Executive Summary

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR § 18964(b)(2) — Executive Summary. The purpose of the Executive Summary is to provide a broad understanding of the mattress recycling organization's program as a whole and to put into context the data and information that will follow. Provide a brief description of the mattress recycling organization's used mattress recovery efforts during the calendar year pursuant to section 18962.

Executive Summary

Overview of the Mattress Recycling Council California, LLC

California's Used Mattress Recovery & Recycling Act, SB 254 (as amended), requires that mattress producers, through a certified "mattress recycling organization," develop, implement and administer a statewide recycling program for mattresses and foundations (collectively mattresses or units) discarded in the state and combat illegal mattress dumping.

The International Sleep Products Association (ISPA) created the Mattress Recycling Council (the Council) as a Section 501(c)(3) nonprofit corporation for this purpose. The California Department of Resources Recycling and Recovery (CalRecycle) certified the Council as the mattress recycling organization and approved its statewide mattress recycling plan. The Council launched the program on December 30, 2015.

In addition to operating in California, the Council also administers similar statewide mattress recycling programs in Connecticut and Rhode Island. In 2017, the Council created separate nonprofit limited liability companies for each of the three state-specific mattress recycling organizations it administers. The California organization is called Mattress Recycling Council California, LLC (MRC), which is now the certified mattress recycling organization. To promote each of these state programs, MRC created a consumer brand known as Bye Bye Mattress.

Year Eight Program Highlights

In 2023, MRC demonstrated consistent and meaningful improvements to achieve plan objectives and goals set by CalRecycle. The program's most notable achievements included:

- MRC increased collection opportunities for residents, retailers and other businesses for the eighth consecutive year, surpassing CalRecycle's 2023 goal.
- MRC's extensive collection network, strategic use of resources and creative use of partnerships provided a highly accessible program for residents in all areas of the state, including rural and environmental justice communities.
- MRC recyclers diverted from disposal 76.9% of materials sent outbound from their facilities by weight (including reuse, recycling and biomass), making more than 60 million pounds of steel, foam, fiber and wood available for use in new products.

- MRC funded one illegally dumped mattress mitigation project.
- MRC's analysis of the Illegally Dumped Mattress Collection Initiative data showed a 14.7% decrease in the total amount of mattresses collected from environmental justice communities compared to 2022.
- MRC spent nearly \$1 million on research projects to make mattress collection, transportation and deconstruction more efficient and to find new and better uses for recycled mattress materials.
- MRC's Industry Workgroup on Circular Design and Industry Workgroup on New Materials met to collaborate and share information across the mattress value chain. These workgroups discuss component materials, design and construction types that may affect mattress recycling.
- MRC's multichannel, multilingual consumer education strategy continues to be effective. MRC's outreach received 424.4 million impressions and increased awareness of mattress recycling, retailers' take back obligation and how to recycle discarded mattresses.

Collection Network

Since the California program's launch, MRC has expanded its collection network each year. In 2023, MRC added more permanent collection sites, curbside bulky item collection programs, collection events and sites that accept commercial volumes of mattresses.

Residential Collection Opportunities

In 2023, residents could access 240 permanent collection sites (including recyclers) and 131 collection events. In addition to these locations, MRC collected units from 87 curbside bulky item collection programs, an increase from 84 in 2022.

TABLE 1: 2023 MRC Residential Collection Network Highlights

Residential Collection Channel	Number
Permanent Collection Sites	240
Curbside Bulky Item Collection Programs	87
Collection Events	131

Retail and Other Commercial Volume Opportunities

MRC's Commercial Volume Program (CVP) serves mattress retailers, lodging establishments, educational facilities, military bases and healthcare facilities. These entities may drop off their mattresses at designated collection sites or a recycler. Entities with at least 100 units may request no-cost transportation to a participating recycling facility.

In 2023, MRC expanded no-cost drop off access for small volume commercial sources through MRC’s existing permanent collection network. During the year, 154 permanent collection sites accepted small volume deliveries of units from commercial sources—an increase from 152 locations in 2022.

MRC also provided on-site trailers and recurring pickups to 60 entities that consistently generate at least 100 discarded units per month, an increase from 55 in 2022.

Eligible entities that reach the 100 unit minimum less frequently than monthly may request live load pickups at their convenience. MRC conducted 257 live load pickups in 2023, an increase from 208 in 2022.

TABLE 2: 2023 Commercial Volume Collection Network Highlights

Commercial Collection Channel	Number
Permanent Collection Sites Accepting Commercial Volume at No Cost	154
On-Site Trailers	60
Live Load Pickups	257

Program Access

MRC annually measures the percentage of residents and retailers who can conveniently access the collection network. MRC evaluates program access for the general population, rural counties and environmental justice communities. We use these results to determine where to focus resources and expansion efforts.

Residential Access

Geographic analysis shows that 98.4% of California’s population lived within 15 miles of MRC’s permanent collection network (an MRC recycler, collection site or curbside bulky item collection program) in 2023.

TABLE 3: Percent of Population Within 15 Miles of MRC’s Collection Network in 2023

Population Category	Permanent Collection Network Only	Permanent Collection Network & Collection Events
All Residents	98.4%	99.3%
Residents in Rural Counties	93.8%	96.0%
Residents in Environmental Justice Communities	98.8%	99.8%

Access in Environmental Justice Communities

MRC worked with the Central California Environmental Justice Network, Local Conservation Corps and other solid waste groups to provide targeted collection events and permanent collection sites in environmental justice communities. In 2023, 99% of California’s residents in environmental justice communities lived within 15 miles of MRC’s permanent collection network, including recyclers, collection sites and curbside bulky item collection programs. Furthermore, by adding collection events to the calculation, the access percentage increased to 99.8%. These residents were also eligible for no-cost take back from mattress retailers, the impact of which is not included in the above access metrics.

Retailer Access

CalRecycle’s goals require that MRC demonstrate by January 1, 2024, that 95% of rural retailers and 80% of urban retailers have convenient access to the collection network. For these purposes, retailer access is measured as the percentage of households within a reasonable driving distance of a commercial volume drop-off location, since the discarded mattress originates at a consumer’s home, not a mattress retailer’s storefront. Based on retailer feedback, CalRecycle set a 20-mile radius for urban areas and 40-mile radius for rural areas. Using this methodology, MRC found that 99.5% of rural households and 99.4% of urban households are within range of a location accepting commercial volume, surpassing the 2024 goals.

Program Collection and Disposition

The number of units collected through the program increased by 3.3% in 2023, from 1,419,814 in 2022 to 1,468,360 in 2023. In 2023, the number of mattresses sold in California decreased by 9.9%, from 3,756,022 in 2022 to 3,383,382 in 2023. MRC attributes the increased units collected to the fact that MRC made the program more accessible to consumers and businesses.

MRC’s recyclers generated 79,139,057 pounds of material, of which they diverted 60,829,045 pounds of material and units from landfill through reuse, recycling and biomass, representing a 76.9% recovery rate.

TABLE 4: 2023 Program Collection and Disposition Highlights

Highlights	Amount
Units Collected	1,468,360
Pounds Recycled, Reused, Biomass	60,749,070
Total Pounds Outbound (Including Disposal)	79,033,703
MRC Recovery Rate	76.9%

Mitigation of Illegal Dumping

The Illegally Dumped Mattress Collection Initiative (Initiative) experienced a slight net decrease in participation in 2023, with 76 entities providing data, compared to 78 in 2022. In 2023, MRC recruited entities from two counties that had not previously participated in the Initiative. Collectively, 76 participants reported removing 55,554 illegally dumped units from public rights-of-way in California, a decrease of 8.1% from the previous year. Using Initiative data, MRC analyzed possible correlations between illegal mattress dumping and various factors, including demographics and opportunities for no-cost mattress recycling. The analysis suggests that zip codes within 15-miles of collection sites report less illegal dumping. In 2023, one collection site reopened and two new collection sites were established in areas with higher reported incidences of illegal dumping. In 2023, MRC provided individualized “heat maps” to each reporting entity, which identified areas where illegal dumping was more prevalent to help guide their local decision making and resource allocation.

MRC also invited Initiative participants and all California municipalities, nonprofits and solid waste facilities that had at least one year of baseline data for illegal mattress dumping from 2021 or later to apply for MRC funding of projects to reduce illegal mattresses dumping in their communities. In 2023, MRC funded one illegally dumped mattress mitigation project. The city of Modesto implemented a multifaceted plan, emphasizing education, surveillance and accessibility. This includes distributing multilingual door hangers, educating students with MRC’s illegal dumping lesson plan, installing illegal dumping signage and deploying mobile cameras at illegal dumping hot spots. The city is also piloting a free mattress collection site for a year.

In conjunction with these efforts, MRC actively participated in relevant working groups, and promoted information on its illegal dumping mitigation best practices. Additionally, MRC hosted targeted mattress collection events, added permanent collection sites and increased education and outreach efforts in areas affected by illegal dumping.

TABLE 5: 2023 Illegally Dumped Mattress
Collection Initiative Highlights

Highlights	Number
Initiative Participants	76
Illegally Dumped Mattresses Reported	55,554

Research

MRC's research program focuses on increasing mattress collection, transportation, deconstruction efficiency and identifying new and better markets for recycled mattress materials. To meet these objectives, MRC:

- Funded operational improvements to mattress collection facilities that increase landfill diversion and reduce mattress unit spoilage. Improvements included paving areas to protect units from wet weather (and thereby improve their recyclability) and decrease mattress loading times and purchasing equipment to increase efficiency and improve worker safety when loading discarded units into trailers.
- Offered lean manufacturing assessments that could help MRC's recyclers improve mattress dismantling and recycling operations.
- Sponsored a study to determine if recovered mattress shoddy and cotton could be used as reinforcing fibers in polyurethane-based composites suitable for a wide range of industrial applications. Using a bio-based polyurethane system, the study concluded that composites containing post-consumer mattress cotton and shoddy had excellent physical properties. MRC will next investigate whether the composite materials community has interest in commercializing this technology.
- Completed a study to estimate the average age of units arriving at mattress recycling facilities. The results will help recyclers anticipate the types and quantities of mattresses (and corresponding materials) to expect in future years. At a 95% confidence level, the study showed the average mattress (all mattress types combined) was 13.9 ± 0.4 years old.
- Completed an independent review of the 2022 life cycle analysis (LCA) that MRC prepared for its California mattress recycling operations, which confirmed the overall environmental benefits that the California program provides in terms of mitigating the use of water, energy and greenhouse gases.
- Completed a multi-year study to characterize post-consumer mattress foam samples to understand and describe a variety of characteristics, including the chemistry and physical property variation, extractable additives, residual compounds and presence of bacteria and mold. The study's objective was to generate information that would help recyclers provide recycled materials to buyers with known composition and consistency for higher value end-uses.
- Continued to foster innovation, cooperation and communication among suppliers, manufacturers, retailers, recyclers and end-market commodity buyers around the world by working with industry experts and sharing information on efforts to develop a circular economy for polyurethane foam.
- Continued to collaborate with mattress associations and stewardship organizations from around the world to share best practices and technological advancements to improve MRC's California recycling program.

Circularity and Sustainability

MRC's program is consistent with California's waste management hierarchy and actively addresses source reduction by focusing on reducing the environmental footprint of the mattress manufacturing process, encouraging the mattress supply chain to consider end-of-life design issues when creating new products and encouraging consumers to maintain their mattresses properly to extend their useful life.

MRC encourages manufacturers to implement internal continuous improvement processes that will help them measure and reduce both the amount of resources consumed in manufacturing new mattresses and the waste generated from those activities. In addition, MRC has created two workgroups that facilitate information sharing across the mattress industry value chain, including mattress manufacturers, component suppliers and recyclers, to improve the circularity of mattress materials.

Industry Workgroup on Circular Design

The objective of MRC's Industry Workgroup on Circular Design is to help members of the value chain take end-of-life recycling challenges into account when they design new components and mattresses. MRC shares lessons learned from mattress deconstruction and recycling to help find strategies to reduce waste generation and enable more and higher value recycling of post-consumer mattress components.

Industry Workgroup on New Materials

The objectives of MRC's Industry Workgroup on New Materials are to identify new materials or technologies recently introduced to the market that may pose end-of-life recycling challenges, advise MRC on anticipated long-term changes in product mix and raise industry awareness about how design and marketing decisions can affect recycling. The workgroup's efforts inform MRC's research team and assist recyclers in preparing for these challenges as well as forecast future types and quantities of mattress materials available for secondary markets.

Sleep Products Sustainability Program

To encourage mattress manufacturers to reduce the environmental impact of their mattress assembly operations (and thereby support California's source reduction goals), MRC's Sleep Products Sustainability Program (SP2) offers a proactive approach that California mattress manufacturers may use to reduce waste and increase operational efficiencies. SP2 helps companies establish an environmental management system that identifies steps for reducing environmental impacts, developing best practices and defining metrics to track progress. SP2 can also serve as a foundation for pursuing an ISO 14001 certification, the international standard for effective environmental management systems. Training, program resources and certification are all offered at no-cost to eligible California mattress manufacturers.

Consumer Education and Outreach

MRC is known to consumers as Bye Bye Mattress. Throughout the life of the program, MRC has built a multichannel, multilingual consumer education and outreach strategy focused on promoting the collection network, raising awareness of the retailer take-back requirement and discouraging illegal dumping.

In 2023, MRC's consumer advertising campaigns, public service announcement, media coverage and social media content generated over 424.4 million impressions, with outreach targeted at areas with high per capita rates of illegal dumping and environmental justice communities. We supplemented these efforts by providing mattress retailers, collection sites, recyclers and public officials with tools they can use to promote retailer take back and mattress recycling in their communities.

Consumers wanting to take action or know more are directed to ByeByeMattress.com. Since launching, more than 3 million visitors nationwide have used the website. In 2023, we introduced a new look featuring a streamlined experience, enhanced locator performance and new mattress care content to help consumers prolong the life of their mattress.

Program Collection, Transportation and Processing

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR § 18962(a)(2)(A) — Identify program objectives consistent with California’s solid waste management hierarchy as required by subdivision (a) of section 42987.1 of the Public Resources Code.

14 CCR § 18964(b)(3) — A description of the methods used to collect, transport, and process used mattresses in California.

14 CCR § 18964(b)(5) — Description of how consumers of mattresses in California had an opportunity to recycle and properly manage their used mattresses, including the number, location, and type of collection points in the program.

14 CCR § 18964(b)(6) — May include a description of activities to ensure proper collection and management of used mattresses.

14 CCR § 18964(b)(7) — A description of methods used by the mattress recycling organization to coordinate with existing used mattress collection and recycling programs with regard to the proper management or recycling of discarded or abandoned mattresses.

14 CCR § 18964(b)(8)(A) — Quantitative information on subdivisions (b), (c), (d), (e), (f), (g), and (j) of section 42990.1 of the Public Resources Code, including conversion factor(s), if used. When describing the uses for the recycled materials, the annual report shall identify the secondary markets to which those materials are sold, and potential end uses of those materials.

Cal. Pub. Res. Code § 42987.1(i) — A description of methods used to coordinate activities with existing used mattress collecting and recycling programs, including existing nonprofit mattress recyclers, and with other relevant parties as appropriate, with regard to the proper management or recycling of discarded or abandoned mattresses, for purposes of providing the efficient delivery of services and avoiding unnecessary duplication of effort and expense.

Cal. Pub. Res. Code § 42990.1(f) — The uses for the recycled materials.

Cal. Pub. Res. Code § 42990.1(m) — For reports submitted on and after July 1, 2021, all of the following:

- (2) A report on activities, which the mattress recycling organization shall undertake, to prioritize, to the extent economically practical, the use of in-state processing facilities over out-of- state processing facilities. If the mattress recycling organization decides to use out-of-state processing facilities, the organization shall provide an explanation of that decision.

Program Collection, Transportation and Processing

Mattress Collection

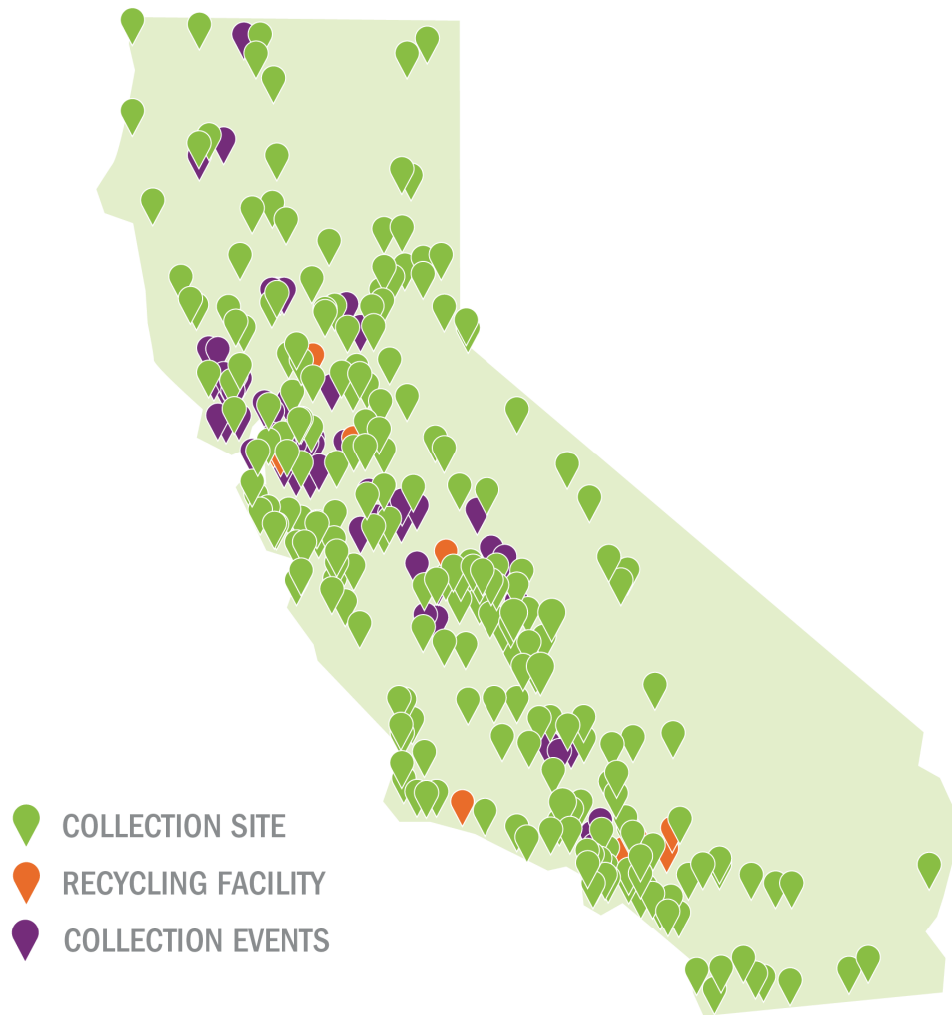

In 2023, MRC continued to recruit mattress collection sites, making it more convenient for California consumers and businesses to have their mattresses recycled at no charge by MRC, either by dropping their units off at a collection site or by otherwise accessing the network. Table 6 summarizes MRC's collection network in 2023 and [Figure 1](#) geographically illustrates the network. See [Appendix B](#) for a list of all the locations.

TABLE 6: MRC Mattress Collection Network

Collection Channel	Site Type	Source of Units	Transportation and Disposition of Units	Number of Sites/ Entities
Retailer Take Back	Mattress Retailers	Retailer's Customer	Retailer delivers units to recycler, permanent collection site, or consolidation location	N/A
			Units picked up from retailer through CVP (below) for dismantling by recycler	N/A (included with CVP below)
Permanent Collection Sites	Solid Waste Facilities (SWFs)	Residents, Commercial Entities	Transported to recycler for dismantling	170
	Mattress Recyclers	Residents (CIP), Commercial Entities	Dismantled by recycler	10
	Nonprofits	Residents, Commercial Entities	Transported to recycler for dismantling	14
	CRV Recycling Locations	Residents, Commercial Entities	Transported to recycler for dismantling	3
	Mattress Retailers	Residents, Commercial Entities	Transported to recycler for dismantling	7

Collection Channel	Site Type	Source of Units	Transportation and Disposition of Units	Number of Sites/ Entities
Permanent Collection Sites (continued)	Mattress Renovators	Residents, Commercial Entities	Unrenovated units transported to recycler for dismantling	7
	Other	Residents, Commercial Entities	Transported to recycler for dismantling	29
Curbside Bulky Item Collection Programs	Franchise Haulers and Municipalities	Residential and Commercial Customers of Franchise Haulers and Municipalities	Entity picks up units at curbside, consolidates them at entity's facility and MRC transports them to recycler for dismantling	29
	Solid Waste Facilities (SWFs)	Residential and Commercial Customers of Franchise Haulers and Municipalities	Entity picks up units at curbside, consolidates them at entity's facility and MRC transports them to recycler for dismantling	58

FIGURE 1: MRC Mattress Collection Network

Collection Channels

MRC collects used mattresses through the following channels in California:

1. Retailer take back
2. Permanent collection sites
3. Curbside bulky item collection
4. Mattress collection events
5. Commercial Volume Program (CVP)

In 2023, MRC:

- Contracted with 240 permanent collection sites that collected units from consumers, a net increase of 12 from 2022.
- Contracted with 87 entities that received curbside bulky item collected units, an increase of seven from 2022. Of these, 58 were operated by franchise haulers and municipalities at SWFs that also serve as permanent collection sites, with the remaining 29 being operated by franchise haulers and municipalities at a private yard, and therefore not at SWFs.
- Participated in 131 collection events in 2023.
- Contracted with 60 CVP sites with permanent on-site trailers an increase of five from 2022.

In 2023, MRC will continue to expand the permanent collection network to increase access for California consumers and commercial entities, who can learn more about the drop-off and recycling options available to them at ByeByeMattress.com. See [Appendix B](#) for a list of all locations by type.

Collection Site Types

Retailer Take Back

A retailer that delivers a new mattress to a California consumer must offer to take back a mattress that the consumer has discarded upon request at no cost. Consumers can use this collection channel when purchasing a new mattress. Retailers then may recycle the used mattresses at no cost through the program (MRC bears the cost of recycling).

In 2021, the retailer take-back requirement expanded to include mattresses delivered to a consumer by a common carrier. These retailers may drop off mattresses at an MRC recycler or use MRC's CVP services.

Permanent Collection Sites

Since the inception of the program, MRC has created a robust, permanent collection network throughout California where residents may discard used mattresses for recycling. MRC initially targeted SWFs, and later focused its site recruitment efforts on underserved areas by adding alternative collection locations, such as nonprofits, public agencies, Native Nations and California Redemption Value (CRV) recycling centers. As of December 31, 2023, the California program had 240 permanent collection sites. These sites are listed in [Appendix B](#).

Except for mattress recyclers, MRC pays contracted collection sites a handling fee if they accept mattresses from the public at no cost (MRC compensates recyclers for serving as collection sites as part of the general recycling services they provide). MRC bears the cost of transporting the units to a recycler and recycling them.

The specific types of permanent mattress collection sites that the program offers California residents and commercial entities are as follows:

Solid Waste Facilities

SWFs comprise the majority of MRC's permanent collection network. In 2023, MRC contracted with 170 SWFs (a net increase of nine since 2022), 55 of which operate in rural counties of the state. All of these sites accept mattresses dropped off by residents at no cost, and 100 accept drop off from commercial entities no cost, an increase of two SWFs from 2022. In 2022, one collection site sold its operation and reopened under a new name in 2023.

In 2023, one SWF that had previously suspended operations as a collection site resumed operations.

MRC uses annual mattress disposal data that SWFs report to CalRecycle to identify which SWFs to recruit as potential new collection sites. This resulted in MRC adding a net increase of nine SWFs to the collection network in 2023. MRC is continuing this recruitment effort in 2024.

Mattress Recyclers

In most cases, MRC recyclers accept mattresses directly from residents and commercial entities at no cost. In 2023, MRC's recycling network consisted of 9 locations throughout California and one location in Oregon. In 2023, one recycler in California moved its location. Recyclers in California track the number of units they receive from each of the following sources (see Program Collection and Disposition Data section for number of units collected from each source):

Recyclers in California track the number of units they receive from each of the following sources (see [Program Collection and Disposition Data](#) section for number of units collected from each source):

- **Retailer Drop-off:** This includes units that mattress retailers drop off at recyclers using their own transportation or use MRC's CVP services, but excludes units that retailers drop off to SWFs.
- **Institutional Drop-off:** Institutional Drop-off: This includes units from hotels, educational facilities and other large-volume mattress purchasers that deliver units to recyclers using their own transportation or use MRC's CVP services.
- **Consumer Incentive Payment (CIP):** Consumer Incentive Payment (CIP): Units collected through MRC's CIP program, which allows California residents to drop off discarded mattresses at specified recyclers and receive an incentive payment of \$3 per unit for as many as five units per vehicle per day.

The Oregon recycling facility only receives dedicated loads from three permanent collection sites in northern California.

Nonprofits

MRC contracts with nonprofit organizations such as Goodwill, Habitat for Humanity ReStore and Local Conservation Corps to serve as permanent collection sites. Depending on the site, residents and/or commercial entities may drop off units at these nonprofit sites at no cost. In 2023, 14 nonprofits accepted mattresses from the public through MRC's program, a decrease of one from 2022. Additionally, 13 of the 14 nonprofits accept commercial drop-off at no cost.

CRV Recycling Locations

MRC contracts with collection centers that participate in the CRV Beverage Container Recycling Program. In 2023, California residents and commercial entities could drop off mattresses at three CRV recycling centers throughout the state, two of which are located in a rural county.

Mattress Retailers

To increase mattress retailer and residential access to the program, MRC contracts directly with some mattress retailers to become permanent collection sites. In 2023, MRC had seven permanent collection sites at retailers. Both California residents and commercial entities may drop off mattresses at all retailer drop-off locations. Additionally, three of the seven retailers are located in rural counties.

Mattress Renovators

Residents and businesses may drop off discarded units at mattress renovators at no cost. In 2023, seven mattress renovators collected mattresses through MRC's program. Mattresses they did not renovate were sent to MRC recyclers for dismantling. In 2023, MRC continued to recruit renovators identified through annual data reported to CalRecycle to become permanent collection sites.

In 2023, one renovator location that had previously suspended operations remained suspended.

Other

In 2023, MRC contracted with seven local businesses, 21 public agencies and one Native Nation to be mattress collectors. Of these, one local business, and one Native Nation are located in rural counties.

Curbside Bulky Item Collection

Some franchise haulers and municipalities provide curbside bulky item collection of mattresses at no additional charge to residents. Residents schedule a pickup for their discarded mattress. Participating haulers and municipalities collect the mattress and load it into an MRC-provided trailer positioned at their yard or SWF. MRC transports full trailers to recyclers for dismantling.

Units may be collected through bulky item pickups through either of two processes:

1. MRC contracts with a municipality or franchise hauler to recycle units collected through its existing bulky item program. The MRC-provided trailers in which these units are consolidated are located at private yards and are not publicly accessible. In 2023, MRC collected mattresses from 29 municipalities or franchise haulers in this way.
2. Some SWF operators that have contracted with MRC to serve as a permanent collection site that is accessible to the public also collect mattresses from bulky item pickup services. These SWFs consolidate mattresses collected curbside in an MRC provided trailer with other units dropped off at the permanent collection site. In 2023, MRC collected mattresses from 58 collection sites that accept mattresses from bulky item programs, an increase of two sites from 2022. To avoid double counting, these locations are counted under the SWF category, and not counted again under the curbside collection category in [Table 6](#).

Mattress Collection Events

To supplement the permanent no-cost collection network, MRC hosts mattress collection events where California residents may drop off mattresses at no cost. MRC partners with municipalities, waste services providers, Local Conservation Corps, Native Nations, retailers and other interested parties to hold collection events. When hosting events, MRC provides the necessary labor, transportation, recycling and publicity.

MRC often combines mattress collection events with events accepting other products to increase convenience for residents, target underserved areas or mitigate illegal dumping.

In 2023, MRC participated in 131 collection events. Notably, these events provided access in 16 rural counties (Amador, Calaveras, Colusa, Del Norte, El Dorado, Glenn, Humboldt, Kings, Lake, Madera, Mendocino, San Benito, Siskiyou, Sutter, Tuolumne and Yuba).

Each year, MRC collects less than 2% of mattresses in California through events. In areas with accessible collection sites and minimal illegal dumping, we collaborate with organizations to promote existing permanent sites instead of hosting events. MRC actively evaluate requests, prioritizing events in areas lacking access, areas with high illegal dumping rates or environmental justice areas.

Commercial Volume Program (CVP) Services

MRC provides no-cost transportation and recycling of discarded mattresses from retailers, lodging establishments, educational institutions, healthcare facilities and military bases if they have at least 100 discarded units to be picked up at a single site. MRC provides transportation in three ways:

1. **Permanent On-Site Trailers:** If a business generates at least 100 mattresses per month at a particular location, MRC provides a permanent on-site trailer at a specific location. This arrangement works well when a retail chain uses a central distribution center from which it delivers mattresses that consumers purchased in the chain's multiple retail storefronts and then consolidates the discarded mattresses that its delivery teams take back from consumers when the delivery trucks return to the distribution center at the end of their delivery run. In this manner, MRC can provide efficient collection service for all of a retailer's storefronts within its local distribution network. In 2023, the number of on-site trailers increased from 55 to 60.
2. **Temporary CVP Site (Live Loads):** For businesses that generate at least 100 units at a time at a particular location, but not on a monthly basis, MRC does not provide a permanent on-site trailer. Instead, MRC dispatches a truck and trailer to the collector when requested and the units are loaded into the trailer while the driver waits. This is referred to as a "live load" pickup. In 2023, MRC provided 257 live load pickups for 78 CVP entities resulting in an 23.5% increase in live load pickups from the previous year.
3. **Consolidation Locations:** To provide no-cost drop-off for smaller retailers and businesses, MRC positions centrally located trailers where these entities can consolidate the mattresses that they collect. By the end of 2023, MRC had a total of seven strategically placed commercial consolidation locations.

Small Volume Commercial Loads

To provide no-cost drop-off for commercial sources generating smaller volumes (that is, fewer than 100 units at a time), some permanent collection sites will accept small commercial loads. By the end of 2023, 154 permanent collection sites accepted no-cost drop-off for small commercial loads, an increase of two from 2022. To avoid double counting, these locations are counted under the Permanent Collection Site category, and not counted again under the CVP category in [Table 7](#).

In order not to undermine mattress renovation, as intended by the Legislature, MRC is communicating with renovators regarding the CVP program. MRC also provides a list of compliant renovators to businesses that are not eligible for CVP transportation services. See the [Reuse](#) section for more detail.

[Table 7](#) shows the total number of collection sites by type from 2019 through 2023. For a complete list of all collection sites and events, see [Appendix B](#).

TABLE 7: Collection Network by Site Type, 2016 Through 2023

Site Type		2016	2017	2018	2019	2020	2021	2022	2023
Permanent Collection Sites	Solid Waste Facilities	109	133	145	162	172	153	166	170
	Mattress Recyclers	11	12	15	11	14	9	10	10
	Nonprofits	2	6	12	14	17	16	15	14
	CRV Recycling Locations	2	3	7	6	5	3	2	3
	Mattress Retailers	6	5	6	7	7	8	8	7
	Mattress Renovators	1	2	2	7	7	7	8	7
	Others	0	2	3	4	5	27	25	29
	Total Permanent Collection Sites	131	163	190	211	227	223	234	240
Curbside Bulky Item Collection Programs		3	9	19	20	21	21	24	29
Mattress Collection Events		50	74	97	152	61	161	162	131

	Consolidation Locations	4	5	6	4	3	8	7	7
	Live Loads	N/A	N/A	0	127	94	170	208	257

Collection Site Mattress Management

When adding new collection sites, MRC provides on-site training and guidelines to educate site staff regarding proper handling, efficient stacking techniques and best practices to increase the recyclability of mattresses received. MRC's Mattress Recycling Program Guidelines (see [Appendix C](#)) are included in all collection site and event contracts.

The guidelines define products eligible and ineligible for recycling and explain how collectors can efficiently load mattresses into trailers. They also describe non-recyclable mattresses (e.g., those that are wet, insect-infested, excessively soiled, etc.) and how to identify bedbug-infested units.

To further assist collection sites in identifying and managing instances of bedbug contamination, MRC offers an online training video about bedbugs that collection site staff can access on demand. See MRC's [Resources Library](#) for a link to the video.

To assist in onboarding new collection sites, MRC developed a video series (available on MRC's [Resources Library](#)) that addresses efficient mattress stacking and loading,

effective collection site operations, program and non-program products identification and collection event promotion. The series is available in English and Spanish with accompanying one-page reference documents. MRC visits new collection sites as they are being established, and on average visits existing locations annually.

In 2023, MRC staff conducted routine site visits providing collection sites supplemental training and resources. During site visits, staff answer questions, confirm whether the site is following the guidelines, provide updates on how a site may apply to MRC for improvement funds, provide resources on stacking and loading of mattresses to improve efficiency, offer suggestions to maintain the quality of collected mattresses and provide necessary signage, invoicing support, etc. In 2023, MRC funded, completed and reimbursed six collection site projects. MRC awards funds for projects intended to increase the recyclability of mattresses or improve efficiency (such as a covered/paved mattress storage area to keep the units dry and clean, forklift equipment, etc.). See the [Research](#) section for more information.

Coordination with Existing Infrastructure

MRC must coordinate with existing used mattress collection programs and recycling programs, including nonprofits, and meet the requirement of Cal. Pub. Res. Code § 42987.1. Since 2016, MRC has demonstrated year-over-year growth in the collection network, increasing the number of collection sites, bulky item collection programs, events and CVP activity.

Existing Used Mattress Collection Programs

Solid Waste Facilities

In 2023, one SWF that previously suspended resumed operations and MRC signed contracts with eight additional permitted SWFs, bringing the collection network's cumulative total of participating SWFs to 170. To expand participation from this segment of the waste industry, MRC identified potential new locations from the list of SWFs that report landfilled mattresses to CalRecycle. MRC contacted viable SWFs on the list that were not already part of our collection network to explain the benefits of working with MRC.

Bulky Item Collection Programs

In 2023, MRC used data from a variety of sources to target additional curbside bulky item collection programs that could participate in the program. To further coordinate with existing used mattress collection programs and increase consumer access to no-cost recycling in California, MRC contracts with municipalities and franchise haulers that provide curbside bulky item pickup at no additional cost. By the end of 2023, 29 bulky item programs and 58 SWFs that consolidate mattresses collected at curbside in an MRC provided container have joined the collection network, an increase of seven from 2022.

In 2024, MRC will continue efforts to target additional bulky item collection programs that could participate with MRC.

Retailer Take Back

Many mattress retailers collected units from their customers before the program launched. MRC leverages this pre-existing practice by working with retailers to bring these mattresses to MRC's recyclers, either by direct drop-off or through the CVP. This practice benefits both the mattress consumer and retailer and increases the volume of mattresses diverted from landfills.

Collecting mattresses directly from retailers also increases the likelihood that the collected mattress will be recyclable, as compared to units obtained from SWFs and bulky item collection programs. When mattresses are mixed with regular trash and other municipal solid waste, they can be crushed and contaminated to the point that few or no parts of the units can be recycled. Discarded units obtained directly from retailers tend to be dry and cleaner, allowing the recycler to reclaim more and better-quality materials that can command higher prices.

Other Relevant Parties

MRC further uses the existing solid waste infrastructure to expand its collection network by:

- Coordinating with municipalities and franchise haulers to hold mattress collection events
- Contracting with CRV recycling centers, Local Conservation Corps, Native Nations, nonprofits, retailers and mattress renovators to act as collection locations

Existing Recycling Programs, Including Nonprofit Mattress Recyclers

In April 2015, MRC requested proposals to provide transportation and recycling services at locations throughout the state. As part of this process, MRC contacted all known mattress recyclers in California (including nonprofit recyclers) and publicized the request by posting it on MRC's website. MRC also visited all active for-profit and nonprofit mattress recyclers in California to assess their capabilities, interest in participating in the program and future plans. Among the companies that responded to our request were three existing nonprofit and 11 for-profit recyclers. After evaluating the proposals based on the price offered to provide the requested recycling services, recycling experience, quality of proposal and facility capabilities, MRC awarded contracts to six recyclers (including four for-profits and two nonprofits). Five were existing mattress recyclers and one was an existing recycler of other products.

Since the program launched in 2015, MRC's recycler network has evolved. Several of the initial recyclers changed or added facility locations, others are no longer under contract with MRC and MRC has added several new recyclers as the program has grown.

In December 2017, MRC requested proposals to better serve the San Francisco Bay Area, Fresno, the city of Los Angeles, Los Angeles County and Orange County. Likewise, in October 2018, MRC requested proposals to serve the city of Fresno or Fresno County, Tulare County, Kings County or Madera County. Each of the recyclers that MRC added in 2017 and 2018 had experience recycling other products, both in California and elsewhere.

In deciding whether to award recycling contracts, MRC has consistently considered the same factors: price, recycling experience, quality of proposal and facility capabilities.

As of December 31, 2023, eight MRC recyclers operated 10 facilities (including four operated by a nonprofit). See [Appendix B](#) for a list of MRC's existing recyclers (and their locations).

In 2024, MRC requested proposals to provide mattress recycling services at locations throughout the state of California. MRC will discuss the contract awards resulting from this process in the 2024 annual report.

MRC's Coordination with Existing Mattress Collectors and Recyclers to Efficiently Deliver Services

As MRC established and expanded its collection and recycling network, it sought to deliver services efficiently and minimize duplication of effort by applying the following principles:

- To bring large quantities of discarded units into the program efficiently, MRC leverages existing retailer take-back practices and contracts with California's existing solid waste collection infrastructure to become convenient no-cost mattress collection sites.
- MRC strategically selects collectors and recyclers to build a network that both provides California residents with statewide access to recycling services and minimizes transportation costs.

Therefore, in building its mattress collection and recycling network, MRC has succeeded in coordinating with existing used mattress collection and recycling entities, including nonprofits, and has supported the broader California recycling community by contracting with existing facilities that collect and recycle mattresses and other products.

Prioritization of In-State Processing Facilities

In 2023, MRC used both in-state and out-of-state processing facilities to recycle program mattresses. MRC contracted with one non-profit recycler in Oregon to process a limited number of California mattresses. By using this facility, MRC maximized its transportation efficiencies and controlled costs. See [Appendix B](#) for the list of MRC recyclers.

Mattress Transportation

For each MRC collection site in California, MRC pays for or provides storage containers that are appropriate for the size and location of each facility. MRC uses 53-, 48- and 28-foot trailers, as well as sea containers and roll-off bins for sites with limited space or other logistical constraints. The 53-foot trailer is preferred because it can hold the most mattress units, resulting in a lower per unit transport cost. Roll-off containers, which are the smallest storage option, are the least efficient alternative, but may be the only option for collection sites with small or restricted loading areas. All containers that MRC provides are covered to reduce contamination of the mattresses and eliminate damage from weather.

To provide mattress transportation throughout the state, MRC contracts with mattress recyclers, third-party logistics companies, transportation companies and SWFs to pick up and transport mattresses from specific facilities.

Collection sites that do not transport units using their own equipment will contact a transporter provided by MRC when a full container is ready to be picked up and swapped for an empty one. For sites located in urban areas, MRC transporters have 48 hours to swap a trailer after receiving a request, and up to five days for sites in rural areas. High-volume locations may be assigned a regular pickup schedule to make sure transporters can keep up with the volume. MRC is available to assist with any issues that may arise regarding transportation. Mattresses are bulky and light cargo, and as a result, efficient transportation helps control costs. MRC assigns mattress loads to individual recyclers to achieve efficiency throughout the collection network.

Mattress Processing and Recycling

Recycler Procedures

After discarded mattresses arrive at a recycling facility, the recycler unloads the container. Mattresses contaminated with bedbugs or putrescible solid waste are typically not recycled and are separated to minimize facility contamination and worker exposure, and then landfilled.

Non-contaminated mattresses then are dismantled. The outer ticking layer is removed so each internal component material can be separated. The dismantling process varies from one recycler to the next, but most use a combination of manual and mechanical processes. Each recyclable material type is separated and sometimes compressed into bales for shipment to buyers. See the [Uses for Recycled Materials](#) section for details regarding what happens to each material type after consolidation at recyclers.

Some recyclers separate and sell high-quality used mattresses or their component materials to renovators, who use them to renovate mattresses for sale in secondary markets.

Uses for Recycled Materials

Recyclers sell or pay to have materials reclaimed from used mattresses and foundations manufactured into new products or used for alternative purposes. See the [Program Disposition Data](#) section for quantitative information. Although there were no significant changes in these uses in 2023, MRC continues to invest in research to identify new end markets to increase the program's recycling rate and to help MRC's recyclers become more financially sustainable.

MRC's research efforts target many of the product categories discussed below. See the [Research](#) section for more detail.

Steel Wire: Most used mattresses contain steel springs, either in the form of innersprings or pocketed (fabric-encased) coils. Likewise, most used foundations contain a steel wire interior structure. The steel from both mattresses and foundations can be shredded or baled for sale in steel scrap markets. Steel mills then purchase the scrap steel and re-melt it for use in manufacturing new steel products, such as appliances, automobiles and building products.

In 2023, California scrap metal recyclers continued to reject unprocessed pocketed coils for recycling because they considered the polypropylene fabric encasing the coils, which amounts to 8% to 10% of the pocketed coil's weight, to be a contaminant. Rather than landfill thousands of tons of pocketed coils, MRC transported this material from seven California recycling facilities to companies in Los Angeles and Fresno that removed the fabric and sold the steel to scrap markets. Three California recyclers processed their own pocketed coils for the greater part of 2023. MRC transported a limited amount of mattresses to an Oregon recycler who can sell unprocessed pocketed coils to an Oregon scrap metal recycler.

Foam: The interiors of most mattresses contain one or more layers of polyurethane and/or latex foam. After the outer quilt panel is removed, the recycler separates the inner foam layers for baling and sale to scrap purchasers. Most post-consumer foam is sold to carpet underlayment manufacturers to make carpet padding. The scrap foam is chopped into small pieces, mixed with rebonding adhesive and exposed to steam to cure the mixture. The result is rebond foam that then is cut into thin sheets to make carpet pad. Carpet pad is constructed primarily of post-industrial polyurethane foam, but also may contain a small percentage of used carpet pad, as well as post-consumer mattress foam and quilt panels. In 2023, the amount of recycled foam decreased due to a decline in demand from manufacturers for the material. As consumer preferences continue to shift from carpet to hard surface flooring alternatives, we expect that the value and demand for post-consumer foam and quilt will continue to decline. See the [Research](#) section for additional discussion on this topic.

Quilt Panel: The mattress sleep surface (that is, the top layer of a one-sided (“no-flip”) mattress and the top and bottom layers of a two-sided mattress) typically is a composite material that includes a decorative outer fabric (also called ticking), one or more layers of fiber batting, non-woven fabric or foam (polyurethane and/or latex) and a thin backing fabric (usually a non-woven fabric). These layers usually are quilted together. Once the quilt panel has been removed from the mattress, recyclers typically bale it for sale separately from other reclaimed commodities.

Demand for recycled quilt panel is limited for several reasons. First, quilt panels lack consistent construction and input materials. Second, quilt panels are more likely to become contaminated with dirt, water, bodily fluids or other environmental impurities because they are the outermost layer of a mattress. As a result, quilt panel is typically sold to carpet underlayment manufacturers, which chop the quilt into small pieces to make carpet pad. In this application, post-consumer quilt panel represents a small percentage of the finished carpet pad. In 2023, the amount of recycled quilt panels decreased due to a decline in demand from manufacturers for the material.

Foundation Wood: Most consumers use a foundation or box spring underneath their mattress. The foundation raises the sleep surface of the mattress to a comfortable height and helps prolong the life of the mattress by acting as a shock absorber. A typical foundation is composed of a wood frame assembled using nails or staples. A steel wire structure attached to the wood frame by staples or nails provides the spring support for the foundation. Some foundations contain an all-wood interior structure instead of a steel wire structure. The sides of the foundation typically are covered by a decorative ticking while the top and bottom typically are covered by a non-woven fabric.

To dismantle a foundation, recyclers remove the ticking and non-woven fabric, then shear or shred the unit to separate the metal from the wood. If the wood is free of significant metal or fabric contamination, it can be finely shredded for use as mulch, or burned for energy value in a biomass facility. Wood is either sold or given away, or recyclers pay a tipping fee for the wood to be made into mulch or alternative daily cover (ADC), or to be burned as biomass fuel.

In 2023, one recycler sold post-consumer foundation wood to a facility that makes wood pallets.

Cotton: Depending on product construction, a mattress may contain other non-woven fiber layers such as mote cotton which is a by-product of the fabric industry. Recyclers separate and bale the reclaimed cotton. Fiber markets for used cotton are limited and depend on whether the reclaimed material is co-mingled with other fibers and prevailing market conditions. End uses for this material include insulation for the construction and building industry or it may be composted at commercial composting facilities.

Other Fiber: Many mattresses also contain layers made from one or more other types of fiber. Depending on the construction of the mattress, these fibers may include polyester, rayon and other synthetic fibers, wool, horse and other animal hair and coconut fiber. MRC determined that coconut and cotton fibers can be composted at commercial composting facilities. Nevertheless, recycling options for these other fibers are limited. As a result, most typically are landfilled.

Shoddy Felt: Another common layer in mattresses is shoddy felt (also called shoddy pad or just shoddy). This material usually is placed between the metal springs and foam layers to insulate the foam from sharp points on the springs and to keep the foam from working its way into the springs during the life of the mattress. Shoddy is a non-woven material comprised of mixed shredded recycled post-industrial fabric and apparel. Given the mixed nature of fiber types used to make shoddy, it is currently cost prohibitive to separate into different fiber categories, so the material is usually landfilled.

Plastics: Retailers often place the discarded mattresses they collect from consumers in plastic bags (usually polyethylene) so that dirt, bedbugs or other biological materials on the discarded units do not contaminate new units being delivered on the same truck. These bags are frequently on the discarded mattress when it arrives at the recycler. Most recyclers bale and sell this material to plastic recycling companies where the bags are converted into plastic pellets. Manufacturers of new plastic products melt and use this recycled plastic as a feedstock in their manufacturing processes. Potential end uses for these pellets include composite plastic lumber and plastic film products.

Cardboard: Mattress foundations may contain a layer of cardboard that separates the wood base structure from the bottom non-woven fabric. Recyclers bale the cardboard and sell the bales to companies that make chipboard for cereal boxes, corrugated cardboard and other packaging materials.

Materials Management/Waste Hierarchy

MRC and its recyclers implement the program consistently with California's solid waste management hierarchy: source reduction, reuse (including renovation), recycling, composting, biomass, transformation/waste to energy (WTE) and landfill. The following describes activities MRC undertakes that are consistent with each waste management tier in the hierarchy. Associated data is provided under the [Program Disposition Data](#) section.

Source Reduction

Healthy, restorative sleep is essential to physical and psychological well-being. The mattress industry manufactures durable, comfortable and affordable products to meet those needs. Almost every American consumer will sleep on a mattress for all their life. These are long-term durable goods that consumers use over a multi-year period. MRC's source reduction efforts focus on reducing the environmental footprint of the mattress manufacturing process, encouraging the mattress supply chain to consider end-of-life design issues when designing new products and encouraging consumers to maintain their mattresses properly to extend their useful life. MRC encourages manufacturers to implement internal continuous improvement processes that will help them measure and reduce both the amount of resources consumed in manufacturing new mattresses and the amount of waste generated from those activities. In addition, MRC has formed workgroups that facilitate information sharing across the mattress industry value chain, including mattress manufacturers, component suppliers and recyclers, to improve the recyclability of mattress materials. In 2023, MRC continued to build consumer awareness of mattress care best practices.

Additional information about each of these sustainability initiatives is found in the [Research](#) and [Education and Outreach](#) chapters of this report.

Reuse (including Renovation)

Reuse follows source reduction in California's waste management hierarchy. In mattress waste management, reuse includes mattresses handed down to friends or family, mattresses sold in used furniture stores and mattress renovation. Used mattress retailers and mattress renovators were active in California before MRC launched the program and remain active today.

Statewide Renovation Trends

When California enacted SB 254, the Legislature stated its intent that the new law "not undermine existing used mattress recycling, resale, refurbishing, and reuse operations that are in compliance with state and federal law." According to CalRecycle data, renovators reported 189,558 units renovated in 2023 (since 2017, renovators reported that they renovated 263,646 units in 2017; 226,068 in 2018; 214,896 in 2019; 210,355 in 2020; 201,542 in 2021; and 283,569 in 2022).

Overall demand for renovated units, which tend to be sold primarily at lower price points, are constrained by low-priced imports of new mattresses. Official U.S. import and industry statistics show that imported mattresses accounted for 27.1% of total mattress units shipped into the United States in 2023, placing competitive pressure on both renovators and manufacturers that sell units at the lower end of the mattress market.

MRC has taken a number of actions consistent with the legislative intent. For example, seven renovators contracted with MRC in 2023 to serve as permanent collection sites

that receive mattresses directly from the public and commercial entities. Under this arrangement, the renovator may select discarded units it wants to renovate and place the remainder in MRC-provided trailers for transport at MRC's expense to recyclers for processing. MRC pays a handling fee for the discarded units sent to recyclers.

In 2023, MRC also provided recyclers a list of renovators that comply with applicable California and federal bedding requirements (as required by SB 254) and may purchase whole units and materials from recyclers.

In addition to the discarded units that renovators may cull from the units they collect, renovators in 2023 also purchased 13,165 units and an estimated 4,435,087 pounds of whole units plus deconstructed materials from MRC recyclers for reuse and renovation, a 26% increase from their 2022 purchases. MRC will update the list of compliant renovators in 2024 and will continue to monitor the relationships between recyclers and renovators for future annual reports.

CalRecycle established that a baseline of 225,000 units were renovated in 2018 and monitors this number annually. According to CalRecycle data, renovators reported that they renovated 189,558 units in 2023. This is a 33% decrease from the 283,569 units reported as renovated in 2022. The CalRecycle data provided to MRC is incomplete, with only 39 out of 44 known renovators reporting in 2023. Additionally, the reported data may not be precise, as 12.8% of registered renovators based the number of units that they reported in 2023 on conversion factors and estimates rather than actual counts and company records. Economic factors, such as low housing sales and high inflation, further contribute to the decrease in demand for renovated mattresses. Similarly, the economic conditions in 2023 caused total mattress units sold in California and reported to MRC to decrease 9.9% below 2022 levels. See [Good Faith Effort](#) for additional information.

Therefore, far from undermining renovators, the statewide program benefits them. Renovators may both cull units from the discards that they collect and purchase whole units and materials from recyclers for renovation. MRC is informing recyclers about renovators that have complied with California law and are thereby eligible to purchase units and materials from recyclers. Renovators that serve as collection sites pay nothing to have residents drop off units at their facilities and then select which of those units to renovate. Those collectors incur no-cost to transport the rejected units to a recycler or landfill. They simply place the rejects in an MRC-provided trailer and MRC pays to have them taken to a recycler. MRC compensates these collectors for the discarded units transported to a recycler for processing.

MRC Recyclers and Renovation

As discussed in the [Recycler Procedures](#), some recyclers sell whole mattresses and component materials to renovators. MRC pays recyclers the same to dismantle units, regardless of whether the materials reclaimed from this process are sold to renovators

or others in the secondary markets. MRC does not compensate recyclers when they sell whole mattresses directly to renovators. The recycler instead is paid for the unit by the renovator. This financial arrangement benefits both the recycler and renovator, allowing the renovator to buy whole mattresses and components.

Renovators as MRC Permanent Collection Sites

MRC lists California-based renovators that contract to serve as used mattress collection locations on its [Bye Bye Mattress Recycling Locator](#). In 2023, seven renovators served as permanent collection sites for residents, retailers and commercial entities. MRC transports unrenovated units collected at these sites to recyclers for dismantling. In 2023, MRC transported 45,404 units (equivalent to a weight of 2.50 million pounds of material) from these renovators to MRC recyclers. In 2023, MRC also reached out to renovators about becoming new permanent collection sites. MRC will continue efforts to identify renovators that could serve as drop-off points.

Renovators on ByeByeMattress.com

Consistent with California's solid waste management hierarchy and to increase California consumers' access to MRC's collection network, MRC contracts with renovators that comply with applicable California and federal bedding requirements (as required by SB 254) to serve as permanent collection sites. MRC includes these locations on its [Bye Bye Mattress Recycling Locator](#).

Renovators and Program Development

MRC considers the views of renovators and other interested stakeholders when setting program policies. For example, when MRC developed the CIP program, it sought input from the Mattress Advisory Committee (on which the renovator segment is represented) regarding the level of incentive that consumers should receive when dropping off discarded mattresses and foundations at an MRC recycler. After considering different incentive levels, the committee advised MRC that setting the incentive above \$3 per unit could harm renovation. MRC accepted the committee's advice and capped the incentive at \$3 per unit, up to five units per vehicle per day. In 2023, MRC communicated with contracted renovator collectors to minimize the impact of CVP on their supply chain. MRC avoids recruiting CVP participants already serviced by renovators. MRC also provides to CVP entities not eligible for transportation the list of recyclers, collection sites accepting commercial drop-off and renovators that comply with applicable California and federal bedding requirements (as required by SB 254).

Education and Outreach to Renovator

During program development and in subsequent years, MRC has informed all known renovators about their obligations and opportunities under SB 254. Renovators receive the same program updates that MRC sends to retailers and other program participants. Therefore, MRC has implemented the program consistent with both this tier of the waste management hierarchy and the Legislature's intent that the program not undermine the resale, refurbishment and reuse of discarded mattresses.

Recycling

Recycling is the third priority in California's waste management hierarchy. The program is designed to increase both the number of discarded mattresses diverted from California's landfills and the recycling of post-consumer mattress materials. To achieve this result, MRC has established a robust, diverse and geographically accessible mattress collection network that is expanding and continually improving. Among other things, MRC provides enclosed containers to protect discarded mattresses from weather damage during storage and transport and funds research and activities to improve the recyclability of mattresses. Once a recycler receives a discarded mattress, it dismantles the unit and separates the component materials for sale or use in secondary markets. Materials for which no market exists or that cannot be recycled (because they are contaminated or mixed with other materials) are usually landfilled.

MRC follows ten strategies to promote mattress recycling:

1. **SWF Compensation:** The Program compensates participating solid waste facilities and other collection locations at negotiated rates for handling mattresses that they accept free of charge from consumers and businesses. Additionally, MRC provides no-cost storage, transport and recycling of these units. This reduces the quantity of discarded mattresses that the facilities would otherwise landfill.
2. **Mattress Retailers (Retailer Take-Back Obligation):** Mattress retailers must offer a consumer the option to have a used mattress picked up for recovery at no cost when they deliver a new mattress. This is an important way for California consumers to access the MRC network in a convenient manner. Since the Program encourages retailers to make the discarded mattresses they collect available for recycling through the Program free of charge, this provision diverts additional quantities of discarded mattresses that a consumer otherwise would dispose of through existing solid waste collection systems.
3. **No-Cost Retailer Recycling:** Retailers can recycle mattresses they pick up through the retailer take-back obligation at no cost through MRC's program. See [Mattress Collection](#) and [Retailer Access](#) for more detail.
4. **No-Cost Business Recycling (Commercial Entities):** Commercial entities (such as hotels and educational institutions, etc.) can recycle their mattresses at no-cost through the program. See the [Mattress Collection](#) and [Commercial Volume Program](#) sections for more detail.
5. **No-Cost Consumer Drop Offs at SWFs:** California residents may drop off mattresses at no-cost at MRC collection locations, which include 170 SWFs statewide as well as 70 other convenient locations. See the [Mattress Collection](#) section for more detail.
6. **Consumer Incentive:** Eight of MRC's 10 recycling facilities and two permanent collection sites pay an MRC-funded incentive to California residents that deliver

discarded mattresses directly to their location. The incentive is \$3 per unit, limited to five units per vehicle per day. See [Consumer Incentive Payment](#) for more detail.

7. **MRC Recyclers' Target:** MRC's recyclers are responsible for dismantling discarded mattresses and foundations, selling or otherwise identifying a use for the reclaimed materials in secondary markets, and disposing of the waste or otherwise unrecyclable material. A recycler has financial incentives to recycle as much of a mattress as it can because it keeps the revenue it earns from the sale of those materials and incurs costs when sending waste and unrecyclable materials to landfills. To further incentivize the amount of mattress materials recycled through the program, MRC's recyclers are expected to recycle 75% by weight of the units they process, but some recyclers have encountered difficulty meeting this requirement. See [Program Disposition Data](#) for more detail.
8. **Mitigate Illegal Dumping:** MRC compensates entities participating in its Illegally Dumped Mattress Collection Initiative for providing data about the number of illegally dumped mattresses they collect in their communities. This information identifies those areas of the state where illegally dumped mattresses are most prevalent and guides MRC's efforts to mitigate illegal dumping activity. See [Mitigation of Illegal Mattress Dumping](#) for more detail.
9. **Prevent Bedbug and Other Contamination:** A mattress may not be recyclable if it is wet, heavily soiled or contaminated by bedbugs. Although contamination affects relatively few units, MRC educates recyclers and collection sites on how to prevent and properly manage bedbug and other contamination, and thereby increase the amount of mattress materials that can be recycled annually. See [Collection Site Mattress Management](#) and [Recycler Procedures](#) for more detail.
10. **Mattress Collection Facility Improvement Funding:** To increase the number of mattresses diverted from the waste stream, improve the recyclability of discarded units, improve worker safety and decrease transportation costs and fuel consumption by increasing the number of units shipped per container, MRC funds improvements to mattress collection sites. Public collection sites in California are eligible for up to \$10,000 per site per funding cycle. Award recipients must agree to serve as permanent collection sites for at least one year following completion of the project. See [Research](#) section for more detail.

Composting

Composting is a form of recycling and falls at the same level in the waste management hierarchy. In 2023, MRC's recyclers did not compost any post-consumer mattress materials. However, MRC concluded a research project in 2023 that demonstrated the feasibility of composting cotton and coir (coconut fiber) extracted from old mattresses. See [Research](#) chapter for more detail. Although foundation wood also can be composted, MRC's recyclers processed no foundation wood into composting material in 2023.

Biomass

California's solid waste management hierarchy considers biomass to be recycling that is preferred over the transformation of solid waste through WTE facilities or landfill. In 2023, MRC recyclers sent 2,382,507 pounds of wood to biomass. While this represents an increase of 1.8% from the amount of wood shipped to biomass in 2022, biomass as a percent of total outbound materials increased a negligible 0.27%, demonstrating that recyclers processed this material consistent with the prior year. MRC recyclers sent wood to biomass because it was financially more attractive than incurring the cost both to transport the wood to a mulcher and pay the mulching operation's tipping fee or because local mulching companies rejected the material due to metal contamination. Biomass may not be a viable long-term recycling option for foundation wood. Low energy prices and environmental regulations may cause existing biomass plants that MRC's recyclers use to close in the coming years.

Transformation (WTE)

In 2023, MRC recyclers did not send any post-consumer mattress material to WTE facilities.

Landfill

Under their contracts with MRC, recyclers are expected to recycle 75% by weight of the units they process, although that may not always be feasible. MRC recyclers dispose of non-recyclable materials and residue in environmentally safe landfills. This material may include entire mattresses or foundations and mattress materials that are:

- Severely damaged or twisted
- Wet, frozen or heavily soiled
- Infested with bedbugs, other living organisms or other biological contaminants that render the unit either unsafe to process or make its constituent materials unmarketable
- Have no financially viable market

MRC recyclers do not track landfill disposal data by material type, making it impossible for MRC to provide data regarding the exact quantity of specific materials that they landfilled in 2023. However, given that recyclers landfilled some whole units, as well as separated materials, MRC assumes that they landfilled at least some quantity of every mattress material type (e.g., steel, foam, fiber and wood). MRC recyclers landfilled 18,310,012 pounds of material in 2023. While this represents an increase of 4.3% from the amount of landfilled material from 2022, most of that increase is attributable to the 3.4% increase in units collected. Landfill as a percent of total outbound materials increased 1.1%. Recyclers slightly increased the amount of material sent to landfill because a pocketed coil processor was closed for an extended time in 2023 due to equipment maintenance, and due to decreased demand for foam and quilt panel, as discussed in the [Program Disposition Data](#) section.

Program Objectives and Activities

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR § 18962(a)(2)(B) — Describe how the program will meet the requirements of subdivisions (d), (g), (i), (j), (k), (l), (m), (o), and (p) of section 42987.1 of the Public Resources Code.

14 CCR § 18964(b)(8) — Description of objectives and activities based on the used mattress recovery and recycling plan, per section 18962(a)(2). State objectives from the approved plan and describe progress toward achieving those objectives during the reporting period. Describe any adjustments to objectives stated in the approved plan that may be made for the upcoming reporting period and accompanying rationale for those changes. If any changes are significant or material, as defined, the mattress recycling organization shall amend and resubmit its plan for approval by the department.

14 CCR § 18964(b)(8)(A) — Quantitative information on subdivisions (b), (c), (d), (e), (f), (g), and (j) of section 42990.1 of the Public Resources Code, including conversion factor(s), if used. When describing the uses for the recycled materials, the annual report shall identify the secondary markets to which those materials are sold, and potential end uses of those materials.

14 CCR § 18964(b)(8)(B) — Qualitative and/or quantitative information on subdivisions (g), (l), and (m) of section 42987.1 of the Public Resources Code.

14 CCR § 18964(b)(13) — Good faith effort. For annual reports submitted on and after July 1, 2019, a demonstration of good faith effort with the state mattress recycling goals established pursuant to section 42987.5 (b) of the Public Resources Code.

Cal. Pub. Res. Code § 42987.1(h) — A program performance measurement that shall collect program data for the purpose of the annual report. The information shall include:

- (1) A methodology for estimating the amount of mattresses sold in the state, used mattresses available for collection in the state, and for quantifying the number of used mattresses collected and recycled in the state.
- (2) A methodology for determining mattresses sold in the state by the manufacturers and renovators of the mattress recycling organization.

Cal. Pub. Res. Code § 42987.1(k) — Establishment of a financial incentive to encourage parties to collect for recycling used mattresses discarded or illegally dumped in the state.

Cal. Pub. Res. Code § 42987.1(m) — Developing strategies, in consultation with the California Environmental Protection Agency's Environmental Justice Task Force and other relevant parties, for collecting used mattresses for recycling in areas and communities that face unique challenges associated with proper waste management such as poverty, language barriers, and illegal mattress dumping.

Cal. Pub. Res. Code § 42987.5(a)(1)(B) — The state mattress recycling goals.

Cal. Pub. Res. Code § 42987.5(a)(1)(C) — On or before July 1, 2020, metrics and goals for increasing consumer convenience for used mattress dropoff, disposal, and recycling in a way that, notwithstanding this subdivision, applies to the entire state regardless of socioeconomic conditions.

Cal. Pub. Res. Code § 42987.5(a)(1)(D) — On or before January 1, 2021, convenience goals to be effective January 1, 2022, specific to each of the following:

- (i) (I) Consumer access to the program, including at least one permanent mattress dropoff location in each county. The requirement to have at least one permanent mattress dropoff location in each county shall not apply to a county with a population of less than 2,000 people as long as the organization continues to provide at least two collection events in the county each year. The department may require additional dropoff locations to ensure that consumers have sufficient convenient access to dropoff locations.
- (II) The mattress recycling organization shall provide no-cost freight services to any mattress retailer, health care facility, educational facility, military base, or lodging establishment that has at least 100 used mattresses to pick up at one time.

- (ii) Retailer access to the program.

Cal. Pub. Res. Code § 42987.5(b) — Beginning July 1, 2019, and annually thereafter, the annual report required pursuant to Section 42990.1 shall demonstrate the mattress recycling organization's good faith effort to comply with the goals established pursuant to this section.

Cal. Pub. Res. Code § 42990.1(b) — The quantity of mattresses disposed of in solid waste landfills.

Cal. Pub. Res. Code § 42990.1(c) — The quantity of discarded used mattresses collected for recycling in the program.

Cal. Pub. Res. Code § 42990.1(d) — The quantity of used mattresses collected for recycling from different categories of sources.

Cal. Pub. Res. Code § 42990.1(e) — The quantity of each category of materials recycled.

Cal. Pub. Res. Code § 42990.1(g) — The quantity of otherwise disposed of materials.

Cal. Pub. Res. Code § 42990.1 (j) — The total volume, number, and weight of used mattresses collected recycled, renovated, and reused in this state during the preceding calendar year, including any conversion factor used to determine the number of mattresses recovered.

Cal. Pub. Res. Code § 42990.1 (l) — For reports submitted on and after April 1, 2020, a demonstration of good faith effort with the state mattress recycling goals established pursuant to Section 42987.5.

Cal. Pub. Res. Code § 42990.1 (m) — For reports submitted on and after July 1, 2021, all of the following:

- (1) A report on activities, which the mattress recycling organization shall undertake, to meet consumer and retailer accessibility goals, and on the progress the organization has made in meeting those goals, and on the organization's planned efforts to meet those goals. Factors to be considered may include, but are not limited to, availability of retailer take-back options, proximity to recyclers and no-cost collection points, availability of no-cost local curbside collections services, and proximity to collection events.

Cal. Pub. Res. Code § 42990.1(o) — For reports submitted after January 1, 2020, the progress toward attainment of the goals included in the organization's mattress recycling plan submitted pursuant to Section 42987.1.

Program Objectives and Activities

Convenience

Pursuant to Cal. Pub. Res. Code § 42987.5(a)(1)(D), CalRecycle requires MRC to meet goals related to consumer convenience, no-cost freight services and retailer convenience. MRC's efforts to achieve the newly established goals are discussed in the [Residential Access](#) and [Commercial Access](#) sections. In 2023, MRC contracted with Customer Analytics, a demographic analytics consulting firm, to evaluate the extent to which its collection network is accessible to California residents and retailers. Customer Analytics measured access for all California residents including those living in rural counties and environmental justice communities to MRC's collection network using a 15-mile benchmark. For these purposes, the program's mattress collection network refers to all drop-off locations in MRC's collection network (recyclers, collection sites, collection events) and curbside bulky item programs that send their mattresses to MRC recyclers for dismantling.

In its convenience analysis, Customer Analytics first considered only the permanent collection network (collection sites, recyclers and curbside bulky item collection programs) to measure whether MRC had met the goals CalRecycle has set, and separately included metrics that incorporate collection events for continuity with past annual reports. For a full description of the methodology used, see [Appendix D](#).

Table 8 shows the percentage of all California residents living within 15 miles of MRC's collection network in 2023 regarding both MRC's permanent collection network and entire collection network (that is, including collection events). See [Residential Access](#) section for further details.

TABLE 8: Percentage of California Residents Living Within 15 Miles of MRC's Collection Network

Population Category	Permanent Collection Network Only	Permanent Collection Network & Collection Events
All Residents	98.4%	99.3%
Residents in Rural Counties	93.8%	96.0%
Residents in Environmental Justice Communities	99.0%	99.8%

Customer Analytics evaluated retailers' access to MRC's permanent collection network by measuring the percentage of California's population that live near locations in the network that accept discarded mattresses collected by retailers.

This metric represents retailers' access to MRC's collection network because retailers often collect discarded units from consumers' residences when they deliver new purchases and need accessible drop-off locations for those discarded units. As shown in Table 9, the analysis used a radius of 20 miles for urban counties and 40 miles for rural counties. See the [Commercial Access](#) section for further details.

TABLE 9: Percentage of California Residents Living Within 20 Miles and 40 Miles of MRC's Collection Network for Retailers in 2023

Distance from Collection Network for Retailers	Percent of Residents
Urban: All Residents Within 20 Miles	99.4%
Rural: All Residents within 40 Miles	99.5%

Residential Access

CalRecycle's goals established pursuant to Cal. Pub. Res. Code § 42987.5(a)(1)(D)(i)(I) require that MRC meet the following consumer convenience and access goals:

- By January 1, 2022, MRC must establish at least one permanent mattress drop-off location in each California county (except counties whose populations are less than 2,000, in which case, MRC must host two collection events annually).
- MRC must establish at least 218 permanent collection sites by December 31, 2023.
- MRC must increase consumer convenience to 94% by 2024.

Table 10 summarizes MRC's efforts to meet these goals in 2023.

Consumer Convenience and Access Goals

TABLE 10: MRC's Consumer Convenience and Access Goals

Category	Goal	2023 Collection Network
Consumer Convenience (Number of Collection Opportunities)	218	240
Consumer Access to the Program (Convenience Goal)	94%	98.4%
Consumer Access to the Program (Number of Convenient Collection Opportunities)	One permanent mattress drop-off location in each county, or 2 collection events in counties with population	MRC's permanent collection network included permanent collection sites in all 58 California counties

Consumer Convenience (Number of Collection Opportunities)

CalRecycle has defined the metric for convenient collection opportunities to include the number of collection sites in MRC's collection network, disposal facilities that accept mattresses, mattress recycling facilities, curbside bulky item collection programs that accept mattresses and retailers that take back old mattresses upon delivery of new mattresses. Because MRC does not have a mechanism to count disposal facilities outside MRC's collection network that accept mattresses for no fee, they are not included in the collection opportunities counted in 2023.

MRC's collection opportunities are comprised of its permanent collection network (including recycling facilities) plus other franchise haulers and municipalities that collect mattresses through their curbside bulky item collection services. In 2023, MRC's permanent collection network consisted of 269 collection opportunities, surpassing CalRecycle's goal by 51. MRC's permanent collection network was comprised of 240 permanent collection sites (which includes recycling facilities) and 29 franchise haulers and municipalities that aggregate curbside bulky item collection units.

Table 11 provides an overview of MRC's collection network (permanent collection sites and recycling facilities) from 2021 through 2023.

**TABLE 11: MRC's Permanent Collection Sites
from 2021 Through 2023**

Year	Permanent Collection Sites
2021	227
2022	234
2023	240

See [Program Collection, Transportation and Processing](#) for an explanation of the various channels from which MRC collects units and the reasonable steps it has taken to expand its collection network.

Consumer Access to the Program

In 2023, 98.4% of California's residents lived within 15 miles of MRC's permanent collection network (which consists of permanent collection sites, recycling facilities and other entities that provide curbside bulky item collection), exceeding CalRecycle's goal of 94%. Including collection events, statewide access increases to 99.3%. In 2023, MRC's permanent collection network included permanent collection sites in all 58 California counties.

The analysis of MRC's collection network, however, understates the access that California residents have to no-cost mattress recycling because it does not take into consideration the impact of the retailer take-back obligation. As discussed more fully in

the [Program Collection, Transportation and Processing](#) chapter, a retailer that delivers a mattress to its customer must offer to pick up the customer’s discarded mattress at no cost. The retailer take-back obligation provides another important alternative for consumers to access the program. [Appendix B](#) contains a list of all locations in MRC’s mattress collection network.

Underserved Areas

The 2022 convenience analysis showed that more than 99% of California residents had access to the program’s permanent collection options and collection events. Using this analysis, MRC identified Contra Costa, Modoc and Kern counties as areas that could benefit from improved consumer access. Table 12 outlines MRC’s progress towards improving convenient access in these counties in 2023.

TABLE 12: 2023 Activities in Selected Counties

County	Progress Made in 2023
Contra Costa	MRC successfully recruited one local business to become a permanent collection site and supported six collection events.
Modoc	MRC established one new collection site in the county.
Kern	One permanent collection site that had previously suspended operations reopened. In addition, MRC successfully recruited one SWF to become a permanent collection site.

Next Steps

Based on Customer Analytics’ analysis of MRC’s 2023 collection network, MRC recognized the potential for enhanced residential access in Contra Costa and San Francisco counties. MRC will provide progress updates in the 2024 Annual Report.

Challenges to Expanding the Collection Network

An ongoing challenge that MRC faces is that some SWFs refuse to become a permanent collection site because they make money by charging residents to dispose of their mattresses. Under California law, MRC may recycle mattresses collected by a SWF only if it collects those units without charge to the resident. In exchange, MRC pays the participating SWF a reasonable amount for accepting, collecting, storing, transporting and handling discarded units. MRC’s negotiated compensation is intended to cover the SWF’s direct costs to provide these services. In addition to being paid to handle units, a participating SWF also avoids the cost of paying to landfill those units or preserves its valuable landfill space because it does not bury units that it sends to MRC recyclers.

Some SWFs, however, currently charge exceedingly high disposal fees for mattresses (up to \$58 or more per unit). Although MRC is prepared to compensate these SWFs

for the reasonable costs they incur in handling mattresses, MRC will not pay them the same high rates that they currently charge consumers. For this reason, some SWFs deliberately do not participate in the program.

MRC anticipates that if not all SWFs participate, the program's ability to increase the number of units collected annually will be limited.

In addition to SWFs that are influenced by financial motivations, other SWFs do not participate in the program because:

- The SWF lacks internal resources to review and complete the contracting process
- Existing contractual restrictions with a local municipality may preclude a franchise hauler that operates a SWF from negotiating to become a permanent collection site
- The SWF lacks the logistical capability to participate in the program (e.g., the facility lacks space for a 53-foot trailer; has insufficient labor to collect, store, transport and handle the units for MRC or lacks appropriate loading equipment)
- The SWF receives very few discarded units

MRC is prepared to accommodate these specific logistical and other constraints to encourage a potential new collection site to expand consumer access by joining MRC's permanent collection network.

When we encounter these obstacles, MRC has developed innovative solutions, including by working with the following types of alternative collection entities:

- Nonprofits, including Goodwill, Salvation Army, and Habitat for Humanity
- Local Conservation Corps, which provide both permanent collection sites and event staffing for community collection events
- California Redemption Value locations
- Mattress retailers and local businesses that allow the public to drop off discarded units at no cost.

Rural County Access

MRC dedicates significant resources to making the program accessible to rural county residents. MRC meets regularly with the Environmental Services Joint Powers Authority (ESJPA) to provide updates, coordinate with stakeholders and discuss strategies and ideas. In rural areas where recruiting a SWF as a collection site may not be an option, MRC will work with alternative types of collection sites (nonprofits, retailers, public agencies or CRV centers) or host local collection events.

For purposes of this report, MRC has defined a rural county using the definition set forth in Cal. Pub. Res. Code § 40184, which in general defines a rural county as one that disposes of less than 200,000 tons of waste annually. Based on the most recent waste

disposal data collected by CalRecycle in 2023 (the most recent data available at the time of this report), the following counties are considered rural: Alpine, Amador, Butte, Calaveras, Colusa, Del Norte, El Dorado, Glenn, Humboldt, Imperial, Inyo, Kings, Lake, Lassen, Madera, Mariposa, Mendocino, Modoc, Mono, Napa, Nevada, Plumas, San Benito, Shasta, Sierra, Siskiyou, Sutter, Tehama, Trinity, Tuolumne, Yolo and Yuba.

In 2023, rural counties covered 48.5 of the state’s geographic area but account for only 6.5% of its population. MRC’s permanent collection network (collection sites, recyclers and curbside bulky item collection programs) served all 32 rural counties.

In 2023, 93.8% of California’s rural residents were located within 15 miles of MRC’s permanent collection network. When including the 16 collection events that MRC hosted in rural counties in 2023, rural county accessibility increased to 96.0%.

California residents in rural counties are accustomed to driving longer distances for services, such as hospitals and grocery stores, when compared to urban residents. MRC also analyzed how many rural county residents were within 25 miles of MRC’s collection network. That analysis shows that 98.7% of California’s rural county population lives within 25 miles of the program’s permanent collection network, demonstrating the program’s success in providing access to mattress recycling in rural counties. Including collection events, the access increases to 99.4%.

In 2022, MRC used an analysis prepared by Customer Analytics to identify rural counties that would benefit from increased network access. Table 13 describes MRC’s progress toward that goal in 2023.

TABLE 13: 2023 Activities in Selected Rural Counties

County	Progress Made in 2023
Mariposa	MRC tried to recruit two new collections sites in hopes of adding another to the county.

Based on Customer Analytics’ analysis of MRC’s permanent collection network in rural counties, MRC recognized the potential for enhanced residential access in Plumas County. MRC will provide progress updates in the 2024 annual report.

Environmental Justice

Cal Pub. Res. Code § 42987.1(m) requires that MRC develop strategies for collecting used mattresses for recycling from “areas and communities that face unique challenges associated with proper waste management such as poverty, language barriers and illegal mattress dumping.” Pursuant to this requirement, MRC has consulted with the California Environmental Protection Agency’s (CalEPA) Environmental Justice Task Force (EJ Task Force) and other stakeholders. MRC has identified

the relevant communities (which we refer to as “EJ communities”) using CalEPA’s CalEnviroScreen 4.0—an environmental mapping program that identifies California communities by census tract that are disproportionately burdened by and vulnerable to multiple sources of pollution, considering indicators such as poverty and linguistic isolation. (A census tract is a small geographic area defined for statistical purposes by the U.S. Census Bureau.)

In 2023, 99% of Californians who resided in EJ communities lived within 15 miles of MRC’s permanent collection network (recyclers, collection sites and curbside bulky item collection). This number increases to 99.8% when collection events are included. These percentages understate actual access since they do not consider when a retailer that delivers a new mattress to a California consumer takes back a consumer’s discarded unit at no cost, which is an additional and important way that residents may access the program.

Collection Strategies

MRC collects used mattresses from residents through four channels: retailer take back, permanent collection sites, curbside bulky item collection and collection events. MRC recognizes that not every resident has the means to transport a mattress, which may be especially true for residents in EJ communities. Therefore, curbside bulky item collection, in addition to the retailer’s take-back obligation, is an important part of MRC’s strategy for collecting discarded mattresses in EJ communities.

MRC maintains a directory on [ByeByeMattress.com](https://www.byebyemattress.com) of communities that offer at least one free curbside bulky item pickup per year. MRC’s consumer education materials and advertising also encourage residents to ask their local government how bulky items are collected in their area. In 2023, 97 bulky programs served EJ communities, 48.5% of which also provided no-cost collection to multifamily housing complexes.

MRC actively uses collection events as another collection channel in EJ communities. Collection events reduce the distance many residents must travel to access the program. In 2023, 71 of MRC’s 131 collection events took place in EJ communities and 89 events were within 15 miles of EJ communities.

Underserved Environmental Justice Communities

In the 2022 Annual Report, we reported that we would seek to improve access to the program for residents living in Kern County. Table 14 describes MRC’s progress toward that goal.

TABLE 14: 2023 EJ Activities in Selected Counties

County	Progress Made in 2023
Kern	One permanent collection site that had previously suspended operations reopened. In addition, MRC successfully recruited one SWF to become a permanent collection site.

In 2024, MRC will focus its efforts on enhancing residential access in Tulare County. To identify areas that could benefit from improved access, MRC's consultant, Customer Analytics, compares CalEnviroScreen data with MRC's permanent collection network to prioritize EJ areas where MRC can increase residential access to the program.

Illegal Dumping Mitigation in EJ Communities

Since launching the Illegally Dumped Mattress Collection Initiative (Initiative) in 2016, participation has increased, helping MRC collect valuable statewide data. In 2023, Customer Analytics analyzed this data to determine the number of illegally dumped units collected from public rights-of-way in EJ communities. According to their analysis, EJ communities accounted for 21,622 units or 39.17% of the total amount of mattresses collected through the Initiative in 2023, a decrease of 14.67% compared to 2022.

By identifying the amount of illegally dumped units collected in EJ communities, MRC can better understand the impact of illegal dumping on these communities and work to address the issue.

EJ-Focused Conferences and Working Groups

In 2023, MRC sponsored or participated in a variety of webinars and conferences to gain and share knowledge about illegal dumping as well as the challenges EJ community leaders face with educating their residents about and encouraging them to use available recycling options, including the following:

- Alameda County Statewide Illegal Dumping Conference (April)
- California Resource and Recovery Association (August)
- California City Leaders Summit (February)
- California League of Cities (September)
- Southern California Waste Management Forum (November)
- North Bay Zero Waste Symposium (May)
- Northern CA Recycling Association Recycle Update (March)
- National Zero Waste Conference (December)
- Solid Waste Association of North America (August)

Attending these events also allows MRC to make community leaders and influencers more aware of resources they can access to promote mattress recycling and to gather feedback to improve our education and outreach. The stakeholders MRC meets through these events also help us expand the collection network.

For similar reasons, MRC communicates with working groups, such as task forces and community-based organizations that serve EJ community needs. Engaging with these groups allows MRC to learn about new initiatives aimed at communities burdened by

multiple sources of pollution or disproportionately vulnerable to the effects of pollution. In 2023, MRC worked with the following:

- CalRecycle
- Identifying Violations Affecting Neighborhoods (serving Fresno, Imperial, Kern, Kings and Tulare Counties)
- Central California Environmental Justice Network

Education and Outreach

MRC prioritizes EJ communities when contacting local officials and media, as well as where we advertise. In 2023, MRC's EJ community-focused efforts included:

- Providing multilingual information to mayors, city council members, county officials and Council of Governments to promote mattress recycling options with their residents.
- Providing permanent collection sites and event hosts with publicity toolkits to educate residents about mattress recycling.
- Encouraging media to cover mattress recycling and publish submitted op-eds and letters to the editor.
- Encouraging public service announcement directors at TV and radio stations to use MRC's "Break Up the Right Way with Your Old Mattress" campaign materials, which we have translated into multiple languages.
- Emailing new homeowners and renters in EJ communities about their mattress disposal options (retailer take back, permanent collection sites or their local curbside bulky item collection program).
- Implementing Spanish-language advertising throughout the state
- Exhibiting at Earth Day festivals and other spring events in EJ communities.
- Using multicultural outreach consultants to advise MRC how to overcome language barriers and communicate most effectively with residents of EJ communities, as well as identify new opportunities to promote MRC's collection network in EJ communities.

Commercial Access

No-Cost Freight Services

Pursuant to Cal. Pub. Res. Code § PRC section 42987.5(a)(1)(D)(i)(II), CalRecycle's baseline and goals requires that MRC provide no-cost freight services to transport discarded mattresses from retailers, health care facilities, correctional facilities, educational facilities, military bases and lodging establishments to permanent collection sites. To meet this goal, MRC offers pickup services for mattresses from each of these entities when they have at least 100 units to discard at one time through its Commercial Volume Program (CVP). The sites where these entities accumulate their mattresses are not open to the public.

Depending on whether an entity regularly collects the minimum (such as a mattress retailer) or has a less frequent or ad-hoc need for MRC’s services (such as a lodging establishment), MRC offers several types of CVP collection and transportation options: CVP sites equipped with a permanent on-site trailer, temporary sites (live loads) and consolidation locations. The following describes each type of CVP collection type:

- Permanent on-site trailer sites are established for entities that collect at least 100 units per month. MRC provides those entities an on-site trailer and transports the collected units to an MRC recycler on a regular basis. In 2023, MRC’s CVP collection network included 60 sites with on-site trailers.
- Temporary sites (live loads) serve entities that generate 100 mattresses less than once a month. Temporary CVP sites contact MRC to schedule a pickup (called a live load) whenever they reach 100 mattresses. MRC picked up 257 live loads from 78 temporary CVP sites in 2023, an increase of 49 live loads from 2022.
- Consolidation locations are sites that accept units delivered by retailers and other commercial entities only. In 2023, MRC offered seven consolidation locations. The number of each CVP site type that MRC offered in 2023 is shown in Table 15.

TABLE 15: 2023 CVP Collection Network

Collection Type	Number of Sites	Site Type	Number of Sites
CVP On-Site Trailer Site	60	Retail	60
Temporary CVP Site (live loads)	78	Retail	3
		Lodging Establishment	45
		Education	8
		Healthcare	2
		Correctional Facility	1
		Military	19
Consolidation Location	7	Consolidation Location	7

In 2024, MRC continues to recruit eligible retailers, businesses and institutions to participate in its CVP and will report on progress in this regard in the next Annual Report.

Commercial Entities with Small Loads

In addition to the above CVP options, MRC assists lower volume commercial sources to manage discarded mattresses that they collect. Under MRC’s CVP, businesses and institutions that generate small loads of discarded mattresses may drop off their units at MRC permanent collection sites that accept commercial volume. These collection sites are not reflected in Table 15’s CVP Collection Network but are designated in [Appendix B](#).

In 2023, 154 permanent collection sites offered no cost drop off for small commercial loads, an increase of two from 2022. MRC lists these locations on its [Bye Bye Mattress Recycling Locator](#) and in list format on the site's page explaining commercial volume options. MRC also provides CVP entities that are not eligible for MRC-provided transportation (because they do not frequently generate loads of 100 mattresses or more) with a list of renovators that accept discarded mattresses and comply with applicable California and federal bedding requirements (as required by SB 254).

Retailer Access

Pursuant to Cal. Pub. Res. Code § 42992, any retailer that delivers a new mattress to a customer must offer to take back the customer's old mattress at no added cost.

To make this take-back requirement a convenient means for California residents to access no-cost mattress recycling, retailers have the following options for recycling those mattresses through the program at no cost:

- Drop them off at an MRC recycler.
- Drop them off at a permanent collection site that accepts small commercial loads.
- Request that MRC pick them up from the retailer through the CVP (permanent on-site trailer or live loads).
- Drop them off at a CVP consolidation location.

For ease of reference, we will refer to these options as the retailer collection network. Pursuant to Cal. Pub. Res. Code § 42987.5(a)(1)(D)(ii), CalRecycle's goals for MRC require that by 2024, 95% of consumers in rural areas reside within 40 miles and 80% of consumers in urban areas reside within 20 miles of a permanent collection site that accepts mattresses from retailers and their associated delivery parties. Customer Analytics calculated the percentage of California's urban and rural population that lives near permanent collection sites that accept discarded mattresses from retailers and other commercial entities (recyclers, permanent collection sites that accept commercial volume and CVP consolidation locations).

Customer Analytics' analysis showed that 99.4% of the urban population lived within 20 miles, and 99.5% of the rural population lived within 40 miles, of MRC's retailer collection network. Note that this analysis may understate actual retailer access because it does not account for retailers whose units MRC picks up directly through the CVP on-site trailer service or that request live loads.

Residents' Access to No-Cost Disposal Options

Some no-cost mattress disposal options in California are not currently part of MRC's collection network. For example, mattresses collected by some retailers are not recycled through the program and some curbside bulky item collection programs do not send units that they collect to the program.

To complete its analysis of how many California residents may access either no-cost mattress recycling or no-cost mattress disposal, MRC mapped its collection network and all curbside bulky item collection programs in the state, regardless of whether they participate in the program.

Based on MRC's collection network (collection sites, recyclers and curbside bulky collection programs) and including all events in the state, 99.3% of California residents were either served by an event or lived within 15 miles of MRC's collection network in 2023.

This percentage likely understates consumer access because our analysis does not include retailers that take back discarded mattresses and recycle them through MRC's program providing consumers additional no-cost collection options. In 2023, the program received 25.4% of its units directly from retailers or MRC's CVP transporters (which transport units received from retailers and other commercial entities). Retailers' share of units recycled through the program is even higher because some retailers also drop off units at permanent collection sites. However, since retailer units obtained from permanent collection sites are comingled with mattresses dropped off by residents and other commercial sources, MRC cannot estimate how many of these were from retailers.

This analysis is useful as MRC considers new strategies for preventing illegal dumping and improving statewide program accessibility. MRC has increased residential accessibility by focusing recruitment efforts on SWFs and communities that offer no-cost curbside collection services. See [Program Collection, Transportation and Processing](#) for further details about MRC's collection network.

Consumer Incentive Payment

California residents may receive a Consumer Incentive Payment (CIP) when they drop off discarded mattresses at MRC recyclers. The CIP is \$3 per unit for up to five units per vehicle per day delivered during the recycler's regular business hours. The CIP is available only to state residents, and not to businesses or government collectors.

The incentive encourages California consumers to manage discarded mattresses responsibly by taking them directly to a contracted recycler for processing.

In 2023, eight of MRC's 10 recycling locations offered the CIP, as well as two permanent collection sites (Habitat for Humanity ReStore and Cristal Materials). One California recycling facility did not offer the CIP because of local restrictions that prohibit public access on the site. The out-of-state processing facility in Oregon does not offer CIP. In 2023, residents received CIPs for 112,834 units. Residents dropped off an additional 24,630 units that did not qualify for CIPs because they exceeded the five units per day limit, or they dropped off their units after normal operating hours. The total of 137,464 units that consumers dropped off at the CIP locations represents approximately 9.4% of all units collected through the program.

CalRecycle has requested that MRC explore offering the CIP at more locations and increasing the amount paid per unit. This, however, is a complex issue. The Mattress Advisory Committee is on record recommending that MRC not increase the CIP because it could result in fewer units being renovated and the Legislature has expressed its intent that MRC’s program not undermine renovation.

After carefully considering the potential advantages and disadvantages of increasing the CIP and offering it at more locations, MRC has decided not to do so for the following reasons. First, collection sites face many challenges in offering the CIP in an efficient, fiscally responsible and secure manner. For example, most collection sites lack staff needed to accept the delivered units in compliance with the CIP rules (such as, no more than five units per day per vehicle) and manage the process. Given the nature of their business, few sites have either the cash on hand in small denomination bills needed to disburse CIP when units are dropped off or the security to protect the cash being disbursed. Even if they have the necessary staff and cash on hand, they also lack the internal controls and accounting system needed to track these transactions and document that the CIP was properly disbursed for eligible units received. Finally, the CIP tends to attract many residents. Collection sites generally lack the space to accommodate lines of residents dropping off mattresses and waiting for their CIP. Second, when MRC developed the CIP program, it sought input from the Mattress Advisory Committee regarding the level of incentive that consumers should receive when dropping off discarded mattresses and foundations at an MRC recycler. After considering different incentive levels, the committee advised MRC that setting the incentive above \$3 per unit could harm renovation. MRC accepted the committee’s advice and capped the incentive at \$3 per unit, for up to five units per vehicle per day. For these reasons, MRC has decided not to increase the CIP at this time from \$3 per unit or to offer it at additional locations.

Program Collection and Disposition Data

Program Collection

Based on data that MRC recyclers report through the program, MRC collected 1,468,360 program units for recycling in 2023, reflecting an increase of 3.4% from 2022 to 2023.

TABLE 16: Total Program Units Collected by MRC for 2019 Through 2023

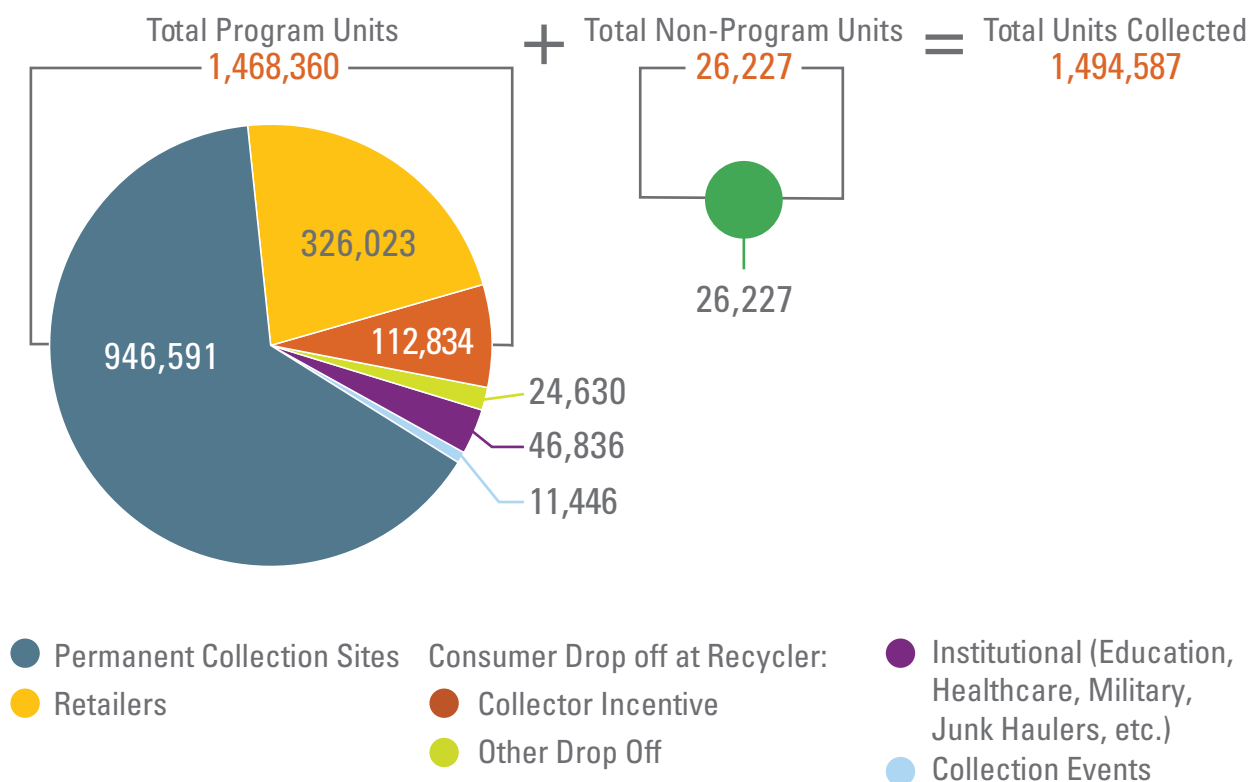

2019	2020	2021	2022	2023
1,448,284	1,511,553	1,602,332	1,419,814	1,468,360

In 2023, MRC recyclers reported that they accepted for recycling a total of 1,497,199 units (that is, both program and non-program units) collected from the sources shown in Table 17 and Figure 2.

TABLE 17: 2023 Units Collected by Source

Source		Units
Permanent Collection Sites		946,591
Retailers		326,023
Consumer Drop Off at Recycler	Collector Incentive	112,834
	Other Drop-Off	24,630
Institutional (Education, Healthcare, Military, Junk Haulers, etc.)		46,836
Collection Events		11,446
Total Program		1,468,360
Total Non-Program		26,227
Total Units Collected		1,494,587

FIGURE 2: Units Collected by Source

MRC recyclers process both program units and non-program units. Non-program units include those that a recycler obtains from franchise haulers and SWFs that do not participate in the program, as well as mattresses manufactured by the Prison Industry Authority (which are exempt from the recycling charge and therefore are not recycled at MRC's cost) and units not collected from California sources. MRC compensates its recyclers for processing program units only.

Although MRC recyclers separately report program and non-program units received at their facilities, the recyclers commingle the materials recovered through the recycling process from program and non-program sources and report those materials together when sold. The data provided in the Program Disposition Data section reports the totals from both program and non-program materials combined, as reported to MRC by its recyclers.

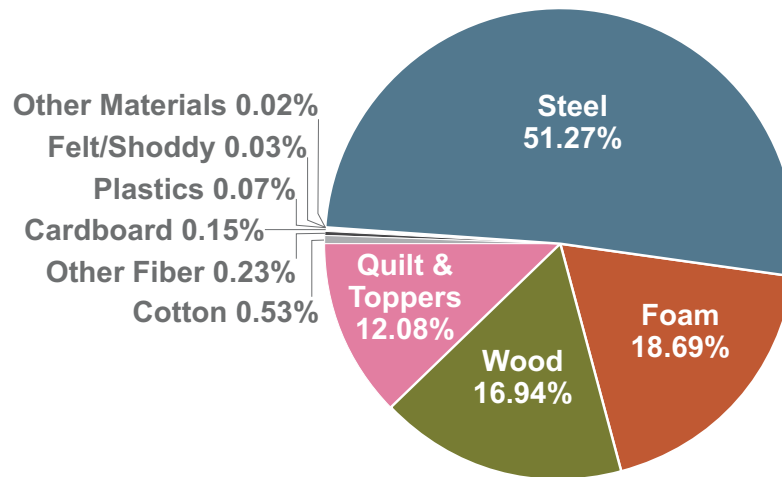

Program Disposition Data

As discussed in the [Materials Management/Waste Hierarchy](#) section, MRC recyclers are expected to reuse, recycle or send to biomass as much material as is economically practical and feasible. MRC recyclers have reported to MRC that they recovered the following materials from discarded mattresses in 2023:

TABLE 18: Total Materials Recycled from Program & Non-Program Units

Materials Recycled	Pounds
Steel	30,772,607
Wood	10,165,966
Foam	11,219,440
Quilt & Toppers	7,251,564
Cotton	316,240
Felt/Shoddy	15,100
Other Fiber	136,212
Cardboard	89,787
Plastics	44,390
Other Materials	13,689
Commodities Total	60,024,995
Whole Mattresses Reused/Renovated Total	724,075
Total Recycled	60,749,070

FIGURE 3: Total Commodities Recycled from Program & Non-Program Units

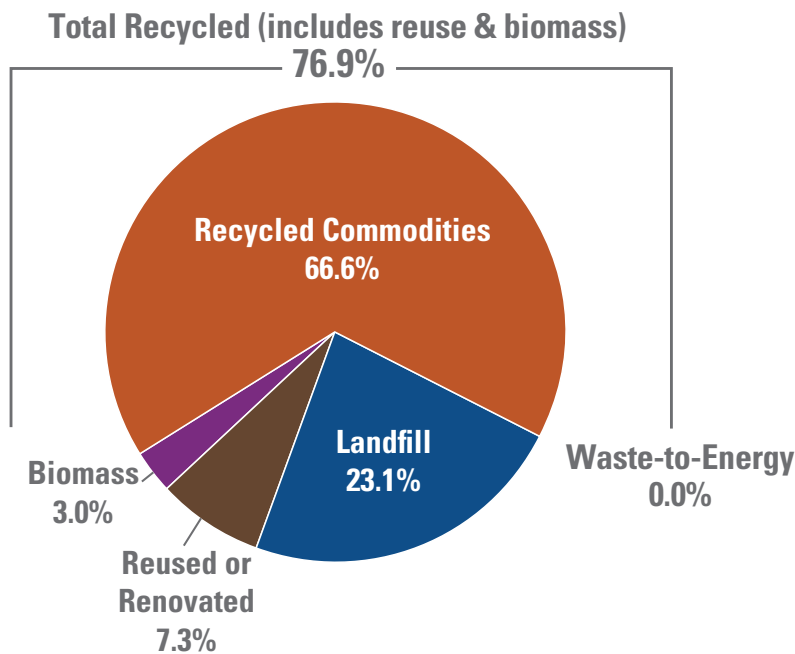

MRC recyclers have reported to MRC that they reused, recycled or sent to biomass 76.9% of all mattress materials processed in 2023. Table 19 and Figure 4 show the 2023 disposition totals and percentages. The data shown for reused or renovated materials includes the whole units reused/renovated shown in Table 19 and other materials that recyclers sold to renovators. The biomass data is included under the wood data in Table 19.

TABLE 19: Disposition of Materials

Disposition	Pounds	Percent
Total Reused, Recycled or Sent to Biomass	60,749,070	76.9%
Recycled Commodities	52,608,228	66.6%
Biomass	2,374,026	3.0%
Reused or Renovated	5,766,816	7.3%
Landfill	18,284,633	23.1%
Waste-to-Energy (Transformation)	0	0.0%
Total Outbound	79,033,703	100.0%

FIGURE 4: Disposition of Materials

CalRecycle requires that MRC report on progress towards goals established pursuant to Cal. Pub. Res. Code § 42987.5(a)(1)(A)-(B) using defined metrics. These metrics are similar to, but different from, metrics that MRC has used for previous annual reports (2016 to 2020). In addition to reporting its performance under the CalRecycle metrics, MRC will also continue to use its established metrics to show continuity over time. MRC previously referred to the percentage of material that MRC recyclers reused, recycled or sent to biomass as the “recycling rate.” To avoid confusion with a distinct goal metric that CalRecycle defines as “recycling rate,” MRC will refer to this percentage as the “MRC recovery rate” moving forward.

TABLE 20: MRC’s Recovery Rate, 2019 Through 2023

2019	2020	2021	2022	2023
70.5%	77.1%	76.9%	78.4%	76.9%

MRC is committed to supporting recyclers efforts to increase their efficiency, but future MRC recovery rates may be influenced by factors outside MRC’s control. Markets for some recycled mattress materials are limited, seasonal or depend on a variety of economic variables.

For example, demand for foam and quilt panels at present depends entirely on demand for carpet pads, the current primary end use for these materials. In 2023, demand for carpet pads fell, so there was a decrease in demand for post-consumer foam and quilt panels. Likewise, some mattresses contain small amounts of different types of fiber,

but these materials can be difficult to sell because buyers require minimum quantities, and it can take recyclers substantial time to separate and accumulate the requisite amount. Some recyclers are unable to store this material because they lack space or are concerned with storing flammable material over an extended time (e.g., mote cotton fiber can be easily ignited).

In 2023, MRC continued to transport pocketed coils from mattress recyclers to a facility in Fresno County that separated the steel springs from the fabric, thereby increasing the amount of metal recycled. The pocketed coil processor experienced extended equipment shutdowns, which caused some recyclers to dispose of pocketed coil due to insufficient storage space.

MRC has also taken steps to improve the quality and amount of material that can be recycled, which can increase the market value for the reclaimed materials and reduce the amount of unrecyclable material sent to landfill. For example, MRC continues to fund collection site improvements that protect discarded mattresses from being spoiled for recycling by exposure to weather. See the [Research](#) section for more detail.

Statewide Collection and Disposition Data

Statewide Program and Disposition Data

MRC is required to report progress towards goals established by CalRecycle pursuant to Cal. Pub. Res. Code § 42987.5(a)(1)(A)-(B) using defined metrics that measure recycling and renovation across California, regardless of affiliation with MRC's program.

14 CCR § 18965 through § 18967 require that mattress recyclers, SWFs and renovators report to CalRecycle the number of used mattresses they collect, recycle, renovate and landfill in California each year. CalRecycle has provided MRC aggregate data that these entities reported.

CalRecycle notes that it took the following actions regarding its 2023 data collection effort:

- Distributed 9 emails through the Mattress Recovery and Recycling Program Database to remind entities to submit 2023 annual reports.
- Identified and onboarded 2 renovators and 4 solid waste facilities that had not reported in prior years.
- Archived 6 SWFs that are no longer in operation or no longer collect mattresses.
- Contacted all entities that had not yet reported as of April 25 via phone call and email to remind them to report prior to May 1, 2024.
- Analyzed all data for completeness and reasonableness, including comparing data to annual reports from prior years. Called and emailed entities to clarify and correct suspected errors in reported data.
- Provided verbal communication, reminder emails, and reporting spreadsheet in Spanish when necessary.

- Mailed letters and annual reports in both English and Spanish in January 2024 to 44 renovators and confirmed receipt. Mailed follow-up letters and annual reports in both English and Spanish in April 2024 to 33 renovators who had not yet reported and confirmed receipt.
- Sent notices of violation to 17 entities that failed to submit annual reports by May 1, 2024.

In-State and Out-Of-State Sources

The number of units collected/received includes those received from in-state and out-of-state sources (shown in Table 21). CalRecycle notes that a significant amount of double counting exists in these numbers. For example, SWFs reported receiving 1,095,609 units in 2023, but many of those were subsequently delivered to mattress recyclers and are counted again in the recyclers' reported data.

TABLE 21: 2023 In-State and Out-of-State Units Collected by California Recyclers, Solid Waste Facilities and Renovators (as reported to CalRecycle)

Entity Type	Entities Providing Data	Units Collected/Received
Mattress Recyclers	9	1,504,372
Mattress Renovators	39	236,204
Solid Waste Facility	341	1,095,609

CalRecycle provided MRC with statewide totals of units recycled, landfilled or renovated/reused in 2023 as shown in Table 22.

TABLE 22: 2023 Units Recycled, Landfilled, Renovated/Reused in California (as reported to CalRecycle)

Mattress Management	Units
A. Recycled (Processed)	1,484,587
B. Renovated/Reused	189,558
C. Landfilled at SWFs	303,663
D. Total	1,977,808
Recycling Rate ((A+B)/D)	84.6%

The number of units recycled represents whole units that were dismantled for the purpose of recycling. SWFs reported the number of units landfilled and renovators reported the number of units renovated.

Statewide Recycling Rate

This metric includes units collected through MRC's program and outside of it, as well as units received from in-state and out-of-state sources. Using the data in [Table 22](#), we calculated the statewide recycling rate by dividing the number of units recycled and renovated by the total number of units managed (that is, the sum of units recycled, renovated and disposed of in landfills based on data reported to CalRecycle by recyclers, renovators and SWFs). The Statewide Recycling Rate is 84.6%, which meets the 2023 goal of 81% plus or minus 5% set by CalRecycle.

MRC will continue its efforts to increase the percentage of discarded units that are recycled or reused statewide, but recognizes that opportunities to expand collection are limited for the following reasons:

- Some discarded units are not recyclable because they are too wet, moldy or are mixed with putrescible solid waste and are unsafe to recycle. To reduce weather-related and other damage to discarded units, MRC funds improvements to mattress collection facilities to improve the quality of discarded units, increase loading efficiency and protect worker safety. While these efforts should reduce the number of units landfilled and increase the program's collection and recycling performance, they are unlikely to substantially increase volumes collected.
- Some units that are potentially recyclable are landfilled by SWFs that have chosen not to participate in the program. MRC has worked diligently since the program's inception to recruit these SWFs and will continue to do so. Nevertheless, recruiting non-participating SWFs into the program is increasingly difficult, limiting MRC's ability to capture additional discarded units.
- In enacting SB 254, the Legislature expressed its intent that mattress recycling does not undermine existing resale, refurbishing and reuse of mattresses that are in compliance with state and federal law, further limiting MRC's ability to increase the number of units recycled.

See [Residential Access](#) and [Program Collection, Transportation and Processing](#) sections of this report for an explanation of the various sources from which MRC collected units and the reasonable steps it has taken to expand the collection network, avoid undermining renovation and better serve state residents and businesses.

Statewide Efficiency Rate

This metric includes the amount of material recycled by recyclers and solid waste facilities and renovated by renovators from mattresses collected through MRC's program and outside of it, as well as units received from in-state and out-of-state sources. As the following table demonstrates, MRC calculated the statewide efficiency rate by dividing the pounds of material recycled and renovated by the total pounds of material recycled, renovated and disposed in landfills from data reported to CalRecycle

by recyclers, renovators and SWFs. Recyclers report the total quantity in pounds of each mattress material recycled and residual materials disposed. SWFs report the number of units landfilled, as well as the number of whole units recycled on-site, if any. These units must be converted to pounds using the assumption that the average unit weighs 55 pounds. Renovators report the number of units they renovate and the pounds of residual material disposed. The units must be converted to pounds and multiplied by the annual renovation recovery rate calculation agreed upon by CalRecycle, which was 89.7% in 2023. The statewide efficiency rate is 65.9%, which meets the 2023 goal of 65% plus or minus 5% set by CalRecycle.

**TABLE 23: 2023 Weight of Mattress Materials
Recycled, Landfilled, Renovated/Reused in California
(as reported to CalRecycle)**

Mattress Management	Weight of Materials (Pounds)
A. Recycled (Processed)	60,567,986
B. Renovated/Reused	9,354,928
C. Landfilled	36,165,195
D. Total	106,088,109
Efficiency Rate ((A+B)/D)	65.9%

MRC cannot control the landfilling of whole units or component parts by third parties but works to meet this goal by increasing collection and working with recyclers to improve the recovery rate for units they process.

MRC continues to invest in research activities targeting low-value and difficult to recycle mattress commodities that have limited or no demand.

Finally, MRC is working with its recyclers to improve their material separation processes. If post-consumer materials are not properly separated, potential buyers may reject them because of contamination. With proper information and training, MRC hopes that recyclers can continue to reduce their disposal rates, increase the amount and quality of mattress materials that can be recycled and increase the revenue they earn from selling the recycled materials, making their businesses more financially sustainable. The multiple strategies MRC is pursuing to divert materials from disposal are discussed in further detail in the [Program Disposition Data](#) section and [Research](#) chapter.

Good Faith Effort

Pursuant to Cal. Pub. Res. Code § 42987.5, CalRecycle in consultation with MRC, must establish a state mattress recycling baseline amount and state mattress recycling goals. MRC must demonstrate its good faith effort to meet the state’s mattress recycling goals. Cal. Pub. Res. Code § 42986(d) provides that “good faith effort” means “all reasonable

and economically practical efforts by a mattress recycling organization to implement the components identified in its approved plan consistent with its annual budget.”

CalRecycle established the following goals for the program:

TABLE 24: Statewide Goals

Category	Goal	MRC Compliance with 2023 Goals
Statewide Recycling Rate	81% ± 5%	84.6%
Statewide Efficiency Rate	65% ± 5%	65.9%
Consumer Convenience (number of collection opportunities)	221	240
Consumer Access to the Program	One permanent mattress drop-off location in each county, or 2 collection events in counties with population <2,000 people	All 58 counties had at least one permanent collection site
Consumer Access to the Program (Convenience Goal)	94% by 2024	98.4%
Rural Retailer Access to the Program	95% by 2024	99.5%
Urban Retailer Access to the Program	80% by 2024	99.4%
No-Cost Freight Services	Provide no-cost freight services to any mattress retailer, health care facility, educational facility, military base, or lodging establishment that has at least 100 units at one time	Offered and provided to 138 entities.

In 2023, MRC successfully achieved all of the state’s mattress recycling goals.

In addition, CalRecycle established a 2023 baseline for units renovated statewide by third party renovators of 225,000 units. Based on the 189,558 units that renovators reported to CalRecycle as units renovated in 2023, renovation reached nearly 85% of the baseline. MRC has the following observations regarding the reported renovated units data:

- The renovated units data that renovators reported to CalRecycle may not be accurate or complete. In 2023, 42 renovators were registered with the program. There is a strong likelihood that other companies are renovating mattresses in California that have not registered with the program. Furthermore, CalRecycle notified 44 renovators about their annual reporting requirement but only 39

renovators reported units renovated data to CalRecycle. Of those, five reported using a conversion factor or estimated units renovated to CalRecycle, as opposed to reporting actual units renovated based on their company records. For these reasons, there is a significant likelihood that if non-registered renovators reported renovated units to CalRecycle, if all registered renovators had complied with CalRecycle's data reporting requirement and if all renovators had reported their actual units renovated instead of just estimates, then the true renovated units data would either meet or exceed the 2023 baseline that CalRecycle set.

- The demand for renovated mattresses (and therefore the number of units that renovators process) is highly influenced by various economic factors. For example, as a result of low housing sales and high inflation, total 2023 mattress units sold in California and reported to MRC (including sales of renovated units) were 9.9% below 2022 levels. Renovated mattresses tend to compete at the lower end of the price point range. Nationally, 2023 mattress sales revenue fell by 7.3%, while units sold fell by 8.2%, compared to 2022. This dynamic means that the sales declines were more pronounced at the lower price points, which would include sales of renovated mattresses. Competition from low-priced mattress imports (which also tend to be sold at lower price points), remains strong. These places added competitive pressures on both renovators and manufacturers that sell units at the low end of the mattress market. For these reasons, general economic pressures logically reduced sales of renovated units in California in 2023.
- MRC has limited influence on the total number of units companies renovate. Nevertheless, MRC continued to demonstrate a good faith effort, using reasonable and economically practical means, to support renovation in 2023. These efforts include adding renovators to our permanent collection network, providing lists of renovators who are compliant with state and federal law to mattress recyclers who may be interested in selling whole units or component parts to renovators and offering collection site improvement funds to renovators collecting units from the public.

Renovation is discussed further in the [Program Collection, Transportation and Processing](#) section of this report.

Mitigation of Illegal Mattress Dumping

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR § 18964(b)(7) — A description of methods used by the mattress recycling organization to coordinate with existing used mattress collection and recycling programs with regard to the proper management or recycling of discarded or abandoned mattresses.

14 CCR § 18964(b)(8)(B) — Qualitative and/or quantitative information on subdivisions (g), (l), and (m) of section 42987.1 of the Public Resources Code.

Cal. Pub. Res. Code § 42987.1(l) — Ensuring, to the maximum extent possible, that urban and rural local governments and participating permitted solid waste facilities and authorized solid waste operations that accept mattresses are provided with a mechanism for the recovery of illegally disposed used mattresses that is funded at no additional cost to the local government, solid waste facility, or solid waste operation.

Cal. Pub. Res. Code § 42990.1(m) — For reports submitted on and after July 1, 2021, all of the following:

- (3) A report on research activities, which the organization shall undertake, to improve used mattress collection, dismantling, recycling operations, source reduction and green product design, and the response to the problem of illegal dumping and a report on the progress made as a result of the research activities.
- (4) A report on pilot programs, which the organization shall undertake, to test new processes, methods, or equipment on a local, regional, or otherwise limited basis, such as those

designed to clean up illegally dumped mattresses, gather data and identify strategies to reduce the number of illegally dumped mattresses, in partnership with the cities and counties identified by the mattress recycling organization as having areas with the highest rate of illegal dumping in the state. Pilot program descriptions shall include a mechanism to measure success, such as establishing a baseline and goals when possible and report on the progress made in undertaking the pilot programs.

- (5) If the mattress recycling organization determines during a particular year that any of the activities undertaken to implement paragraph (3) or (4) were unsuccessful, the organization shall identify the problems with the current activities, and report on the new activities undertaken and progress made, in the following year's annual report.

Mitigation of Illegal Mattress Dumping

MRC uses the following strategy to address illegal mattress dumping:

1. Intercept discarded mattresses before they are illegally dumped by:
 - a. Providing California residents with no-cost retailer pick-up of discarded mattresses when the retailer delivers a new mattress to a consumer.
 - b. Encouraging no-cost drop-off options for state residents at designated collection points throughout California.
 - c. Providing a financial incentive to encourage residents to deliver discarded units directly to recycling facilities.
2. Through MRC's Illegally Dumped Mattress Collection Initiative, compensate participating local governments, solid waste facilities and solid waste operations that provide baseline data to help MRC and policymakers better understand the extent of illegal mattress dumping.
3. MRC, policymakers and participants use this data to measure and document the extent to which illegal mattress dumping is occurring in each participant's geographic area and whether mitigation efforts are effective.
4. Fund pilot projects to mitigate illegal mattress dumping and communicate those findings to illegal dumping technical experts.
5. Work with technical experts to develop solutions and best practices to address illegal dumping, attend illegal dumping working groups and conferences, promote recycling and illegal dumping mitigation resources.

The methods MRC uses to intercept discarded mattresses before they are illegally dumped are discussed in other chapters of this report. MRC encourages consumers to use the no-cost collection network and promotes [Consumer Incentive Payment](#) locations (where consumers can receive compensation for delivering units directly to recyclers). To reduce the retailers' burden of providing no-cost take-back services, MRC encourages them to participate in our [Commercial Volume Program](#) (which provides simple, no-cost options for retailers to dispose of units they collect) described in [Program Objectives and Activities](#). The [Education and Outreach](#) chapter describes how MRC informs industry and consumer audiences about MRC-the collection channels.

MRC's goal is to proactively discourage illegal dumping by encouraging consumers and businesses to divert used mattresses to recyclers. MRC reassesses this strategy annually and considers other actions that might combat illegal dumping better or address unanticipated increases in illegal dumping.

Illegally Dumped Mattress Collection Initiative

To gather reliable data about the nature and extent of California’s illegally dumped mattress problem, the Initiative offers financial incentives to local governments, solid waste facilities, franchise haulers, nonprofits contracted with municipalities, Local Conservation Corps, Joint Powers Authorities, Native Nations and other entities that report data to MRC regarding illegally dumped units they collect from public rights-of-way (e.g., collection date, number of units collected, disposition of collected units and collection ZIP code). MRC pays participants a per unit amount for every illegally dumped unit they pick up and report to MRC. The amount paid depends on whether the entity operates in an urban (up to \$15 per unit) or rural county (\$20 per unit), as determined by the rural county definition set forth in Cal. Pub. Res. Code § 40184 (which in general defines a rural county as one that disposes of less than 200,000 tons of waste annually). [Table 26](#) identifies participating counties that are rural. MRC plans to continue the Initiative in 2024 and will report progress in future annual reports.

2023 Results

In 2023, 76 Initiative participants representing 36 counties reported 55,554 units with the number of units collected dropping 8%. Compared to 2022, the total number of participants decreased by a net of two participants in 2023. Eight 2022 participants did not return in 2023, but two new entities—one rural and one urban—joined in 2023. Six existing participants that did not report in 2022 reported again in 2023. As demonstrated in Table 25, this is the third consecutive year the total number of units reported decreased from the previous year. This is also the lowest number of units reported over the 2021–2023 period.

MRC learned that staffing constraints (turnover or staff shortage) prompted the eight participants from prior years to drop out in 2023. MRC will continue to support and provide resources to keep current participants engaged and help them maintain involvement during staff transitions.

MRC will continue to observe data trends in future years to determine whether a more in-depth qualitative analysis of the Initiative is warranted.

TABLE 25: MRC’s Illegally Dumped Mattress Collection Initiative 2021 Through 2023

Initiative	2021	2022	2023
Number of participants	85	78	76
Total units	73,380	60,510	55,554

Participant Outreach and Retention

To recruit participants, MRC promoted the Initiative among local governments, Native Nations, franchised haulers, Local Conservation Corps and other collectors through conferences and workshops, illegal dumping working groups and task force meetings. We also communicated with our network of contacts via emails, phone calls and meetings to raise awareness of the Initiative's benefits and persuade them to join. These efforts resulted in two new participants. In 2023, 34 of 58 counties participated in the Initiative, of which 13 were rural. In 2024, MRC will continue to recruit participants from underrepresented counties.

In 2023, MRC also regularly corresponded with registered participants to keep them engaged and submit information in a timely manner. MRC sent monthly email reminders and three newsletters encouraging them to submit their data to MRC's online database and to contact MRC if needed. MRC continued to provide participants with ongoing support, including providing login assistance, resetting passwords, updating an organization's contact information and navigating the database.

Local Conservation Corps Recruitment

In 2020, MRC discussed with CalRecycle the possibility of involving the Local Conservation Corps (LCCs) in the Initiative to enhance illegal dumping mitigation efforts within their respective territories through partnering with municipalities.

As an experiment, three LCCs successfully participated in the Initiative. The experiment commenced in 2021 and concluded in 2022. Following this positive outcome, CalRecycle approved MRC expanding participation to all LCCs, including the initial three, which expressed interest in continuing to participate in the Initiative.

In 2023, one LCC collected and reported units. Each year, MRC will continue to encourage LCCs to participate in the Initiative.

Data Analysis

Demographic/Socio-economic Trends

MRC hired Customer Analytics, a demographic data analysis firm, to analyze 2023 illegal dumping data collected through the Initiative. Customer Analytics measured the relationships between illegal dumping and demographic and socio-economic factors in the communities served by the reporting entities. They also tested for associations between rates of illegal dumping and various elements of MRC's collection network.

See [Appendix D](#) for a complete description of the methodology used.

Similar to the 2022 analysis, Customer Analytics' analysis of 2023 illegal dumping data showed that ZIP codes with the following attributes experienced higher rates of illegal dumping:

- Higher percentage of renter households
- Higher percentage of multifamily housing complexes
- Higher percentage of persons living below the federal poverty level
- Lower proportions of persons aged 64+

Curbside Bulky Item Collection Programs and Illegal Mattress Dumping

To increase residents' awareness of additional curbside collection opportunities, MRC provides a Bulky Item Pickup Directory on [ByeByeMattress.com](https://www.byebyemattress.com). This directory is based on information MRC collected in its 2018 statewide study of curbside collection services, which MRC periodically updates. The directory identifies areas that provide residents with at least one free bulky item pickup per year. MRC's consumer outreach also promotes bulky item curbside collection as an option for responsible mattress collection.

MRC Collection Network and Illegal Mattress Dumping

Customer Analytics' analysis of the 2023 Initiative data suggests that of the zip codes with higher rates of reported illegal dumping, areas in nearby zip codes that are within 15-miles of collection sites have less reported illegal dumping.

Overall, this analysis supports MRC's strategy that expanding the permanent collection network is an effective method to reduce illegal dumping.

In 2023, MRC also funded an illegal dumping pilot study that examined how establishing a permanent collection site affected illegal dumping. See [Illegal Dumping Pilot Projects](#) for more details.

Initiative Data and Analysis Utilization

The Initiative data and accompanying analyses help guide MRC's efforts to expand its collection network, provide a tool for monitoring the outcomes of pilot projects and influence where to target MRC advertising and other outreach.

In the 2022 report, MRC's analysis of the Initiative data identified areas with the highest per capita rates of illegal dumping. These areas included the cities of Bakersfield, Oxnard and San Diego. In 2023, MRC expanded its collection network in each of these communities, resulting in a cumulative decrease of over 5,000 illegally dumped units reported in those areas. Specific tactics MRC implemented included supporting collection events, adding collection sites, improving relationships with waste haulers and encouraging Initiative participants to propose illegal dumping pilot project concepts. MRC also targeted education and outreach in these areas, generating media coverage of collection sites added in San Diego and Bakersfield and encouraging city, county and local organizations to use MRC's information to build awareness of retailer take-back, drop-off locations and no-cost curbside pick-up, if applicable.

MRC provides Initiative participants a customized heat map they may use to inform their city management, local leaders and waste service providers as they respond to illegal dumping incidents. In 2024, MRC will continue to consult Initiative data as it determines where to expand and conduct outreach. Participants will also continue to receive heat maps.

Projects to Mitigate Illegally Dumped Mattresses

MRC encourages communities experiencing illegal mattress dumping to propose pilot projects to address the problem. MRC invited Initiative participants and California municipalities, nonprofits and SWFs that have collected illegally dumped mattress data for at least one year (either under the Initiative or using an internal reporting system) to propose a project that MRC might fund. The three broad areas considered for funding include:

1. Education programs to inform residents about existing mattress collection channels
2. Improving residents' awareness of illegal dumping laws and their enforcement
3. Establishing or improving mattress drop-off locations

Completed Projects

The table below describes completed projects. Since 2021, MRC has awarded over \$255,000 in total funding for pilot projects targeting illegal dumping. MRC has prepared case studies detailing each project's outcome. These are available on MRC's website, published in MRC's newsletters and social media and circulated with city and county leaders. MRC intends to release a case study on the City of San Rafael's project in 2024.

TABLE 27: Completed Pilot Projects

Funding Recipient	Funding Year	Project Details
City of Berkeley	2021	The city of Berkeley developed an educational campaign for mattress recycling options and offered two curbside pickup appointments to residential and multifamily properties per year. In addition, the city informed Berkeley City College and University of California Berkeley students how they can properly recycle their mattresses.
City of Palmdale	2021	MRC funded a proposal to raise awareness about the city of Palmdale's bulky item collection program. Action Research, a community-based social marketing consultant, led the effort, which included surveying property managers, analyzing data and creating the "Junk Away the Right Way" campaign. The campaign featured vehicle wraps, a new website landing page and outreach materials.
City of San Jose	2021	The city of San Jose tested surveillance and education strategies at four illegal dumping hotspots. The educational materials promoted proper mattress recycling through junk pickup appointments and no-cost drop-off sites.
City of San Rafael	2022	The city of San Rafael piloted a pickup program at eight multifamily housing complexes located near illegal dumping hot spots. The project tracked the frequency of resident use and the number of mattresses collected. Using this data, the city developed new policies to hold property managers responsible for bulky item disposal.

Active Projects

County of Ventura

In 2022, MRC funded the county of Ventura's proposal to target outreach to increase resident awareness about illegal dumping and proper mattress disposal, and to buy surveillance cameras to install at an illegal dumping hot spot location. MRC extended the project completion date until 2024 because the county was unable to secure the surveillance cameras due to delivery issues.

City of Modesto

In 2023, MRC received three proposals for funding, but one applicant withdrew its proposal. MRC awarded \$100,000 to the City of Modesto.

The city of Modesto proposed a comprehensive plan to combat illegal dumping by focusing on education and outreach, surveillance and expanding access to its residents. The project includes developing and distributing multilingual door hangers, collaborating with schools to educate students on the impacts of illegal dumping using MRC's illegal dumping lesson plan, installing signage with information on reporting illegal dumping and deploying mobile cameras and a digital message board at illegal dumping hot spots. Additionally, the city will pilot a one-year no-cost mattress collection site, measuring success by whether these actions reduce illegal dumping.

MRC will discuss the findings of each study in the next annual report.

Next Steps

Given the strong participant retention, quality of reported data and positive outcomes from the completed pilot projects, MRC will continue to work with CalRecycle, the Mattress Advisory Committee and other illegal dumping task force groups to promote the Initiative and pilot project funding. MRC will also continue to analyze Initiative data and pilot project results to identify best practices to share with the wider community.

Supplemental Strategies

Clean California Initiative

In 2021, Governor Newsom launched the Clean California Initiative (Clean California), to remove roadway litter and beautify public spaces throughout the state. Under one part of Clean California, the California Department of Transportation (Caltrans) hosts Dump Day events, when underserved communities may have their bulky waste collected at no cost.

In 2023, MRC partnered with Caltrans and supported 14 Clean California Dump Day events in five of Caltrans 12 districts. As a result, over 1,000 mattresses were collected.

School Lesson Plan: Don't Dump it, Recycle it

To teach California's youth the importance of recycling (as opposed to dumping), MRC created a school lesson plan that includes five activities aligned with Next Generation Science Standards to guide students through the waste journey, its impact on the environment and ways to prevent illegal dumping. The last lesson provides facts and statistics about mattress recycling and how its components can be repurposed. In 2023, MRC promoted the lesson plan to teachers, afterschool programs, solid waste working groups and to local municipalities. To date, several dozen organizations, counties, cities, solid waste companies and nonprofit organizations have downloaded the material.

In 2024, MRC will continue to promote the lesson plan and its activities.

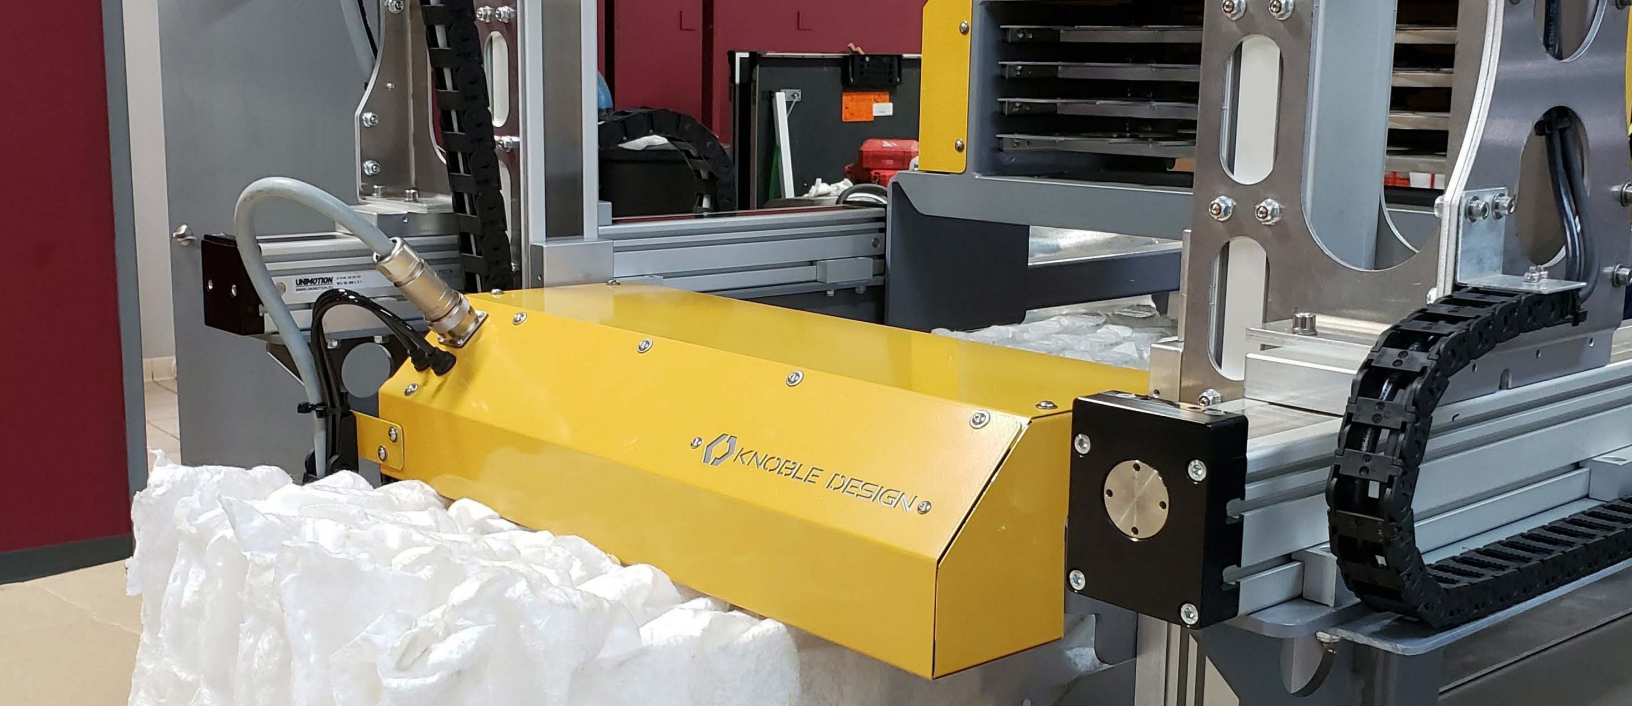

White Paper

In 2020, MRC commissioned an interdisciplinary team of experts lead by Dr. Calvin Lakhan, Faculty of Environmental Studies, York University, Toronto, Ontario, to develop a white paper on "Best Practices in Addressing Illegal Dumping of Durable Waste — A Guide for Policy Makers." The paper discusses strategies and best practices that have been found effective in mitigating illegal dumping in the United States and elsewhere. The report is available on MRC's website.

In 2023, MRC promoted the white paper to illegal dumping task force groups, environmental justice organizations, through MRC social media and at other conferences and events. MRC also presented the white paper findings at the League of California Cities 2023 City Leaders Summit.

MRC will continue promoting the white paper in 2024.

This page is intentionally left blank.

Research

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR § 18964 (b)(8)(B) — Qualitative and/or quantitative information on subdivisions (g), (l), and (m) of section 42987.1 of the Public Resources Code.

Cal. Pub. Res. Code § 42987.1(g) — Conducting research, as needed, related to improving used mattress collection, dismantling, and recycling operations, including pilot programs to test new processes, methods, or equipment on a local, regional, or otherwise limited basis.

Cal. Pub. Res. Code § 42990.1(m) — For reports submitted on and after July 1, 2021, all the following:

Cal. Pub. Res. Code § 42990.1(m)(3) — A report on research activities, which the organization shall undertake, to improve used mattress collection, dismantling, recycling operations, source reduction and green product design, and the response to the problem of illegal dumping and a report on the progress made as a result of the research activities.

Cal. Pub. Res. Code § 42990.1(m)(5) — If the mattress recycling organization determines during a particular year that any of the activities undertaken to implement paragraph (3) or (4) were unsuccessful, the organization shall identify the problems with the current activities, and report on the new activities undertaken and progress made, in the following year's annual report.

Cal. Pub. Res. Code § 42990.1(m)(6) — A hard copy of, or an electronic reference to, each research study and report completed by the organization during the period covered by the annual report and a brief explanation of how the organization anticipates the research may benefit the program. The organization shall make these studies and reports publicly available free of charge. If the study or report contains trade secret or confidential information protected by law, the organization shall only be required to provide a description of the research and its relevance to the program that omits any of the trade secret or confidential information.

AB 187

- Requires that MRC report on research activities pertaining to:
 - Mattress collection, dismantling & recycling operations
 - Source reduction & green product design
 - Response to problem of illegal dumping
 - Progress made as result of research activities
- States that if any of the activities undertaken to implement this measure were unsuccessful, MRC shall identify the problems with the current activities, and report on the new activities.
- Requires that MRC include a hard copy of all research studies & reports and an explanation of how research benefits program.

RESEARCH

MRC seeks to improve the sustainability of mattress recycling by:¹

- Advancing the efficient collection and transport of discarded mattresses
- Identifying and promoting best practices for mattress dismantling and recycling
- Identifying new and better uses for the recycled components
- Fostering innovation, cooperation and communication between suppliers, manufacturers, collectors, dismantlers and end-market commodity buyers to increase mattress recycling rates

To assist in developing and managing its research efforts, MRC staff works with an experienced team of research and innovation subcontractors. MRC's goal is to identify projects that have the potential to achieve both short-term, high-impact results, as well as longer-term projects with multi-year horizons. This section summarizes completed, in-progress (active) and future projects or areas of interest. When projects span multiple calendar years, they will be discussed in several reporting cycles. From a portfolio management perspective, MRC works to establish and manage a diverse family of projects which explores both incremental and disruptive technology development. This includes, but is not limited to, mechanical recycling technologies, thermal or chemical modification of recovered materials for use in adjacent industries, process automation innovations and newly emerging chemical recycling process development.

MRC is encouraged by its efforts to date, but is realistic, recognizing that by their nature, research outcomes are unpredictable, with some projects producing useful results and others failing. Moreover, many factors influence market acceptance of new technologies. Therefore, research is necessary to improve long-term industry performance, but should not be focused exclusively on short-term results.

With these cautions in mind, MRC evaluates research proposals and defines the intended objective of each research project awarded. This process considers whether the proposer is qualified to undertake the project and the value proposition. Awarded

¹ In addition to MRC's research efforts to improve the sustainability of mattress recycling, Cal. Pub. Res. Code § 42990.1(m)(3) also requires that MRC report on research activities undertaken concerning "source reduction and green product design, and the response to the problem of illegal dumping." These topics are discussed in the Sleep Products Sustainability Program and Illegal Dumping sections of this report.

projects are funded contingent on established, structured, milestone-driven contracts with the selected organization. MRC research program metrics are structured to:

- Reward learning
- Encourage taking and managing risks
- Encourage collaboration
- Meet project milestones
- Produce results

Research projects may be accelerated or extended (or stopped entirely) if it appears the work is likely to produce valuable (or inconclusive) results.

Completed Projects

Mattress Collection Facilities Improvement Funding

For the sixth year, MRC funded improvements at mattress collection sites to increase the number of mattresses diverted from landfills, improve the recyclability of discarded units, improve worker safety, reduce fire risk and decrease transportation costs and emissions by increasing the number of units shipped per container. Beginning in 2018, public and private collection sites in California have been eligible for up to \$10,000 per site per year. Award recipients must agree to serve as MRC-contracted public drop-off sites for at least one year following reimbursement of project funding.

In 2023, MRC funded, completed and reimbursed six projects totaling \$44,600. The scope of work included improvements to collection areas to increase the recyclability of units, purchasing equipment for safer and more efficient loading and protecting units from rain and weather exposure. In total, the six project recipients estimate that the funding will allow them to collect an additional 16,000 units annually for recycling.

MRC awarded six other projects in 2023 that will be completed and funded in 2024, including two that are new collection sites. Those projects will be discussed in the 2024 annual report. MRC will offer collection site funding again in 2024.

TABLE 28: Collection Projects Completed in 2023

	Company	Location	Project	Amount Paid
1	Antelope Valley Recycling and Disposal Facility	Palmdale, CA	Walking ramp, dolly, pallet jack and carport to provide weather protection and more easily load units into a trailer.	\$3,708
2	Blue Water Recycling Corporation (new site)	Alturas, CA	Weather shelter for staging units to keep them clean and dry for recycling.	\$10,000
3	Florin Perkins Disposal Site	Sacramento, CA	Construction of paved area to stage units and keep them clean and dry for recycling.	\$10,000
4	Lancaster Landfill and Recycling Center	Lancaster, CA	Walking ramp, dolly, pallet jack and carport to provide weather protection and more easily load units into a trailer.	\$3,677
5	Santa Barbara County - South Coast Recycling and Transfer	Santa Barbara, CA	Weather shelter for staging units to keep them clean and dry for recycling.	\$7,215
6	Western Placer Waste Management Authority (new site)	Placer County, CA	Purchase forklift trailer ramp.	\$10,000
TOTAL				\$44,600

Using Recycled Mattress Textiles to Make Composite Products

In 2023, MRC initiated a study to determine if recovered mattress shoddy and cotton could be used as reinforcing fibers in polyurethane-based composites suitable for a wide range of industrial sectors including aerospace, automotive, marine, electronics and biomedical, among many others. In many constructions, fibers are used to reinforce urethanes or epoxy resins to create durable, lightweight and strong products. The research was conducted under the leadership of Dr. Ram Gupta at Pittsburg State University.

The base resin selected was a bio-based polyurethane system. Dr. Gupta found that composites containing up to 20% cotton had excellent physical properties. Very similar results were obtained with shoddy, however maximum content was approximately 15%. The study notes that the composites industry is interested in developing lower carbon footprint materials and demonstrates a pathway to achieve this objective. MRC will next review findings with the composite community to determine if there is interest in commercializing this technology. The [full report is available on the MRC website](#). Project costs were \$47,297.

Mattress Age Study

In 2019, an MRC study estimated the average age of a unit arriving at mattress recycling facilities. MRC was interested in replicating this study with some adjustments to the methodology to improve the accuracy of the data since most discarded mattresses do not retain their date tag. The results from this study would inform the industry about the age at which consumers discard mattresses and inform recyclers about the types and quantities of mattresses to expect in future years.

In late 2022, MRC collected age data from discarded units by recording the manufacturing date shown on the law label on those units which retained their label. On units where a label was no longer present, two industry experts analyzed construction methods, quilt panel design and other factors to estimate the age of the unit. MRC's data analytics contractor used a combination of actual and estimated age in this revised study published in July 2023.

At a 95% confidence level, the analysis reveals a mean age of 13.9 ± 0.4 years for all units combined. The data also indicates that a significant percentage of mattresses are discarded prior to the end of their useful lives.

Further research is required to understand underlying factors which contribute to the decision by a consumer to discard a mattress, as well as recent changes in the relative market share of different mattress types. By understanding the current state of the industry and the age of units being recycled, stakeholders will be better equipped to make informed decisions and develop effective strategies to improve recycling processes, reduce waste and promote sustainability. The [full report is posted on the MRC website](#). Project costs were \$25,142.

Life Cycle Analysis

In 2022, Scope 3 Consulting LLC completed a life cycle analysis (LCA) of MRC's mattress recycling operations. The analysis measured 11 environmental impacts incurred at each stage of MRC's process (collection, transportation and recycling) and the benefits achieved from landfilling less material and displacing virgin materials with recycled post-consumer mattress material.

The LCA demonstrated that mattress recycling provides significant environmental benefits. In processing over 1.6 million mattresses in 2021, the materials MRC recycled reduced carbon dioxide emissions by a net 75 million lbs., water usage by 818 million gallons and energy use by 174 MWh. Stated differently, each mattress recycled provides environmental benefits equivalent to driving 60 fewer miles, saving 500 gallons of water and saving enough energy to power an average household for three days. The [full report is available on MRC's website](#).

In addition to evaluating the environmental benefits of recycling post-consumer polyurethane foam using the mechanical processes that MRC's California recyclers

employ (which prepares this material primarily for use in making carpet padding), the LCA also evaluated for comparative purposes the environmental impacts of advanced recycling processes such as chemical recycling and pyrolysis, as well as incineration. The LCA demonstrates that the advanced recycling processes provide significant net environmental benefits that are similar to mechanical recycling and that all provide significant benefits compared to landfill.

MRC will use the LCA in a variety of ways. First, it provides a benchmark for evaluating future performance. Second, the LCA will help identify potential areas of improvement (transportation, location of recyclers and collection sites, etc.). Third, the LCA can guide future research and investment decisions. Finally, MRC will use the data to increase the public's awareness of the benefits of recycling.

In 2023, MRC completed an independent review to verify the LCA findings in compliance with requirements set by the International Standards Organization. The review committee confirmed the overall environmental benefits of the recycling program and identified areas which required further clarification. A detailed discussion about target virgin material displacement rates led to a deeper understanding of environmental impacts and the importance of diversifying end uses for recycled materials. An addendum reflecting the committee's findings and subsequent report revisions was developed and is attached to the final report on MRC's website. The cost for the independent review was \$32,235.

Enzymatic Digestion of Blended Textiles and Fibers

Mattress textiles make up a considerable percentage of total current mattress recycling waste. They also pose a significant recycling challenge due to the wide variety of blended synthetic and natural fibers used in their production. The shoddy pad layer of mattresses, which is typically a mix of non-woven cotton and polyester fibers, is particularly difficult to recycle into useful products. As a result, the vast majority of recovered textile material is currently landfilled.

In August 2021, MRC contracted with Dr. Richard Gross of Rensselaer Polytechnic Institute (RPI) to explore enzymatic digestion of cotton-polyester blended textiles, with an initial focus on shoddy felt pads (shoddy). The research project also included collaboration with several textile industry participants.

Dr. Gross's research team devised a two-step cascading enzyme concept to convert shoddy into building block chemicals. First, commercially available enzymes converted PET fiber into ethylene terephthalate and ethylene glycol. Following PET conversion, the remaining cotton was enzymatically reduced to glucose, again using commercially available enzymes.

The research team demonstrated that enzymatic digestion can be an effective way to recycle cotton-polyester blends with varying composition. Unfortunately, yields in this study were rather low and further research will be necessary. More information can be found in the [full report published March 2023 on MRC's research web page](#).

In follow up discussions with small businesses and researchers engaged in developing higher performance enzymes, we learned that while the field shows promise, there are many technical hurdles that impede progress toward commercially scalable solutions. MRC will monitor progress as the industry develops. For the present, no further research is planned. Project costs were \$100,000.

Cotton Fibers in Biodegradable 3D Printed Composites

MRC contracted with West Virginia University to explore the use of recycled mattress cotton in biodegradable 3D printed composites. The project, under the direction of Dr. Sunidhi Mehta, attempted to develop and test extruded filament feedstocks using cotton and a biodegradable binding resin such as polylactic acid. Unfortunately, the starting test formulations tended to clog the 3D printer nozzles.

As a fallback, the researchers decided to make compression molded samples and begin biodegradation studies. In parallel, they will continue formulation development. Biodegradation studies concluded in late 2023.

Biodegradation studies were conducted in an aerated moist environment designed to simulate conditions in a typical composting facility. Greenhouse gas emissions were measured every 12 hours over 60 days. Degradation rates were also measured. The findings show that pure cotton and composites with biodegradable binding resins had similar emissions profiles, which were predominantly carbon dioxide with trace amounts of methane and carbon monoxide. Other studies find landfill gas emissions caused by decomposition of organic material in an anaerobic environment typically contain as much as 50% methane in addition to carbon dioxide. Methane has 28 times greater global warming potential than carbon dioxide. Therefore, we conclude that while mechanically recycling recovered cotton is the preferred option, composting is a viable alternative having a far superior environmental impact over landfilling. The project cost \$71,289.

Foam Testing

Potential new end-users of post-consumer mattress foam want data describing the nature and variability of foam feedstocks before they invest time and money in new market development projects. MRC contracted with UCLA in late 2021 to characterize post-consumer mattress foam. The scope of work involved three distinct sub-projects:

- Statistically describing the chemistry and physical property variation of the population of recovered foam
- Quantifying and characterizing extractable additives and residual compounds in post-consumer mattress foams
- Detecting bacterial growth and mold formation in post-consumer mattress foams

Due to cost and logistical constraints, the researchers characterized only limited quantities of materials. For that reason, this is an initial effort at characterizing this material. Additional work on this subject will be useful.

The study's results indicate that the population of polyurethane foams fall into three clusters in terms of resilience and polymer composition. These clusters include memory (viscoelastic), conventional and high resilient foams. While density alone was not sufficient to distinguish the foams, the study showed clear differences between the chemical composition and thermal properties of memory and conventional foams. Interestingly, resilience, measured by a simple ball rebound test, was highly correlated to the chemical composition and thermal properties. Thus, this simple field implementable technique can be used to establish foam sorting criteria.

[This study, posted on MRC's website](#) in April 2024, contributes to our ultimate objective, which is for recyclers to provide feedstock to material buyers with known composition and consistency for higher value end-uses.

The cost of this multi-year study was \$175,965.

Active Research Projects

Lean Manufacturing Assessment of MRC California Recyclers

In November 2021, MRC established a lean manufacturing program (lean). Lean is an improvement and problem-solving methodology that strives to reduce or eliminate activities that do not add value to an organization. MWS and Associates (MWS) helps MRC recyclers and staff establish a lean culture throughout MRC's recycling network. Since the program was established, MRC recyclers have demonstrated continued overall productivity improvements.

In 2023, MWS again contacted all MRC recyclers to create or update a development plan tailored to their facilities. At the time of this report, MWS completed site reassessments at three facilities with the remaining scheduled for later in 2024. Additionally, two recycling facility leaders have received lean White Belt Certifications, which indicates a fundamental understanding of the basic concepts of change management and is a prerequisite to obtaining additional lean certifications.

MWS has recently expanded staffing with qualified Lean Six Sigma Black Belts and the program will continue in 2024.

Recycling Facility Fire Assessments

Mattress recycling can involve fire safety risks. To encourage MRC's recyclers to learn about and implement fire safety compliance and mitigation tactics, MRC contracted with Doyle Sullivan LLC, a nationally certified fire safety consultant with over four decades of experience in fire prevention and suppression.

In 2023, Doyle Sullivan provided fire assessments at each MRC contracted recycling facility in California to evaluate fire risk reduction opportunities and code compliance. These assessments are intended to help each facility understand the complexities of fire safety. MRC encourages all recyclers to conduct and provide our contractor with a monthly fire risk self-assessment that provides a basis for on-going discussion and awareness of fire prevention throughout the year.

MRC will provide this service again in 2024.

Vitrimerization of Polyurethane Foam

In May 2021, MRC contracted with Edge Geoscience Inc. (EGI) to explore whether mattress foam can be converted into valuable reformable polymers. The main objective of the project was to assess the feasibility of creating new components for various consumer and industrial products, like shoe soles, conveyor belts, tool grips and other applications.

The project leveraged previous work conducted by leading university material science laboratories which demonstrated that polyurethane foams can be thermo-chemically converted into covalent dynamic networks (vitrimers). Vitrimers are meltable pellets that can be reshaped and recycled into useful products. EGI was successful in its attempt to scale this technology using post-consumer mattress foam.

EGI built a pilot scale process with enough capacity to seed product development activities and is collaborating with a mattress recycler to explore business model options and assess economic viability. In parallel, EGI is developing new formulations with 50% to 100% recycled content to meet specifications in target applications. This work will continue in 2024.

Pilot scale samples are now available and EGI plans to work with potential end users to fine tune formulations and establish supply agreements. The MRC funded portion of the project is expected to conclude in mid-2024 and a final report suitable for public release will be published. At that time, MRC will explore options to accelerate bringing the technology to commercial scale.

Oleo Sponge

While demand for foam for use in carpet rebond declines, U.S. mattress recyclers are steadily increasing their output of recycled foam. Two main factors contribute to this growth: newer boxed mattresses tend to contain more foam than traditional mattress construction types and the number of units recycled has increased over time. To sustain foam recycling rates, our recyclers need economically viable markets in addition to the carpet rebond market where they can sell this material.

A 2017 report published by Barry, Mane, Elam and Darling of the Argonne National Laboratory described the development of a reusable oil absorbing foam technology called [Oleo Sponge](#). These researchers successfully used a pilot scale sequential infiltration synthesis process to modify the surface chemistry of common polyurethane foams. These modifications optimized the oil and water absorption properties of foam for use in oil clean-up applications. However, the modification process involved costly and difficult to scale procedures.

In discussion with industry experts, MRC learned that although oil absorbing polyurethane foam may excel in some applications, raw material and manufacturing costs of creating virgin foam for these purposes is an economic barrier. To learn if the economics could be improved by using modified post-consumer mattress foam, MRC requested research proposals in January 2022.

MRC is currently sponsoring a project with Prof. Tim Long's group at Arizona State University (ASU) to modify the surface physics of post-consumer mattress foam. The ASU team has demonstrated that some simple chemical modifications at laboratory scale creates a foam with high oil absorption characteristics and dramatically increased selectivity for oil over water absorption.

While the current target is to cost effectively introduce oleophilic properties into a foam through chemical modification, MRC believes that a general technology platform for modifying the high surface area of foam could provide opportunities for upcycling post-consumer foam in a variety of other applications, including air filtration, water filtration, moisture retention and gas absorption. We anticipate project completion in mid-2024.

Compression Trailer

A full 53' trailer of efficiently stacked mattresses contains about 110 units weighing 6,000 lbs. These trailers, however, are capable of hauling 40,000 lbs. of material. MRC was interested in exploring the feasibility of using compression trailers to reduce transportation costs. In Europe, compression trailers are used to reduce the transportation costs of bulky, low-density materials, such as flexible polyurethane foams. In 2022, MRC contracted with GG Transport to manufacture a prototype container that would compress whole mattresses to increase the density and number of units that could be transported per haul.

The project focused on two potential objectives:

1. Compressing loose pocketed coils recovered from mattress recycling facilities throughout California for transport to a centrally located processing facility in Fresno for recycling.
2. Transporting whole units from public mattress collection sites to recycling facilities. MRC's 2021 LCA documents that this activity alone represents approximately 36% of the program's greenhouse gas emissions in California.

Compression of full mattresses, however, could harm mattress staging and dismantling operations if units are crushed or disfigured. Therefore, GG Transport will conduct tests to determine the maximum amount of compression to validate the technology the company is developing. We anticipate project completion in mid-2024.

Future Areas of Interest

Bridging the Gap

In early 2024, MRC launched a new initiative to accelerate driving promising research projects to commercial scale. In most cases, a concept proven at lab scale requires additional research to produce an improved material at larger scale and integrate the concept into final products. Unfortunately, the risk profile of production scale investment without clear sight of revenue is a formidable challenge for most enterprises. As a result, promising innovations can stagnate for lack of investment at this stage, a phenomenon often referred to as the “innovator’s dilemma.”

Driving innovations to commercial scale requires collaboration at multiple levels in the supply chain. Obtaining buy-in from end users, developing prototypes and investing in pilot scale production are examples of activities that are necessary to take technical and commercial readiness to a self-sustainable level. To focus on this challenge, MRC increased technical resources and funding to help create awareness of the potential market value, de-risk scale-up activities, build networks and encourage assembly of end-user sponsored product development teams. Co-investment from the marketplace may take many forms including government sponsored small business innovation awards, government grants, corporate sponsorship and private party agreements.

Manufacturing Battery Electrodes from Recycled Mattress Materials

A research team led by Dr. Ram Gupta at the National Institute for Materials Advancement (NIMA) completed a 3-year study sponsored by MRC which successfully developed dual carbon and lithium-sulfur batteries using recycled mattress materials.

The results were very encouraging. Test data indicated that electrodes made from recycled cotton, shoddy pad and coconut fiber had significant performance advantages over common electrode materials, such as carbon black, graphene and carbon nanotubes. In January 2022, NIMA completed follow up research to construct and test actual batteries using the developed components and evaluate their performance. When used in lithium-ion test batteries, recycled mattress materials had very high storage capacity and good power density. They retained over 90% performance over 10,000 charge-discharge cycles (roughly equivalent to a 10+ year service life).

For dual carbon batteries, recycled mattress materials were used to make both the anode and cathode. NIMA also developed cathodes suitable for use in lithium-sulfur batteries. These devices were also electrochemically stable up to 10,000 charge-discharge cycles. The Coulombic efficiency was almost 100%, suggesting no loss of energy during the charge and discharge process.

The findings are significant for several reasons. The rapid increase in rechargeable battery demand has created a global shortage of carbon feedstocks used to make electrodes. Recycled mattress materials, particularly non-woven textiles, may be an inexpensive, clean and abundant feedstock that can fill current and emerging needs. Presently, a large percentage of mattress textiles are landfilled due to a lack of economically viable markets. Creating a new market channel that uses recycled textiles to make domestically produced carbon electrodes would have significant environmental benefits.

Further details are in the [full report on MRC's web site](#). At this point, the NIMI team is interested in developing industry relationships to explore the potential for commercializing this technology. MRC is assisting in this effort by leveraging its network and establishing new relationships with potential collaborators.

Textile Recycling

MRC's 2021 waste characterization study determined which types and quantities of materials recyclers were landfilling and why. A key finding was that textiles, particularly nonwoven materials such as mote cotton, spun bond polypropylene and shoddy pads represent about 60% of all waste products from the mattress recycling process. Recyclers landfilled these textiles primarily because there is no market for them. In April 2022, MRC requested proposals to explore and develop new applications for post-consumer mattress textiles. MRC will continue to engage potential textile recycling innovators and circularity experts to further expand its project portfolio in this area.

As reported in prior years, MRC successfully worked with innovative companies to develop improved processes for recycling pocketed coils. This resulted in a significant improvement in metal recycling rates. Unfortunately, the spunbond polypropylene sleeves recovered were often contaminated with hot melt adhesives and metal fragments which significantly limited recyclability. Through ISPA's 2023 sustainability conference, Customized Recycling Programs, a pocketed coil recycling equipment supplier, connected with SABA, a leading adhesive manufacturer. Both organizations collaborated to develop a polypropylene-based hot melt adhesive which is compatible with the polypropylene sleeve fabric and is easily handled in recycling processes. Additionally, part of the feedstock for this new adhesive is derived from post-consumer polypropylene fiber recycled from pocketed coils.

Biochar

The biochar industry in California is not well developed, with most companies operating at pilot or small scale. MRC is exploring biochar as a potential end use for post-consumer mattress wood, cotton and coconut fiber and has identified a California-based company interested in using these materials to make both energy and a char soil amendment that sequesters carbon from the feedstock in the finished biochar product. A pilot project is planned for 2024.

NSF-Funded Foam Circularity Research

MRC serves on the Stakeholder Committee for a five-year project funded by the National Science Foundation (NSF) called the Emerging Frontiers in Research & Innovation Circularity of Cross-linked Polyurethane Foams. This research is being conducted by scientific teams from Arizona State University and Virginia Polytechnic Institute and State University. The Stakeholder Committee provides insights from essential stakeholders in the U.S. polyurethane foam value-chain that will inform and guide the research team's efforts, decisions and resource allocations. The Stakeholder Committee convenes regularly to establish a conduit and communication channel between industry members and the research team.

Sustainability

Circularity for the Mattress Industry

As MRC manages its own efforts to improve mattress recycling and find new and better markets for reclaimed mattress materials, we regularly communicate with other mattress recycling organizations around the world and stay abreast of broader efforts being pursued to work toward a more circular economy for mattresses.

Designing mattresses that are easier to recycle is a common thread in discussions among manufacturers interested in sharing best practices. However, end-of life management priorities and strategies diverge significantly from region to region. Rather than invest in conventional recycling infrastructure, which is mostly downcycling, some countries are interested in moving directly to technologies that would recycle polymeric materials (such as the foam and some fibers) through chemical recycling and pyrolysis. We anticipate further debate regarding the best ways to incentivize global development of chemical recycling technologies and investment in commercial scale facilities.

In Europe, several pilot and commercial chemical recycling facilities convert post-consumer polyurethane foam back into its chemical building blocks that can then be used to make new foam or other materials. With increased experience and a better understanding of the technical risks and business case, public-private sector entities and industry led consortia are exploring means to globally expand the most promising technologies. Decisions regarding the size and placement of these future facilities will have significant environmental and economic impacts. MRC has been actively engaged

with these organizations to provide volume estimates and feedstock quality data to help inform these decisions.

In the United States, MRC continues its focus first on developing better and new markets for our recycled materials. Although mechanical recycling does not create full circularity, it is an important part of the overall strategy because it typically has a favorable environmental impact. Second, MRC thinks that building operational efficiencies to collect, transport and process discarded units is equally important. In these two areas, MRC is taking a leading role and sharing findings with other regions.

Finally, among stakeholders, consensus is building that circularity is an idea that will take considerable time and investment to attain. Moving forward, several industry trade organizations in Europe, the United States, Asia and Australia have committed to playing a lead role to encourage investment and to facilitate communication and collaboration in pursuit of this goal. Global collaborative networks have already formed to explore and address capability gaps systematically with the following initial priorities:

- Develop better designs
- Develop the means to increase recycled content in raw materials
- Build a sustainable logistics and recycling infrastructure
- Establish a science-based forum to advance meaningful innovation
- Establish a more informative material labeling system
- Develop an effective, easy-to-understand communication plan for consumers

Industry Work Group on Circular Design

MRC formed the Industry Workgroup on Circular Design to help members of the value chain take end-of-life recycling challenges into account when they design new components and mattresses. MRC shares lessons learned from mattress deconstruction and recycling with the workgroup to help find strategies that will reduce waste generation and create value by recycling post-consumer mattress components.

The workgroup met during ISPA's 2023 Sustainability Conference and continues to meet annually with both foam and other component suppliers and mattress manufacturers. In 2023, MRC expanded the discussion to include mattress recyclers. The workgroup's goals are to:

- Discuss how to improve the circularity of mattresses.
- Share recyclers' experiences with suppliers, designers and manufacturers to understand design and materials impacts on mattress deconstruction and end-of-life component recycling.
- Anticipate whether new materials and assembly techniques will require adjustments to recycling infrastructure when a mattress is discarded.
- Establish consensus circular design principles for the mattress industry.

The 2023 meeting focused on feedback from recyclers that may be used to improve the circularity of future designs. The meeting opened with a general discussion and then divided into three breakout sessions covering:

- **Design for Deconstruction:** How mattress design, component composition/selection and assembly techniques might be adjusted to reduce manufacturing waste, improve recyclability and reduce recycled material contamination.
- **Product Material Traceability:** How the material composition of the mattress can be communicated to consumers and recyclers and the barriers to such communication.
- **Identifying Barriers to Circularity:** Discuss the current barriers to converting post-consumer mattress materials into viable new products.

Pocketed Coils

Pocketed coils are an example of how this workgroup and the industry is addressing one component recycling challenge. A pocketed coil innerspring unit is usually made from steel coils enclosed in polypropylene fabric sleeves. Although a pocketed coil innerspring unit can be easily separated from other mattress components (foam, fiber, etc.), quickly and efficiently separating the steel from the polypropylene fabric has been an ongoing challenge. Additionally, the glue used to assemble the pocket coil structure can be a contaminant for some buyers of scrap polypropylene fabric. In response, the industry has developed several solutions that include developing:

- Shredding and other equipment that efficiently separates the polypropylene and steel to maximize the quality of each material for commodity markets
- Polypropylene-based glues that are more compatible with the fabric for potential buyers of the recycled fabric
- Sonically welded pocket coils structures that eliminate the use of glue
- Perforated polypropylene fabric that allows the pocketed coils to be separated more easily at recycling facilities.

Additionally, BedTimes magazine published a case study on the industry's response to the pocketed coil challenge called [How Industry Collaboration is Improving Sustainability](#) in the February 2024 issue.

The Industry Workgroup on Circular Design will meet again during ISPA's Sustainability Conference on September 25–26, 2024, in Charlotte, NC.

Industry Work Group on New Materials

MRC formed the Industry Workgroup on New Materials to identify end-of life challenges posed by mattresses being sold to consumers today, advise MRC on anticipated long-term changes in product mix and raise industry awareness about how design and marketing decisions can affect recycling. Members of the workgroup represent

foam, textile and spring suppliers as well as MRC board members. Members share information about new materials introduced since the last workgroup meeting. Participants evaluate the implications that new materials may have on future mattress recycling. The workgroup's efforts inform MRC's research team and assist recyclers in preparing for these challenges as well as forecast future types and quantities of mattress materials available for recycling. The workgroup meets with MRC annually.

During the 2023 meeting, the workgroup identified potential challenges and suggested that MRC continue to engage with the industry to better understand how product design and individual components affect the recycling process.

Circular Economy for Polyurethane Foam

Polyurethane foam is an important material used in most mattresses. At present, only a small percentage of polyurethane foam is recycled globally. An interdisciplinary international effort to improve polyurethane foam circularity has been underway for several years.

Most major polyurethane chemical suppliers have established goals to reduce their carbon footprints by 50% by 2035 and achieve net zero by 2050. As part of these initiatives, researchers are actively working on feedstocks derived from bio-based and chemically recycled materials. While several manufacturers have already introduced products with increased bio and/or recycled content, MRC understands that these new products still have low industry adoption rates.

To further enhance circularity in the EU, several chemical companies have partnered with recyclers to develop end-of-life solutions for post-consumer foam. This field is very active, with several pilot and commercial facilities now producing recycled content polyol, subsidized by EU funding. These recycling processes and their resulting outputs are dependent on facility design, which is taking three distinct paths:

1. Low energy intensity processes generate a mixture of urethane chemicals. Formulations to use these recovered materials to displace virgin chemicals in the flexible foam manufacturing process are under development and show promise. Recycled content in finished products, however, currently tends to be less than 25%.
2. Alternative depolymerization technologies effectively separate the major chemical components in a purer form that can be used to make new foam or other products. With some adaptation in formulating technologies, these materials may be used to make products with much higher recycled content.
3. More energy intensive developmental processes can generate building block chemicals that theoretically could be further refined or used as feedstocks in existing chemical manufacturing facilities. Displacement of virgin products in these facilities could approach 100%.

Each of these approaches has a cost/performance tradeoff. At this point, the cost to generate chemicals from a recycled material feedstock exceeds the cost of production from virgin sources. Therefore, investment to generate the recycled chemicals on a commercial scale will require subsidies.

MRC's current recycling rate for polyurethane mattress foam exceeds 80% (almost all of which is mechanically recycled into carpet padding). However, consumer demand for carpet padding is falling because carpet's share of the U.S. flooring market is declining. Furthermore, as more states enact their own mattress recycling laws, the supply of post-consumer mattress foam will increase.

Therefore, to sustain the currently high recycling rate for polyurethane mattress foam, it is imperative that MRC seek to develop new markets for this material. Our recent LCA study demonstrates that mechanical and chemical recycling processes have similar environmental benefits.

As discussed earlier in this chapter and in previous annual reports, MRC is also funding research on an alternative low intensity thermomechanical recycling process called vitrimerization, which has the potential to convert foam into reformable polymers for use in a variety of common consumer products. While these are not purely circular solutions, preliminary assessments indicate that they might offer favorable environmental benefits. MRC thinks that investment in all options will be necessary to substantially improve the global recycling rate for mattress foams.

Sleep Products Sustainability Program

In 2019, MRC launched an initiative called the Sleep Products Sustainability Program (SP2), focused on providing mattress manufacturers with a management process for reducing material waste, water and energy consumption. SP2 helps individual mattress manufacturers analyze and understand the environmental impacts of their products by examining:

- The raw materials they manage and consume in manufacturing and distributing those products
- The energy, water and other resources needed to manufacture and distribute mattresses, and how to manage and minimize waste products generated at each stage in the manufacturing and distribution process
- The nature and designs of the products they manufacture
- How the products they manufacture today are managed at the end of their useful lives by recyclers

SP2 helps mattress manufacturers develop methods for improving their businesses, products and processes in light of these factors. For example, these methods identify steps manufacturers can take to reduce their environmental impacts, define metrics for

measuring the impact of those changes and learn from best practices. The goal is to help mattress manufacturers create voluntary and practical environmental management systems that can produce continual improvements over time, reinforced by periodic follow-up reviews by MRC.

In 2023, MRC began piloting SP2 with a component manufacturer and will use the pilot to inform how SP2 can be used for all component manufacturers.

Program Criteria

SP2 includes methods to train and verify the participant meets the SP2 requirements. A participant must meet the criteria in Table 29 to obtain SP2 certification:

TABLE 29: Sleep Products Sustainability Program Criteria and Requirements

Category	SP2 Criteria	Requirement
Plan	Environmental Policy	Must be written, adopted by management and communicated to staff
	Facility Impact Assessment	Must evaluate activities, their impact on waste and control methods
	Goals and Targets	Must have targets for waste reduction, reviewed by top management
	Measurement of Progress	Must track waste generation and disposition
People	Employee Awareness and Engagement	Must train, gather improvement ideas and provide feedback
	Supplier Partnership	Must conduct one supplier project each year to reduce waste
	Best Practice Sharing	Must share best practices in industry at least once per year
Process	Regulatory Compliance	Must be in compliance with all environmental regulations
	Program Verification	Must conduct periodic walk throughs for waste programs
	Corrective and Preventative Actions	Must track corrective actions and review periodically
	Program Resilience	Must plan how to respond to program disruptions

Program Resources

MRC has developed the following resources to meet the needs of SP2 participants:

- **Training:** A comprehensive, personalized training for all participants. Offered in-person or virtually.
- **SP2 Requirements Document:** A concise document detailing the minimum requirements for certification.
- **SP2 Guidance Document:** A comprehensive document that details each of the 11 requirements, providing a description, examples and gap analysis questions.
- **SP2 Resources Website:** A participants-only website that contains program material, archived webinars and downloadable tools to assist with certification.
- **SP2 Toolkit:** A monthly resource that provides participants with methods and examples to achieve one of the SP2 requirements.
- **Program Tools:** Downloadable tools to help participants assess, track and make progress towards certification. Tools include facility impact assessment and gap analysis templates, a utility tracking tool, a corrective and preventative action tracking tool and a program verification checklist.

In 2023, MRC developed the following additional resources and online tools to assist participants in the SP2 process:

- **Maintenance Audit Protocol:** The protocol for monitoring participants and their continued operation of their SP2 System was revised for the years before full recertification, focusing on target performance and metrics.
- **Goals and Targets Template:** This new tool was created to assist with recording goals and targets along with the metrics needed to track them and the projects that achieve them.
- **SP2 Training Material Suggestions:** This new tool was provided after MRC received requests from participants for ideas of what to add to SP2 training for employees. It brings together ideas and best practices from certified facilities.
- **SP2 Utility Tracking Tool, Revised:** This tool was updated to include additional data fields requested by participants.
- **SP2 New Participant Training, Revised:** The training was updated to reflect program updates and incorporate best practices from certified facilities.
- **eLearning Pilot:** MRC is developing an eLearning version of the initial participant training to make the training more efficient and accessible to participants.

Program Metrics

MRC uses the following metrics to determine the success of the program:

- **Participant Status:** Participant count at each stage (registration, training, developing, certification, recertification)
- **Waste Diversion:** Qualitative description of participants' waste diversion activities and quantitative data regarding waste diverted by participants (anonymized and aggregated after completing five certifications)
- **Education and Outreach:** Number of impressions or touchpoints with current participants (newsletters, trainings and webinars, etc.), and number of impressions with potential participants (marketing, advertising, webinars, etc.)

Participant Status

Table 30 provides the participant count at each stage of SP2. MRC continues to assist trained facilities with achieving their SP2 certification and recruit eligible manufacturers that sell mattresses to California residents and businesses.

TABLE 30: Participant Count

Participant Status	2021	2022	2023
Registered/Untrained	2	0	1
Trained/Developing Program	2	3	2
Certified	1	2	1
Recertified	0	1	1
Total	5	6	5

Registered/Untrained participants have registered to participate in the program but have not received training. Trained/Developing participants received training and are working on the SP2 requirements. Participants can be in this stage for six months to one year while evaluating current sustainability activities, identifying opportunities and implementing new practices. Certified participants have met all requirements and obtained SP2 certification. Recertified participants have recertified their SP2 program at least once.

Waste Diversion

To achieve SP2 certification, each participant must set qualitative goals and quantitative targets for waste reduction and diversion. The participants certified in 2023 achieved the following waste reduction impacts by combining existing sustainability efforts with targets developed using SP2 principles:

- Increased their recycling rate from 50% to 87% in less than 12 months after establishing their SP2 system.

- Combined lean production principles with their SP2 system to reduce greenhouse gas emissions from their truck routes through more efficient routing.
- Reduced and reused materials by partnering with suppliers to reuse pallets, wood bracing and cardboard roll cores.
- After conducting a recycling Kaizen event, the facility reworked their recycling signage and color coding throughout the facility, created maps of collection points and reconfigured their collection process. Annual savings are projected to be \$35,000.
- Developed a recycling checklist for new product launches, so that recycling infrastructure is in place before a new product begins production.
- Achieved an 89% recycling rate, diverted 1.1M pounds of waste from incineration and landfill and is now generating less than 1 pound of waste for every mattress produced.
- Implemented a disciplined end-of-shift shutdown procedure to reduce energy consumption by over 50%.

In 2024, MRC will provide qualitative descriptions about SP2 participants' waste diversion targets. Once MRC has certified five participants, anonymized and aggregated waste diversion quantitative data will be reported in future annual reports.

Education and Outreach

To recruit participants, MRC publicizes SP2 among mattress manufacturers and in industry trade publications—BedTimes, Sleep Savvy and Furniture Today—both print and digital editions and in monthly social media posts. MRC generated further awareness about SP2 through its participation during ISPA's Sustainability Conference. All SP2 announcements, advertisements and outreach materials encouraged readers to visit a dedicated webpage (www.MattressRecyclingCouncil.org/SP2).

In 2023, MRC published two newsletters for SP2. SP2 Toolkit is distributed monthly to participants in the program—those already certified and those working towards certification. SP2 Insights is distributed quarterly to potential program participants as a recruiting tool.

SP2 Toolkit: The monthly toolkit sent to 28 program participants has an average open rate of 38 percent. The format of this newsletter is non-traditional with content focused on one of the 12 key steps in the certification process.

SP2 Insights: This quarterly digest distributed to 125 participants has an open rate of 40 percent. Content includes program news, case studies and video clips of sustainable practices in the furniture industry.

TABLE 31: Marketing Tactics and Metrics

Tactic	Frequency	Outcome
Trade Publication Printed Ads	Furniture Today	14,000 distribution
	BedTimes (5 times)	3,300 distribution, 16,500 total distribution
Trade Publication Digital Ads	Furniture Today (eblasts, digital display, sponsored web content, social and newsletter)	49,406 views and impressions, 444 click-throughs
	BedTimes in Brief newsletter	13,838 total delivers, 9,189 opens, 59 clicks
Social Media	25 social posts	Two separate posts were each posted once a month. Together there were about 2,500 views with six likes and two shares.
Videos & Webinars	SP2 promotional video	Total views since 2020: 460
	Elements of 2020 video incorporated in 2022 video: The Road Ahead	1,000 views since Nov. 2022
	Dec. 2022 webinar recording	164 lifetime views
Presentations & Events	2023 Sustainability Conference	Sponsor and participant

Financing Mechanism

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR § 18964 (b)(9) — Financing Mechanism. Include the mattress recycling organization's total expenses and revenues associated with the implementation of the used mattress recycling program. Changes to the mattresses recycling charge shall be reflected in the annual program budget for approval by the department. If a mattress recycling organization conducts activities that are separate from the implementation and management of the California used mattress recycling program, then the annual report shall include documentation on how the collection and use of funds from the California mattress recycling charge were kept separate from other activities of the mattress recycling organization, including the methodology for distribution of shared costs. Consistent with subdivision (a) of section 42990.1 of the Public Resources Code, the annual report shall include the following:

- (A) Mattress recycling charge per mattress size
- (B) Capital costs
- (C) Education/Outreach costs
- (D) End-of-life used mattress management costs with line items, if applicable, for collection, transportation, recycling, renovating, reuse, and proper disposal
- (E) Program administration costs including, but not limited to, the department's costs pursuant to subdivision (a) of section 42988.2 of the Public Resources Code, and third party legal costs. Surplus funds, if any, and detailed rationale for the specified level of surplus.

Financing Mechanism

Mattress Recycling Council Inc. (MRC Inc.) operates similar mattress recycling programs in three states: California, Connecticut and Rhode Island. In 2017, MRC Inc. established separate limited liability companies (LLCs) for each state program. The LLC operating the California program is Mattress Recycling Council California, LLC (MRC).

Each state program's LLC maintains its own financial records to reflect the receipt of the appropriate recycling charge and the direct expenses that it incurs (e.g., collection, recycling, transportation, communications, etc.). MRC Inc. allocates shared expenses (e.g., administration costs, overheads, etc.) among the three state program LLCs based on the relative population of each state. Each LLC also has a separate reserve for that state program.

Using the format specified in CalRecycle's regulations, we review MRC's total 2023 expenses and revenues associated with the California program with tables comparing 2023 actual expenses and revenues to 2022 actuals, as well as projections for 2024 and the budget for 2025, subject to CalRecycle's approval, as follows:²

Revenue from the Mattress Recycling Charge

Cal. Pub. Res. Code § 42989(b)(2) authorizes MRC to either (1) set a single recycling charge that applies to all sizes and types of mattresses and foundations, or (2) set two different charges "to accommodate mattress size differentials." MRC maintained a single charge for 2023 and in its 2024 budget (as approved by CalRecycle). Factors MRC considered that supported this decision included avoiding confusion among retailers and consumers, ease of consumer messaging and simplified charge collection and reporting obligations for retailers when they collect the charge from consumers and then remit those charges to MRC.

MRC has a single recycling charge for mattresses and foundations sold in Connecticut and Rhode Island, the other two states in which it administers similar mattress recycling programs, and, like California, that arrangement has worked well in those states. Having

² For these purposes, all 2022 and 2023 revenue and expenses are based on MRC's audited financials. Projections for 2024 are based on unaudited 1st quarter 2024 actuals and forecasted revenue and expenses for the remainder of the year. Proposed 2025 revenue and expense amounts cited in this annual report have been approved by the MRC Board of Directors and have been submitted separately to CalRecycle in MRC's 2025 Budget.

a single recycling charge, regardless of mattress size, that is consistent across state programs avoids confusion among multi-state and online retailers.

MRC collected this recycling charge on all sales of mattresses and foundations to California residents or end users (e.g., hotels, educational institutions, etc.), regardless of size. In 2023, registered retailers and other sellers reported California sales of 3,383,382 units, 9.9% less than 2022, including 723 units sold in prior years (2016–2017) at the \$11 fee. As a result, in 2023 MRC collected recycling charge revenue totaling \$35,525,873 (3,382,659 units multiplied by \$10.50 plus 723 units multiplied by \$11). This represents a 9.9% revenue decrease from 2022.

In 2023, the California program also earned \$21,309 in late fees on recycling charge remittance from retailers to MRC. The total revenue for 2023 including recycling charge and late fees was \$35,547,182.

Table 32 shows MRC's 2022 and 2023 actual revenue from the recycling charge and late fee revenue, MRC's 2024 projected revenue and its proposed 2025 revenue.

TABLE 32: Program Revenue

Category	2022 Actual	2023 Actual	2024 Projections	2025 Proposed Budget
Recycling Charge Revenue	\$39,438,301	\$35,525,873	\$35,170,254	\$55,200,560 ³
Late Fee Revenue	\$35,903	\$21,309	\$20,000	\$25,000
Total Revenue	\$39,474,204	\$35,547,182	\$35,190,254	\$55,225,560

Capital Costs

Other than modest expenditures on computers, software and office equipment, MRC incurred no capital costs in 2023 related to the California program.

Education and Outreach Costs

Costs for education and outreach activities in 2023 totaled \$2,798,276, 2.9% lower than 2022, representing 6.4% of total expenses. MRC continued to meet its communication objectives, providing robust industry- and consumer-targeted outreach as explained in the [Education and Outreach](#) section of this report. Table 33 shows MRC's 2022 and 2023 actual education and outreach costs, its projected 2024 costs and its proposed 2025 expenses.

³ 2025 Proposed Budget includes a fee increase detailed in the 2025 Budget.

TABLE 33: Education and Outreach Costs

Category	2022 Actual	2023 Actual	2024 Projections	2025 Proposed Budget
Advertising and Consumer Education	\$1,712,860	\$1,567,979	\$1,540,000	\$1,540,000
3rd Party PR Agency	\$589,874	\$584,993	\$590,000	\$590,000
Industry and Stakeholder Outreach	\$215,297	\$190,303	\$192,000	\$192,000
Conferences & Events	\$54,073	\$79,042	\$48,600	\$50,100
Annual Report Expenses	\$23,240	\$30,293	\$35,000	\$35,000
Subtotal	\$2,595,344	\$2,452,610	\$2,405,600	\$2,407,100
Travel	\$32,745	\$28,041	\$28,600	\$29,400
Staff Expenses	\$252,611	\$317,625	\$330,000	\$346,500
Total Education and Outreach Costs⁴	\$2,880,700	\$2,798,276	\$2,764,200	\$2,783,000

⁴ The 2023 audited financial statements include Education and Outreach staff expenses in the Management, Staffing, and General Expenses category and travel expenses in the Staff and Officer Travel Expense category.

End-of-Life Used Mattress Management Costs

MRC classifies as Operational Costs expenses incurred for mattress collection (including the Illegally Dumped Mattress Collection Initiative), transportation and recycling. As summarized in [Table 34](#), MRC's 2023 Operational Costs for end-of-life management were \$33,457,977, a decrease of 1.0% from 2022 levels. Total units collected and recycled in 2023 were 1,461,946, an increase of 3.1% from 2022 units. This increase in units collected directly affected the recycling and collection costs.

The following provides additional details for Operational Costs:

Collection Costs

- **Solid Waste Handling Fees:** MRC paid \$3,369,947 (0.2% less than 2022) to collection sites throughout the state to compensate them for consolidating discarded mattresses and preparing them for transport to an MRC recycling facility.
- **Collection Containers and Storage:** MRC incurred \$1,671,336 in 2023 (4.8% more than 2022) to lease trailers and roll-off containers used to hold and transport collected mattresses.
- **Consumer Incentive:** In 2023, MRC recyclers paid a total of \$339,652 (13.7% more than 2022) in consumer incentives to encourage residents to deliver discarded mattresses directly to MRC recycling facilities and one external consumer incentive location. In setting the per unit incentive amount, MRC took into account Cal. Pub. Res. Code § 42985(b), which states the legislature's intent that MRC's

statewide program not undermine existing used mattress recycling, resale, refurbishing and reuse operations that are in compliance with state and federal law.

- **Collection Site Signage/Guidelines:** MRC incurred \$10,439 in 2023 (58.8% less than 2022) to provide new collection site signage and updated written guidelines to collection sites. MRC only produces the signs when a new site joins the program or MRC must replace damaged signage.
- **Illegally Dumped Mattress Collection Initiative:** MRC spent \$871,014 in 2023 (15.1% less than 2022) to address illegally dumped mattresses in California. Most of these costs (\$846,855) were payments to entities, including local governments, solid waste facilities, franchise haulers, nonprofits contracted with municipalities, Joint Powers Authorities and Native nations, to count and pick up mattresses that were illegally dumped in their communities. See [Mitigation of Illegal Mattress Dumping](#) for more information.

Transportation

Although the number of units transported in 2023 increased slightly, MRC's total transportation expenses decreased. MRC paid \$8,709,465 in 2023 (7.5% less than 2022) to transport collected units to MRC recyclers. Per unit transportation costs decreased from \$7.55 to \$6.92 due to cost saving efficiencies implemented in 2022 and 2023 and a decrease in transportation for pocketed coils. In 2023, the number of recyclers processing pocketed coil onsite increased from one to three, reducing the need for MRC to transport some pocketed coils units to a central processing facility. As a result, the cost for transporting pocketed coils in 2023 was \$933,380 (compared to \$1,308,734 in 2022).

Recycling

MRC contracts with recyclers to dismantle and recycle units in California. Although MRC processed 3.1% more units in 2023 compared to 2022, total recycling expenses rose by a lower percentage. MRC paid eight contracted recyclers (operating 10 facilities) \$18,486,124 (2.4% more than 2022) for these services. This amount includes \$511,081 for processing pocketed coils at a central processing facility.

Pocketed coils contain recyclable steel, but most scrap steel purchasers require that the steel be separated from the pocket fabric. In previous years, only one recycler processed all pocketed coils, but in 2023, three mattress recyclers offered this capability. For recyclers who do not process pocketed coils, MRC continues to transport the material to a centrally located recycler for processing. As a result, the additional cost MRC incurred to recycle more units in 2023 was offset by savings on pocketed coil processing.

[Table 34](#) shows MRC's 2022 and 2023 actual end-of-life management costs, its projected 2024 costs and its proposed 2025 expenses.

TABLE 34: End-of-life Used Mattress Management Costs (Operational Costs)

Category	2022 Actual	2023 Actual	2024 Projections	2025 Proposed Budget
Collection and Container Costs				
Solid Waste Handling Fees	\$3,376,209	\$3,369,947	\$3,353,523	\$3,484,604
Collection Containers and Storage	\$1,594,769	\$1,671,336	\$1,788,112	\$1,863,000
Consumer Incentive	\$298,836	\$339,652	\$341,361	\$367,770
Collection Site Signage/ Guidelines	\$25,345	\$10,439	\$17,220	\$20,000
Total Collection and Container Costs	\$5,295,159	\$5,391,374	\$5,500,216	\$5,735,374
Illegally Dumped Mattress Collection Initiative				
Initiative Entity Compensation	\$858,370	\$846,855	\$835,885	\$863,410
Marketing/Advertising/ Events	\$4,673	\$8,712	\$20,346	\$22,000
Consulting Services	\$8,986	\$735	\$1,800	\$1,800
Pilot Studies	\$142,787	\$0	\$70,000	\$90,000
Staff Expenses	\$11,691	\$14,712	\$15,000	\$15,750

Total Collection Costs	\$6,321,666	\$6,262,388	\$6,443,247	\$6,728,334
Transportation	\$9,418,346	\$8,709,465	\$9,509,115	\$9,125,649
Recycling	\$18,056,285	\$18,486,124	\$20,130,058	\$24,544,412
Total Operational Costs	\$33,796,297	\$33,457,977	\$36,082,420	\$40,398,395

Research

MRC seeks to enhance the sustainability of California's mattress recycling program by improving the efficiency and effectiveness of the mattress collection network, promoting best practices in mattress recycling and identifying and developing new and better end uses for recovered materials. In addition, MRC operates the Sleep Products Sustainability Program (SP2) which is a third-party certification designed to help individual mattress manufacturers reduce the generation of waste materials, water and energy. MRC also supports two circularity focused workgroups.

⁵ The 2023 audited financial statements include staff expenses for the Illegally Dumped Mattress Collection Initiative in the Management, Staffing, and General Expenses category.

Research Projects

In 2023, MRC incurred expenses of \$606,264 (15.4% less than 2022) for research activities and mattress collection facility improvement funding. See [Research](#) section for a more detailed explanation of completed, active and future research activities.

Sleep Products Sustainability Program (SP2)

In 2023, MRC incurred \$95,927 to operate the SP2 program (13.9% less than in 2022). SP2 develops methods that manufacturers can use to analyze and reduce their environmental impact. MRC works with California manufacturers to help them reduce both the generation of waste materials and the use of water and energy in their manufacturing facilities.

Program expenses included consulting fees for SP2 oversight and development of program resources to assist participants as they prepare for certification, as well as the costs associated with facilitating workgroups focused on product circularity and new materials in mattresses.

See the [Materials Management/Waste Hierarchy](#) and [Research](#) sections of this report for more information.

Table 35 shows MRC's 2022 and 2023 actual research costs, its projected 2024 costs and its proposed 2025 expenses.

TABLE 35: Research Costs

Category	2022 Actual	2023 Actual	2024 Projections	2025 Proposed Budget
Research Activities	\$447,606	\$410,208	\$475,000	\$475,000
Mattress Collection Facility Improvement Funding ⁶	\$76,587	\$44,512	\$75,000	\$45,000
Consulting	\$192,189	\$151,544	\$275,000	\$280,000
Sleep Products Sustainability Program	\$111,453	\$95,927	\$161,290	\$147,278
Subtotal Research	\$827,835	\$702,191	\$986,290	\$947,278
Staff Expenses	\$184,933	\$209,337	\$217,000	\$227,850
Total Research⁷	\$1,012,768	\$911,528	\$1,203,290	\$1,175,128

⁶ The 2023 audited financial statements show Mattress Collection Facility Improvement Funding, labeled as Grants, separately from Research.

⁷ In MRC's 2023 audited financial statements, the Management, Staffing, and General Expenses category includes staff expenses for Research.

Program Administration, Legal and CalRecycle Costs

In 2023, MRC incurred \$6,450,282 (5.6% higher than 2022) in program administration costs, including legal and CalRecycle oversight. In 2023, MRC's total staff expense of \$4,068,987 covered salaries for a total of 29 FTE (full time equivalent) staff. Of that amount, \$3,399,723 is for 24 FTEs that perform administrative and operational program oversight and whose salaries are included under this expense category. Staff expense for the additional five FTEs, who work on education and outreach, the illegally dumped mattress initiative, research, and in-house legal are included under those activity costs (see below).

MRC also paid consultants and outside contractors \$445,138 in 2023 to provide additional services and expertise to help manage program registrants, retailer participation, recycling data, and financials. MRC 2023 program administration included \$353,453 in computer and database expenses for the organization's finance and CRM systems, including expanding its program CRM to improve efficiency and data collection. Other administrative and overhead costs include office space, telephone, utilities, insurance, bad debt and depreciation. In addition, MRC incurred \$19,821 to conduct compliance audits of its recyclers and \$65,100 to conduct reviews of retailer participation compliance, bringing total compliance expenses to \$84,921.

Program administrative expenses also include costs to prepare annual tax filings and conduct the annual financial audit, including MRC's SOC1 audit (conducted by PwC, a global audit and accounting firm), which CalRecycle's regulation 14 CCR§ 18964(b) (11) requires MRC to perform as a necessary component of the annual audit. These expenses are reflected in the \$287,000 in the Annual Financial Audit and Tax Filings expense category.

Field site visits and program travel expenses of \$150,859 were 6.9% lower in 2023 compared to 2022 levels.

MRC also works with California-based entities to provide industry and government relations support, specifically to assist MRC in responding to questions from legislators, informing elected officials and other stakeholders about the program and monitoring other California legislative and regulatory developments that may affect the program. In 2023, MRC incurred \$144,557 in this expense, similar to 2022 levels. In addition, CalRecycle invoiced MRC \$666,404 for oversight expenses in 2023, a 4.2% increase from 2022.

In 2023, MRC incurred legal and litigation support expenses totaling \$179,192, of which \$8,883 was for outside legal counsel and the remainder for in-house legal support.

Legal costs represent in-house and outsourced legal costs⁸ to support the organization, including negotiating, managing and updating MRC's contracts with hundreds of vendors.

Table 36 shows MRC's 2022 and 2023 actual administration, legal and CalRecycle oversight costs, its projected 2024 costs and its proposed 2025 expenses.

TABLE 36: Program Administration, Legal and CalRecycle Oversight Costs

Category	2022 Actual	2023 Actual	2024 Projections	2025 Proposed Budget
Staff Expenses	\$3,052,594	\$3,399,723	\$3,637,800	\$3,928,260
Administrative and Overhead Expenses	\$686,525	\$739,035	\$705,807	\$712,008
Outsourced Contractors/ Consultants	\$485,559	\$445,138	\$436,246	\$412,298
Computer and Database Expenses	\$395,147	\$353,453	\$392,842	\$295,517
Annual Financial Audit and Tax Filings	\$290,089	\$287,000	\$245,000	\$248,450
Compliance Expenses (operational and retailer)	\$67,467	\$84,921	\$98,544	\$93,920
Industry and Government Relations	\$144,797	\$144,557	\$150,000	\$150,000
Field Visits and Program Travel	\$162,047	\$150,859	\$134,100	\$138,300
Total Administration	\$5,284,225	\$5,604,686	\$5,800,339	\$5,978,753
Legal and Litigation Support Costs	\$181,730	\$179,192	\$202,000	\$210,850
CalRecycle Oversight	\$639,572	\$666,404	\$700,000	\$700,000
Total Administration, Legal and CalRecycle Oversight Costs	\$6,105,527	\$6,450,282	\$6,702,339	\$6,889,603

⁸ Legal expenses are presented differently in the Audited Financial Statement Legal Services reflect only out-sourced legal costs, while in-house legal expenses are included in the Management, Staffing, and General Expenses category.

Total Program Costs

As noted in Table 37 below, MRC's 2023 total program costs were \$43,618,063.

TABLE 37: Total Program Costs

Types of Costs	2022 Actual	2023 Actual	2024 Projections	2025 Proposed Budget
Education and Outreach	\$2,880,700	\$2,798,276	\$2,764,200	\$2,783,000
Operational Costs	\$33,796,297	\$33,457,977	\$36,082,420	\$40,398,395
Research	\$1,012,768	\$911,528	\$1,203,290	\$1,175,128
Administration	\$5,284,225	\$5,604,686	\$5,800,339	\$5,978,753
Legal and Litigation Support Costs	\$181,730	\$179,192	\$202,000	\$210,850
CalRecycle Oversight	\$639,572	\$666,404	\$700,000	\$700,000
Total Program Costs	\$43,795,292	\$43,618,063	\$46,752,249	\$51,246,126

Reserves and Surplus Funds

Cal. Pub. Res. Code § 42988 requires that MRC maintain a reserve that is sufficient to fund the program's operations over a multiyear period in a fiscally prudent and responsible manner. Section 42988.3 further provides:

Commencing January 1, 2027, the mattress recycling organization shall not maintain total reserves exceeding 60 percent of its annual operating expenses, consistent with the requirements of the Financial Accounting Standards Board's Accounting Standards Update 2016-14, Not-for-Profit Entities (Topic 958), and any future updates to that standard.

In addition, CalRecycle's regulations require that MRC's annual report include a discussion of its "[s]urplus funds, if any, and detailed rationale for the specified level of surplus." 14 CCR § 18964(b)(9)(E).

For nonprofit entities like MRC, the concepts of "surplus funds" and "reserves" are distinct. For nonprofits, generally accepted accounting principles (GAAP) define the annual "increase (or decrease) in net assets" to mean the mathematical difference between total revenue and total expenses for that year. A nonprofit's increase (or decrease) in net assets is functionally comparable to net income (or net loss) earned by a for-profit company. For this reason, we interpret the term "surplus funds" used in 14 CCR § 18964(b)(9)(E) as referring to an increase in net assets that MRC records at the end of each annual year. (A decrease in net assets at year-end would be a deficit.)

GAAP (as set forth in FASB Accounting Standards Update 2016-14, referenced in Section 42988.3 of the Public Resources Code) defines a nonprofit's reserves as that amount of the unrestricted accumulated net assets that the organization's board of directors has designated as reserves. MRC has no restricted net assets. MRC's 2023 audited financial statement (Statement of Financial Position) identifies MRC's reserve fund as "Board Designated Financial Reserve."

An organization's board designated financial reserve can serve many purposes, including providing continuity of operations in times of economic downturn and addressing unforeseen events or other financial hardships. In MRC's case, MRC has set aside funds to be prepared for unforeseen circumstances that could have a substantial impact on revenues and expenses.

The reserves, however, are less than the total accumulated net assets. The part of the total net assets that are not designated by the board as reserves includes the nonprofit's financial assets which are set aside to meet the organization's short-term financial needs. These are comprised of liquid assets (such as cash), as well as non-liquid assets. Non-liquid assets, among other items, include accounts receivable (representing 12.2% of net assets), property and equipment and prepaid expenses.

Sufficient undesignated net assets are important to provide an organization with working capital to meet immediate cash flow needs. MRC's network of recyclers and transporters rely on prompt payment for services rendered. To keep the program functioning and its vendors paid and operating, it is critical that MRC hold sufficient working capital to cover cash flow shortfalls. To be fiscally responsible, MRC has designated approximately three months of operating assets as working capital.

As of December 31, 2023, MRC's net assets were \$31,780,961, as reported on the Statement of Financial Position section of MRC's 2023 audited financial statements. The Net Assets are divided into two segments:

- \$20,876,441 in board designated financial reserve, which is equal to the total net assets less the undesignated net assets. The reserve represents approximately 47.9% of 2023 Total Expenses, below the 2022 level of 60.4%.
- \$10,904,520 in undesignated net assets (which equals 25.0% of 2023 Total Expenses). This is set aside to meet MRC's short-term cash needs.

MRC has adopted a conservative investment strategy with the goal of preserving the value of our investments over the long term, using lower risk investments that historically provide good returns, with a strong weighting in fixed income. In 2023, MRC earned a net return of \$2,444,590 on its investments (including interest, dividends, realized and unrealized gains).

Section 42988.3 of the Public Resources Code requires that by January 1, 2027, MRC's reserves not exceed 60% of its annual operating expenses. As part of its multiyear effort to meet this requirement, MRC was able to keep the recycling charge at \$10.50 despite operating at a deficit since 2019. As part of this process, MRC recorded an operating loss in 2023 of \$8,070,881. As a result, MRC's net assets decreased in 2023 by a total of \$5,625,176, which reflects the sum of the \$8,070,881 operating loss, the \$2,444,590 net gain on investments, and a modest \$1,115 gain on disposal of assets.

As Table 38 shows, as of December 31, 2023, the Net Assets at End of Year was \$31,780,961.

TABLE 38: Net Assets

Category	2022 Actual	2023 Actual	2024 Projections	2025 Proposed Budget
Total Revenue	\$39,474,204	\$35,547,182	\$35,190,254	\$55,225,560
Total Program Costs	\$43,795,292	\$43,618,063	\$46,752,249	\$51,246,126
Change in Net Operating Assets	(\$4,321,088)	(\$8,070,881)	(\$11,561,995)	\$3,979,434

Gain on the Disposal of Assets	\$90	\$1,115	\$0	\$0
Change in Net Assets	(\$8,037,132)	(\$5,625,176)	(\$10,955,995)	\$4,723,434
Net Assets Beginning of the Year	\$45,443,269	\$37,406,137	\$31,780,961	\$20,824,966
Net Assets at the End of the Year	\$37,406,137	\$31,780,961	\$20,824,966	\$25,548,400

MRC anticipates a further decrease in net assets in 2024, as indicated in Table 38 above, due to a combination of factors, including lower charge revenue because 2024 mattress sales are forecasted to remain at the same low level as 2023 and increasing operating costs projected for upcoming years resulting from increases in labor, fuel and general inflationary pressures. Fortunately, the reserves that MRC had prudently set aside in the early years of the program helped MRC continue to support the program in California despite these economic challenges without necessitating an increase in the recycling charge up to this point.

At year-end 2023, MRC's board designated financial reserve and undesignated net assets (working capital) were as follows.

TABLE 39: MRC's Board Designated Financial Reserve and Undesignated Net Assets

Net Assets as of 12/31/2023	\$31,780,961	2023 Total Expenses: \$43,618,063
Board Designated Financial Reserve	\$20,876,441	47.9% (approximately 5.7 months of 2023 expenses)
Undesignated Net Assets	\$10,904,520	25.0% (3 months of 2023 expenses)

As demonstrated above, the Board Designated Financial Reserve as of December 31, 2023 complies with the 60% reserve target required by Section 42988.3 of the Public Resources Code.

This page is intentionally left blank.

Education and Outreach

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR § 18964(b)(10) — Education and Outreach. Provide a description of educational materials that were provided, including electronic examples of these materials. Identify any method(s) used to determine the effectiveness of educational and outreach efforts (e.g., surveys, hits on specific web pages, number of participants at events, etc.), if applicable. Describe any changes to those materials that are planned for subsequent years, if applicable.

EDUCATION & OUTREACH

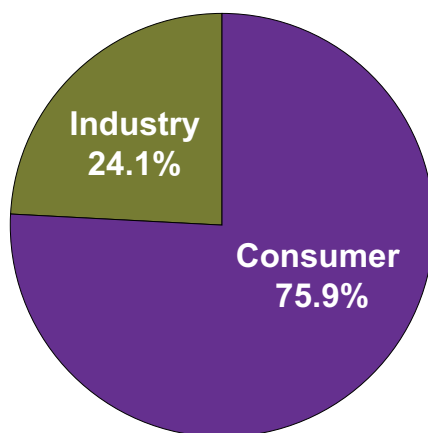

MRC's education and outreach efforts inform consumers, retailers, the mattress industry and other stakeholders about mattress recycling in California by explaining:

- How MRC operates
- MRC's accomplishments and impact in California
- How and where to recycle discarded mattresses
- Why recycling is beneficial
- What the charge funds
- The mattress industry's legal obligations

MRC reaches these audiences using an array of communications and marketing methods, including targeted direct mail, printed collateral, advertising, media relations, websites and social media. MRC also participates in community and industry events and visits retailers, recyclers and other collection locations to learn how to collaborate on residential outreach.

Figure 5 shows the percentage of MRC's education and outreach costs directed to consumer and industry audiences.

**FIGURE 5: 2022 Education and Outreach
Spending Industry Versus Consumer**

Communication Efforts

MRC's outreach materials fall into one of three categories of efforts:

1. **Controlled:** MRC uses its own assets to provide and publish information (e.g., websites, social media, newsletters).
2. **Paid:** MRC pays for the ability to distribute information and receive visibility (e.g., advertising or event sponsorships).
3. **Offered:** MRC makes information or resources available to others to voluntarily distribute (e.g., a media release or toolkit).

Controlled

Websites

MRC's outreach encourages visiting one of three websites:

1. [ByeByeMattress.com](https://www.ByeByeMattress.com), which focuses on consumers.
2. [MattressRecyclingCouncil.org](https://www.MattressRecyclingCouncil.org), which informs the mattress industry, regulators, and stakeholders.
3. [MRCreporting.org](https://www.MRCreporting.org), which mattress retailers, manufacturers, distributors and renovators use to register with MRC and to report and remit recycling charges to MRC.

MRC uses Google Analytics to measure website performance. In 2023, Google instituted major changes to its website analytics tool as well as the definition of several common metrics. In addition, to comply with consumer data privacy regulations in California, MRC implemented a popup in the final months of 2023 that allows website visitors to opt out of sharing their web browsing information with Google. Given the impact of these variables, we are only presenting 2023 website data and cannot make comparisons to previous years.

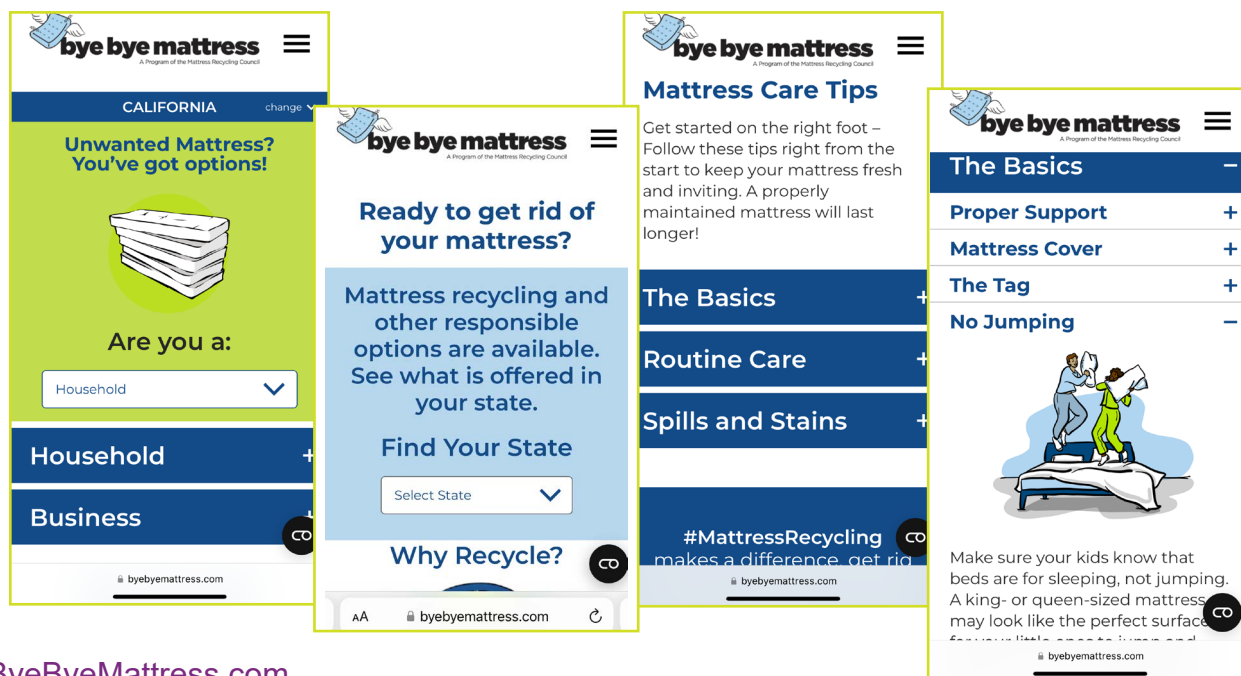

[ByeByeMattress.com](https://www.ByeByeMattress.com)

All of MRC's outreach to California consumers (residents and businesses wanting to discard a mattress) encourages visiting [ByeByeMattress.com](https://www.ByeByeMattress.com) to learn how and where to recycle unwanted mattresses. For residents, the site features a searchable locator and curbside pickup directory, along with California program details such as retailer take-back information. For businesses, MRC provides Commercial Volume Program information.

In October 2023, MRC unveiled a fresh look and user experience for [ByeByeMattress.com](https://www.ByeByeMattress.com). Changes included enhancing the website's performance and presentation on mobile devices, giving households and businesses streamlined views of the content, and optimizing geolocation to immediately present the most relevant information and pinpoint the nearest locations. With the redesign, MRC took another step to address source reduction by introducing a new section devoted to mattress

care best practices. We also updated our information on mattress recycling and actions consumers can take to combat illegal dumping.

In 2023, 445,980 users visited [ByeByeMattress.com](https://byebyemattress.com).

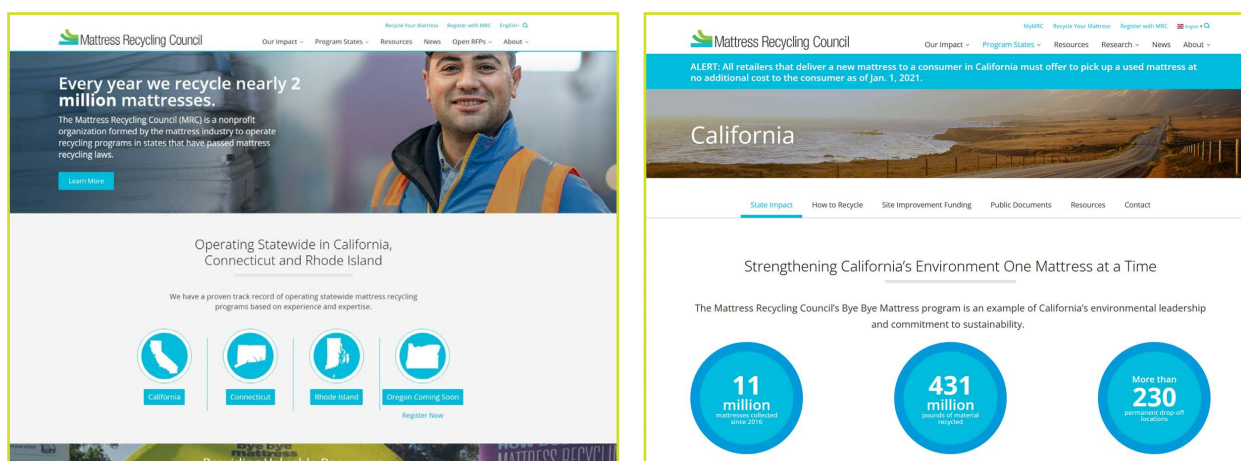

[ByeByeMattress.com](https://byebyemattress.com)

[MattressRecyclingCouncil.org](https://mattressrecyclingcouncil.org)

MRC uses [MattressRecyclingCouncil.org](https://mattressrecyclingcouncil.org) to inform industry audiences, regulators, and stakeholders about state laws, program implementation and performance. The website features a robust resource library for the solid waste, recycling and mattress industries; research reports and developments; and a media center with newsletters and announcements.

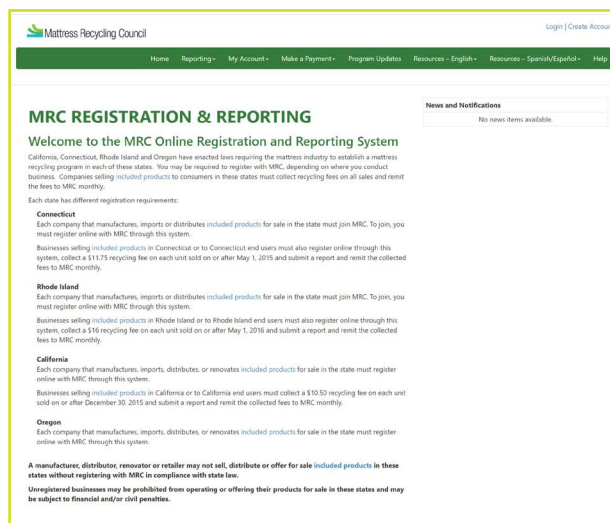

In 2023, [MattressRecyclingCouncil.org](https://mattressrecyclingcouncil.org) had 47,759 visitors.

[MattressRecyclingCouncil.org](https://mattressrecyclingcouncil.org)

MRCreporting.org

Mattress retailers, manufacturers, distributors and renovators use MRCreporting.org to register with MRC and to report and remit recycling charges to MRC. The portal houses resources about California law and program, as well as documents and videos demonstrating the registration, reporting and charge remittance processes. Registered parties receive automatic payment reminders and missed deadline email notices. MRC also pushes important announcements about available customer education materials and mattress recycling options. In 2023, the number of companies receiving these communications totaled 1,572.

MRCreporting.org

Social Media

MRC maintains social media channels for both brands. We use the Bye Bye Mattress branded channels—Facebook, X (formerly Twitter) and Instagram—to educate consumers, and the Mattress Recycling Council branded channels—Facebook, X, LinkedIn, and YouTube—to communicate with industry audiences. Our social media followers consist of retailers and manufacturers, civic and environmental groups, local and state governments, waste haulers, and recyclers.

Bye Bye Mattress channels

During 2023, the content on Bye Bye Mattress branded channels earned 652,845 impressions. The collective audience grew to 2,760, a 24.5% increase from 2022. MRC attributes most of the growth to the late 2022 launch of Instagram and the use of social media advertising and boosted posts.

MRC used social media advertising to promote retailer take back, guide users to the nearest drop-off location, advertise collection events, showcase consumer incentive drop-off locations, draw attention to new mattress care content and inform new residents to visit [ByeByeMattress.com](https://www.ByeByeMattress.com). These ads earned an additional 11.4 million impressions.

Overall, MRC's Bye Bye Mattress social media accounted for 8% of all visitors to [ByeByeMattress.com](https://www.ByeByeMattress.com) in 2023—a substantial growth from 4% in 2022.

Mattress Recycling Council channels

During 2023, the content on Mattress Recycling Council branded channels earned 86,569 impressions. The collective audience grew to 3,796 followers, a 25% increase from 2022. LinkedIn contributed to most of the growth in followers.

MRC used these channels to announce program developments, promote MRC's presence at industry events, share research announcements, distribute resources, generate interest in using the Commercial Volume Program (CVP), recruit Sleep Products Sustainability Program (SP2) participants and increase e-newsletter subscribers.

In 2024, MRC will continue to monitor the viability of our current social media channels as well as explore other platforms that may be effective tools to communicate with our diverse audiences.

Newsletters

In 2023, MRC offered six digital newsletters. The bulk of these newsletters targeted specific small audiences; however, our flagship publication, Highlights, reached over 7,200 subscribers.

Highlights, monthly

Highlights is MRC's primary communication tool for announcements, state program updates, posting research accomplishments and distributing lessons learned from our illegal dumping pilot projects.

MRC distributes Highlights to all registered retailers, renovators, manufacturers, collection site hosts, recyclers and other stakeholders that subscribe. By year's end, the mailing list exceeded 7,200 with an average open rate of 32%. MRC also publishes each issue on [MattressRecyclingCouncil.org](https://www.MattressRecyclingCouncil.org).

Retailers Spotlight, quarterly

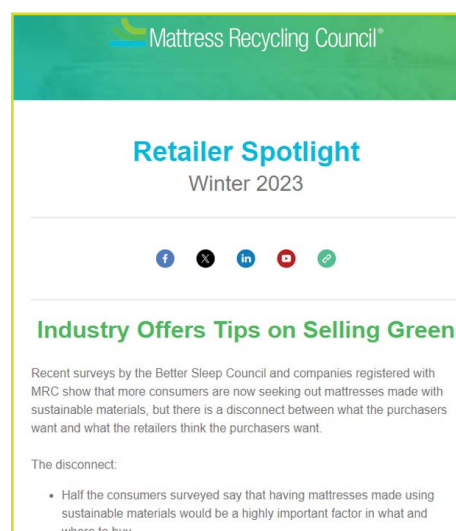

Retailer Spotlight is distributed to registered retailers and provides tips for using [MRCreporting.org](https://www.MRCreporting.org), updates on state laws and regulations, new MRC resources for retailers, and insights on mattress recycling. By year's end, the mailing list exceeded 1,400 with an average open rate of 35%.

In 2024, in response to the 2023 Industry Survey, MRC included more regulatory information in this newsletter, including how retailers can prepare for a CalRecycle inspection.

Illegal Mattress Dumping Download, quarterly

In 2023, MRC re-branded the newsletter directed to the Illegally Dumped Mattress Collection Initiative (Initiative) participants as Illegal Mattress Dumping Download with the mission to deliver more news and tips to combat/prevent illegal mattress dumping while continuing to remind participants about data entry and how to use the database.

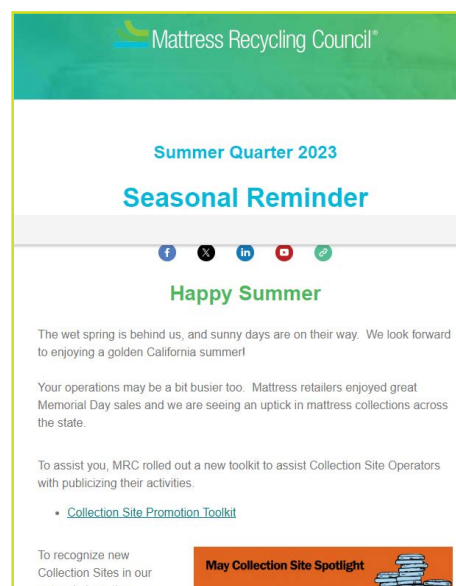

The mailing list consisted of 87 contacts registered in the Initiative. Each newsletter was opened by a third of the subscribers. In 2024, we expanded the mailing list to 150 additional recipients.

Seasonal Reminders, monthly

Each of MRC's program coordinators distributes a Seasonal Reminder to the collection site operators within their multi-county regions. The primary purpose of the newsletter is to remind operators of relevant MRC best practices (e.g., how to properly stack mattresses) and resources for training their staff or publicizing their site. In 2023, MRC expanded the format to recognize the achievements of individual collection sites within the region and share different approaches to implementing best practices.

The open rates of each coordinator's newsletter varied. Averages ranged from 47% to 63%.

SP2 Publications

In 2023, MRC published two newsletters for SP2:

- **SP2 Toolkit:** MRC distributes this newsletter monthly to contacts at certified facilities or facilities working toward certification. Each month's content focuses on one of the 12 certification requirements. In 2023, the mailing list consisted of 28 program participants and the newsletter averaged an open rate of 38%.
- **SP2 Insights:** In 2023, MRC used this newsletter as a recruiting tool and distributed it quarterly to contacts at potential participating companies. The content consisted of program news, case studies and clips of sustainable practices in the furniture industry. MRC sent the newsletter to 125 recipients and achieved an average open rate of 40%. In 2024, this newsletter shifted to an on-demand format and will be distributed as new facilities are certified or as MRC releases case studies.

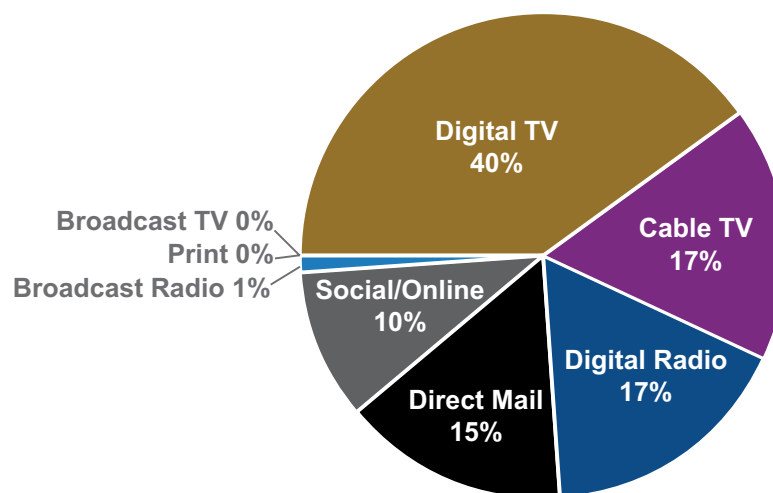

Paid

Consumer Advertising

MRC uses a mix of television, radio, digital, social media, and print as it designs advertising plans for general audiences or local plans to address a specific need. MRC's ads are multilingual.

Figure 6 shows the percentage of consumer advertising spending for television, radio, print, digital and social in 2023.

FIGURE 6: Consumer Advertising Spending by Media Type

[Appendix E](#) contains examples of these advertisements.

General Audience Campaigns

In 2023, MRC ran general audience advertising in the spring and fall to coincide with holiday weekends when retailers sell large volumes of mattresses. MRC used English-language and Spanish-language ads in select major markets to increase general awareness of the program.

MRC considered the following factors when determining which areas to target: the presence of a recycler, increased access such as the opening of a large collection site or multiple sites, the area's environmental justice classification, and the per capita rate of illegal dumping. Based on these criteria, MRC chose the following as major advertising markets in 2023:

- Los Angeles County's Antelope Valley, San Gabriel Valley and the Gateway Cities regions
- Central Valley counties (Fresno, Merced and Tulare)
- Northern California counties (Del Norte, Humboldt, Mendocino, Lake, Sonoma)

English-language media received the “Three Ways to Recycle” campaign. The ad summarized the three primary ways a consumer could place a mattress in the recycling stream: retailer take back, consumer drop off, and municipal bulky item pickup. Spanish-language media received “Cuidando la Tierra” (translates to Taking Care of the Earth) which positions mattress recycling as an easy and free way to help protect the environment. Both ads encourage visiting ByeByeMattress.com to learn more about what to do with an unwanted mattress. Digital direct mail campaigns to new movers in the target markets complimented these ads.

Overall, MRC’s general audience advertising in these markets resulted in 85 million impressions, and nearly half (49%) of the visits to the California page on ByeByeMattress.com originated from these ads.

Local Campaigns

In 2023, four local communities invited MRC to collaborate on local advertising:

- **Long Beach:** MRC produced multiple digital and printed direct mail projects to raise awareness of a newly established collection site, each reaching an average of 75,000 households.
- **Modesto:** MRC collaborated with the city and regional chamber to raise awareness of a newly established collection site in an illegal dumping hotspot area with a ribbon-cutting ceremony and a printed direct mail postcard sent to over 49,000 households.
- **Fresno:** MRC joined forces with local city and county officials to address illegal dumping by producing a 60-second radio spot that aired on five FM radio stations during a 16-week period.
- **San Benito County:** MRC collaborated with the county on a direct mail print campaign to publicize a major waste collection event to nearly 20,000 households.

Online and Digital Advertising

MRC continued to use Google's AdWords Grant program, keyword search ads and display ads, as well as the Waze navigation app to build ongoing awareness of the program. MRC also used digital advertising to bring attention to the new mattress care content on [ByeByeMattress.com](https://www.byebyemattress.com).

- **Online Search:** MRC garnered more than 33.6 million impressions in 2023 through the use of Google ads, which displayed in or alongside search results as users searched the internet for “mattress recycling,” “disposal,” or “junk removal.” Over 51,000 consumers visited [ByeByeMattress.com](https://www.byebyemattress.com) after clicking on one of these ads.

- **Mobile Navigation:** MRC's ads on Waze received more than 1.9 million impressions and prompted 1,393 navigations before a Sept. 1 re-structuring by Google ended advertising on Waze. MRC's ads promoted all locations that offered the Consumer Incentive Payment and appeared as the app's users drove near these areas. Locations were also marked on the map, so as users referenced the map during their journey, they would learn a location exists.

- **Mattress Care Campaign:** MRC used a mix of digital and social media advertising to generate awareness of the new mattress care page on [ByeByeMattress.com](https://www.byebyemattress.com). MRC worked with a digital content distributor to place a sponsored-content article offering mattress care advice on 55 California news sites. MRC produced the article in both English and Spanish. The collective audience of these news sites totaled 48.7 million viewers. Four of the news sites further promoted the article on their social media channels, earning an additional 2.87 million impressions. The campaign ran from November 2023 to March 2024, resulting in 7,867 clicks to [ByeByeMattress.com](https://www.byebyemattress.com).

MRC will continue using online and digital advertising to generate leads to [ByeByeMattress.com](https://www.ByeByeMattress.com) and regularly monitor analytics to find the best marketing mix for Californians.

Industry Advertising

In 2023, MRC advertised the CVP, SP2 and the retailer take-back obligation in a variety of trade publications in different industry verticals. Overall, MRC's industry advertising received 2.3 million impressions. Appendix E contains examples of these ads.

- **CVP:** MRC used digital and print ads, as well as targeted emails to subscribers in the home furnishings, lodging and apartments verticals. To reach sustainability directors at California universities, MRC sponsored a recycling guide for administrators seeking waste reduction and illegal dumping mitigation solutions during student move-out.
- **SP2 and Retailer Takeback:** MRC focused these ads in the home furnishings vertical and used digital and print ads, as well as targeted emails to subscribers.

Event Sponsorships

Community Events

MRC participated in 17 events throughout the state during spring, including Earth Day, exposing Bye Bye Mattress to more than 100,000 residents. MRC's booth raises awareness about retailer take back, participating drop-off locations, and available curbside opportunities. MRC also invites attendees to learn about how a mattress is recycled, what happens to the components and the positive environmental impacts of mattress recycling. MRC's 2023 schedule included:

- Alameda's Spring Shindig
- Carson CSU Dominguez Hills Earth Day Festival
- Cupertino Earth & Arbor Day
- Fremont Go Green with Us! Earth Day
- Fresno Earth Day
- Hayward Community Festival
- Lodi Street Faire Spring
- Los Angeles County Sanitation Districts Earth Day
- Marin Earth Day
- Napa Earth Day
- Sacramento ECOS Earth Day

- San Diego350's Carnival for Climate
- Santa Barbara Earth Day
- Stockton Earth Day
- Victorville Spring Festival and Egg Hunt
- Visalia Dia de los Niños

Mattress Industry Events

In 2023, MRC participated in mattress industry events to increase awareness of legal obligations, present research findings, further sustainability and circularity conversations and build interest in SP2. These events included:

- **Las Vegas Market:** Held twice each year, this event is the largest furniture and bedding show in the United States. It attracts retailers, distributors and manufacturers from California, the U.S., and over 80 countries.
- **Southern California Furniture and Accessory Market:** In 2023, this event resumed its annual schedule. MRC exhibited alongside some of the industry's leading manufacturers, suppliers, and distributors of mattresses, furniture and home goods. MRC interacted with attendees at our booth and engaged in discussions with other exhibitors.

- **ISPA Sustainability Conference:** ISPA in 2023 held its second conference to educate, connect and inspire the bedding industry to develop practical solutions for sustainability challenges. MRC exhibited and participated in a panel discussion to create a broader understanding of end-of-life challenges recyclers face with mattresses, generate interest in research projects and encourage participation in SP2. At the IPSEA EXPO in March 2024, we found several manufacturers were already applying lessons from the 2023 Sustainability Conference.

Offered

Consumer Education Materials for Retailers

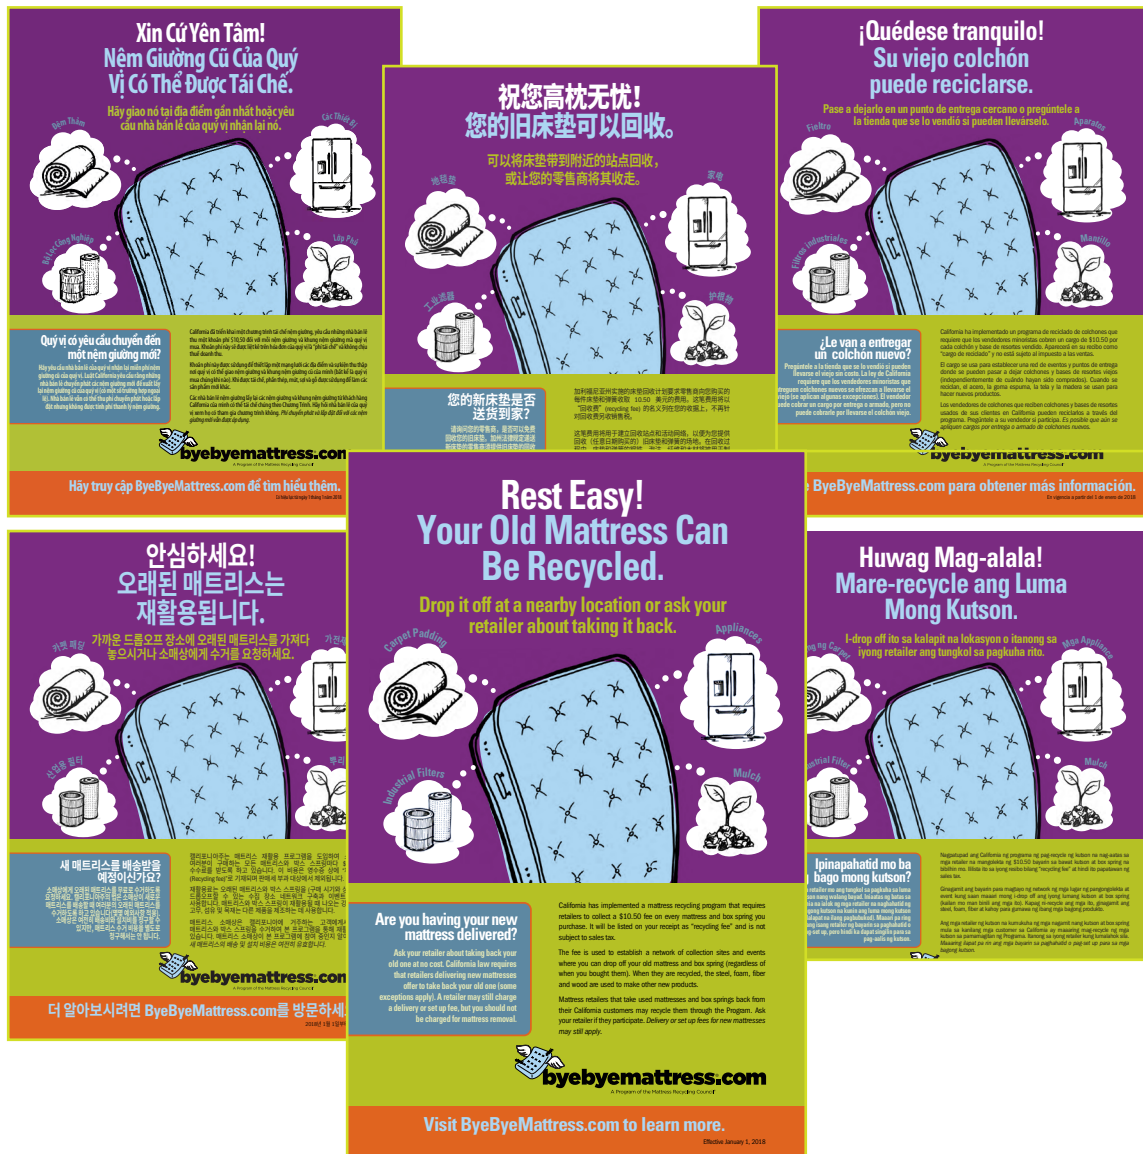

MRC provides no-cost point-of-sale materials to the mattress industry. Items include an information card, poster, Consumer FAQ and digital badge. All materials are available in Spanish, Chinese, Korean, Tagalog and Vietnamese. A retailer may request these items from MRC or download artwork from [MRC's Resources Library](#).

In 2023, MRC provided 16,000 information cards and 366 posters to California retailers to help them explain mattress recycling and the charge to their customers.

MRC uses Retailer Spotlight, email notifications via [MRCreporting.org](#), industry publications, and events to regularly inform retailers of these educational materials. For newly registered retailers or those opening new stores in the state, MRC sends a starter kit with a postage-paid response card to request an automatic refill of materials.

In early 2024, MRC rolled out the first-ever redesign of our information cards and in-store posters. MRC redesigned the educational materials based on retailer feedback and our observations during store visits. The revisions make it easier for consumers to read and find relevant information on recycling their old mattresses, including the retailer take-back requirements. Each card and poster also feature a QR code to quickly access pertinent pages on [ByeByeMattress.com](#).

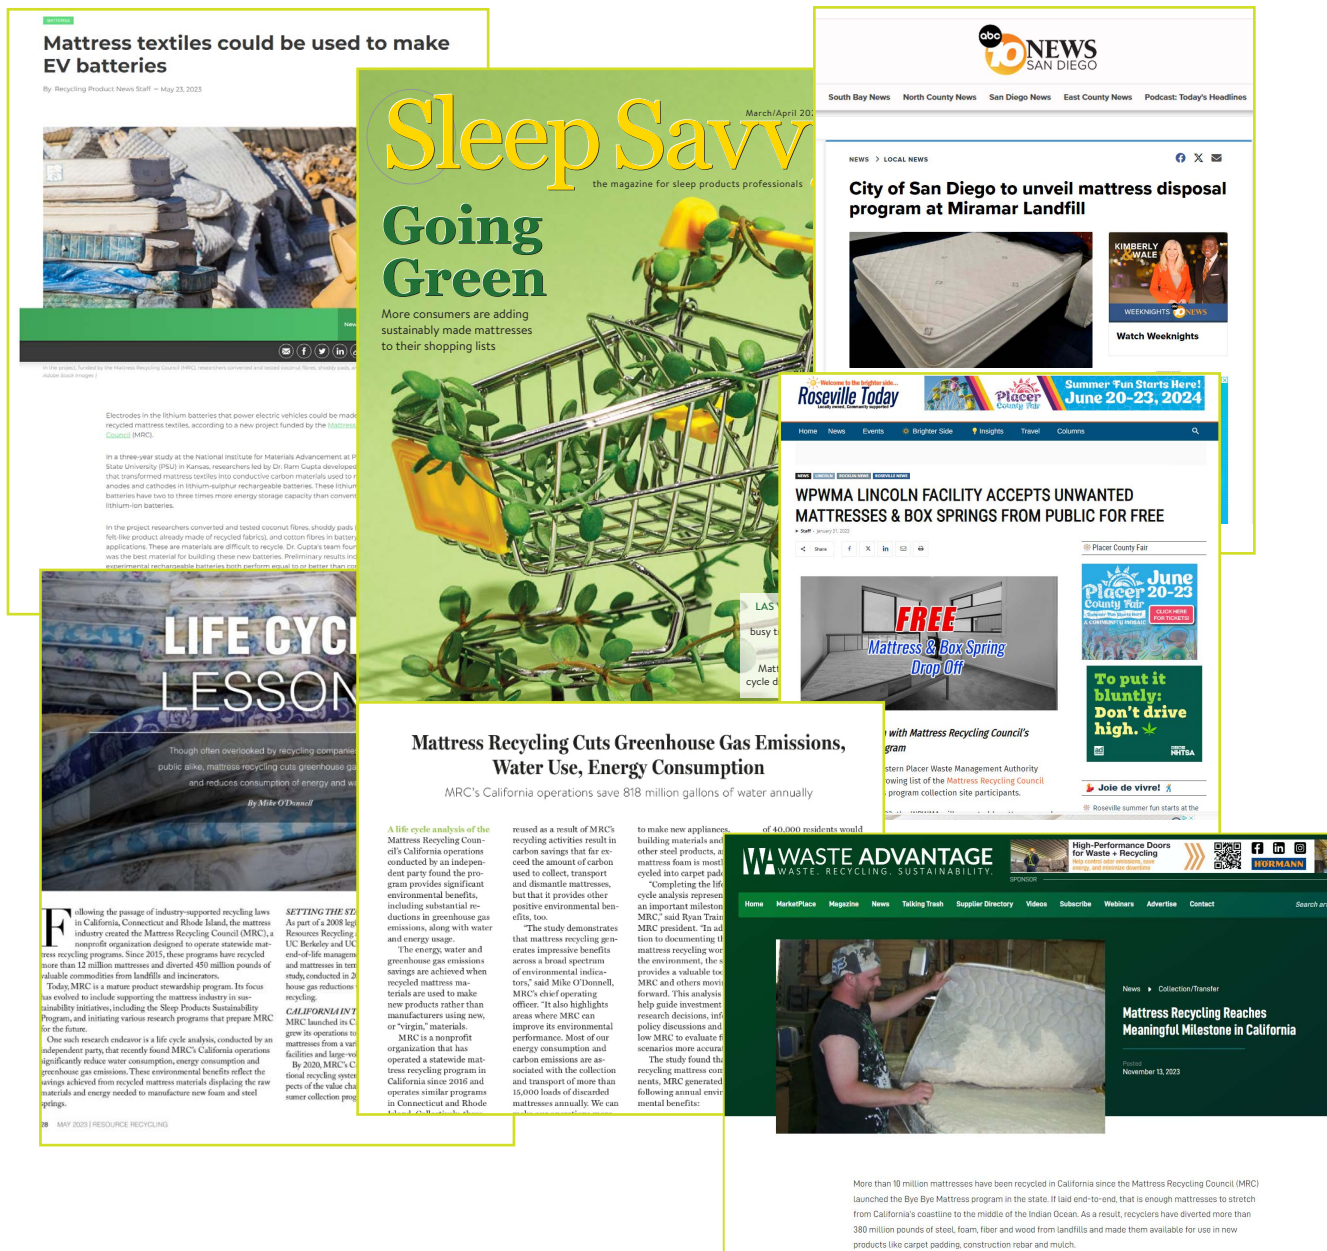

Media Relations

In 2023, MRC generated more than 236.2 million impressions with consumer and industry media outreach. This amount of coverage equates to approximately \$206,400 in advertising value.

MRC proactively generated coverage for the positive impact of recycling 10 million mattresses in California and 12 million mattresses program-wide, the results of the life cycle analysis and completed textile research, as well as new or expanded Bye Bye Mattress collection opportunities. Other mentions resulted from reporters attributing MRC as their source for mattress recycling information or collection sites or event hosts using MRC's publicity toolkit and accompanying resources.

Major announcements included:

- **10 Million Mattress Milestone:** To recognize the program's success MRC organized a press conference in Fresno at Caglia Environmental's Cedar Avenue Transfer Station, one of the first sites to join the program. This resulted in coverage on ABC, CBS and NBC in various markets.
- **America Recycles Day:** In collaboration with the city of Modesto and the Modesto Chamber of Commerce, MRC used Keep America Beautiful's America Recycles Day to announce the opening of the city's first collection location.
- **Life Cycle Analysis:** MRC announced this research report to the furniture and bedding industries and the solid waste and recycling sector, resulting in several byline columns by MRC leaders in trade publications.

Making a Change Within the Industry

Industry roundtable tackles issues of sustainability in bedding

Asking data, collaborating supply chain and even building 11 Mincraft figures could help sustainability forward in the bedding, according to the Mattress Sustainability Roundtable at ISPA Sustainability Conference.

resident Ryan Trainer moderated, asking each member company's sustainability goals, and what's next for the industry. Panelists represented a broad mix of companies — public and private, and manufacturers, U.S.-based and international.

The panel included:

- Skorpenske, vice president of public affairs for LLC, North American unit, a foam supplier, is headquartered in Germany, with U.S. offices in Pittsburgh.

- Veille, indirect sourcing manager for bedding manufacturer Tempur Sealy International, is based in Lexington, Kentucky.

- Lowery, circularity director for Hanes, which produces polyester fiber and bedding.

- Hallam, senior vice president of sales for bedding supplier Deslee, with world headquarters in Winston-Salem, North Carolina.

Panelists noted their companies' focus on sustainability, with goals in how a circular economy. Deslee has always put sustain-

The Mattress Industry Sustainability Roundtable, from left to right: Richard Skorpenske, Covestro LLC; Patrique Veille, Tempur Sealy International Inc.; Ryan Trainer, ISPA president; Joseph Lowery, Carpenter Co.; and Rhianon Hallam, BekantDreide.

ability at the core of everything we do," Hallam said. "It's no longer a line item, or a project that we embark on. It's really about who we are and how we drive the industry forward."

Covestro, as an international company, has had to adapt to the regulations put in place by the European Union. Many of those European practices and expectations spill over into the United States, Skorpenske said.

"In addition to those regulatory frameworks, I think there's certainly different consumer expectations in Europe," he said. "And I think that consumer expectation is beginning to change a little bit here in the U.S., as well."

Where should companies start? Benchmarking, Skorpenske said. Get benchmarking data to figure out where you need to place your attention.

Veille said Tempur Sealy started there, too. "Our first goal was, OK, what does our footprint look like? And we traced it back to trucking, electricity and

gas within our operations," he said. "Can we do other than to actually make impact on those areas?"

Lowery recommended working at the value chain. "I think one of the big problems that we encounter in this field is that as you move from a linear economy — take, make, waste — into a circular economy, all of a sudden, everybody's means you can't just focus on where you have to help them figure out solutions so that they can win."

Trainer noted Lowery touched on key point — collaboration. Veille said the conference was a great way to bring everyone together. "There are good conversations to have now to begin to understand the challenges and opportunities that face this industry how we can work across the value chain to make sure that we will continue to

PROFILES AMERICAN REPORT

By Ryan Trainer, President of the Mattress Recycling Council and the International Sleep Products Association

MRC'S CALIFORNIA MATTRESS RECYCLING PROGRAM PROVIDES IMPORTANT ENVIRONMENTAL BENEFITS

The U.S. mattress industry created the Mattress Recycling Council (MRC) to operate statewide mattress recycling programs in California, Connecticut and Rhode Island. MRC expects to expand its activities to Oregon in 2024. Since its operations launched in 2015, these programs have recycled

diverted over 200,000 metric tonnes of valuable commodities away from landfills and incinerators and to companies that use these materials to make new products (or in the case of box spring wood, use the material to generate power). To better understand the environmental impacts (both the benefits and the costs) of our recycling activities, the MRC hired Scope 3

Consulting, a Santa Barbara, CA based firm, to conduct a Life Cycle Analysis (LCA) of our California program. Completed in late 2022, the LCA results document the environmental benefits that mattress recycling programs provide.

The laws set off a cascade changes in the industry, including the International Sleep Products Association's action of the nonprofit Mattress Recycling Council operate the three programs. Since then, MRC has invested in educating consumers about the value of mattress recycling, preventing illegal mattress dumping, improving the recycling process and opening new markets for components.

Mattress Recycling Council Study Demonstrates Benefits

February 6, 2023 by HFBusiness Staff in Business Strategy, Industry

RECYCLING 1 MATTRESS

SAVES 500 gallons of water

Enough energy to power an average household for 3 days

Greenhouse gas emissions savings similar to driving 60 fewer miles

A life cycle analysis of the Mattress Recycling Council's California operations conducted by an independent party found the program provides significant environmental benefits, including substantial reductions in greenhouse gas emissions along with water and energy usage.

Recycling just 1 mattress can save 500 gallons of water, according to the MRC life cycle analysis of its 2021 California operations. Full report: <https://mattressrecyclingcouncil.org/lca-report/>

MRC has operated a statewide mattress recycling program in California since 2016 and operates similar programs in Connecticut and Rhode Island. Collectively, these programs have recycled

more than 11.5 million mattresses.

MRC commissioned the study to establish baseline environmental performance indicators for its California program. Using this data, MRC can now focus on reducing carbon consumption, such as by making mattress transportation more efficient.

The life cycle analysis ([www.mattressrecyclingcouncil.org/lca-report/](https://mattressrecyclingcouncil.org/lca-report/)) found not only that the materials recovered and reused as a result of MRC's recycling activities result in carbon savings that far exceed the amount of carbon used to collect, transport and dismantle mattresses, but that it provides other positive environmental benefits.

MRC

3 States. 10 Years. 12 Million Mattresses Recycled.

2023 marks a decade since Connecticut, Rhode Island and California authorized the creation of statewide mattress recycling programs

by Julie A. Palm

like? What did it mean for our industry? One thing that we did realize — similar to flammability regulations — we could be part of the process or be run over by it. In our judgment, it was more important to work with state legislators and regulators to fashion a solution that worked and was rational and consistent from state to state. As such, we were able to focus on a prototype model that has been effective in all three states."

Connecticut went first. Connecticut was the first to approve its law on May 28, 2013. Rhode Island followed on July 15, 2013, and California's recycling legislation was signed into law on Sept. 27 of that year. MRC started operating

the programs in Connecticut and California in 2013 and in Rhode Island in 2016. Since then, MRC has recycled more than 12 million mattresses and invested in finding the best ways to store, transport and dismantle used mattresses and foundations to get the most value out of their components. MRC also invests in research to find new uses for those components, especially materials like cotton and coconut fibers that are harder to recycle.

MRC's Bye Bye Mattress program works with retailers, municipalities and other stakeholders to educate consumers about the benefits of mattress recycling and the harm created by illegal mattress dumping.

Big impacts Although focused on diverting used beds from landfills and recycling their components, MRC has helped the sleep products industry focus more broadly on sustainability. MRC created the Sleep Products Sustainability Program, or SPSP for short, to assist mattress manufacturers in California that want to improve the sustainability of their facilities.

And in a 2022 life cycle analysis, MRC documented how mattress recycling reduces greenhouse gas emissions and energy and water consumption.

"It's been fantastic to see the evolution of MRC's programs and increased interest by the mattress community," said Mike O'Donnell, MRC's chief operating officer. "We have a tremendous amount of support from ISPA members and that has translated to highly functional and successful programs. Since 2018, this has evolved into discussions about sustainability and new mattress designs that contemplate end-of-life recycling."

For more information about MRC and its programs, check Mattress-RecyclingCouncil.org and ByeByeMattress.com.*

Mattress Textiles Could Be Used to Make Tomorrow's EV Batteries

Press Release // May 23, 2023

Facebook LinkedIn Twitter

Electrodes in the lithium batteries that will power tomorrow's electric vehicles could be made from recycled mattress textiles.

In a three-year study at the National Institute for Materials Advancement at Pittsburg State University (PSU) in Kansas, researchers led by Dr. Ram Gupta developed a process that transformed mattress textiles into conductive carbon materials used to make the anodes and cathodes in lithium-sulfur rechargeable batteries. These next-generation, lithium-sulfur batteries have 2-3 times more energy storage capacity than conventional lithium-ion batteries.

In the project, funded by the Mattress Recycling Council (MRC), researchers converted and tested coconut fibers, shoddy pad (which is a felt-like product already made of recycled fabrics), and cotton fibers in battery applications. These are materials that today are difficult to recycle. Dr. Gupta's team found cotton was the best material for building these new batteries. Preliminary results indicate the experimental rechargeable batteries both perform equal to or better than conventional batteries and do not require scarce metals such as nickel, manganese and cobalt, which are found in many of today's lithium batteries.

- **Collection Site and Event Publicity Toolkits:** MRC provides recyclers, collection sites, and event hosts with a toolkit containing a news release template, flyer, signage, and suggested content they can use to publicize their participation in the program through online and social media outlets, city/organization websites, and newsletters. The toolkit allows customization of messaging such as hours of operation and residency restrictions. Examples of media coverage resulting from these toolkits include Western Placer Waste Management and the City of San Diego opening Miramar Landfill. Visit [MRC's Resources Library](#) for complete toolkits.

Public Service Announcement

In 2023, MRC's Public Service Announcement (PSA) campaign, "Break Up the Right Way With Your Old Mattress," eclipsed 10 million lifetime impressions nationwide. In 2023, it aired 7,677 times in California, resulting in over 3.7 million impressions.

The campaign includes a 15-second and 30-second video and radio spots in three languages—English, Spanish and Mandarin. In California, English-language spots accounted for 51% of the airings and Spanish-language spots accounted for the remaining 49%. The most aired spot was the 30-second Spanish-language version.

MRC encouraged airings by contacting station directors in the weeks before Earth Day (April 22) and America Recycles Day (Nov. 15). To complement these airings, MRC also asked city leaders and community-based organizations to share the PSA on their social media feeds and other communication channels. This outreach resulted in the use of the PSA by 16 new stations.

California media markets with the most 2023 airings included:

- Los Angeles
- Chico-Redding
- San Francisco-Oakland-San Jose
- Yuma-El Centro

Since 2021 MRC has offered this PSA to California media. In 2024, MRC will produce new spots using information gathered from completed illegal dumping pilot projects and our involvement in task forces, workshops and conferences.

[Appendix E](#) contains the video and radio scripts.

Compliance Outreach

MRC continues to monitor various sources for new entrants into the mattress segment, as well as non-compliant parties. When MRC identifies a party that may need to register and participate in the program, MRC mails a certified mail notice informing it of its

potential obligations and follows up with a phone call or email. If there is no response within 30 days, MRC mails a second certified letter and the party is given 30 more days to respond. If the party remains unresponsive, MRC refers the party to CalRecycle for action.

MRC's database of potential retailers, manufacturers, distributors, and renovators is a compilation of information from California's Bureau of Household Goods and Services, ReferenceUSA, Dun & Bradstreet, industry publication subscriber lists, industry event attendee lists, Yellow Pages, chambers of commerce, the Better Business Bureau and online searches. MRC also receives leads for potential registrants from CalRecycle's enforcement staff and MRC program coordinators as they travel the state, MRC Customer Relations area visits and other registered participants.

MRC also monitors whether retailers and other mattress sellers submit monthly reports and remit collected recycling charges on time. MRC uses a protocol to alert parties more than 90 days delinquent of late fees and associated interest. Each month, MRC notifies CalRecycle of all parties that reach level seven.

TABLE 38: Notification Protocol for Late Reporters and Charge Remitters

Delinquency Stage	Late Reporter	Late Remitter
Level 1	Late notice email generated by MRCreporting.org	Late notice email generated by MRCreporting.org
Level 2	Phone call made to verify continued program participation and provide a verbal reporting reminder	Phone call made regarding outstanding payment and warning of potential interest charges
Level 3	Written notice mailed	Written notice mailed and interest invoice issued
Level 4	Second phone call made to provide verbal warning of potential penalties	Second written notice sent by certified mail and interest invoice issued
Level 5	Written notice sent by certified mail and late fee invoice issued	Second phone call made warning of accruing interest
Level 6	Second written notice sent by certified mail and late fee invoice issued	Third call made warning of referral to collections agency and interest invoice issued
Level 7	Late fee invoice issued; CalRecycle notified of delinquent account	Delinquent account sent to collections agency and interest invoice issued; CalRecycle notified of delinquent account
Continued action	Late fee invoices issued monthly until account no longer delinquent	Interest invoices issued monthly until account is no longer delinquent

Meanwhile, CalRecycle's enforcement unit randomly selects mattress retailers, manufacturers and renovators to evaluate compliance with SB 254 through virtual and on-site inspections.

At retailer inspections, CalRecycle confirms whether the business is registered with MRC, visibly displays the correct charge on the sales transaction documents, collects the recycling charge from customers, properly remits those charges to MRC, and complies with the no-cost retailer take-back obligation. Inspectors also verify whether the mattresses and foundations offered for sale are produced by manufacturers that have registered with MRC.

At renovator inspections, CalRecycle confirms whether the business is registered with MRC and evaluates documentation practices used to report annual mattress collection and disposition data (due to CalRecycle May 1 of each year).

When CalRecycle determines it will levy penalties against a non-compliant party, it publishes the enforcement order on the department's website (<https://www2.calrecycle.ca.gov/Docs/EnforcementOrder/>). In 2023, CalRecycle issued five enforcement orders.

Evaluations

MRC tracks consumer awareness annually and conducts periodic research to measure and improve consumer outreach and education. We also gauge industry awareness and satisfaction by contacting all registered retailers at least once each year. Appendix E contains the complete survey results.

Consumer Behavior and Awareness

MRC surveyed consumers statewide in late April 2023 at the conclusion of its spring advertising campaign. MRC contracted with KB Insights, a 30-year marketing consultant and experienced analyst, to create and implement the survey (N=1,025). This survey obtained feedback from adult residents throughout California, matching California's demographic breakdown reported in Census data for age, gender, ethnicity and income. All responses were collected online.

The survey measured consumer awareness of mattress recycling, retailer take back, how to dispose of a mattress so it can be recycled, knowledge of "free" recycling and awareness of the program's name (these comprise our five Key Performance Indices or "KPIs" listed in [Table 39](#)). Although lower than the same KPIs taken in May 2022, the 2023 results were within 2%-5% of previous measurements. The KPI measurement that showed the greatest decline was knowledge of retailer take back, which dipped 5%, from 35% to 30%. Since consumers seek out and retain information about mattress recycling as they plan to replace their existing products, it is logical that our survey would reveal small KPI decreases in 2023 because Californians bought fewer mattresses in 2023, a continuing trend from 2022. As discussed in further detail

below, other MRC surveys demonstrate that consumers' awareness and knowledge about recycling increase when they are actively engaged in replacing their existing mattresses.

**TABLE 39: MRC's Statewide Consumer Awareness
Key Performance Indices 2020-2023**

Key Performance Indicator	2020	2021	2022	2023
Knowledge of retailer take back	35%	37%	35%	30%
Knowledge that a mattress can be recycled	47%	52%	52%	50%
Knowledge that recycling is free	22%	28%	27%	23%
Knowledge of how to dispose of a mattress so it can be recycled	26%	31%	29%	27%
Recall of Bye Bye Mattress program name	18%	23%	20%	16%

The respondents that could recall Bye Bye Mattress by name (N=172) reported learning about the program through the following sources (MRC asked respondents to select all that apply): advertising (73%), friend or relative (50%), news (31%), local recycling center (26%), mailed information (25%), social media (24%), mattress retailer (24%), landlord or property manager (22%), city or local government (21%) and online search (13%). When compared to 2022, the categories with significant increases were online search (8%), news (7%) and mattress retailer (5%). The sources that had the greatest decrease were landlord or property manager (13%), mailed information (4%) and local recycling center (4%).

Of the survey respondents who recalled hearing or seeing an advertisement (N=153), about two-thirds recalled a television spot (66%) and more than half remembered a social media post (58%). Print ad recall ranked third (26%), followed by radio (23%), in-store signage or materials (21%), online ads (19%), outdoor/billboard (17%) and Nextdoor (6%).

MRC will continue to use these channels to build awareness of Bye Bye Mattress and continue to work with local leaders, city staff, mattress retailers, landlords and property managers to promote the program.

Other portions of the survey measure consumers' mattress purchasing, disposal and storage behaviors, as well as motivators and barriers to recycling. MRC uses this behavioral data to identify opportunities for improving consumer communications.

In 2023, MRC did not see significant changes in either consumer purchasing behavior or the methods used to acquire mattresses. Similar to 2022, most respondents purchased from brick-and-mortar retailers (66%), another quarter from online-only companies (24%) and 7% acquired through non-retail sources such as hand-me-downs, yard sales, classifieds, etc. The remaining 3% did not recall.

The number of respondents who disposed of mattresses in 2023 dropped slightly from 22% to 18%. However, the top methods of disposal are the same as in 2022. Consumers preferred to have their mattresses picked up over dropping it off themselves. The top disposal methods were retailer take back (29%), municipal curbside collection (16%), or private junk removal service (13%). Dropping it off at a recycling center, collection event or at a landfill combined for 17% and 8% of the respondents selected placing it in the trash or dumpster. Meanwhile, 11% of responses pointed toward reuse—giving it away, donating it or selling it. The remainder did not recall (5%) or selected other (1%).

Respondents reported that they were motivated to recycle their mattresses to “protect the environment” (51%) and by “convenience - it’s easy to do” (44%). These were the top two motivators in 2022, though we note in reversed order. As in prior years, respondents’ perceived barriers to mattress recycling are consistently reported as a lack of knowledge (75%) and not having a vehicle to transport their discarded mattresses (34%).

MRC’s consumer survey strategy in 2024 will include a comprehensive, statewide behavioral/awareness study to gauge success against the April 2023 survey.

General Advertising Campaign Effectiveness

To measure the effectiveness of seasonal advertising campaigns, MRC compares KPI performance before and after advertising in the specific markets targeted in its advertising plan. Accordingly, MRC conducted research in February 2023 (N=500) to establish “pre-campaign” performance in 267 targeted zip codes. We compared this data to the results from the annual survey detailed above for those specific zip codes, to assess “post-campaign” results. MRC conducted an additional survey in October 2023 (N=530) to assess “post-campaign” results for the Fall ad campaign.

TABLE 40: MRC’s Ad Campaign Key Performance Indices 2023

Key Performance Indicator of Consumer in a Target Market	Pre-Campaigns Feb. 2023	Post-Campaign April 2023	Post-Campaign Oct. 2023
Knowledge of retailer take back	35%	37%	38%
Knowledge that a mattress can be recycled	52%	56%	58%
Knowledge that recycling is free	26%	30%	30%
Knowledge of how to dispose of a mattress so it can be recycled	27%	32%	35%
Recall of Bye Bye Mattress program name	21%	25%	27%

Since mattress disposals strongly correlate with mattress purchases, MRC also asks consumers who have purchased or acquired a mattress recently about their recycling knowledge and awareness. When segmenting respondents into targeted markets that had purchased or acquired a mattress in the last year, we note that KPIs increase significantly, indicating that MRC’s outreach is resonating and reaching the most likely users of the program.

TABLE 41: Key Performance Indices of Recent Mattress Purchasers in MRC’s Targeted Markets

Key Performance Indicator of Recent Mattress Purchaser in a Target Market	Pre-Campaigns Feb. 2023	Post-Campaign April 2023	Post-Campaign Oct.
Knowledge of retailer take back	50%	57%	65%
Knowledge that a mattress can be recycled	60%	71%	73%
Knowledge that recycling is free	37%	53%	50%
Knowledge of how to dispose of a mattress so it can be recycled	40%	55%	60%
Recall of Bye Bye Mattress program name	38%	50%	52%

MRC will continue to measure advertising effectiveness in this manner while still conducting statewide research for strategic analysis and for trending purposes.

Spanish-Speaking Consumers

MRC continues to monitor awareness among Spanish-speaking consumers because we offer outreach material and produce advertisements in this language. In each 2023 survey phase, MRC asked whether the respondent spoke Spanish and segmented those responses for standalone analysis. KPIs dropped between February and April 2023 among Spanish speakers and rebounded significantly between April and October 2023.

MRC notes that Spanish speakers that lived in a zip code targeted by MRC’s advertising campaigns displayed awareness at similar levels to the general population in a targeted zip code ([Table 42](#)), and higher in three of five KPI categories in the October post-campaign survey.

MRC attributes the early 2023 drop to decreased mattress purchases at the time. Only since 2022 have MRC’s surveys included a question to determine if a respondent spoke Spanish, so MRC will continue to keep this question to determine if there is a similar pattern in 2024.

TABLE 42: Key Performance Indices of Spanish-Speaking Consumer in a Targeted Market

Key Performance Indicator of Spanish-Speaking Consumer in a Target Market	Pre-Campaigns Feb. 2023	Post-Campaign April 2023	Post-Campaign Oct.
Knowledge of retailer take back	43%	31%	36%
Knowledge that a mattress can be recycled	58%	50%	56%
Knowledge that recycling is free	35%	28%	34%
Knowledge of how to dispose of a mattress so it can be recycled	36%	28%	36%
Recall of Bye Bye Mattress program name	35%	25%	30%

Based on these results, MRC will continue incorporating Spanish-language outlets in our advertising campaigns, offering a Spanish-language Public Service Announcement, providing dual-language outreach materials and collaborating with Latino community leaders, elected officials and nonprofit/community-based groups to keep Spanish-speaking consumers informed.

Industry Relations

MRC annually surveys registered retailers to monitor their satisfaction with MRC's assistance and resources, measure their awareness of their obligations and provide them an opportunity to request materials or assistance. In 2023, we expanded the survey to include all other registered companies—manufacturers, distributors and renovators. MRC varies portions of the questionnaire each year to learn what the mattress community needs to best implement the program.

In 2023, MRC invited all 1,585 companies registered in California, Connecticut and Rhode Island to complete the annual survey. MRC emailed the survey to the participants and 16% responded (N=249 with 149 completing the entire survey). The vast majority—85% or 175 participants—were in California or did business within the state.

Retailers

Most of the retailer respondents had a physical presence in California (N=134) and a handful of retailers based in other states reported sales to California residents as well (N=7). We asked these 141 respondents a variety of questions to help us understand how retailers are offering to take back to their customers.

Of the California retailers, 22% sell online and 94% sell from store locations. Of retailers selling mattresses online, 56% provide take-back information after a sale is completed,

33% provide the option to choose at checkout and for 22% the retailer provides take-back information in other areas of their website (such as a Frequently Asked Questions page). In addition, 41% of retailers selling online report always using a third-party transporter to take back their customer's discarded unit, and 11% sometimes use a third party.

For retailers with brick-and-mortar locations, 63% said they discuss take-back options prior to purchase, and 26% discuss take-back options after purchase.

The most used take-back information tool—reported by 69% of the California retailers—are the MRC-provided posters and MRC- or store-generated written communications.

We asked all retailers in all program states how they inform customers about the fee and the program. Of the 140 retailers who responded to these questions, a large majority (73%) stated that they provide our consumer education materials with every sale, which is up from 60% in 2022. Meanwhile, 13% provide materials with just some sales and 14% provide information only upon the customer's request. More than half (61%) display posters in their stores and 56% expressed a desire for a refill of MRC's customer education materials. In addition, 54% confirm that they publish information about the recycling charge and MRC's program, with 14% using social media, 6% including information in a newsletter and 34% use other forms of customer communication such as advertising, store websites, store displays or sales documents.

Other insights MRC gained from the retailer segment of the 2023 industry survey were:

- Nearly half of all retailer respondents (47%) reported an engagement with MRC's Customer Service staff and 77% of those stated they were satisfied with the experience.
- Among the 134 California-based retailers, 68% reported that they knew what to expect during a CalRecycle compliance inspection (up from 61% in 2022) and 32% requested additional information (MRC promptly corresponded with these respondents as completed surveys were received). MRC attributes the rise in understanding compliance expectations as an indication that Retailer Spotlight information and retailer visits are working to convey this information.
- To aid ISPA's Sustainability Initiative, MRC also asked retailers about their customers' "green" buying habits and found that 41% of consumers specifically requested green or sustainable products. 32% of retailers reported that they sell green or sustainable products. Most retailers (77%) also indicated that the manufacturers of the mattresses they sell provide information about sustainable products.

Based on these results, MRC is exploring new ways to convey information to all retailers on the take-back requirement and for opportunities to increase retailers' satisfaction in engagement with MRC.

Manufacturers and Renovators

29 manufacturers (which included distributors) and four renovators responded to the survey. While each of these segments are too small of a sample size to draw confident conclusions, MRC notes:

- Of the manufacturers, 48% reported using their websites to communicate their sustainability practices to consumers while 38% use product documentation.
- Seven manufacturers expressed interest in participating in the Sleep Products Sustainability Program and were referred to the program's coordinator, who provided them with more information.
- Manufacturers ranked online/digital resources as the most helpful formats for receiving MRC's information—MRC's website, the online resources library, MRCreporting portal and newsletters.
- Of the renovators, two indicated interests in recycling unwanted units with MRC as well as becoming a public collection site.
- All renovators were aware of their annual reporting requirements to CalRecycle.
- Neither manufacturers nor renovators reported any dissatisfaction with the program or current resource offerings.

MRC will repeat this process in 2024 and will refine the questionnaire as appropriate.

Appendices

Appendix A: Registered Manufacturers, Renovators, Retailers, Distributors and Brands

14 CCR § 18964(b)(4)

Registered Manufacturers, December 31, 2023

“Manufacturer” means any of the following:

(A) The person who manufactures a mattress and who sells, offers for sale, or distributes a mattress in the state.

(C) If there is no person who is a manufacturer of a mattress for purposes of subparagraph (A), the manufacturer is the person who imports the mattress into the state for sale or distribution.

Legend: In the Address field, the following abbreviations are used: Ave is avenue, Blvd is boulevard, Dr is drive, E is east, Fl is Floor, Hwy is highway, L is lane, N is north, Pkwy is parkway, Pl is place, Rd is road, S is south, St is street, Ste is suite, W is west.

Retailers, December 31, 2023

“Retailer” means a person who sells mattresses in the state or offers to a consumer a mattress in the state through any means, including, but not limited to, by remote offering, including sales outlets or catalogs, electronically through the internet, by telephone, or through the mail.

“Sale” or “sell” means the transfer of title of a mattress for consideration, including by a manufacturer, a distributor, or a retailer for eventual consumption to a consumer in the state, including remote sales conducted through sales outlets, catalogs, or the internet or any other similar electronic means. For purposes of this chapter, a long-term lease of not less than 12 months is the same as a sale.

Appendix C: Program Operations Materials

CALIFORNIA MATTRESS RECYCLING STANDARDS

The Mattress Recycling Standards (Standards) define the minimum requirements to be an approved Recycler for the Mattress Recycling Council (MRC). Under these Standards, mattresses must be managed and processed in a manner that adequately safeguards the environment, industry employees and consumers. The Standard also includes data tracking and reporting requirements.

The MRC reserves the right at its discretion to review and revise these Standards.

For purposes of these Standards, the term “mattress” should be interpreted to include both mattresses and foundations (or box-springs).

Background

The MRC is a non-profit organization formed by the International Sleep Products Association (ISPA) to develop and implement mattress recycling programs in states with laws requiring recycling of discarded mattresses.

Recyclers must comply with these Standards, contract terms and conditions and all legislative and regulatory requirements. Recyclers must have transparent operations, clear and documented recycling procedures and accurate tracking of all mattresses and components (including non-recyclable waste). All Recyclers will be audited under these Standards.

Disclaimer

The MRC does not intend for these Standards to constitute or provide legal guidance of any kind. The Recycler must be aware of and abide by all local, state, or federal laws and regulations applicable to the management of post-consumer mattresses or the business operation of the Recycler. In the event that these Standards are inconsistent with any such laws or regulations, the laws or regulations take precedence, and the Recycler must inform the MRC of such inconsistency.

1. General Requirements

Each Recycler shall:

- 1.1. Possess a current and valid business license and meet all applicable local, state and federal requirements for providing the type of recycling services required by the MRC.
- 1.2. Possess valid state approved permits, plans, and approvals, as applicable.

- 1.3. Comply, and be in good-standing, with all applicable federal, state, and local regulations including but not limited to:
 - Department of Transportation (DOT) if providing any transportation services
 - Occupational Safety and Health Administration (OSHA) and applicable local and state health and safety regulations
 - Local and state fire department regulations, fire and building codes and other applicable building and occupancy safety requirements
- 1.4. Possess Commercial General Liability Insurance, including coverage for bodily injury, property damage, complete operations and contractual liability with combined single limits of not less than \$1 million per occurrence and \$2 million aggregate. Recycler's policy must be endorsed to name MRC, its directors, officers, employees, agents, assigns, as Additional Insureds. Recycler must carry its own Business Auto and Workers Compensation policies. Recycler shall require all third parties that it uses to provide any services under its contract with MRC to comply with the same insurance requirements specified in these Standards.
- 1.5. List the MRC as an additional insured party.
- 1.6. Possess and maintain in good standing workers compensation and unemployment insurance coverage through a state program or through private insurance policy or sufficient self-insurance coverage.
- 1.7. Maintain all records for a minimum of 4 years, including but not limited to shipping documents (both for goods received and shipped), processing, material disposal and sales records.
- 1.8. Develop and keep current a written plan that assures:
 - 1.8.1. proper closure of the Recycler's facility or site in the event of sale, closure, abandonment, bankruptcy, any form of dissolution of the Recycler, or for any other reason;
 - 1.8.2. against abandonment of any mattresses, mattress materials, or other products or materials processed by the Recycler in the event of closure; and
 - 1.8.3. proper remediation of any contamination to the Recycler's facility or site in accordance with all applicable local, state and federal laws and regulations.

As part of that plan, the Recycler must obtain a bond or other financial instrument sufficient to pay for the closure activities described in the plan in the event that the Recycler itself is financially unable to perform all or some of such activities. The Recycler shall make such plan and bond or other financial instrument available for inspection by the MRC upon request.

- 1.9. Maintain a process to provide written notice of closure to the MRC with a minimum of 90-days advance notice.

- 1.10. Maintain a process to provide written notice to the MRC of any incidents that required the assistance of first responders within 24 hours of the occurrence. Provide written notice of any corresponding regulatory orders, fines or other governmental or administrative actions taken within 48 hours of receiving such orders or fines.
- 1.11. Maintain a documented process to record and track accidents, injuries or violations and any corresponding corrective and/or preventive actions taken.
- 1.12. Maintain a documented process to identify and communicate physical, mechanical, biological or pathogenic hazards and severity of such hazard to employees, and any corresponding corrective and/or preventive actions taken.
- 1.13. Maintain a documented process to identify and communicate potential fire hazards and severity of such hazards to employees, and any corresponding corrective and/or preventive actions taken.

2. Material Processing

Each Recycler shall implement and maintain a documented plan for deconstructing mattresses, which shall at a minimum require the Recycler to:

- 2.1. Fully disassemble the mattresses.
- 2.2. Recycle at least 75% by weight of the mattresses it processes by selling such material in appropriate markets for use in making new materials or products.
- 2.3. Minimize the quantity of material disposed of through landfills, incineration, or other non-recycling avenues.
- 2.4. Maintain a written policy describing how each mattress type and material (including pocket coils) will be processed.
- 2.5. Process all mattresses within 30 days of receipt at facility.
- 2.6. List criteria applied in determining when a given mattress cannot be processed.

3. Material Tracking

Each Recycler shall implement and maintain a documented plan to track and control mattresses entering their processing facilities and the flow of recyclable and non-recyclable materials generated through mattress deconstruction. The plan shall at minimum require the following:

- 3.1. Weigh all in-bound mattresses.
- 3.2. Maintain in-house or use third party annually calibrated and certified scale to weigh all in-bound and outbound materials on-site or document all out-bound shipments using third party calibrated and certified scales.
- 3.3. Maintain daily records of all receipts of used mattresses, mattress processing, sales or other dispositions of recycled or non-recyclable materials, and inventories.

- 3.4. Provide the MRC records for all parties providing discarded mattresses to Recycler in exchange for a collector incentive, including quantities received from and incentives paid to each party, and link such information to the inventory records required in 3.3.
- 3.5. Provide the MRC a list of all purchasers of recycled materials, and notify the MRC of any changes to that list at least 10 business days in advance (the MRC will treat this information as confidential). Recycler must obtain written approval from MRC for new facilities.
- 3.6. Train employees on how to prepare and maintain all necessary records and other documentation related to the receipt, processing, inventory and disposition of mattress and mattress materials.
- 3.7. Provide certificates of recycling for all material received and processed.

4. Downstream Due Diligence

Each Recycler shall have processes in place to identify, audit and approve all purchasers of recycled materials. The processes shall at a minimum require:

- 4.1. Annual desk audits to verify each purchaser's compliance with all applicable local, state and federal environmental and other requirements, and review of each purchaser's operating permits, environmental compliance permits, business licenses, insurance and certifications.

5. Bed Bug Management

Each Recycler shall implement and maintain a documented plan to identify and mitigate bed bug infestation in the facility and among employees. Components of the plan shall, at minimum, address the following provisions:

- 5.1. Document that all employees attended bed-bug identification and mitigation training.
- 5.2. Post bed bug identification posters in prominent work place location to encourage proactive identification and isolation of contaminated mattresses.
- 5.3. Clearly identify how infested mattresses will be isolated and either decontaminated or disposed.
- 5.4. Track the number and if possible, source of contaminated units.

Quality Standards	C-11
Materials Collection & Handling	C-12
Transportation & Processing	C-14
Recordkeeping	C-15
Program Withdrawal & Termination	C-16

About the Guidelines

Staff at all participating collection sites must be knowledgeable regarding these guidelines before accepting mattresses. For simplicity, these guidelines will refer to mattresses and box springs as mattresses. These guidelines describe the program and what is required to participate. MRC reserves the right to update, change, modify, amend, add or remove terms or otherwise alter these guidelines at any time with or without prior notice.

About the Mattress Recycling Council

In 2013, California enacted Senate Bill 254 as amended which requires mattress manufacturers to create a recycling program for mattresses discarded in the state. The bedding industry established the Mattress Recycling Council (MRC) to develop and operate the mattress recycling program known as Bye Bye Mattress.

What MRC Provides

MRC provides the following to participating collection sites:

- A collection container to store mattresses that is appropriate for the number of mattresses that the collection site expects to generate and the site's available space
- Transportation from the collection site to a contracted recycler
- No-cost mattress recycling services

PROGRAM MATERIALS

INCLUDED PRODUCTS

Mattresses: Defined as any sleep surface covered with ticking or fabric that contains resilient material such as steel innersprings, foam, fiber or other filling or upholstery materials, used alone or in combination, regardless of size or shape. This definition includes foam mattresses.

Futons: See mattress definition above. Futon mattresses must be detachable from the frame or base to be accepted. (Futon mattresses that do not detach from the frame or base are not included.)

Box springs (also commonly called foundations): A ticking or fabric-covered structure used to support a mattress or sleep surface and may be comprised of a frame, foam, springs or other structure, or other materials, used alone or in combination, regardless of whether the product is stationary or adjustable.

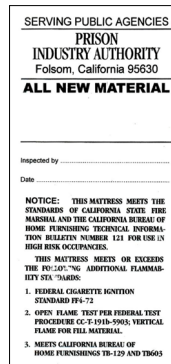

All items accepted for recycling by MRC must have been used and discarded in the state of California.

PROGRAM MATERIALS

EXCLUDED PRODUCTS

- Severely wet, damaged, twisted, frozen or soiled mattresses
- Adjustable bases not covered in ticking or fabric
- Air mattresses that contain no upholstery material (such as camping beds)
- Car beds
- California Prison Industry Authority units
- Collapsible roll-away beds
- Fold-out sofa beds
- Futon frames or bases
- Juvenile products including crib mattresses, carriages, baskets, dressing tables, strollers, playpens, infant carriers, lounge pad, crib bumpers
- Loose bedding, blankets or sheets
- Mattresses infested with bed bugs or other living organisms
- Mattress pads and toppers
- Metal bed frames
- Out-of-state mattresses
- Pillows and cushions
- Sleeping bags
- Water beds

PROGRAM MATERIALS

MATTRESS INSPECTION AND EXAMINATION

Collection site staff should screen incoming mattresses to determine whether they are suitable for recycling and should remove mattresses that are:

- Excessively wet or frozen
- Severely twisted, punctured or crushed
- Infested with bed bugs or other living organisms
- Exceptionally soiled or moldy

Mattresses not suitable for recycling should be disposed of through your existing solid waste stream.

Bed Bug Identification

Mattresses and box springs infested with bed bugs are unacceptable for recycling and should be disposed of through your existing solid waste stream. Staff at collection sites should evaluate program materials for evidence of bed bug infestation. A training webinar focused on dispelling health related myths, identifying bed bugs and offering best practices for protecting staff can be found here: <https://www.mattressrecyclingcouncil.org/resources>

Bed bugs are tan to brown in color, but may appear redder if they have fed.

Adult Bed Bugs are dorsally flat insects, broadly oval and the size of an apple or melon seed (1/4").

Nymphs look like adults in shape but are smaller.

Eggs are white and barrel-shaped.

Signs of bed bug activity may be more obvious than the insects themselves. Look for clusters of dark spots or smudges on mattresses (fecal spots), especially along seams. Eggs, shed skins and all life stages of bed bugs may also be present in these 'soiled' areas.

For more information on bed bugs, please refer to the resources made possible by the **Connecticut Coalition Against Bed Bugs at www.ct.gov/caes/CCABB**

QUALITY STANDARDS

Acceptable Quality

IMPORTANT: Only units used and discarded in California are accepted by the program.

Shown here are examples of acceptable units.

Unacceptable Quality

Shown here are examples to illustrate severe damage, heavy soiling and infestation.

Other Conditions:

- Out-of-state mattresses
- Severely damaged or soiled mattresses
- Mattress that have been stripped of padding components.
- Pillows and cushions
- Fold-out sofa beds and futon frames or bases
- Loose mattress pads, toppers
- Loose bedding, blankets, or sheets
- Water beds
- Fire damaged units

MATERIALS COLLECTION & HANDLING

Each collection site will have unique operational considerations. Participating sites must make their own decisions about how to best manage their operations in the safest manner possible in accordance with applicable laws. At a minimum, each participating site must meet these requirements:

MINIMUM PROGRAM REQUIREMENTS	
SITE	Each collection site must be secure with adequate space and staffing to handle and store acceptable mattresses.
PERMITS	Each collection site must have knowledge of and comply with all applicable federal, state and local laws. These may include, but are not limited to, zoning requirements, state permit requirements and OSHA or other workplace requirements. Please contact your Local Enforcement Agency (LEA) to confirm whether your site is in compliance with all applicable notifications or requirements for accepting mattresses for recycling at your site. In many cases, this will be your county or local Public Health Department.
INSURANCE	Each collection site must maintain general liability insurance of at least \$1,000,000 per occurrence.
TRAINING	Staff at each collection site must be trained and knowledgeable regarding these guidelines before accepting mattresses for recycling.
STORING & LOADING MATTRESSES See page 9 for photos and guidelines	<p>Collection sites must keep mattresses dry by storing in weatherproof containers or under cover to maximize their recyclability. In addition, all collection sites must:</p> <ul style="list-style-type: none"> • Make every effort to place mattresses in MRC-designated storage containers immediately upon acceptance • Do not store units on the ground for prolonged periods of time and make every effort to keep container doors closed • Keep mattresses intact and not intentionally crush or puncture them • Efficiently stack mattresses to maximize the number of units loaded in each storage container • Provide oversight to keep unacceptable items out of MRC-designated storage containers • Remove any non-program materials from MRC-designated storage containers before transport to MRC recyclers • Practice good housekeeping standards and keep storage containers and program materials in a neat and orderly condition
SITE ACCESS	Collection sites must allow MRC access to confirm compliance with these guidelines.

MATERIALS COLLECTION & HANDLING

LOADING MATTRESSES IN STORAGE CONTAINERS

Expected number of mattresses that should fit in various container sizes:

Container Type	Number of Mattresses
20-foot sea container	30-45
28-foot trailer	60-95
40-foot sea container	75-95
40-yard roll-off container	35-50
48-foot trailer	110-180
53-foot trailer	125-190

Acceptable Loading

- 1. Begin each stack with a queen or full size box spring.**
This acts as a base pallet to create a secure stack and makes unloading of mattresses quick and efficient.
- 2. Mattresses should be stacked horizontally** to the top of the trailer to maximize space.
- 3.** In small quantities, king size mattresses can be placed vertically next to a stack of horizontal mattresses.
- 4.** If there are more than 10 king size units, stack horizontally.

Unacceptable Loading

IMPORTANT: Do not load units vertically or in an unsafe manner.

Please contact your Program Coordinator to learn more about acceptable/non-acceptable units and appropriate stacking and loading techniques.

TRANSPORTATION & PROCESSING

TRANSPORTERS

MRC will assign each collection site a transporter to provide a storage container and transport services.

- MRC-contracted transporters will provide participating locations with evidence of automobile insurance coverage of at least \$1,000,000 per occurrence
- Each collection site must notify transporter at least two business days before a storage container is full of mattresses
- The assigned transporter will pick up full containers and drop off an empty container at the same time
- On the scheduled pick up day, the collection site must make the collection container readily accessible to the transporter
- At the time of pick-up, collection site staff must be present to sign a three-part Bill of Lading (BOL) supplied by the transporter that details the quantity of mattresses in the container and must provide appropriate copies of the BOL to the transporter

A collection site may choose to provide its own storage containers and transportation. These locations must contact the recycler directly to arrange for a convenient drop-off time.

RECYCLERS

Recyclers under contract with MRC will meet established recycling standards and accurately account for all mattresses received, the mattress components recycled (e.g., foam, steel, wood, fiber, etc.) and any residual disposal. Collection sites will be assigned an MRC recycler to best service your facility.

RECORDKEEPING

Bill of Lading:

A Bill of Lading (BOL) will be provided by the transporter. Before a full container leaves the site, the BOL must be completed and signed by facility staff.

Annual Reporting to CalRecycle:

Per the law, mattress recyclers, renovators, and solid waste facilities, as defined by Public Resources Code section 42986, must submit an annual report to CalRecycle by May 1 each year. The annual reports must meet the requirements listed in Title 14, California Code of Regulations (CCR) sections 18965-18967, which includes contact information and quantitative information. Annual reports are used by CalRecycle and MRC to assess the program and establish and update the mattress recycling goals for the state.

See CalRecycle's website for more information:

PROGRAM WITHDRAWAL & TERMINATION

A collection site's participation in MRC's Bye Bye Mattress program in California is voluntary. Either party may withdraw from participation in accordance with the terms in your contract. Written notice to the other party is required. MRC reserves the right to remove any collection site not in compliance with these guidelines from further participation in the program.

These guidelines describe the program and what your facility (collection site) needs to do to participate. For simplicity, these guidelines will refer to mattresses and box springs as mattresses. MRC reserves the right to update, change, modify, amend, add or remove terms or otherwise alter these guidelines at any time with or without prior notice.

ABOUT THE PROGRAM

Mattress Recycling Council

The Mattress Recycling Council (MRC) is a nonprofit organization formed by the bedding industry to operate the Bye Bye Mattress recycling program in states that have enacted mattress recycling laws – California, Connecticut and Rhode Island.

In each of these states households and businesses now have no-cost options to recycle mattresses. Businesses may recycle through the Commercial Volume Program by dropping off units directly at a participating location or eligible entities can arrange transportation with MRC. Households may directly recycle through a local collection site or event or indirectly through a residential bulky item curbside collection program or retailer that takes back old units when delivering new ones.

Bye Bye Mattress is made possible when consumers purchase a mattress or box spring. Fees vary by state and each state fee funds that state's program. The fee is primarily used to establish collection sites and events, transport mattresses from those locations to recyclers and cover the cost to disassemble the mattresses. Portions of the fee are also used for combatting illegal dumping, researching improvements to the recycling process and identifying new uses for materials, as well as conducting public education and outreach.

Commercial Volume Program

MRC provides California businesses and organizations the following opportunities to recycle mattresses at no cost.

- Any business or organization may drop off any number of units at a participating recycler. Contact the desired location to make arrangements. View the current listing at:
byebyemattress.com/programs-by-state/ca-commercial-sites/
- Any business or organization may drop off units at a site that is accepting commercial volume at no cost. Unit limits may apply or an appointment may be required. View the current listing at:
byebyemattress.com/programs-by-state/ca-commercial-sites/
- Eligible entities (ie: retailers, health care facilities, educational facilities, military bases, and lodging establishments) with at least 100 units to recycle can request transportation services. 14 days advance notice required. Contact MRC for details.

Contact:

Joy Broussard, 707-394-8620
cvp@mrc-us.org

PICKUP ELIGIBILITY AND PARTICIPATION REQUIREMENTS

MRC provides no-cost transportation and recycling of mattresses to eligible entities (ie: retailers, health care facilities, educational facilities, military bases, and lodging establishments) with at least 100 units to discard. All units must have been used and discarded in California and MRC requires 14 days notice to secure transportation.

Eligibility

RETAILERS

- Must be registered with MRC, remitting the recycling fees and compliant with all provisions of California's Used Mattress Recovery and Recycling Act.
- Must have accumulated a minimum of 100 units. Partnering with other local businesses, organizations or allowing public drop-off to reach the minimum is permitted.
- Those collecting at least 100 units monthly may request a permanent trailer.

OTHER COVERED ENTITIES

Hotels & Lodging Facilities, Universities & Educational Facilities, Military Bases, Healthcare

- Must have accumulated a minimum of 100 units. Partnering with other local businesses, organizations or allowing public drop-off to reach the minimum is permitted.

Participation

To receive MRC's assistance with transporting and recycling mattresses, the eligible entity must:

- Complete a registration form and return it no later than 14 days in advance of the desired pickup date.
- Agree to follow these guidelines.
- Provide a collection area that is capable of allowing access to a 53-foot trailer.
- Provide a minimum of two staff members to assist with loading units into the provided trailer.

PROGRAM MATERIALS

INCLUDED PRODUCTS

Mattresses: Defined as any sleep surface covered with ticking or fabric that contains resilient material such as steel innersprings, foam, fiber or other filling or upholstery materials, used alone or in combination, regardless of size or shape. This definition includes foam mattresses.

Futons: See mattress definition above. Futon mattresses must be detachable from the frame or base to be accepted. (Futon mattresses that do not detach from the frame or base are not included.)

Box springs (also commonly called foundations): A ticking or fabric-covered structure used to support a mattress or sleep surface and may be comprised of a frame, foam, springs or other structure, or other materials, used alone or in combination, regardless of whether the product is stationary or adjustable.

All items accepted for recycling by MRC must have been used and discarded in the state of California.

Mattresses from out of state sources cannot be recycled using MRC's program.

PROGRAM MATERIALS

EXCLUDED PRODUCTS

- Severely wet, damaged, twisted, frozen or soiled mattresses
- Adjustable bases not covered in ticking or fabric
- Air mattresses that contain no upholstery material (such as camping beds)
- Car beds
- California Prison Industry Authority units
- Collapsible roll-away beds
- Fold-out sofa beds
- Futon frames or bases
- Juvenile products including, carriages, baskets, dressing tables, strollers, playpens, infant carriers, lounge pad, crib bumpers
- Loose bedding, blankets or sheets
- Mattresses infested with bed bugs or other living organisms
- Mattress pads and toppers
- Metal bed frames
- Out-of-state mattresses
- Pillows and cushions
- Sleeping bags
- Water beds

MATERIALS COLLECTION & HANDLING

Each facility's collection site will have unique operational considerations. Participating facilities must make their own decisions about how to best manage their operations in the safest manner possible in accordance with applicable laws. At a minimum, each facility's collection site must meet these requirements:

MINIMUM PROGRAM REQUIREMENTS	
SITE	Each collection site must be secure with adequate space and staffing to handle and store acceptable mattresses.
PERMITS	Each collection site must have knowledge of and comply with all applicable federal, state and local laws. These may include, but are not limited to, zoning requirements, state permit requirements and OSHA or other workplace requirements. Please contact your Local Enforcement Agency (LEA) to confirm whether your site is in compliance with all applicable notifications or requirements for accepting mattresses for recycling at your site. In many cases, this will be your county or local Public Health Department.
INSURANCE	Each collection site must maintain general liability insurance of at least \$1,000,000 per occurrence.
TRAINING	Staff at each collection site must be trained and knowledgeable regarding these guidelines before accepting mattresses for recycling.
STORING & LOADING MATTRESSES See page 10 for photos and guidelines	<p>Collection sites must keep mattresses dry by storing in weatherproof containers or under cover to maximize their recyclability. In addition, all collection sites must:</p> <ul style="list-style-type: none"> • Make every effort to place mattresses in MRC-designated storage containers immediately upon acceptance • Keep mattresses intact and not intentionally crush or puncture them • Efficiently stack mattresses to maximize the number of units loaded in each storage container • Provide oversight to keep unacceptable items out of MRC-designated storage containers • Remove any non-program materials from MRC-designated storage containers before transport to MRC recyclers • Practice good housekeeping standards and keep storage containers and program materials in a neat and orderly condition
SITE ACCESS	Collection sites must allow MRC access to confirm compliance with these guidelines.

LOADING INFORMATION

LOADING MATTRESSES IN STORAGE CONTAINERS

Expected number of mattresses that should fit in various container sizes:

Container Type	Number of Mattresses
20-foot sea container	30-45
28-foot trailer	60-95
40-foot sea container	75-95
40-yard roll-off container	35-50
48-foot trailer	110-180
53-foot trailer	125-190

Acceptable Loading

- 1. Begin each stack with a queen or full size box spring.**
This acts as a base pallet to create a secure stack and makes unloading of mattresses quick and efficient.
- 2. Mattresses should be stacked horizontally** to the top of the trailer to maximize space.
- 3.** In small quantities, king size mattresses can be placed vertically next to a stack of horizontal mattresses.
- 4.** If there are more than 10 king size units, stack horizontally.

Unacceptable Loading

IMPORTANT: Do not load units vertically or in an unsafe manner.

Please contact your Program Coordinator to learn more about acceptable/non-acceptable units and appropriate stacking and loading techniques.

TRANSPORTATION & PROCESSING

TRANSPORTERS

MRC will assign each collection site a transporter to provide a storage container and transport services.

- MRC-contracted transporters will provide participating facilities with evidence of automobile insurance coverage of at least \$1,000,000 per occurrence.
- Each facility should notify transporter at least two business days before a storage container is full of mattresses if a permanent container is on site.
- The assigned transporter will pick up full containers within two business days of notification and drop off an empty container at the same time.
- On the scheduled pick up day, the facility must make the collection container readily accessible to the transporter.
- At the time of pick-up, facility staff must be present to sign a three-part Bill of Lading (BOL) supplied by the transporter that details the quantity of mattresses in the container and must provide appropriate copies of the BOL to the transporter.

A facility may choose to provide its own storage containers and transportation at its own cost. View a current list of locations that accept commercial volume at byebymattress.com/programs-by-state/ca-commercial-sites/.

RECYCLERS

Recyclers under contract with MRC will meet established recycling standards and accurately account for all mattresses received, the mattress components recycled (e.g., foam, steel, wood, fiber, etc.) and any residual disposal. MRC will assign a recycler to best service your facility.

RECORDKEEPING

Bill of Lading:

A Bill of Lading (BOL) will be provided by the transporter. Before a full container leaves the site, the BOL must be completed and signed by facility staff.

PROGRAM WITHDRAWAL & TERMINATION

An entity's participation in MRC's Commercial Volume Program is voluntary. Either party may withdraw from participation with 10 days written notice to the other party. MRC reserves the right to remove any entity not in compliance with these guidelines from further participation in the program.

Appendix D: GIS Methodology

Customer Analytics: MRC Convenience Analysis— Spring 2024 Technical Details

Summary

The Mattress Recycling Council (MRC) requested that Customer Analytics determine how many and what percent of the population in California has convenient access to recycle mattresses in California using the 2023 Collection Network. A combination of standard and spatial analyses was performed to determine convenience rates by geographic and consumer attributes.

A related analysis on the convenience for retailers to recycle used mattress was also requested. It shares many similarities to the consumer analysis and inputs from the consumer work were used to calculate convenience rates for retailers using consumer convenience as a proxy.

Details

To perform the analysis, MRC and Customer Analytics had to define:

- Level of geographic detail the data can support
- What population data would be analyzed: Total, In Environmental Justice Communities, Rural
- Eligible collection network entities
- Convenience

Geography

The working geography for this analysis are 2020 Census Block Groups. Apart from Census Blocks, this is the smallest level of geographic detail for which data from government sources are available. This is also the smallest unit of geography which information on dwelling type is available, a necessary component to the analysis of certain types of collection programs.

The state of California has just over 25,000 Census Block Groups, which have an average population of 1,500 people. Census Block Groups are subdivisions of Census Tracts, which are subdivisions of Counties. In other words, Block Groups roll up to Tracts which roll up to Counties. Each Census Block Group has a unique, 12-character

ID. The first 11 digits of that ID are the Census Tract the Block Group falls inside. The first 5 characters of the ID are the County. This allows us to transfer attributes of Counties or Tracts on to Census Block Groups directly.

Population

Small area population data was obtained from the US Census Bureau's American Community Survey (ACS). Customer Analytics downloaded block group and [census tract level data](#) for BR25033: Total Population in Occupied Housing Units by Tenure by Units in Structure from the 2018 to 2022 [5-year ACS](#) via the Census Bureau's FTP site. These data were summarized into the population living in single family dwellings and multifamily dwellings. The population living in households with less than 5 units is considered single family, 5 or more units is multifamily. This was required to support bulky item collection programs that only service single family dwellings described later.

Environmental Justice

One of the populations that MRC asked Customer Analytics to analyze separately is the population in Environmental Justice Communities ("EJ"). California's EnviroScreen 4.0 (October 2021 release) data was used to determine how many people in a Census Block Group are in EJ Communities. EJ Communities are those Census Tracts CalEnviroScreen defines as Disadvantaged Communities. [Disadvantaged Communities](#) are "the top 25% scoring areas from CalEnviroScreen along with other areas with high amounts of pollution and low populations." As previously noted, Census Block Groups roll up into Census Tracts, which allows us to apply the EJ Community status from Tracts to Block Groups. Once applied, an estimate for the population in EJ Communities for both single and multifamily populations were created.

The table below displays the total population and population by EJ Community status.

**TABLE 1: California Population by EJ Community Status
(2022 Census Counts and 2021 EnviroScreen Score)**

Population	Number
Total Population	38.5 million
Population in EJ Communities	9.4 million
Population in Non-EJ Communities	29.1 million

*Estimates based on 2018-2022 ACS Census Block Group Population;
Environmental Justice Communities from EnviroScreen 4.0.*

Rural

Part of the requested convenience analysis is to analyze convenience for the rural population of California. MRC requested that Customer Analytics define a rural county to be consistent with Cal. Pub. Res. Code § 40184, which in general defines a rural county as one that disposes of less than 200,000 tons of waste. See the Rural County List located in this appendix for the list of counties that are considered rural for the purposes of this analysis. The county's status as being Urban or Rural is then applied to the Census Block Groups within it, allowing various reports to be summarized by this status.

Retailers

Retailer convenience is determined by the same process used to measure consumer convenience, using consumer convenience as a proxy for retailer convenience.

There are two changes applicable only to retailer convenience analysis:

- Only those collection network facilities that accept units from commercial entities are included.
- The population in rural areas are considered to have convenient access if the distance to a site is less than 40 miles, while in urban areas it must be within 20 miles.

Collection Network Entities

The Mattress Recycling Council provided Customer Analytics a list of the entities that provide mattress recycling in California. This network of entities is composed of sites wherein consumers transport mattresses directly as well as bulky item programs where the mattress is picked up directly from the consumer's home.

The sites include permanent collection sites, recyclers and events. In all cases, the sites were marked as servicing consumers, commercial customers, or both. For residential convenience analysis, only those collection sites that service consumers or both consumers and commercial customers are considered.

The bulky item programs are classified in two different ways. The first type are those programs that participate with MRC's recycling program. The other type are other bulky item pick-up programs available to consumers that do not participate in MRC's program. For standard convenience analysis, only those that participate with MRC's recycling program are included.

In addition to segmenting between "participating" or "generally available" programs, bulky item programs are also classified by the consumers they service. All bulky item programs service single family dwellings, but some do not service multifamily dwellings. Both types are included in convenience analysis, but the multifamily population is excluded if the area is only serviced by a bulky item program that exclusively services single family dwellings and is not covered by a collection site.

Exclusively for the retailer convenience analysis Commercial Volume Program (CVP) consolidation locations were provided to Customer Analytics. These are fixed locations that are used to centralize pick-up for numerous retail chains in the State of California. Any retailer convenience analysis included these sites in addition to the permanent sites and recyclers that service commercial customers.

Collection Network Spatial Coverage

The two types of collection network entities require two approaches to determine the areas that they service.

Sites

MRC requested that Customer Analytics consider a collection site to service a consumer if they are within a 15-mile straight line distance of the site for consumer analysis. As individual consumer to site data are not available, the proximity of the Census Block Group is used to determine if the population within that Block Group is considered serviced or not using the population centroid of each Block Group. Customer Analytics uses the [Haversine distance formula](#) when calculating the distance between two points.

The population centroid is superior to the geographic centroid as it is more representative of the population living in that Block Group. This is particularly important in Block Groups with uninhabitable area such as bodies of water, forests, and deserts.

For a limited number of Collection Sites, there are residency requirements that limit who is eligible to recycle a mattress to residents of a city or one or more counties. A consumer must reside in those eligible geographies and meet the distance criteria to be considered to have convenient access.

Bulky Item

The bulky item programs service a consumer if they live within the area serviced by the bulky item collection program. Each bulky item program's service area is defined by ZIP code, municipal boundary, unincorporated areas within a county, or a description of their service area. Each Census Block Group in California was coded as being in or outside of the service area of one or more bulky item programs. Census Block Groups were identified using a ZIP Code to Census Block Group crosswalk developed by Customer Analytics. Through spatial joins in ArcMap, Census Block Groups were identified as being in a place or in the unincorporated areas of a county, when applicable, mapped to bulky item programs covering those areas. Description-based service areas were converted to boundary files, which were used to spatially select the Census Block Groups that fall within the area.

Customer Analytics: MRC Illegal Mattress Dumping Analysis — Spring 2024 Technical Details

Summary

The Mattress Recycling Council (“MRC”) requested that Customer Analytics use multivariate statistical analyses to determine the following from the 2023 illegal dumping data:

- How preventative measures/opportunities for no-cost management of discarded mattresses affect illegal dumping.
- How demographic/socio-economic characteristics affect illegal dumping within a ZIP code.

As noted in the report, the data suggest that communities near select collection sites (i.e., Retailers; as well as Non-Profit, “Other” within 15 miles; and Renovators within its host zip code) and recyclers are associated with less dumping. Communities with bulky item programs are associated with less dumping. For 2023, collection events had an ambiguous statistical relationship with dumping; significant under select models while non-significant in most models. While we were unable to statistically determine a relationship between dumping and collection events, it is possible that events do have an impact on dumping but that the 2023 data are not able to pick up this relationship.

ZIP codes with high concentrations of poverty, renters and multifamily dwelling types (e.g., apartment complexes) are associated with higher dumping rates. Zip codes with higher concentrations of elderly persons are associated with less dumping. We should be careful to note that it is possible that persons outside of these areas may have dumped mattress into these areas.

Data Source Details

Illegal Dumping

Illegal Mattress Dumping by member, ZIP code and month were provided by MRC. As the finest geography available with mattress dumping was the ZIP code, the data compiled to perform this analysis was narrowed down to the ZIP code level (by month). Data provided by differing types of boundaries (i.e., “places” and “tracts”) were allocated to ZIP codes based on overlapping shares of populations within these boundaries.

Demographic and Socio-Economic Characteristics

CalEnviroScreen (“CES”) 4.0 (October 2021) data were used as the source of Environmental Justice (“EJ”) Communities¹, Pollution, Poverty, Total Population and % Elderly (Aged 65+) figures. CES’s Pollution Burden Score was derived from their

¹ “Environmental Justice” Communities, referred to as Disadvantaged Communities in the CES data.

collection of numerous pollution exposure scores (such as ozone, pesticides, hazardous waste, etc.).² CES defines [poverty](#) as anyone living in a household with a household income that is up to two times the federal poverty level. CES's poverty data are sourced from the 2016 to 2020 ACS. Total Population as well as % Elderly were drawn from CES's spreadsheet which also draw from the 2016 to 2020 ACS. As these data are provided at the tract level, we produce a weighted average of these scores by the ZIP code where each tract's contribution to the average is weighted by the population within the tract.

Additional demographic characteristics, namely percentage of renting households or percentage of households in multifamily units, were derived from Customer Analytics' internal estimates which are derived from 2018 to 2022 ACS data.

MRC requested that Customer Analytics define a rural county to be consistent with Cal. Pub. Res. Code § 40184, which in general defines a rural county as one that disposes of less than 200,000 tons of waste annually. See the [Rural County List](#) included in this appendix for the list of counties that are considered rural for the purposes of this analysis. The county's status as being Urban or Rural is then applied to ZIP codes within the county.

Collection Network Entities

The MRC provided Customer Analytics a list of locations that accept mattresses for recycling as part of MRC's program for mattress recycling in California. This network of entities is comprised of sites wherein consumers transport mattresses directly to a site for recycling. The sites include permanent collection sites, recyclers and events. Also under consideration are bulky item programs, where the mattress is picked up directly from the consumer's home.

Model Details

An Ordinary Least Squares ("OLS") model was used to determine which factors were related to higher per capita dumping. To preserve reasonable distributions, we perform a natural log of dumps per capita as the dependent variable for the main analyses but also include a non-logged set of regressions for relationships that are linear (i.e., Bulky Item). The Pollution Burden Score, % EJ, Poverty Score, % Elderly, % Renter, Rural ZIP Code (yes/no) and % MultiFamily Units are included as independent variables that capture some of the ZIP code's defining environmental and demographic characteristics. The presence of events, collection sites, recyclers and bulky item programs accessible to a given ZIP code were also included as independent dummy (yes/no) variables to determine which of these programs affect dumping behavior. Month variables were included to account for seasonality. Finally, a factor variable grouping the number of months for which a ZIP code reported dumps {1, 2 through 8, 9 through 11, 12} was included to take into consideration differential reporting

² See the [OEHHA Pollution Indicators page](#) as well as the CalEnviroScreen 4.0 Report.

rates by the level of cooperation of the ZIP code. Separate nested models were run to group different combinations of independent variables to determine overall dynamics (e.g., “Any Event/Entity”) vs. individualized dynamics (e.g., parsing Events, Collection Site Type, Recycler, Bulky Item, etc.).

“CUIDANDO LA TIERRA”

Abre a una acera arbolada. La cámara enfoca (sobre nuestro personaje principal, la “Tierra” (que es un ‘hombre con un traje de la Tierra). SFX: Música divertida y alegre

Descripción	Voz
Abre con la Tierra en un trote por la acera arbolada sonriendo y saludando a la gente.	Queremos una Tierra sana.
Corte a la Tierra angustiada encontrando un colchón en un callejón, e intenta moverlo él mismo, pero es demasiado pesado.	Pero seamos sinceros, somos muy duros con ella.
Corte a la Tierra dentro de una casa familiar, la madre está en un ordenador portátil con su hijo a un lado y la abuela en el otro lado. Corte a un primer plano de la pantalla que muestra el sitio web de BBM el colchón explotado en un lado y los nuevos productos en el otro.	Reciclar los colchones viejos ayuda a nuestro medio ambiente: el acero, la espuma, la fibra y la madera pueden utilizarse para hacer cosas nuevas.
La mano de la Tierra toca la pantalla y las “3 maneras de í reciclar» aparecen.	También hay formas fáciles de hacerlo.- - (“en voz baja”) ¡y son totalmente GRATIS!
La cámara corta a la Tierra sonriente y cabeceando.	Menos residuos hacen una Tierra más feliz
La cámara se desplaza a una vista amplia y vemos al padre y a la hija adolescente sacando un viejo colchón con la Tierra entusiasmada observando (la madre, el hijo, - y la abuela son visibles en el sofá en primer plano).	Aprenda a reciclar su colchón en ByeByeMattress punto com hoy.

Jerry: Hello, I'm Fresno Mayor, Jerry Dyer...

Paul: ...and I'm Fresno County Chief Administrative Officer, Paul Nerland.

Jerry: Did you know your old mattress can be recycled for free?

Paul: ...and that is a much better option than leaving it along the roadside.

Jerry: Thanks to the Mattress Recycling Council's Bye Bye Mattress Program, residents throughout the Valley can easily recycle old mattresses and box springs by dropping them off at dozens of free collection sites.

Paul: The Program also works with local retailers to recycle mattresses from their customers. When they deliver a new mattress, they'll take back your old one.

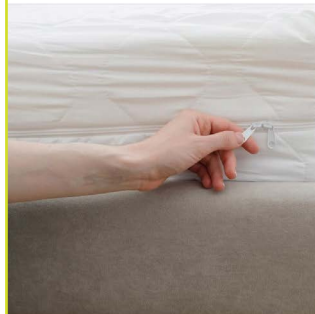

Jerry: When old mattresses are reduced to foam, wood, fiber and steel, it's recycled into new steel, carpet padding, insulation, garden mulch...all kinds of new products.

Paul: So, Recycle your mattress! It's easy and it's free!

Jerry: To find a location near you, visit "bye bye mattress dot com."

Announcer: *This message sponsored by the City & County of Fresno and the Mattress Recycling Council.*

Mattress magic: 8 essential tips for taking care of your mattress

(BPT) - A restful night's sleep is crucial to your overall well-being, which is why picking the right mattress is an important decision. If you take care of your mattress it will also help you sleep better.

Caring for your mattress isn't difficult.

1. Use the proper support
2. Don't remove the tag
3. Don't use your bed as a trampoline
4. Vacuum regularly
5. Air it out
6. Remember to rotate
7. Cleaning spills and stains

It's natural that you'll spill on or stain your mattress over years of use. Don't fret. If you spill, remove the liquid as soon as possible.

Sleep Products Sustainability Program

BE LEAN AND GREEN

GET THE SEAL TO PROVE IT.

MRC's **Sleep Products Sustainability Program** is designed to help California manufacturers reduce waste and increase operational efficiencies. We now have measurable results!

One facility has reduced its manufacturing waste to just 1.25 pounds per mattress – a saving that will net more than \$100,000 in avoided landfill fees.

Production changes are now saving more \$40,000 on energy bills. And, that savings was calculated before the recent spike in energy prices!

There are even more savings! Find the details in our case study and learn how to take advantage of the benefits of this no-cost program, please visit : www.MattressRecyclingCouncil.org/SP2.

That recycling fee supports a statewide mattress recycling program.

The recycling fee listed on your receipt, which is required by law for each mattress and box spring sold, supports the statewide mattress recycling program known as Bye Bye Mattress.

The Program allows any mattress or box spring, regardless of date of purchase, to be dropped off at a participating collection location, event or recycling facility.

Retailers may also use the Program. If you're having a new mattress delivered, ask them to take back your old one. The fees they may charge for delivery or set-up will still apply.

When mattresses and box springs are recycled they are dismantled. The steel, foam, fiber and wood become other products such as carpet padding or industrial filters.

Find your nearest drop-off location or learn more about the fee and how the Program works at

byebye, mattress.

El cargo de reciclado financia un programa de reciclado de colchones a nivel estatal.

El cargo de reciclado mencionado en su recibo, el cual es exigido por la ley para cada colchón y base de resortes vendidos, financia el programa de reciclado de colchones estatal conocido como Bye Bye Mattress.

El programa permite que cualquier colchón o base de resortes, independientemente de la fecha de compra, se pueda dejar sin costo en un punto de recolección, evento o centro de reciclaje participante.

Los vendedores minoristas también pueden utilizar el programa. Si le van a entregar un colchón nuevo, puede pedir que se lleven el viejo. Los cargos que le pueden cobrar por la entrega o el armado siguen aplicándose.

Cuando los colchones y bases de resortes se reciclan, se desarmen. El acero, espuma, fibra y madera se convierten en otros productos como fieltro o filtros industriales.

Rest Easy! Your Old Mattress Can Be Recycled.

Drop it off at a nearby location or ask your
retailer about taking it back.

Are you having your new mattress delivered?

Ask your retailer about taking back your old one at no cost. California law requires that retailers delivering new mattresses offer to take back your old one (some exceptions apply). A retailer may still charge a delivery or set up fee, but you should not be charged for mattress removal.

California has implemented a mattress recycling program that requires retailers to collect a \$10.50 fee on every mattress and box spring you purchase. It will be listed on your receipt as "recycling fee" and is not subject to sales tax.

The fee is used to establish a network of collection sites and events where you can drop off your old mattress and box spring (regardless of when you bought them). When they are recycled, the steel, foam, fiber and wood are used to make other new products.

Mattress retailers that take used mattresses and box springs back from their California customers may recycle them through the Program. Ask your retailer if they participate. Delivery or set up fees for new mattresses may still apply.

Rest Easy! Your Old Mattress CAN Be Recycled.

Drop it off at a participating location, use your solid waste provider, or ask your retailer about taking it back.

California's Mattress Recycling Fee Is \$10.50 Per Unit
Each year, the Mattress Recycling Council's Bye Bye Mattress program facilitates the recycling of nearly 1.5 million mattresses across California. The fee collected on the sale of all mattresses and box springs establishes collection opportunities throughout the state, mitigates illegal mattress dumping and funds research to improve mattress recycling.

YOUR MATTRESS RECYCLING OPTIONS

Drop Off At A Participating Location
Use our website to find your nearest collection site or event.

Ask Your Retailer To Take It Back
Retailers that provide delivery of mattresses and box springs in California must offer at the time of delivery to pick up your old one for no additional cost. Online retailers have 30 days to arrange the pick-up of your old one. Your retailer may still charge delivery or set-up fees. Ask about takeback and recycling during your purchase.

Contact Your Solid Waste Provider
Your solid waste provider may offer pickup of large, bulky items at the curb. See which ones recycle with Bye Bye Mattress on our website.

¡Quédese tranquilo! Su viejo colchón PUEDE reciclarse.

Llévelo a una ubicación participante, utilice su proveedor de residuos sólidos o pregunte a su minorista si puede recibirlo.

La tarifa de reciclaje de colchones de California es de \$10.50 por unidad
Cada año, el programa Bye Bye Mattress de Mattress Recycling Council facilita el reciclaje de casi 1.5 millones de colchones en California. La tarifa cobrada por la venta de todos los colchones y bases de resortes establece oportunidades de recolección en todo el estado, mitiga el vertido ilegal de colchones y financia la investigación para mejorar el reciclaje de colchones.

SUS OPCIONES DE RECICLAJE DE COLCHONES

Llévelo a una ubicación participante
Utilice nuestro sitio web para encontrar el sitio de recogida o evento más cercano.

Póngase en contacto con su proveedor de residuos sólidos
Su proveedor de residuos sólidos puede ofrecer la recogida de artículos grandes y voluminosos en la acera. Vea cuáles reciclan con Bye Bye Mattress en nuestro sitio web.

Pídale a su minorista que lo reciba
Los comercios minoristas que entregan colchones y bases de resortes en California deben ofrecer la oportunidad de recoger el colchón viejo sin costo adicional en el momento de la entrega de un colchón nuevo. Los comercios minoristas en línea tienen 30 días para organizar la recogida de su colchón viejo. Es posible que su minorista aún le cobre cargos por entrega o instalación. Pregunte sobre la recogida y el reciclaje durante su compra.

안심하세요! 오래된 매트리스는 재활용되니까요.

프로그램에 참여 중인 수거 장소에 배송하거나, 고품 폐기물 업체를 이용하거나, 해당 판매점에 수거에 대해 문의하세요.

캘리포니아주의 매트리스 재활용 수수료는 개당 \$10.50입니다
매년 Mattress Recycling Council의 Bye Bye Mattress 프로그램은 매년 캘리포니아 전역에서 약 150만 개의 매트리스 재활용을 지원하고 있습니다. 모든 매트리스와 박스 스프링 판매 시 징수되는 수수료는 주 전역에 걸쳐 수거 환경을 조성하고, 불법 매트리스 투기를 감소시키며, 매트리스 재활용을 촉진하기 위한 연구 자금으로 사용됩니다.

매트리스 재활용 옵션

프로그램에 참여 중인 수거 장소에 배송하기
저희 웹사이트를 통해 가장 가까운 수거 장소 또는 이벤트를

해당 판매점에 수거 요청하기
캘리포니아에서 매트리스 및 박스 스프링의 배송을 제공하는 판매점은 배송 시 추가 비용 없이 기존 매트리스의 수거 서비스를 제공해야 합니다. 온라인 판매점은 30 일 이내에 기존 매트리스의 수거 계획을 정해야 합니다. 해당 판매점은 여전히 배송비와 설치비를 청구할 수 있습니다. 구매 시 수거 및 재활용에 대해 문의하세요.

고품 폐기물 업체에 문의하기
고품 폐기물 업체에서 부피가 큰 대형 재물을 드로브에서 수거해 가는 서비스를 제공할 수 있습니다. 어떤 재물이 Bye Bye Mattress를 통해 재활용되는지 저희 웹사이트에서 확인하세요.

bye bye mattress

Program of the Mattress Recycling Council®

Chương trình này là kết quả của một đạo luật được thông qua tại California vào năm 2013. Chương trình lấy kinh phí từ phí tái chế được nêu trên biên lai của quý vị.

Mỗi năm, chương trình Bye Bye Mattress của Mattress Recycling Council hỗ trợ tái chế gần 1.5 triệu chiếc nệm tại California. Phí thu được từ việc bán tất cả nệm và lò xo hộp giúp tạo ra các cơ hội thu gom nệm trên toàn tiểu bang, giảm thiểu việc vứt bỏ bất hợp pháp và tài trợ cho việc nghiên cứu tái chế nệm hiệu quả hơn.

Các tùy chọn tái chế nệm cho quý vị

Mang nệm đến một địa điểm của chương trình
Hãy sử dụng trang web của chúng tôi để tìm địa điểm gần nhất với quý vị.

Đề nghị nhà bán lẻ thu lại nệm
Nhà bán lẻ cung cấp dịch vụ giao nệm và lò xo hộp ở California phải đề nghị nhận lại một chiếc nệm cũ. Có áp dụng một số trường hợp ngoại lệ. Xin xem trang web để biết chi tiết.

Liên hệ với công ty xử lý rác thải cùng của quý vị
Chúng tôi làm việc với các công ty xử lý chất thải rắn trên toàn tiểu bang để tái chế nệm và lò xo hộp được thu ngay bên lề đường.

祝您高枕无忧! 您的旧床垫可以回收。

将其送到参与地点、联系您的固体废物提供商或让您的零售商将其收走。

加州的床垫回收费用为每件 10.50 美元
每年，床垫回收委员会 (Mattress Recycling Council) 的“再见床垫” (Bye Bye Mattress) 项目推动在加州回收近 150 万张床垫。出售所有床垫和弹簧床垫而获得的费用将在全州范围内创造多个回收机会，有助于减少非法床垫乱扔现象，并可提供相应资金来改善床垫回收。

您的床垫回收选择

送到参与地点
通过我们的网站找到距离您最近的收集地点或活动。

联系您的固体废物提供商
您的固体废物提供商可提供在路边收取大件能装物品的服务。通过我们的网站查看哪些提供商可通过“再见床垫” (Bye Bye Mattress) 项目提供回收服务。

让您的零售商将其收走
在加州提供床垫和弹簧床垫送货服务的零售商必须在交货时免费提供床垫回收服务。在线零售商有 30 天的时间来安排旧床垫收取相关事宜。您的零售商可能会收取运费或安装费。在您购买时，请务必询问回收和回收相关情况。

Customer Questions about the Mattress Recycling Fee

This list of frequently asked questions (FAQs) is here to help. Please share with your staff.

1. Why do I have to pay the recycling fee and what is it for?

State law requires retailers to collect a recycling fee on each mattress and box spring that is sold. The fee funds the state's mattress recycling program and provides for collection, transportation and recycling of old mattresses and box springs. The amount of the fee is the same statewide and is not controlled by individual retailers. More than 75 percent of a mattress can be recycled into new consumer and industrial products. The recycling program diverts valuable materials from landfill and helps keep bulky waste like mattresses and box springs out of the waste stream.

2. Who is the Mattress Recycling Council?

The Mattress Recycling Council (MRC) is a nonprofit organization that operates recycling programs known as Bye Bye Mattress in states that have passed mattress recycling laws. MRC was founded by the bedding industry and recycles more than 1.7 million mattresses each year. For more information about MRC, go to www.MattressRecyclingCouncil.org. To learn how to recycle your mattress or to find a collection location or event near you, visit www.ByeByeMattress.com.

3. If I don't plan to discard a mattress now, why do I have to pay this fee?

Even if you aren't discarding a mattress right now, mattresses don't last forever and will eventually be discarded. State law requires retailers to collect this fee on any mattress or box spring sale to fund the state's mattress recycling program. This program provides a network of participating cities, towns, retailers, recyclers and other organizations where old mattresses are collected for recycling at no additional cost to you. The fee also supports efforts to combat illegal dumping of mattresses and help keep our community clean.

4. If I decide to take my old mattress to a recycler myself, do I still pay the fee?

Yes, state law requires retailers to collect this fee on any mattress and box spring sale at the time of purchase to fund the mattress recycling program. You may receive a modest financial incentive if you drop off your used mattress or box spring at a designated recycling location. Visit www.ByeByeMattress.com to find the location nearest you.

5. I didn't pay this fee when I bought my old mattress, so will it be accepted for recycling?

Yes, the Bye Bye Mattress program will accept your old mattress no matter when it was originally purchased. To be recycled, units must be clean and dry. Normal wear and tear is expected. Units infested with bed bugs or that are heavily soiled or damaged cannot be recycled.

6. My old mattress was "unacceptable" for recycling. Can you refund my recycling fee?

No, state law requires retailers to collect this fee on any mattress and box spring sale to fund the mattress recycling program. The law does not force retailers to accept every mattress for recycling out of concern for employee health and safety. Store policy, in addition to the guidelines of the recycling program, determine what we will and won't accept. If your mattress is unacceptable for recycling, contact your city or town to learn what disposal options are available.

7. What are the benefits of mattress recycling?

Mattress recycling programs offer many benefits for the community, state and environment, including:

- Less reliance on incinerators and landfills by diverting mattresses from the waste stream
- Reduces the number of illegally dumped mattresses
- Conserves resources by making used steel, foam and other materials available for use in new products
- Creates recycling jobs

8. What happens to my old mattress or box spring when it gets recycled?

Recycled mattresses are cut open and the layers are separated and organized by type. Wood is recycled and used as a fuel source or shredded to produce landscaping mulch. Foam, fiber and other soft commodities are compressed and turned into carpet underlayment or animal bed padding. Metal and box springs are extracted, sent to recyclers and used to make new appliances and building materials.

9. Will the Mattress Recycling Council or Bye Bye Mattress program pick up my old mattress from my home?

If your store takes back old mattresses:

No, but our store offers this service at time of delivery of your new mattress. (If your store recycles with the program, please let the customer know. Otherwise direct them to drop off their mattress at one of our free collection points listed on www.ByeByeMattress.com.)

If your store does not take back old mattresses, your response should be:

Mattresses are collected from a vast network of free collection sites throughout the state. These are typically public works yards or transfer stations. Your city/town may also collect bulky items at curbside as part of your trash service. Visit www.ByeByeMattress.com to see what options are available. The Mattress Recycling Council or the Bye Bye Mattress program does not pick up mattresses from customer's homes.

California Retailer Take Back Requirement

In California, mattress retailers are required by law to offer to take back old mattresses at no extra cost when delivering new ones. This applies to any method of delivery (in-house, third-party and even common carriers like USPS, UPS, FedEx). Your customer may be aware of this or mention having heard or seen this in an ad.

Please make information available on your website, in the purchasing process or in your shipping/delivery communications about how the pickup of an old mattress will work. Also consider sharing this information with those providing customer service.

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors of the
Mattress Recycling Council
Alexandria, Virginia

Opinion

We have audited the accompanying financial statements of the **Mattress Recycling Council – California LLC** (a wholly owned subsidiary of the Mattress Recycling Council, Inc.), which comprise the statements of financial position as of December 31, 2022 and 2023, and the related statements of activities, functional expenses, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the **Mattress Recycling Council – California LLC** as of December 31, 2022 and 2023, and the changes in its net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the **Mattress Recycling Council – California LLC**, and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about **Mattress Recycling Council – California LLC's** ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

INDEPENDENT AUDITOR'S REPORT (continued)

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements, including omissions, are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the **Mattress Recycling Council – California LLC's** internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the **Mattress Recycling Council – California LLC's** ability to continue as a going concern for a reasonable period of time.

INDEPENDENT AUDITOR'S REPORT (continued)

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also used our report dated June 10, 2024, on our consideration of Mattress Recycling Council – California LLC's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of Mattress Recycling Council – California, LLC's internal control over financial reporting or on compliance. That report (located on pages 29-30) is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Mattress Recycling Council – California LLC's internal control over financial reporting and compliance.

Additional Report on the Audited Financial Statements of Mattress Recycling Council

We have also audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of the Mattress Recycling Council (MRC), as of and for the years ended December 31, 2022 and 2023, and our report thereon dated June 10, 2024, expressed as an unmodified opinion on those financial statements. See **NOTE A** for **Mattress Recycling Council – California, LLC's** (MRC – CA) subsidiary relationship.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

**MATTRESS RECYCLING COUNCIL -
CALIFORNIA LLC**

NOTES TO FINANCIAL STATEMENTS

December 31, 2022 and 2023

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

This summary of significant accounting policies of the **Mattress Recycling Council – California LLC** (“MRC – CA”) is presented to assist in understanding MRC – CA’s financial statements. The financial statements and notes are representations of MRC – CA’s management who is responsible for their integrity and objectivity. These accounting policies conform to generally accepted accounting principles and have been consistently applied in the preparation of the financial statements.

Purpose of the California Recycling Operations:

The California (CA) Used Mattress Recovery and Recycling Act, as amended (“the Act”) requires manufacturers of mattresses sold in CA to develop, finance, and implement a convenient and cost-effective program to recover and recycle used mattresses generated in CA. The Act is administered by MRC – CA. MRC – CA funds its operations through a \$10.50 per unit recycling fee collected from consumers when they purchase a mattress or box spring. MRC – CA is required to perform a financial statement audit under accounting principles generally accepted in the United States of America and the generally accepted *Government Auditing Standards* issued by the Comptroller General of the United States of America to satisfy the state of California’s certified audited financial statement requirement in accordance with the State of California Section 42990 of the Public Resources Code.

MRC – CA is one of three operating wholly owned subsidiaries of the Mattress Recycling Council, Inc. (“MRC”). MRC also operates recycling programs in the states of Connecticut and Rhode Island. In addition, MRC has formed a new subsidiary in Oregon during 2022, which is a non-operating LLC as of December 31, 2023 (see **NOTE G**). MRC is a not-for-profit corporation incorporated on November 14, 2013 under the laws of the State of Delaware and organized and operated for purposes consistent with recognition of exempt status under Internal Revenue Code Section 501(c)(3), including, without limitation, to work to establish an environmentally sound and cost-effective program for recycling of sleep products. MRC is a subsidiary (under current accounting standards) of the International Sleep Products Association (“ISPA”) due to common control.

MRC – CA’s significant accounting policies are as follows:

Basis of Accounting and Separately Stated Financial Statements of MRC – CA:

The financial statements of MRC – CA have been prepared on the accrual basis of accounting and, accordingly, reflect all significant receivables, advances, prepaid expenses, payables, accruals and other liabilities.

**MATTRESS RECYCLING COUNCIL -
CALIFORNIA LLC**

NOTES TO FINANCIAL STATEMENTS

December 31, 2022 and 2023

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

On an annual basis, MRC – CA’s financial statements are included in the consolidated group financial statements of MRC. These financial statements of MRC – CA have been issued as a subsidiary of MRC for the years ended December 31, 2022 and 2023. MRC – CA’s December 31, 2022 and 2023 separately stated financial statements are prepared due to the request of the Board of Directors of MRC and the State of California. See **NOTE J** for related party transaction disclosures.

Basis of Presentation:

As a wholly owned subsidiary of MRC, a 501(c)(3) not-for-profit organization, the financial statements of MRC – CA have been prepared on the accrual basis of accounting. MRC – CA reports information regarding its financial position and activities according to two classes of net assets: net assets without restriction and net assets with restriction.

Net Assets Without Restriction - Net assets that are not subject to or are no longer subject to third party-imposed stipulations. The board designated reserves are included in net assets without restrictions.

Net Assets With Restriction - Net assets whose use is limited by third party-imposed time and/or purpose restrictions. MRC – CA has no net assets with restriction as of December 31, 2023 or 2022.

Revenues are reported as increases in net assets without restriction unless use of the related assets is limited by third party-imposed restrictions. Expenses are reported as decreases in net assets without restriction. Gains and losses on investments and other assets or liabilities are reported as increases or decreases in net assets without restrictions unless their use is restricted by explicit third-party stipulation or by law. Expirations of restrictions on the net assets (i.e., the third party stipulated purpose has been fulfilled and/or the stipulated time period has elapsed) are reported as reclassifications between the applicable classes of net assets. MRC – CA has adopted a policy to classify restricted revenues as without restrictions to the extent that restrictions were met in the year the revenue was received.

MRC – CA established a financial reserve policy to provide for short-term and long-term financial needs. It is the policy of MRC – CA to include in its unrestricted net assets, approximately three months of its annual operating expenses. Once MRC – CA has met the unrestricted net asset objective, MRC – CA seeks to maintain a reserve target of approximately 60% of its annual operating expenses.

**MATTRESS RECYCLING COUNCIL -
CALIFORNIA LLC**

NOTES TO FINANCIAL STATEMENTS

December 31, 2022 and 2023

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Income Tax Status:

MRC is exempt from federal income tax under Section 501(c)(3) of the Internal Revenue Code. However, income from activities not directly related to MRC's tax-exempt purpose is subject to taxation as unrelated business income. MRC – CA is considered a disregarded entity for federal income tax purposes. MRC – CA's activity and mission are consistent with those of its Parent company, MRC. The subsidiary's financial operations are reported on a consolidated basis with MRC's tax-exempt Federal Form 990 filing. MRC – CA is subject to franchise tax in the state of California. No taxes were owed as of December 31, 2023.

MRC has adopted the authoritative guidance relating to uncertainty in income taxes included in ASC Topic *Income Taxes*. These provisions provide consistent guidance for the accounting for uncertainty in income taxes recognized in an entity's financial statements and prescribe a threshold of "more likely than not" for recognition and de-recognition of tax positions taken or expected to be taken in a tax return. MRC performed an evaluation of uncertain tax positions for the year period ended December 31, 2023, and determined that there were no material matters that would require recognition in the financial statements or that may have an effect on its tax-exempt status. As of December 31, 2023, the statute of limitations for MRC's income tax return for the years ended December 31, 2020, 2021, and 2022 remain open with the Federal, state, and local authorities. It is MRC's policy to recognize interest and/or penalties related to uncertain tax positions, if any, in income tax expense.

Cash and Cash Equivalents:

For purposes of the statement of cash flows, MRC – CA considers all unrestricted highly liquid investments with an initial maturity of three months or less to be cash equivalents.

Accounts Receivable:

Accounts receivable are stated at the amount management expects to collect from outstanding balances. Management provides for probable uncollectible amounts through a charge to earnings and a credit to valuation allowance based on its assessment of the current status of individual accounts. Balances which are still outstanding after management has used reasonable collection efforts are written off through a charge to the valuation allowance and a credit to accounts receivable. For the years ended December 31, 2022 and 2023, the balance of the allowance for doubtful accounts was \$126,086 and \$152,327 respectively.

**MATTRESS RECYCLING COUNCIL -
CALIFORNIA LLC**

NOTES TO FINANCIAL STATEMENTS

December 31, 2022 and 2023

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Revenue Recognition:

Mattress retailers pay MRC – CA a mattress recycling fee based on the number of mattresses and box springs sold within the state of California on a monthly basis, and report their monthly unit sales to MRC – CA. The recycling fee is mandated by the state of California. MRC – CA recognizes mattress recycling fee revenue in the period a mattress is sold by a retailer.

Property, Equipment, Depreciation and Amortization:

MRC – CA capitalizes all expenditures for property and equipment in excess of \$1,000. Purchased property and equipment are carried at cost. Depreciation is computed using the straight-line method over the estimated useful lives of the assets.

Use of Estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Investments:

MRC – CA has adopted Accounting Standards Codification (ASC) 958 Not-for-Profit Entities (formerly Statement of Financial Accounting Standards (SFAS) No. 124, *Accounting for Certain Investments Held by Not-for-Profit Organizations*). Under FASB ASC 958-320, investments in marketable equity securities with readily determinable fair values and all investments in marketable debt securities are valued at their fair values in the statements of financial position. Realized and unrealized gains and losses are included in the change in net assets.

**MATTRESS RECYCLING COUNCIL -
CALIFORNIA LLC**

NOTES TO FINANCIAL STATEMENTS
December 31, 2022 and 2023

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Functional Allocation of Expenses:

The costs of providing the various programs and other activities have been summarized on a functional basis in the statement of activities and in the statements of functional expenses. Accordingly, certain shared costs have been allocated among the three operating state programs (CA, CT, and RI) based on supporting services benefiting each program. Shared general and administrative expenses include those expenses that are not directly identifiable with any other specific function but that provide for the overall support of MRC, including expenses related to contracts with third-party vendors. Total shared costs are allocated to the respective operating states on a monthly basis. For the years ended December 31, 2022 and 2023, approximately 90% of the shared expenses not directly identifiable with any other specific function but that provide overall support of MRC were allocated to MRC – CA, which is based on relative state population of CA as it relates to CT and RI.

Reclassifications:

Certain accounts in the prior year's financial statements have been reclassified for comparative purposes to conform with the presentation of the current year financial statements.

NOTE B - CASH AND CASH EQUIVALENTS – (UNRESTRICTED)

Cash and cash equivalents at December 31, 2022 and 2023, consisted of the following:

<u>Unrestricted:</u>	<u>2022</u>	<u>2023</u>
Demand deposits	\$ 5,605,134	\$ 475,873
Money market funds	247,720	754,284
US Treasury Note (short-term)	995,300	0
Total unrestricted cash and cash equivalents	<u>\$ 6,848,154</u>	<u>\$ 1,230,157</u>

**MATTRESS RECYCLING COUNCIL -
CALIFORNIA LLC**

NOTES TO FINANCIAL STATEMENTS

December 31, 2022 and 2023

NOTE C – INVESTMENTS

At both December 31, 2022 and 2023, MRC – CA investments consisted of approximately 83% and 80% conservative fixed income products, respectively, and the remaining 17% and 20% are invested in U.S. and International ETF's and mutual funds, respectively. All investments are exposed to various risks, such as market and credit. Due to the level of risk associated with investments and level of uncertainty related to changes in the value of investments, there is always a possibility that changes in risks in the near term could materially affect investment balances and the amounts reported in the financial statements. MRC – CA has an investment policy statement that is reviewed by the MRC Board annually which addresses these risks. The portfolios are reviewed on a quarterly basis and changes are made as needed, within the scope of the policy.

Investments at December 31, 2022 consisted of the following:

	<u>Cost</u>	<u>Fair Value</u>
Unrestricted	\$ 4,486,182	\$ 4,298,959
Board Designated – financial reserve	<u>27,609,550</u>	<u>26,457,314</u>
	<u>\$ 32,095,732</u>	<u>\$ 30,756,273</u>

As of December 31, 2022, \$26,457,314 has been recorded as board designated investments (see **NOTE E**).

Investments are composed of the following:

	<u>Cost</u>	<u>Fair Value</u>
U.S. ETF Fixed Income Securities	\$ 21,832,444	\$ 20,367,258
International ETF and Equity Securities	1,647,460	1,564,900
REITs	547,004	579,833

NOTE E - NET ASSETS

As of December 31, 2022, and 2023, total net assets without restrictions available for general operations of MRC – CA amounted to \$37,406,137 and \$31,780,961, respectively. MRC – CA’s Board has a reserve policy to establish a board designated financial reserve to operate CA’s recycling program over a multi-year period. As of December 31, 2022, and 2023, the Board has designated \$26,457,314 and \$20,876,441 of its \$37,406,137 and \$31,780,961 total net assets, respectively, as a financial reserve which is consistent with the requirements under the (CA) Used Mattress Recovery and Recycling Act.

The remaining net assets in the amount of \$10,948,823 and \$10,904,520 are undesignated as of December 31, 2022 and 2023, respectively. Undesignated net assets equal approximately three months of annual budgeted expenses for the upcoming year.

As of December 31, 2022, and 2023, MRC – CA did not have any net assets with third-party restrictions.

NOTES TO FINANCIAL STATEMENTS
December 31, 2022 and 2023

NOTE G - COMMITMENTS AND CONTINGENCIES

Blue Marble Materials Litigation:

MRC – CA terminated its relationship under a contract entered into in 2018 with a recycler named Eco-Mobility, LLC d/b/a Blue Marble Materials (“BMM”) in September 2018. Subsequently, MRC – CA, BMM, BMM’s principal and AeroFund Financial (AeroFund) (BMM’s factor) asserted various claims against each other in an arbitration proceeding. In October 2019, MRC – CA entered into a settlement agreement with AeroFund in which it agreed to withdraw its claims against MRC – CA, which comprised a claim regarding three invoices BMM issued to MRC – CA in exchange for \$1,300,000. During 2020 and through 2021, the Organization incurred legal and litigation expenses defending MRC – CA’s interest against substantial monetary claims asserted in a complex arbitration proceeding involving BMM and the recycler’s principal in addition to other legal matters related to handling routine program operations contracts with hundreds of vendors. The litigation-related costs included attorney’s fees, expert witness fees, transcript costs, arbitration panel costs and other out-of-pocket expenses. The arbitration proceedings concluded in May 2021. Among other things, the arbitrators found that MRC – CA had established valid grounds for terminating BMM, that BMM was liable for significant costs that MRC – CA incurred to store, transport and process units that BMM had abandoned after termination of its contract with MRC – CA and that BMM had overbilled MRC – CA under the 2018 contract. In addition, the arbitrators ruled against BMM and its principal on each of the claims that they had asserted against MRC – CA for substantial monetary damages. Also, during 2021 in connection with the arbitrators ruling, MRC – CA wrote off \$836,422 in invoices, that were being contested as part of the arbitration, which were accrued on the Statement of Financial Position in prior years related to this litigation. The \$836,422 was included in the prior year’s Statements of Activities as an “gain on extinguishment of liabilities” for 2021. On March 16, 2022, the court confirmed the arbitrator’s award. MRC – CA considers the collection of any award to be unlikely, therefore has not recorded any amount in these financial statements. In 2023, there was no activity related to the litigation, and the litigation had no impact to MRC – CA in 2023.

Product Care Association Consulting Fees:

MRC has outsourced its registration, billing and collection functions to Product Care Association (PCA), a third-party vendor which operates out of Canada. PCA manages the seller registrations, collects and reviews the monthly sales reports from various mattress retailers/sellers, invoices these sellers and collects the fee income on behalf of MRC. During the years ended December 31, 2022 and 2023, the total expenses incurred related to PCA consulting fees were \$250,159 and \$259,366 respectively, and MRC – CA’s proportionate allocation of those expenses was \$223,950 and \$232,193, respectively, which is included in administration expense (management and staffing) on the statement of activities.

**MATTRESS RECYCLING COUNCIL -
CALIFORNIA LLC**

NOTES TO FINANCIAL STATEMENTS
December 31, 2022 and 2023

NOTE G - COMMITMENTS AND CONTINGENCIES (continued)

Concentration of Service Provider:

For the years ended December 31, 2022 and 2023, four and five recyclers accounted for approximately 79% and 68% of MRC – CA's total recycling costs, respectively, and approximately 80% of the units recycled, respectively.

Note Payable – line of credit:

On July 19, 2018, MRC entered into a line of credit agreement with PNC Bank. The principal amount of the line was \$1,000,000 and called for an interest rate equal to the daily LIBOR rate plus 2.0%. During 2021, this line of credit agreement was renewed under the original terms, with a maturity date of July 31, 2022. The line of credit was secured by collateral of the assets of MRC. The line of credit with PNC Bank was terminated in April 2022. In May 2022, MRC entered into a line of credit agreement with M&T Bank. The principal amount on the line is \$1,000,000 and calls for a variable interest rate of 2.42 % above the greater of the Prime Rate or 3.25%. The line of credit is secured by collateral of the assets of MRC.

There were no draws on the line of credit in 2022 or 2023, therefore there is no interest expense related to the line of credit in 2022 or 2023.

New State Program:

On March 24, 2022, the State of Oregon approved a law that requires a mattress recycling program be implemented in the state. Mattress Recycling Council (MRC) will implement and run the Oregon state recycling program, and on June 24, 2022, Mattress Recycling Council Oregon, LLC (MRC – OR) was formed as a subsidiary of MRC. As of December 31, 2023, MRC – OR is a development stage non-operating LLC. The Oregon state recycling program is expected to begin in late 2024 or early 2025. The formation of this program in Oregon had no financial impact on MRC – CA in 2023.

NOTE H - CONCENTRATION OF CREDIT RISK

MRC – CA maintains its cash and cash equivalents balances in three U.S. financial institutions. The balances are insured by the Federal Deposit Insurance Corporation (FDIC) and the Securities Investor Protection Corporation (SIPC). The FDIC insures up to \$250,000 and the SIPC insures up to \$500,000 (including up to \$250,000 for cash) as of December 31, 2023. MRC – CA's investment firm also maintains additional insurance coverage through an outside insurer which provides excess protection of up to \$400 million per account. At December 31, 2023, MRC – CA's uninsured cash balance was \$0 and uninsured investment balance was \$0.

CALIFORNIA LLC**

NOTES TO FINANCIAL STATEMENTS
December 31, 2022 and 2023

NOTE I - FAIR VALUE OF FINANCIAL INSTRUMENTS

Generally accepted accounting principles define fair value, establish a framework for measuring fair value, and establish a fair value hierarchy that prioritizes the inputs to valuation techniques. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market. Valuation techniques that are consistent with the market, income or cost approach are used to measure fair value.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

Level 1 – These inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that MRC – CA has the ability to access.

Level 2 – These are inputs (other than quoted prices included within level 1) that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, default rates and other similar data.

Level 3 – These are unobservable inputs for the asset or liability and rely on management's own assumptions about the assumptions that market participants would use in pricing the asset or liability. The unobservable inputs should be developed based on the best information available in the circumstances and may include MRC – CA's own data.

MRC – CA estimates that the fair value of all financial instruments at December 31, 2022 and 2023 does not differ materially from the aggregate carrying values of its financial instruments recorded in the accompanying statement of financial position.

**MATTRESS RECYCLING COUNCIL -
CALIFORNIA LLC**

NOTE J – RELATED PARTY TRANSACTIONS (MRC)

MRC – CA is one of three operating wholly owned subsidiaries of the Mattress Recycling Council, Inc. (“MRC”). MRC also operates recycling programs in the states of Connecticut and Rhode Island. MRC is a not-for-profit organization incorporated on November 14, 2013 under the laws of the State of Delaware and organized and operated for purposes consistent with recognition of exempt status under Internal Revenue Code Section 501(c)(3), including, without limitation, to work to establish an environmentally sound and cost-effective program for recycling of sleep products. MRC is a subsidiary (under current accounting standards) of the International Sleep Products Association (“ISPA”) due to common control.

**MATTRESS RECYCLING COUNCIL -
CALIFORNIA LLC**

NOTES TO FINANCIAL STATEMENTS

December 31, 2022 and 2023

NOTE J – RELATED PARTY TRANSACTIONS (MRC) (continued)

These financial statements include the intra-entity accounts and transactions between MRC – CA and MRC. Due from MRC includes participant funds for the recycling program collected by MRC on behalf of MRC – CA. The following transactions below are included in these separately stated financial statements, but are eliminated in the consolidated MRC financial statements:

	2022	2023
Due from MRC – (page 4)	\$ 1,129,769	\$ 1,510,683
Administrative and management fee expense - MRC	\$ 3,814,273	\$ 4,328,710

The following are intercompany transactions between MRC – CA and ISPA (the ultimate parent), which include administrative costs paid by ISPA on behalf of MRC – CA, and are included in accounts payable on the Statement of Financial Position for the years ended December 31, 2022 and 2023:

	2022	2023
Due to ISPA – (page 5)	\$ 159,711	\$ 70,670

Operating Agreement with MRC:

MRC – CA is required to pay a monthly service fee in the amount of \$309,500, which represents the anticipated costs incurred by MRC for administrative, financial and operational support services to the LLC. At the end of each quarter a reconciliation is prepared for a “true up” of actual costs MRC – CA incurred versus the monthly fee charged, and any surplus or deficits are reimbursed by the respective party.

For the years ended December 31, 2022 and 2023, MRC – CA incurred expenses of \$3,814,273 and \$4,328,710 related to this agreement for administrative and management fee expense including MRC – CA’s portion of shared staff expenses and staff expense for in-state personnel. MRC recorded the associated management fee revenue in the same amount. The administrative and management fee expense charged by MRC has not been eliminated in these financial statements as of December 31, 2022 and 2023.

**MATTRESS RECYCLING COUNCIL -
CALIFORNIA LLC**

NOTES TO FINANCIAL STATEMENTS

December 31, 2022 and 2023

NOTE K – LIQUIDITY AND AVAILABILITY OF FINANCIAL ASSETS

MRC – CA has financial assets as of December 31, 2023, consisting of cash and cash equivalents of \$1,230,157, unrestricted investments of \$9,396,528, net accounts receivable of \$3,862,596, other accounts receivable of \$10,644, due from MRC of \$1,510,683, and investments for financial reserve of \$20,876,441, which total \$36,887,049. Included in these financial assets is the board designated investments in the amount of \$20,876,441, set aside for the financial reserve in order to comply with state regulations in CA. These board designated financial assets are not available for general use.

The following reflected MRC – CA's financial assets available for general use as of the Statement of Financial Position date.

Financial assets, at year end	\$ 36,887,049
Less those unavailable for general expenditure within one year, due to: Board designation	
Amount set aside for the financial reserve	<u>(20,876,441)</u>
Financial assets available to meet cash need for general expenditures within one year	<u>\$ 16,010,608</u>

MRC – CA considers all expenditures related to its ongoing recycling programs, as well as the services undertaken to support these programs to be general expenditures. As part of MRC – CA's liquidity management, it has a policy to structure its financial assets to be available as its general expenditures, liabilities and other obligations come due. In addition, MRC – CA invests cash in excess of daily requirements in investments which include conservative fixed income products, U.S. and International ETF's and mutual funds.

In addition to financial assets available to meet general expenditures over the next 12 months, MRC – CA has a financial reserve to assist with operational liquidity if needed.

**MATTRESS RECYCLING COUNCIL -
CALIFORNIA LLC**

NOTES TO FINANCIAL STATEMENTS

December 31, 2022 and 2023

NOTE L – RECENT ACCOUNTING PRONOUNCEMENTS

In September 2020, the FASB issued ASU 2020-07, (Topic 958): *Presentation and Disclosures by Not-for-Profit Entities for Contributed Nonfinancial Assets*, which is intended to increase transparency of contributed nonfinancial assets for nonprofit entities through enhancements in presentation and disclosure requirements. Nonprofit entities will be required to present contributed nonfinancial assets as a separate line item in the statement of activities, apart from contributions of cash and other financial contributions. Nonprofit entities will also be required to disclose various information related to contributed nonfinancial assets. ASU 2020-07 is effective for fiscal years beginning after June 15, 2021. MRC – CA implemented ASU 2020-07 during the year ended December 31, 2022, and the implementation did not have a material effect on its results of operations, financial position, and cash flows.

In February 2016, the FASB issued ASU 2016-02, “Leases (Topic 842).” ASU 2016-02 requires lessees to recognize the assets and liabilities that arise from leases on the balance sheet. A lessee should recognize in the statement of financial position a liability to make lease payments (the lease liability) and a right-of-use asset representing its right to use the underlying asset for the lease term. ASU 2016-02 is effective for annual periods beginning after December 15, 2021. MRC – CA implemented ASU 2016-02 during the year ended December 31, 2022, and the implementation did not have a material effect on its results of operations, financial position, and cash flows.

In June 2016, the FASB issued guidance (FASB ASC 326) which significantly changed how entities will measure credit losses for most financial assets and certain other instruments that aren’t measured at fair value through net income. The most significant change in this standard is a shift from the incurred loss model to the expected loss model. Under the standard, disclosures are required to provide users of the financial statements with useful information in analyzing an entity’s exposure to credit risk and the measurement of credit losses. MRC – CA adopted the standard effective January 1, 2023. As of December 31, 2023, MRC-CA did not have any financial assets that were subject to the guidance in FASB ASC 326.

**MATTRESS RECYCLING COUNCIL -
CALIFORNIA LLC**

NOTES TO FINANCIAL STATEMENTS

December 31, 2022 and 2023

NOTE M – RESTATEMENT OF THE PRIOR PERIOD

During the year ended December 31, 2022, a necessary adjustment was identified to the MRC-CA's previously issued financial statements. During 2022, Cal Recycle informed MRC – CA that they had erroneously invoiced MRC – CA for indirect program oversight costs and therefore had overcharged for costs to oversee and enforce the program in prior years. The total amount overcharged and then subsequently refunded in 2022 to MRC – CA was \$1,227,233. Included in the refunded amounts were \$5,822 related to overcharged fees occurring in 2021 and \$1,221,411 of overcharged fees occurring in 2020 and prior. The refund of the overcharges was recorded as an adjustment to previously stated financial statements and affected the previously stated accounts as discussed below:

**Statement of Financial Position as of
December 31, 2021:**

	As Previously Stated	Prior Period Adjustment	Restated
Ending net assets without restrictions (December 31, 2021)	44,221,858	1,221,411	45,443,269

NOTE N – SUBSEQUENT EVENTS

In preparing the financial statements, MRC – CA has evaluated events and transactions for potential recognition or disclosure through June 10, 2024, the date the audit report was available to be issued.

Supplementary Reports
for the
California Department of
Resources, Recycling
And Recovery

**INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER
FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS
BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED
IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS**

To the Board of Directors of the
Mattress Recycling Council
Alexandria, Virginia

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the **Mattress Recycling Council - California LLC** ("MRC – CA"), a subsidiary of the Mattress Recycling Council, Inc. (a nonprofit organization), which comprise the statement of financial position as of December 31, 2023, and the related statements of activities, functional expenses, and cash flows for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated June 10, 2024.

Report on Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered MRC – CA's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of MRC – CA's internal control. Accordingly, we do not express an opinion on the effectiveness of MRC – CA's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

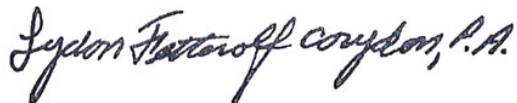

**INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER
FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS
BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED
IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS (continued)**

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether MRC – CA's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of MRC – CA's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the organization's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Rockville, MD
June 10, 2024

**INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE WITH THE FINANCIAL
ASPECTS OF THE PUBLIC RESOURCES CODE SECTION 42990,
AND CHAPTER 21, PART 3, DIVISION 30 OF THE PUBLIC RESOURCES
CODE, AND TITLE 14, DIVISION 7, CHAPTER 11, ARTICLE 3 OF THE
CALIFORNIA CODE OF REGULATIONS**

To the Board of Directors of the
Mattress Recycling Council
Alexandria, Virginia

We have examined the Mattress Recycling Council – California LLC's ("MRC – CA") Used Mattress Recovery and Recycling Act's ("the Act") compliance with the financial aspects of the Sections 42990 and 42990.1 of the California Public Resources Code, and Title 14, Division 7, Chapter 11, Article 3 of the California Code of Regulations for the year ended December 31, 2023. Management is responsible for MRC – CA's compliance with those requirements. Our responsibility is to express an opinion on MRC – CA's compliance based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether MRC – CA complied, in all material respects, with the specified requirements of the Act. An examination involves performing procedures to obtain evidence about whether MRC – CA complied with the specific requirements of the Act. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risk of material noncompliance, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion. Our examination does not provide a legal determination on MRC – CA's compliance with specified requirements of the Act.

In our opinion, MRC – CA complied, in all material respects, with the financial requirements of the Public Resources Code Section 42990, Part 3, Division 30 of the Public Resources Code, and Title 14, Division 7, Chapter 11, Article 3 of the California Code of Regulations, for the year ended December 31, 2023.

This report is intended solely for the information and use of MRC's Board of Directors, management, and the California Department of Resources, Recycling and Recovery, and is not intended to be and should not be used by anyone other than these specified parties.

For the Year Ended December 31, 2023

Section II – Financial Statement Findings – For the year ended December 31, 2023:

There were no Financial Statement findings noted during the audit for the year ended December 31, 2023

Section II – Prior Year Financial Statement Findings – For the year ended December 31, 2022:

There were no Financial Statement findings noted during the audit for the year ended December 31, 2022.

**Mattress Recycling Council -
California LLC**

Schedule of Findings
For the Year Ended December 31, 2023

Section III – Compliance with Financial Aspects of CA’s Public Resource Code:

There were no Compliance Findings with Financial Aspects of CA’s Public Resource Code noted during the audit for the year ended December 31, 2023.

Appendix G: Advisory Committee Report

14 CCR § 18964(b)(12)

April 30, 2024

Consultative Process (as per [PRC section 42990.1\(k\)](#)):

Through email and telephone consultation or in-person contacts, members of the Mattress Recycling Advisory Committee occasionally provide input to staff and management of the MRC/MRO. These exchanges are brought to the full committee as agenda items in instances where a resolution is requested or a motion is needed for an official recommendation or action. Additionally, at its regular meetings, the committee includes informational items, updates, discussion items and motions for proposed actions, including the MRC/MRO in the discussion for the purpose of consultation.

The Committee was impressed with regular updates from the MRC at the Committee meetings, especially the education components. They are very engaged with the Committee. After previous requests from the Committee, MRC has shared information on design for recyclability efforts made by the program and the Committee encourages this consultative process moving forward to promote eco-design.

The Committee feels CalRecycle's regular attendance at our meetings would help the Committee accomplish our statutory duties. For example, we would like to have additional interactions with CalRecycle and MRC on diversion quantification. Additionally, the Chair and Vice Chair could attend regular update meetings between CalRecycle and MRC, like the carpet advisory committee.

Letter approved by a roll-call vote during the meeting on 4/30/24.

Motion: Approval of the Report on Consultative Process with MRC

Motion: David Goldstein; Second Jordan Wells

Aye: David, Don, Joanne, Jordan, Larry, Michelle, Scott, Steve

Nay: None

Abstain: None

Appendix H: References for the Outline Prescribed by 14 CCR § 18964

For ease of review, the following is the annual report outline prescribed in CalRecycle Regulations, followed by a reference indicating where the requirement is discussed in the 2022 Annual Report.

(b) The annual report shall follow the outline below and contain the following:

- (1) Contact information. Identify the corporate officer of the mattress recycling organization responsible for annual report submittal.
[1. Contact Information](#)
- (2) Executive Summary. The purpose of the Executive Summary is to provide a broad understanding of the mattress recycling organization's program as a whole and to put into context the data and information that will follow. Provide a brief description of the mattress recycling organization's used mattress recovery efforts during the calendar year pursuant to section 18962.

[2. Executive Summary](#)

- (3) A description of the methods used to collect, transport, and process used mattresses in California.

[3. Program Collection, Transportation, and Processing](#)

- (4) Include an updated list of participating manufacturers, renovators, and retailers and any updates to their respective contact information per section 18961(a)(2) and an updated list of brands covered under the plan per section 18961(a)(3).

[Appendix A: Registered Manufacturers, Renovators, Retailers and Brands](#)

- (5) Description of how consumers of mattresses in California had an opportunity to recycle and properly manage their used mattresses, including the number, location, and type of collection points in the program.

[3. Program Collection, Transportation, and Processing — Mattress Collection — Collection Site Types](#)

- (6) May include a description of activities to ensure proper collection and management of used mattresses.

[3. Program Collection, Transportation, and Processing — Mattress Collection — Collection Site Mattress Management](#)

- (7) A description of methods used by the mattress recycling organization to coordinate with existing used mattress collection and recycling programs with regard to the proper management or recycling of discarded or abandoned mattresses.

[3. Program Collection, Transportation, and Processing — Coordination with Existing Infrastructure](#)

[5. Mitigation of Illegal Mattress Dumping](#)

- (8) Description of objectives and activities based on the used mattress recovery and recycling plan, per section 18962(a)(2). State objectives from the approved plan and describe progress toward achieving those objectives during the reporting period. Describe any adjustments to objectives stated in the approved plan that may be made for the upcoming reporting period and accompanying rationale for those changes. If any changes are significant or material, as defined, the mattress recycling organization shall amend and resubmit its plan for approval by the department. The annual report shall include:

[4. Program Objectives and Activities](#)

- (A) Quantitative information on subdivisions (b), (c), (d), (e), (f), (g), and (j) of section 42990.1 of the Public Resources Code, including conversion factor(s), if used. When describing the uses for the recycled materials, the annual report shall identify the secondary markets to which those materials are sold, and potential end uses of those materials.

- (b) The quantity of mattresses disposed of in solid waste landfills.

[4. Program Objectives and Activities — Statewide Collection and Disposition Data](#)

- (c) The quantity of discarded used mattresses collected for recycling in the program

[4. Program Objectives and Activities — Program Collection and Disposition Data — Program Collection](#)

- (d) The quantity of used mattresses collected for recycling from different categories of sources.

[4. Program Objectives and Activities — Program Collection and Disposition Data — Program Collection](#)

- (e) The quantity of each category of materials recycled

[4. Program Objectives and Activities — Program Collection and Disposition Data — Program Collection](#)

- (f) The uses for the recycled materials.

[3. Program Collection, Transportation, and Processing — Mattress Processing/Recycling — Uses for Recycled Materials](#)

- (g) The quantity of otherwise disposed of materials.

4. Program Objectives and Activities — Program Collection and Disposition Data — Program Disposition Data

- (j) The total volume, number, and weight of used mattresses collected recycled, renovated, and reused in this state during the preceding calendar year, including any conversion factor used to determine the number of mattresses recovered.

4. Program Objectives and Activities — Statewide Collection and Disposition Data

- (B) Qualitative and/or quantitative information on subdivisions (g), (l), and (m) of section 42987.1 of the Public Resources Code.

- (g) Conducting research, as needed, related to improving used mattress collection, dismantling, and recycling operations, including pilot programs to test new processes, methods, or equipment on a local, regional, or otherwise limited basis.

6. Research

- (l) Ensuring, to the maximum extent possible, that urban and rural local governments and participating permitted solid waste facilities and authorized solid waste operations that accept mattresses are provided with a mechanism for the recovery of illegally disposed used mattresses that is funded at no additional cost to the local government, solid waste facility, or solid waste operation.

5. Mitigation of Illegal Mattress Dumping

- (m) Developing strategies, in consultation with the California Environmental Protection Agency's Environmental Justice Task Force and other relevant parties, for collecting used mattresses for recycling in areas and communities that face unique challenges associated with proper waste management such as poverty, language barriers, and illegal mattress dumping.

4. Program Objectives and Activities — Convenience — Environmental Justice

5. Mitigation of Illegal Mattress Dumping

- (9) Financing Mechanism. Include the mattress recycling organization's total expenses and revenues associated with the implementation of the used mattress recycling program. Changes to the mattresses recycling charge shall be reflected in the annual program budget for approval by the department. If a mattress recycling organization changes the amount of the mattress recycling

charge in the first 12 months during which the mattress recycling charge is being collected per subsection (1) of subdivision (c) of section 42989 of the Public Resources Code, the mattress recycling organization shall provide the department no less than 90 days' notice before the change in the amount of the mattress recycling charge takes place. If a mattress recycling organization conducts activities that are separate from the implementation and management of the California used mattress recycling program, then the annual report shall include documentation on how the collection and use of funds from the California mattress recycling charge were kept separate from other activities of the mattress recycling organization, including the methodology for distribution of shared costs. Consistent with subdivision (a) of section 42990.1 of the Public Resources Code, the annual report shall include the following:

7. Financing Mechanism

- (A) Mattress recycling charge per mattress size

7. Financing Mechanism — Revenue from the Mattress Recycling Charge

- (B) Capital costs

7. Financing Mechanism — Capital Costs

- (C) Education/Outreach costs

7. Financing Mechanism — Education and Outreach Costs

- (D) End-of-life used mattress management costs with line items, if applicable, for collection, transportation, recycling, renovating, reuse, and proper disposal

7. Financing Mechanism — End-of-Life Used Mattress Management Costs

- (E) Program administration costs including, but not limited to, the department's costs pursuant to subdivision (a) of section 42988.2 of the Public Resources Code, and third party legal costs. Surplus funds, if any, and detailed rationale for the specified level of surplus.

7. Financing Mechanism — Program Administration, Legal, and CalRecycle Costs and Total Program Costs

- (F) For the first 12 months during which the mattress recycling charge was collected, include a description of any changes to the amount of the mattress recycling charge, and how implementation of the change complied with subsection (1) or (2) of subdivision (c) of section 42989 of the Public Resources Code, if applicable. The mattress recycling organization may also include a description of why the change was made.

7. Financing Mechanism — Revenue from the Mattress Recycling Charge

- (10) Education and Outreach. Provide a description of educational materials that were provided, including electronic examples of these materials. Identify any method(s) used to determine the effectiveness of educational and outreach efforts (e.g., surveys, hits on specific web pages, number of participants at events, etc.), if applicable. Describe any changes to those materials that are planned for subsequent years, if applicable.

[8. Education and Outreach and Appendix E: Education and Outreach Examples](#)

- (11) Audits. The annual report shall include an independent financial audit of the used mattress recovery and recycling program funded from the mattress recycling charge. The audit shall be conducted in accordance with auditing standards generally accepted in the United States of America, and standards set forth in Government Auditing Standards issued by the Controller General of the United States. The financial audit submitted to the department shall be prepared by an Independent Certified Public Accountant (CPA). The CPA shall not perform non-audit services for the mattress recycling organization that would impair independence as defined in the Government Auditing Standards issued by the Controller General of the United States (e.g., accounting services, development of internal controls, management decisions). The independent financial audit shall include:
- (A) Mattress recycling program financial statements, as required by GAAP.
 - (B) An opinion on the mattress recycling organization's compliance with the financial aspects of Chapter 21 (commencing with section 42985), Part 3, Division 30 of the Public Resources Code and Title 14, Division 7, Chapter 11, Article 3 of the California Code of Regulations.
 - (C) Findings and recommendations as they relate to the financial aspects of the program.
 - (D) Management Letter, if issued, by the mattress recycling organization's CPA.

[Appendix F: Financial Audit](#)

- (12) Advisory Committee Report. The annual report shall include the report of the advisory committee required by subdivision (k) of section 42990.1 of the Public Resources Code. The mattress recycling organization's annual report may include a description of how it addressed the points or recommendations raised in the advisory committee report.

[Appendix G: Advisory Committee Report](#)

- (13) Good faith effort. For annual reports submitted on and after July 1, 2019, a demonstration of good faith effort with the state mattress recycling goals established pursuant to section 42987.5 (b) of the Public Resources Code.

[4. Program Objectives and Activities — Good Faith Effort](#)
