Executive Summary

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR § 18964(b)(2) — Executive Summary. The purpose of the Executive Summary is to provide a broad understanding of the mattress recycling organization's program as a whole and to put into context the data and information that will follow. Provide a brief description of the mattress recycling organization's used mattress recovery efforts during the calendar year pursuant to section 18962.

Executive Summary

Overview of the Mattress Recycling Council California, LLC

California's Used Mattress Recovery & Recycling Act, SB 254 (as amended), requires that mattress producers, through a certified "mattress recycling organization," develop, implement and administer a statewide recycling program for mattresses and foundations (collectively mattresses or units) discarded in the state and combat illegal mattress dumping.

The International Sleep Products Association (ISPA) created the Mattress Recycling Council (the Council) as a Section 501(c)(3) nonprofit corporation for this purpose. The California Department of Resources Recycling and Recovery (CalRecycle) certified the Council as the mattress recycling organization and approved its statewide mattress recycling plan. The Council launched the program on December 30, 2015.

In addition to operating in California, the Council also administers similar statewide mattress recycling programs in Connecticut, Rhode Island and Oregon. Each of these state-specific mattress recycling organizations are separate nonprofit limited liability companies. The California organization is called Mattress Recycling Council California, LLC (MRC), which is now the certified mattress recycling organization. MRC promotes each of these state programs through our consumer brand known as Bye Bye Mattress.

Year Ten Program Highlights

In 2025, MRC demonstrated consistent and meaningful improvements to achieve plan objectives and goals set by CalRecycle. The program's most notable achievements include:

- 1,639,511 units collected, the highest number since program launch.
- Continued development of a robust statewide collection network that offers 98.6% of California residents access to a permanent collection opportunity within 15 miles. For rural retailers, 99.6% had access to a permanent collection site within 40 miles and 99.4% of urban retailers had access within 20 miles.
- Recyclers diverted from disposal 67.3% of materials sent outbound from their facilities by weight (including reuse, recycling and biomass); making more than 61 million pounds of steel, foam, fiber and wood available for use in new products.

- Our multichannel, multilingual outreach strategy generated 778 million impressions and grew consumer awareness of mattress recycling, the retailer take-back requirement and how to recycle discarded mattresses.
- Two new work groups created to engage the supply chain on how design and construction of polyurethane foam and textiles may affect mattress recycling.
- Since 2016, over 8 million have been invested in illegal dumping mitigation. In 2025, two more illegal dumping pilot projects were completed, and we funded a project with our first Native Nation.
- Completion of a sponsored research project that developed an innovative non-cryogenic process that converts recycled polyurethane foam into surface-modified, free-flowing powder.

Collection Network

Residents and businesses are provided with access to recycling opportunities statewide. We continue to recruit new drop-off locations, curbside bulky item collection programs, host events and provide direct pick-up service to commercial volume generators.

Residential Collection

In 2025, the collection network included 247 permanent collection sites and 25 franchise haulers and municipalities that aggregate curbside bulky item units, providing 272 collection opportunities and exceeding CalRecycle's goal by 22. When collection events are included, this number increases to 347.

TABLE 1: 2025 Residential Collection Network Highlights

Residential Collection Channel	Number
Permanent Collection Sites	247
Curbside Bulky Item Collection Programs	25
Collection Events	75

Retail and Commercial Volumes

The Commercial Volume Program (CVP) serves mattress retailers, lodging establishments, educational facilities, military bases and healthcare facilities. These entities may drop off their mattresses at designated collection sites or a recycler. Entities with at least 100 units may request no-cost transportation to a participating recycling facility.

In 2025, we expanded no-cost drop-off access for small volume commercial sources with less than 100 units through our existing permanent drop-off collection network.

During the year, 176 permanent collection sites accepted small volume drop-off from commercial sources, an increase from 172 locations in 2024.

MRC also provided on-site trailers and recurring pickups to 61 entities that consistently generated at least 100 discarded units per month.

Eligible entities that reach the 100 unit minimum less frequently than monthly may request live load pickups at their convenience. We completed 307 live load pickups, an increase from 290 in 2024. Additionally, there are four regional consolidation sites for small volume generators to access a trailer at no cost.

TABLE 2: 2025 Commercial Volume Collection Network Highlights

Commercial Collection Channel	Number
Permanent Sites Accepting Commercial Volumes	176
CVP On-Site Trailer Sites	61
Live Load Pickups	307
Consolidation Sites	4

Program Access

The percentage of residents and retailers who can conveniently access the collection network is measured annually for the general population, rural counties and environmental justice communities. We use these results to determine where to focus resources and expansion efforts.

Residential Access

Geographic analysis shows that 98.6% of California's population lived within 15 miles of MRC's permanent collection network (an MRC recycler, permanent collection site or curbside bulky item collection program) in 2025, exceeding CalRecycle's goal.

TABLE 3: Percent of Population Within 15 Miles of Collection Network in 2025

Population Category	Permanent Collection Network Only	Permanent Collection Network & Collection Events
All Residents	98.6%	98.7%
Residents in Rural Counties	95.2%	95.9%
Residents in Environmental Justice Communities	99.6%	99.7%

Retailer Access

CalRecycle's goals require that MRC demonstrate by January 1, 2025, that 95% of rural retailers and 80% of urban retailers have convenient access to the collection network.

For these purposes, retailer access is measured as the percentage of households within a reasonable driving distance of a commercial volume drop-off location, since the discarded mattress originates at a consumer's home, not a mattress retailer's storefront.

Based on retailer feedback, CalRecycle set a 20-mile radius for urban areas and 40-mile radius for rural areas. Using this methodology, MRC found that 99.6% of rural retailers and 99.4% of urban retailers have access, surpassing 2025 goals.

Program Collection and Disposition

MRC collected 1,639,511 units in 2025, a 5.1% increase from 2024. MRC attributes the increased units collected to more access for consumers and businesses.

Recyclers generated 92,369,560 pounds of material, of which they diverted 62,180,604 pounds of material and units from landfill through reuse, recycling and biomass, representing a 67.3% recovery rate.

TABLE 4: 2025 Program Collection and Disposition Highlights

Highlights	Amount
Units Collected	1,639,511
Total Pounds Outbound (Including Disposal)	92,369,560
Pounds Recycled, Reused, Biomass	62,180,604
MRC Recovery Rate	67.3%

Mitigation of Illegal Dumping

In 2025, MRC continued to track illegal mattress dumping across California through its Illegally Dumped Mattress Collection Initiative ("Initiative"). In 2025, 69 Initiative participants representing 33 counties reported 56,717 units. Of the represented counties, 11 were rural. In addition, five new entities joined the Initiative, with one previous participant rejoining.

In 2025, MRC worked with a software developer to customize a reporting platform for the Initiative to improve accuracy of data collection and verify the location and quantity of illegally dumped units through geo-located photos. The platform launched January 1, 2026.

Using Initiative data, MRC analyzed possible correlations between illegal mattress dumping and various factors, including demographics and opportunities for no-cost mattress collection. The analysis suggests that zip codes within 15-miles of collection sites and collection events report less illegal dumping.

MRC also invited Initiative participants and all California municipalities, nonprofits and solid waste facilities that had at least one year of baseline data for illegal mattress dumping from 2023 or later to apply for project funding to reduce illegal mattress dumping in their community. In 2025, MRC funded an illegally dumping mattress mitigation project with its first Native Nation and projects with two other entities.

In conjunction with these efforts, staff attended conferences, actively participated in relevant working groups and promoted resources on strategies for mitigating illegal dumping. In May 2025, we presented the Initiative to an EPA hosted webinar with Native Nations.

TABLE 5: 2025 Illegally Dumped Mattress Collection Initiative Highlights

Highlights	Number
Initiative Participants	69
Illegally Dumped Mattresses Reported	56,717

Research

MRC's research program focuses on improving mattress collection, transportation, deconstruction efficiency and identifying new and better markets for recycled mattress materials. To meet these objectives, MRC:

- Funded collection site operational improvements to increase landfill diversion, protect units from wet weather, decrease mattress loading times and improve worker safety when handling mattresses.
- Completed fire assessments at each contracted recycling facility to evaluate fire risk reduction opportunities and code compliance.
- Completed another waste characterization study of the residual material generated from mattress recycling operations to understand what, and why certain materials are landfilled.
- Funded a project that developed an innovative non-cryogenic process that converts recycled polyurethane foam into surface-modified, free-flowing powders. Testing has shown the powders can reduce density and alter thermal or acoustic properties in cement and rigid foams, with future work focused on broader application validation, reintegration into flexible foams, and scaling the process for commercial feasibility.

- Built upon previously completed research that successfully converted polyurethane mattress foam into moldable polymers; a secondary project used recycled mattress polymers to manufacture shoe soles with performance characteristics similar to virgin thermoplastic urethanes.
- Continued to collaborate with mattress associations and stewardship organizations from around the world to share best practices and technological advancements to improve MRC's California recycling program.

Circularity

Consistent with California's waste management hierarchy, we actively address source reduction by focusing on reducing the environmental footprint of mattresses and the manufacturing process by encouraging the mattress supply chain to reduce material use and consider end-of-life design issues when creating new products and encouraging consumers to maintain their mattresses properly to extend their useful life. MRC encourages manufacturers to implement internal continuous improvement processes that will help them measure and reduce the quantity of resources consumed in manufacturing new mattresses and the waste generated from those activities. In addition, MRC facilitates information sharing across the mattress industry value chain, including mattress manufacturers, component suppliers and recyclers, to improve mattress circularity. These efforts include conferences, webinars, articles, and case studies that promote best practices aligned with the waste hierarchy, including source reduction.

Industry Workgroups on Circular Design: Polyurethane Foam and Textiles

The objective of these work groups is to help members of the value chain take end-of-life deconstruction and recycling challenges into account when choosing construction types and making design decisions. MRC shares lessons learned from mattress deconstruction and recycling with the industry at ISPA's annual sustainability conference, where MRC's work is featured. This activity helps to reduce the amount of solid waste generated by MRC's mattress recycling contractors.

Sleep Products Sustainability Program

To encourage mattress manufacturers to reduce the environmental impact of their mattress assembly operations (and thereby support California's source reduction goals), MRC's Sleep Products Sustainability Program (SP2) offers a proactive approach that California mattress manufacturers may use to reduce solid waste and increase operational efficiencies at the facility level. SP2 helps companies establish an environmental management system that identifies steps for reducing environmental impacts by developing best practices and defining metrics to track progress. SP2 can also serve as a foundation for pursuing an ISO 14001 certification; the international standard for effective environmental management systems. Training, program resources and certification are all offered at no cost to eligible California mattress manufacturers.

Consumer Education and Outreach

Throughout the life of the program, MRC has built a consumer-facing brand known as Bye Bye Mattress. It is supported by a multichannel, multilingual consumer education and outreach strategy focused on source reduction, promoting the collection network, raising awareness of the retailer take-back requirement and discouraging illegal dumping.

MRC also uses social media to promote mattress care and build consumer awareness. These efforts encourage and inform consumers about how to properly maintain their mattresses and extend their useful life. By keeping mattresses in good condition, fewer new mattresses need to be manufactured—an important element of source reduction.

In 2025, consumer advertising campaigns, public service announcements, media coverage and social media content generated over 778 million impressions. We supplemented these efforts by providing mattress retailers, collection sites, recyclers and public officials with tools they can use to promote retailer take back and mattress recycling in their communities. Consumers wanting to take action or know more are directed to ByeByeMattress.com.

Reuse/Renovation

MRC contracts with six renovators to serve as public collection sites. The renovator may select units dropped off by consumers to renovate, while directing the remaining units into an MRC-provided trailer for transport to a recycler. MRC also encourages its recyclers to sell whole units and recovered mattress materials to qualified renovators that meet state and federal bedding requirements. Beyond program-managed activities, mattress reuse also occurs through informal channels, including mattresses handed down to friends or family and resale through used furniture retailers.

Program Collection, Transportation and Processing

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR § 18962(a)(2)(A) — Identify program objectives consistent with California's solid waste management hierarchy as required by subdivision (a) of section 42987.1 of the Public Resources Code.

14 CCR § 18964(b)(3) — A description of the methods used to collect, transport, and process used mattresses in California.

14 CCR § 18964(b)(5) — Description of how consumers of mattresses in California had an opportunity to recycle and properly manage their used mattresses, including the number, location, and type of collection points in the program.

14 CCR § 18964(b)(6) — May include a description of activities to ensure proper collection and management of used mattresses.

14 CCR § 18964(b)(7) — A description of methods used by the mattress recycling organization to coordinate with existing used mattress collection and recycling programs with regard to the proper management or recycling of discarded or abandoned mattresses.

14 CCR § 18964(b)(8)(A) — Quantitative information on subdivisions (b), (c), (d), (e), (f), (g), and (j) of section 42990.1 of the Public Resources Code, including conversion factor(s), if used. When describing the uses for the recycled materials, the annual report shall identify the secondary markets to which those materials are sold, and potential end uses of those materials.

Cal. Pub. Res. Code § 42987.1(i) — A description of methods used to coordinate activities with existing used mattress collecting and recycling programs, including existing nonprofit mattress recyclers, and with other relevant parties as appropriate, with regard to the proper management or recycling of discarded or abandoned mattresses, for purposes of providing the efficient delivery of services and avoiding unnecessary duplication of effort and expense.

Cal. Pub. Res. Code § 42990.1(f) — The uses for the recycled materials.

Cal. Pub. Res. Code § 42990.1(m) — For reports submitted on and after July 1, 2021, all of the following:

(2) A report on activities, which the mattress recycling organization shall undertake, to prioritize, to the extent economically practical, the use of in-state processing facilities over out-of- state processing facilities. If the mattress recycling organization decides to use out-of-state processing facilities, the organization shall provide an explanation of that decision.

Program Collection, Transportation and Processing

Mattress Collection

In 2025, MRC continued to recruit mattress collection sites, making it more convenient for California consumers and businesses to have their mattresses recycled at no charge, either by dropping their units off at a permanent collection site or by otherwise accessing the network. Table 6 summarizes MRC's collection network in 2025. Refer to Appendix B for a list of all the locations in MRC's collection network.

TABLE 6: MRC's Collection Network

Collection Channel	Site Type	Source of Units	Transportation and Disposition of Units	Number of Sites/ Entities 2025
Retailer Take Back	Mattress Retailers	Retailer's Customer	Retailer delivers units to recycler, permanent collection site, or consolidation location	N/A
			Units picked up from retailer through CVP (below) for dismantling by recycler	N/A included with CVP below)
Permanent Collection Sites	Solid Waste Facilities (SWFs)	Residents, Commercial Entities	Transported to recycler for dismantling	176
	Mattress Recyclers	Residents (Consumer Incentive Payment), Commercial Entities	Dismantled by recycler	9[1]
	Nonprofits	Residents, Commercial Entities	Transported to recycler for dismantling	13
	CRV Recycling Locations	Residents, Commercial Entities	Transported to recycler for dismantling	2
	Mattress Retailers	Residents, Commercial Entities	Transported to recycler for dismantling	8

[1] Seven of the 9 recyclers accept mattresses from residents. Appendix B contains a list of MRC recyclers.

Collection Channel	Site Type	Source of Units	Transportation and Disposition of Units	Number of Sites/ Entities 2025
Permanent Collection Sites (continued)	Mattress Renovators	Residents, Commercial Entities	Unrenovated units transported to recycler for dismantling	6
	Other	Residents, Commercial Entities	Transported to recycler for dismantling	33
Curbside Bulky Item Collection Programs	Franchise Haulers and Municipalities	Residential and Commercial Customers of Franchise Haulers and Municipalities	Entity picks up units at curbside, consolidates them at entity's facility and MRC transports them to recycler for dismantling	25
	Solid Waste Facilities (SWFs)	Residential and Commercial Customers of Franchise Haulers and Municipalities	Entity picks up units at curbside, consolidates them at entity's facility and MRC transports them to recycler for dismantling	64
Mattress Collection Events	Temporary Event	Residents	Transported to recycler for dismantling	75
Commercial Volume Program (CVP)	CVP On-Site Trailer	Mattress Retailers Commercial Entities	Transported to recycler for dismantling	61
	Consolidation Location	Commercial Entities	Transported to recycler for dismantling	4
	Live Loads	Commercial Entities	Transported to recycler for dismantling	307
	Small Volume Commercial Drop-Off	Mattress Retailers Commercial Entities	Transported to recycler for dismantling	N/A (176 permanent collection sites accept units from commercial entities and are counted in the permanent collection sites above)

Collection Channels

MRC collects used mattresses through the following channels in California:

1. Retailer take back
2. Permanent collection sites
3. Curbside bulky item collection
4. Mattress collection events
5. Commercial Volume Program (CVP)

In 2025, MRC:

- Contracted with 247 permanent collection sites that collected units from consumers, a net increase of five from 2024.
- Contracted with 89 entities that received curbside bulky item collected units, a net increase of three from 2024. Of these, 64 were operated by franchise haulers and municipalities at SWFs that also serve as permanent collection sites, with the remaining 25 being operated by franchise haulers and municipalities at a private yard, and therefore not at SWFs.
- Participated in 75 collection events.
- Contracted with 61 CVP sites with permanent on-site trailers. Picked up 307 live loads from 103 temporary CVP sites, representing a 5.9% increase over 2024.

MRC will continue to expand the permanent collection network in 2026 to improve statewide access. California consumers and commercial entities can learn more about the drop-off and recycling options available to them at ByeByeMattress.com.

Appendix B contains a list of all locations by type.

Collection Site Types

Retailer Take Back

Any retailer that delivers a new mattress to a California consumer must offer to take back the discarded mattress upon request at no cost. Consumers can use this collection channel when purchasing a new mattress. Retailers may then recycle the used mattresses at no cost through the program (MRC bears the cost of recycling).

Permanent Collection Sites

Since the program's inception, MRC has created a robust, permanent collection network throughout California where residents may discard used mattresses for recycling at no cost.

MRC's site recruitment efforts focus on both SWFs and alternative collection locations, including nonprofits, public agencies, Native Nations and CRV recycling centers.

As of December 31, 2025, the California program had 247 permanent collection sites. These sites are listed in Appendix B.

Except for mattress recyclers, MRC pays contracted collection sites a handling fee if they accept mattresses from the public at no cost (MRC compensates recyclers for serving as collection sites as part of the general recycling services they provide). MRC bears the cost of transporting the units to a recycler and recycling them.

The specific types of permanent mattress collection sites that the program offers California residents and commercial entities are as follows:

Solid Waste Facilities

SWFs comprise the majority of MRC's permanent collection network. In 2025, MRC contracted with 176 SWFs (a net increase of two since 2024), 51 of which operate in rural counties of the state. All of these sites accept mattresses dropped off by residents at no cost, and 114 accept drop off from commercial entities at no cost, an increase of seven from 2024.

MRC uses annual mattress disposal data that SWFs report to CalRecycle to identify which SWFs to recruit as potential new collection sites. This resulted in MRC adding a net increase of two SWFs to the collection network in 2025. MRC is continuing this recruitment effort in 2026.

Mattress Recyclers

In most cases, MRC recyclers accept mattresses directly from residents and commercial entities at no cost. In 2025, MRC's recycling network consisted of eight locations throughout California and one location in Oregon. Recyclers in California track the number of units they receive from each of the following sources (Program Collection and Disposition Data section contains the number of units collected from each source):

- **Retailer Drop-off:** This includes units that mattress retailers drop off at recyclers using their own transportation or using MRC's CVP services but excludes units that retailers drop off to SWFs.
- **Institutional Drop-off:** This includes units from hotels, educational facilities and other large-volume mattress purchasers that deliver units to recyclers using their own transportation or use MRC's CVP services.
- **Consumer Incentive Payment (CIP):** Units collected through MRC's CIP program, which allows California residents to drop off discarded mattresses at specified recyclers and receive an incentive payment of $3 per unit for as many as five units per vehicle per day.

Nonprofits

MRC contracts with nonprofit organizations such as Goodwill, Habitat for Humanity ReStore and Local Conservation Corps to serve as permanent collection sites.

Depending on the site, residents and/or commercial entities may drop off units at these nonprofit sites at no cost. In 2025, 12 nonprofits accepted mattresses at no cost from California residents and commercial entities.

CRV Recycling Locations

MRC contracts with collection centers that participate in the CRV Beverage Container Recycling Program. In 2025, California residents and commercial entities could drop off mattresses at two CRV recycling centers throughout the state.

Mattress Retailers

To increase mattress retailer and residential access to the program, MRC contracts directly with some mattress retailers to become permanent collection sites. In 2025, eight retailers accepted mattresses at no cost from California residents and commercial entities. Additionally, three of the eight retailers are located in rural counties.

Mattress Renovators

Residents and businesses may drop off discarded units at mattress renovators at no cost. In 2025, six mattress renovators collected mattresses through MRC's program. The mattresses they did not renovate were sent to MRC recyclers for dismantling.

In 2025, MRC continued to recruit renovators identified through annual data reported to CalRecycle to become permanent collection sites.

Other

In 2025, MRC contracted with eight local businesses, 24 public agencies and one Native Nation to be permanent collection sites. Of these, one local business, two public agencies and one Native Nation are located in rural counties.

Curbside Bulky Item Collection

Some franchise haulers and municipalities provide curbside bulky item collection of mattresses at no additional charge to residents. Residents schedule a pickup for their discarded mattress. Participating haulers and municipalities collect the mattress and load it into an MRC-provided trailer positioned at their yard or SWF. MRC transports full trailers to recyclers for dismantling.

Units may be collected through bulky item pickups through either of two processes:

1. MRC contracts with a municipality or franchise hauler to recycle units collected through its existing bulky item program. The MRC-provided trailers in which these units are consolidated are located at private yards and are not publicly accessible. In 2025, MRC collected mattresses from 25 municipalities or franchise haulers in this way.
2. Some SWF operators that contract with MRC to serve as permanent collection sites also accept mattresses collected through bulky item pickup services. These SWFs consolidate mattresses collected curbside in an MRC-provided trailer with other units

dropped off at the permanent collection site. In 2025, MRC collected mattresses from 64 collection sites that accept mattresses from bulky item programs, an increase of four sites from 2024. To avoid double counting, these locations are counted under the SWF category and not counted again under the curbside collection category in Table 6.

Mattress Collection Events

MRC hosts mattress collection events in areas that may benefit from enhanced residential access. MRC partners with municipalities, waste services providers, Local Conservation Corps, Native Nations, retailers and other interested parties to hold collection events. When hosting events, MRC provides the necessary labor, transportation, recycling and publicity.

MRC often combines mattress collection events with events accepting other products to increase convenience for residents, target underserved areas or mitigate illegal dumping.

Each year, MRC collects less than 1% of mattresses in California through events. In areas with accessible collection sites and minimal illegal dumping, we collaborate with organizations to promote existing permanent sites instead of hosting events. MRC actively evaluates requests, prioritizing events in areas lacking access, high rates of illegal dumping or environmental justice areas.

In 2025, MRC participated in 75 collection events, eight of which expanded access in five rural counties (Glenn, Butte, El Dorado, Madera, Tuolumne); however, the number of events decreased by 28.6% in 2025 compared to 2024, and some events were canceled by event hosts in select communities.

Commercial Volume Program (CVP) Services

MRC provides no-cost transportation and recycling of discarded mattresses from retailers, lodging establishments, educational institutions, healthcare facilities and military bases if they have at least 100 discarded units to be picked up at a single site.

MRC provides transportation in three ways:

1. **Permanent On-Site Trailers:** If a business generates at least 100 mattresses per month at a particular location, MRC provides a permanent on-site trailer at a specific location. This arrangement works well when a retail chain uses a central distribution center from which it delivers mattresses that consumers purchased in the chain's multiple retail storefronts and then consolidates the discarded mattresses that its delivery teams take back from consumers when the delivery trucks return to the distribution center at the end of their delivery run. In this manner, MRC can provide efficient collection service for all of a retailer's storefronts within its local distribution network. In 2025, the number of on-site trailers decreased from 70 to 61, as two locations transitioned to permanent collection sites. Other sites closed operations, consolidated distribution centers, or transitioned to temporary pick-up locations.

2. **Temporary CVP Site (Live Loads):** For businesses that generate at least 100 units at a time at a particular location, but not on a monthly basis, MRC does not provide a permanent on-site trailer. Instead, MRC dispatches a truck and trailer to the collector when requested and the units are loaded into the trailer while the driver waits. This is referred to as a "live load" pickup. In 2025, MRC provided 307 live load pickups for 103 CVP entities.
3. **Consolidation Locations:** To provide a no-cost drop-off for smaller retailers and businesses, MRC positions centrally located trailers where these entities can consolidate the mattresses that they collect. By the end of 2025, MRC had a total of four strategically placed commercial consolidation locations.

Small Volume Commercial Loads

To provide no-cost drop-off for commercial sources generating smaller volumes (that is, fewer than 100 units at a time), some permanent collection sites will accept small commercial loads. By the end of 2025, 176 permanent collection sites accepted no-cost drop-off for small commercial loads. To avoid double-counting, these locations are counted under the Permanent Collection Site category and not counted again under the CVP category in Table 7.

To avoid undermining the mattress renovation intended by the Legislature, MRC is communicating with renovators about the CVP program. MRC also provides a list of compliant renovators to businesses that are not eligible for CVP transportation services. Refer to the Reuse section for more details.

Table 7 shows the total number of collection sites by type from 2021 through 2025.

TABLE 7: Collection Network by Site Type, 2021 Through 2025

Site Type		2021	2022	2023	2024	2025
Permanent Collection Sites	Solid Waste Facilities	153	166	170	174	176
	Mattress Recyclers	9	10	10	11	9
	Nonprofits	16	15	14	14	13
	CRV Recycling Locations	3	2	3	2	2
	Mattress Retailers	8	8	7	8	8
	Mattress Renovators	7	8	7	6	6
	Others	27	25	29	30	33
	Total Permanent Collection Sites	**223**	**234**	**240**	**245**	**247**
Curbside Bulky Item Collection Programs		21	24	29	26	25
Mattress Collection Events		161	162	131	105	75
Commercial Volume Program (CVP)	Permanent On-Site Trailers	63	55	60	70	61
	Consolidation Locations	8	7	7	5	4
	Live Loads	170	208	257	290	307

Appendix B contains a complete list of all collection sites and events.

Collection Site Mattress Management

When adding new collection sites, MRC provides on-site training and guidelines to educate site staff regarding proper handling, efficient stacking techniques and best practices to increase the recyclability of mattresses received. MRC's Program Operation Materials Guidelines (Appendix C) are included in all collection site and event contracts.

The guidelines define products eligible and ineligible for recycling and explain how collectors can efficiently load mattresses into trailers. They also describe non-recyclable mattresses (e.g., those that are wet, insect-infested, excessively soiled, etc.) and how to identify bedbug-infested units.

To further assist collection sites in identifying and managing instances of bedbug contamination, MRC offers an online training video about bedbugs that collection site staff can access on demand. MRC's Resources Library contains a link to the video.

MRC also offers a video series (available in MRC's Resources Library) that addresses efficient mattress stacking and loading, effective collection site operations, program and non-program products identification and collection event promotion. The series is available in English and Spanish.

To assist collection sites with onboarding, MRC visits new and existing locations annually, or as needed. In 2025, MRC staff conducted routine site visits providing collection sites with supplemental training and resources. During site visits, staff answer questions, confirm whether the site is following the guidelines, provide updates on how a site may apply to MRC for collection site improvement funds, provide resources on stacking and loading of mattresses to improve efficiency, offer suggestions to maintain the quality of collected mattresses and provide necessary signage, invoicing support, etc.

In 2025, MRC funded five collection site improvement projects and completed seven, two of which carried over from 2024. MRC awards funds for projects intended to increase the recyclability of mattresses or improve efficiency (such as a covered/paved mattress storage area to keep the units dry and clean, forklift equipment, etc.). The Research section contains more information.

Coordination with Existing Infrastructure

MRC must coordinate with existing used mattress collection programs and recycling programs, including nonprofits, and meet the requirements of Cal. Pub. Res. Code § 42987.1. Since 2016, MRC has demonstrated year-over-year growth in the collection network, increasing the number of collection sites, bulky item collection programs and CVP activity.

Existing Used Mattress Collection Programs

Solid Waste Facilities

In 2025, MRC contracted with 176 SWFs. To expand participation from this segment of the waste industry, MRC contacted new potential locations from the list of SWFs that report landfilled mattresses to CalRecycle to explain the benefits of working with MRC.

Bulky Item Collection Programs

In 2025, MRC used data from a variety of sources to target additional curbside bulky item collection programs that could participate in the program. To further coordinate with existing used mattress collection programs and increase consumer access to no-cost recycling in California, MRC contracts with municipalities and franchise haulers that provide curbside bulky item pickup at no additional cost. By the end of 2025, 25 bulky item programs and 64 SWFs that consolidate mattresses collected at curbside in an MRC-provided container participated in its collection network.

In 2026, MRC will continue efforts to target additional bulky item collection programs that could participate with MRC.

Retailer Take Back

Many mattress retailers collected units from their customers before the program was launched. MRC leverages this pre-existing practice by working with retailers to bring these mattresses to MRC's recyclers, either by direct drop-off or through the CVP. This practice benefits both the mattress consumer and retailer and increases the volume of mattresses diverted from landfills.

Collecting mattresses directly from retailers also increases the likelihood that the collected mattress will be recyclable, as compared to units obtained from SWFs and bulky item collection programs. When mattresses are mixed with regular trash and other municipal solid waste, they can be crushed and contaminated to the point that few or no parts of the units can be recycled. Discarded units obtained directly from retailers tend to be dry and cleaner, allowing the recycler to reclaim more and better-quality materials that can command higher prices.

Existing Recycling Programs, Including Nonprofit Mattress Recyclers

MRC first solicited transportation and recycling services in 2015, contacting all known California mattress recyclers, posting the request publicly, and visiting active facilities to assess capabilities and interest. Among the companies that responded to the request were three existing nonprofit and 11 for-profit recyclers. Proposals were evaluated based on the proposed price to provide the requested recycling services, recycling experience, quality of proposal and facility capabilities. MRC awarded contracts to six recyclers

(including four for-profits and two nonprofits). Five were existing mattress recyclers and one was an existing recycler of other products.

Since program launch, the recycler network has evolved as facilities have opened, closed, or changed locations, and as MRC has added new recyclers to support program growth. Additional requests for proposals were issued in 2017 and 2018 to improve service in specific regions, and the recyclers added during this period brought experience recycling other products in California and elsewhere. In 2024, MRC again requested proposals for mattress recycling services throughout California. MRC promoted the request by contacting all known mattress recyclers and posting the announcements on our website, in newsletters and on social media. A total of 10 businesses submitted proposals and MRC selected seven to operate nine recycling facilities in 2025.

In deciding whether to award recycling contracts, MRC has consistently considered the same factors: price, recycling experience, quality of proposal and facility capabilities.

As of December 31, 2025, seven MRC recyclers operated eight facilities (two facilities are operated by a nonprofit). One recycling facility is located in Oregon. One additional facility finalized its contractual obligations to MRC early in 2025, completing the processing of MRC program units remaining from 2024 deliveries.

Appendix B contains a list of MRC's existing recyclers (and their locations).

MRC's Coordination with Existing Mattress Collectors and Recyclers to Efficiently Deliver Services

As MRC established and expanded its collection and recycling network, it sought to deliver services efficiently and minimize duplication of effort by applying the following principles:

- To bring large quantities of discarded units into the program efficiently, MRC leverages existing retailer take-back practices and contracts with California's existing solid waste collection infrastructure to become convenient no-cost mattress collection sites.
- MRC strategically selects collectors and recyclers to build a network that both provides California residents with statewide access to recycling services and minimizes transportation costs.

Therefore, in building its mattress collection and recycling network, MRC has succeeded in coordinating with existing used mattress collection and recycling entities, including nonprofits, and has supported the broader California recycling community by contracting with existing facilities that collect and recycle mattresses and other products.

Prioritization of In-State Processing Facilities

In 2025, MRC used in-state and out-of-state processing facilities to recycle program mattresses. MRC contracted with one non-profit recycler in Oregon to process a limited number of California mattresses. By using this facility, MRC maximized its transportation efficiencies and controlled costs. Appendix B contains a list of MRC recyclers.

Mattress Transportation

For each MRC collection site in California, MRC pays for or provides storage containers that are appropriate for the size and location of each facility. MRC uses 53-, 48- and 28-foot trailers, as well as sea containers and roll-off bins for sites with limited space or other logistical constraints. The 53-foot trailer is preferred because it can hold the most mattress units, resulting in a lower per unit transport cost. Roll-off containers, which are the smallest storage option, are the least efficient alternative, but may be the only option for collection sites with small or restricted loading areas. All containers that MRC provides are covered to reduce contamination of the mattresses and to protect against weather damage.

To provide mattress transportation throughout the state, MRC contracts with mattress recyclers, third-party logistics companies, transportation companies and SWFs to pick up and transport mattresses from specific facilities.

MRC uses a logistics and database portal, MyMRC, for California transporters, recyclers and collection sites. Transporters can manage pickup requests (accepting, rejecting, or diverting) and make docking appointments with recyclers, and recyclers can communicate their dock availability to transporters. All users can report feedback and access real-time data and reporting. MRC is also available to assist with any issues that may arise regarding transportation and logistics.

Collection sites that do not transport units using their own equipment will use MyMRC to request or cancel pickups from an MRC-contracted transporter when a full container is ready to be picked up and swapped for an empty one. For sites located in urban areas, MRC transporters have 48 hours to swap a trailer after receiving a request, and up to five days for sites in rural areas. Mattresses are bulky and light cargo, and as a result, efficient transportation helps control costs. MRC assigns mattress loads to individual recyclers to achieve efficiency throughout the collection network.

Mattress Processing and Recycling

Recycler Procedures

After discarded mattresses arrive at a recycling facility, the recycler unloads the container. Mattresses contaminated with bedbugs or putrescible solid waste are typically not recycled and are separated to minimize facility contamination and worker exposure and then landfilled.

Non-contaminated mattresses then are dismantled. The outer ticking layer is removed so each internal component material can be separated. The dismantling process varies from one recycler to the next, but most use a combination of manual and mechanical processes. Each recyclable material type is separated and sometimes compressed into bales for shipment to buyers. The Uses for Recycled Materials section contains details regarding what happens to each material type after consolidation at recyclers.

Some recyclers separate and sell high-quality used mattresses or their component materials to renovators, who use them to renovate mattresses for sale in secondary markets.

Uses for Recycled Materials

Recyclers sell or pay to have materials from used mattresses and foundations manufactured into new products or used for alternative purposes. The Program Disposition Data section contains quantitative information. Although there were no significant changes in these uses in 2025, MRC continues to invest in research to identify new end markets to increase the program's recycling rate, help MRC's recyclers become more financially sustainable and expand secondary markets for mattress components. The Research section contains more detail.

Steel Wire: Most used mattresses contain steel springs, either in the form of open coil innersprings or as pocketed coils encased in polypropylene fabric, and most used foundations include a steel wire interior support structure. The steel recovered from these products can be shredded or baled and sold into steel scrap markets, where mills remelt the material for use in new steel products such as appliances, automobiles, and building components. However, in 2025 most California scrap metal recyclers continued to reject unprocessed pocketed coils because the polypropylene fabric and any glued layers attached are treated as contaminants that may account for up to 15% of the coil's weight. In 2025, only one recycling facility partnered with a third-party scrap metal recycler willing to accept unprocessed coils.

In prior years, MRC transported this material from recyclers to a California processor. Beginning in 2025, recyclers were required to either process their own pocketed coils or contract with a qualified third party to perform the work. This requirement drove operational changes across the recycling network, with most recyclers investing in processing equipment or developing deconstruction technologies, while others supplemented internal capacity through third party processing arrangements. As these technologies and processes were implemented, 2025 represented a startup and learning phase, during which recyclers worked through initial operational challenges as they established and stabilized their processing capabilities.

Foam: The interiors of most mattresses contain one or more layers of polyurethane and/or latex foam. After the outer quilt panel is removed, the recycler separates the inner foam layers for baling and sale to scrap

purchasers. Nearly all post-consumer foam is sold to carpet underlayment manufacturers to make carpet padding where scrap foam is chopped into small pieces, mixed with rebonding adhesive and exposed to steam to cure the mixture. The result is a large rebond foam cylinder that is cut into thin sheets to make carpet pad. The feedstock for carpet padding is mostly post-industrial polyurethane foam but may also contain a small percentage of used carpet pad, as well as post-consumer mattress foam and quilt panels. In 2025, demand for recycled foam showed a slight increase over 2024. As consumer preferences continues to shift from carpet to hard surface flooring alternatives, we expect the value and demand for post-consumer foam and quilt to continue its decline. The Research section contains additional discussion on this topic.

Quilt Panel: The mattress sleep surface (that is, the top layer of a one-sided "no-flip" mattress and the top and bottom layers of a two-sided mattress) is typically a decorative outer fabric (also called ticking), one or more layers of fiber batting, non-woven fabric or foam (polyurethane and/or latex) and a thin backing (usually a non-woven fabric). These layers usually are stitched or "quilted" together. Once the quilt panel has been removed from the mattress, recyclers bale it for sale separately from other reclaimed commodities.

Demand for recycled quilt panels is limited for several reasons. First, quilt panels lack consistent construction and materials. Second, quilt panels are more likely to become contaminated with dirt, water, bodily fluids or other environmental impurities because they are the outermost layer of a mattress. As a result, nearly all quilt panels are sold to carpet underlayment manufacturers, which chop the quilt into small pieces to make carpet pads. In this application, the post-consumer quilt panel represents a small percentage of the finished carpet pad. In 2025, demand from manufacturers for recycled quilt panels continued at the same level as 2024.

Foundation Wood: Most consumers use a foundation or box spring underneath their mattress. The foundation raises the sleep surface of the mattress to a comfortable height and helps prolong the life of the mattress by acting as a shock absorber. A typical foundation is composed of a wood frame assembled using nails or staples. A steel wire structure attached to the wood frame by staples or nails provides spring support for the foundation. Some foundations contain an all-wood interior structure instead of a steel wire structure. The sides of the foundation are typically covered by a decorative ticking, while a non-woven fabric typically covers the top and bottom.

To dismantle a foundation, recyclers remove the ticking and non-woven fabric, then shear or shred the unit to separate the metal from the wood. If the wood is free of significant metal or fabric contamination, it can be finely shredded for use as mulch or, in some limited cases, as compost. Some recyclers also send wood to biomass facilities, where it is burned to generate energy.

In 2025, one recycler sold post-consumer foundation wood to a facility that remanufactures wood pallets, and another directed foundation wood to reuse outlets.

Cotton: Depending on product construction, a mattress may contain other non-woven fiber layers such as mote cotton, which is a by-product of the fabric industry. Recyclers separate and bale the reclaimed cotton. Fiber markets for used cotton are limited and depend on whether the reclaimed material is co-mingled with other fibers and prevailing market conditions. End uses for this material include insulation for the construction, building and automotive industries. Mote cotton may be composted at commercial composting facilities.

Other Fiber: Many mattresses also contain layers made from one or more other types of fiber. Depending on the construction of the mattress, these fibers may include polyester, rayon and other synthetic fibers, wool, horse and other animal hair and coconut fiber. MRC determined that coconut and cotton fibers can be composted at commercial composting facilities. Nevertheless, recycling options for these other fibers are limited. As a result, most are typically landfilled.

Shoddy Felt: Another common layer of mattresses is shoddy felt (also called shoddy pad or just shoddy). This material is typically placed between the metal springs and foam layers to insulate the foam from sharp points on the springs and prevent the foam from working its way into the springs over time. Shoddy is a non-woven material comprised of mixed shredded recycled post-industrial fabric and apparel. Given the mixed nature of fiber types used to make shoddy, it is currently cost prohibitive to separate into different fiber categories, so the material is usually landfilled.

Plastics: Retailers often place the discarded mattresses they collect from consumers in plastic bags (usually polyethylene) so that dirt, bedbugs or other biological materials on the discarded units do not contaminate new units being delivered on the same truck. These bags sometimes cover discarded mattresses when they arrive at the recycler. Most recyclers bale and sell this material to plastic recycling companies, where the bags are converted into plastic pellets. Manufacturers of new plastic products melt and use recycled plastic as a feedstock in their manufacturing processes. Potential end uses for these pellets include composite plastic lumber and plastic film products.

Cardboard: Mattress foundations may contain a layer of cardboard that separates the wood base structure from the bottom non-woven fabric. Recyclers bale the cardboard and sell the bales to companies that make chipboard for cereal boxes, corrugated cardboard and other packaging materials.

Materials Management/Waste Hierarchy

MRC and its recyclers implement the program consistently with California's solid waste management hierarchy: source reduction, reuse (including renovation), recycling, composting, biomass, transformation/waste to energy (WTE) and landfill. The following describes activities MRC undertakes that are consistent with each waste management tier in the hierarchy. Associated data is provided in the Program Disposition Data section.

Source Reduction

The mattress industry manufactures a long-life durable good that consumers use over a multi-year period. They can also be expensive and are commonly resold or reused before entering the program for recycling. MRC's legislative mandate centers on developing and operating a statewide recycling program, and within this role, we aim to support and complement broader industry efforts toward source reduction across the product lifecycle.

However, we actively encourage manufacturers to pursue source reduction to decrease the environmental footprint of their product and production processes. This includes promoting consideration of end-of-life design in the development of new products, opportunities to reduce material use while maintaining performance and supporting the implementation of continuous improvement practices through the Sleep Products Sustainability Program (SP2) that measures and reduces both resource consumption and waste generation in mattress manufacturing.

MRC accomplishes this by facilitating information sharing across the mattress industry value chain; including manufacturers, component suppliers, and recyclers through conferences and webinars, convening an annual workgroup on circular design, and publishing articles and case studies on best practices including source reduction. Additionally, in 2025, MRC's marketing team managed a rotating series of eight social media posts to promote mattress care and build consumer awareness. These efforts encouraged and informed consumers about how to properly maintain their mattresses and extend their useful life. By keeping mattresses in good condition, fewer new mattresses need to be manufactured—an important element of source reduction.

Additional information about these source reduction initiatives is found in the Research and Education and Outreach chapters of this report.

Reuse (including Renovation)

Reuse follows source reduction in California's waste management hierarchy. In mattress waste management, reuse includes mattresses handed down to friends or family, mattresses sold in used furniture stores and mattress renovation. Used mattress retailers and mattress renovators were active in California before MRC launched the program and remain active today.

Statewide Renovation Trends

When California enacted SB 254, the Legislature stated its intent that the new law "not undermine existing used mattress recycling, resale, refurbishing, and reuse operations that are in compliance with state and federal law." According to CalRecycle data, renovators reported 152,465 units were renovated in 2025. Table 8 shows the number of units renovated from 2023 to 2025.

TABLE 8: Units Renovated Annually

Year	Units
2023	189,559
2024	179,984
2025	152,465

Overall demand for renovated units, which tend to be sold primarily at lower price points, are constrained by low-priced imports of new mattresses. Official U.S. import and industry statistics show that imported mattresses accounted for 24% of total mattress units shipped into the United States in 2025, placing competitive pressure on both renovators and manufacturers that sell units at the lower end of the mattress market.

Additionally, the decline in mattress renovation volume reflects broader macroeconomic conditions impacting the home furnishings sector. Stakeholders noted that ongoing pressures in the furniture retail sector, including closures of independent furniture stores have reduced available sales channels for renovated units

MRC has taken a number of actions consistent with legislative intent. For example, six renovators contracted with MRC in 2025 to serve as permanent collection sites that receive mattresses directly from the public and commercial entities. Under this arrangement, the renovator may select discarded units it wants to renovate and place the remainder in MRC-provided trailers for transport at MRC's expense to recyclers for processing. MRC pays a handling fee for the discarded units sent to recyclers.

In 2025, MRC also provided recyclers with a list of renovators that comply with applicable California and federal bedding requirements (as required by SB 254) and may purchase whole units and materials from recyclers.

In addition to the discarded units that renovators may cull from the units they collect, renovators in 2025 also purchased 563 units and an estimated 4,896,180 pounds of whole units plus deconstructed materials from MRC recyclers for reuse and renovation. MRC will update the list of compliant renovators in 2026 and will continue to monitor the relationships between recyclers and renovators for future annual reports.

CalRecycle established that a baseline of 225,000 units were renovated and monitors this number annually. According to CalRecycle data, renovators reported that they

renovated 152,465 units in 2025, this is a 15.3% decrease from the units reported as renovated in 2024. The CalRecycle data provided to MRC is incomplete, with only 42 out of 47 known renovators reporting in 2025. Additionally, the reported data may not be precise, as 12% of reporting renovators based the number of units that they reported in 2025 on conversion factors and estimates rather than actual counts and company records. Economic factors, such as competition with low-priced imported bedding and the closure of independent furniture stores further contribute to the decrease in demand for renovated mattresses. The Good Faith Effort section contains additional information.

Therefore, far from undermining renovators, the statewide program benefits them. Renovators may both cull units from the discards that they collect and purchase whole units and materials from recyclers for renovation. MRC is informing recyclers about renovators that have complied with California law and are thereby eligible to purchase units and materials from recyclers. Renovators that serve as collection sites pay nothing to have residents drop off units at their facilities and then select which of those units to renovate. Those collectors incur no cost to transport the rejected units to a recycler or landfill. They simply place the rejects in an MRC-provided trailer and MRC pays to have them taken to a recycler. MRC compensates these collectors for the discarded units transported to a recycler for processing.

MRC Recyclers and Renovation

As discussed in the Recycler Procedures section, some recyclers sell whole mattresses and component materials to renovators. MRC pays recyclers the same to dismantle units, regardless of whether the materials reclaimed from this process are sold to renovators or others in the secondary markets. MRC does not compensate recyclers when they sell whole mattresses directly to renovators. The recycler instead is paid for the unit by the renovator. This financial arrangement benefits both the recycler and renovator, allowing the renovator to buy whole mattresses and components.

Renovators as MRC Permanent Collection Sites

MRC lists California-based renovators that contract to serve as used mattress collection locations on its Bye Bye Mattress Recycling Locator. In 2025, six renovators served as permanent collection sites for residents, retailers and commercial entities. Most participating renovators opt to use MRC's transporters to move unrenovated units collected at these sites to recyclers for dismantling. In 2025, MRC recyclers received 52,045 units (equivalent to a weight of 2.8 million pounds of material) from these renovators to MRC recyclers. In 2025, MRC also reached out to renovators about becoming new permanent collection sites. MRC will continue efforts to identify renovators that could serve as drop-off points.

Renovators on ByeByeMattress.com

Consistent with California's solid waste management hierarchy and to increase California consumers' access to MRC's collection network, MRC contracts with renovators that comply with applicable California and federal bedding requirements (as required by SB 254) to serve as permanent collection sites. MRC includes these locations on its Bye Bye Mattress Recycling Locator.

Renovators and Program Development

MRC considers the views of renovators and other interested stakeholders when setting program policies. For example, when MRC developed the CIP program, it sought input from the Mattress Advisory Committee (on which the renovator segment is represented) regarding the level of incentive that consumers should receive when dropping off discarded mattresses and foundations at an MRC recycler. After considering different incentive levels, the committee advised MRC that setting the incentive above $3 per unit could harm renovation. MRC accepted the committee's advice and capped the incentive at $3 per unit, up to five units per vehicle per day. In 2025, MRC communicated with contracted renovator collectors to minimize the impact of CVP on their supply chain.

MRC avoids recruiting CVP participants already serviced by renovators. MRC also provides CVP entities not eligible for transportation the list of recyclers, collection sites accepting commercial drop-off and renovators that comply with applicable California and federal bedding requirements (as required by SB 254).

Education and Outreach to Renovator

During program development and in subsequent years, MRC has informed all known renovators about their obligations and opportunities under SB 254. Renovators receive the same program updates that MRC sends to retailers and other program participants. Therefore, MRC has implemented the program consistent with both this tier of the waste management hierarchy and the Legislature's intent that the program not undermine the resale, refurbishment and reuse of discarded mattresses.

Recycling

Recycling is the third priority in California's waste management hierarchy. The program is designed to increase both the number of discarded mattresses diverted from California's landfills and the recycling of post-consumer mattress materials.

To achieve this result, MRC has established a robust, diverse and geographically accessible mattress collection network that is continually improving. Among other things, MRC provides enclosed containers to protect discarded mattresses from weather damage during storage and transport and funds research and activities to improve the recyclability of mattresses. Once a recycler receives a discarded mattress, it dismantles the unit and separates the component materials for sale or use in secondary markets.

Materials for which no market exists or that cannot be recycled (because they are contaminated or mixed with other materials) are usually landfilled.

MRC follows 10 strategies to promote mattress recycling:

1. **SWF Compensation:** The Program compensates participating solid waste facilities and other collection locations at negotiated rates for handling mattresses that they accept free of charge from consumers and businesses. Additionally, MRC provides no-cost storage, transport and recycling of these units. This reduces the quantity of discarded mattresses that the facilities would otherwise landfill.
2. **Mattress Retailers (Retailer Take-Back Obligation):** Mattress retailers must offer a consumer the option to have a used mattress picked up for recovery at no cost when they deliver a new mattress. This is an important way for California consumers to access the MRC network in a convenient manner. Since the Program encourages retailers to make the discarded mattresses they collect available for recycling through the Program free of charge, this provision diverts additional quantities of discarded mattresses that a consumer otherwise would dispose of through existing solid waste collection systems.
3. **No-Cost Retailer Recycling:** Retailers can recycle mattresses they pick up through the retailer take-back obligation at no cost through MRC's program. Retailers generating more than 100 discarded units may request no-cost pick-up through MRC's Commercial Volume Program. Additionally, many public collection locations in MRC's network also accept discarded units from retailers. Discarded mattresses that retailers provide for recycling reduce the quantity of discarded mattresses that they send to landfills. The Mattress Collection and Retailer Access sections contain more detail.
4. **No-Cost Business Recycling (Commercial Entities):** Business or large-volume mattress consumers (such as hotels, dormitories, nursing homes, etc.) generating discarded mattresses may provide these units to an MRC-contracted recycling facility at no cost. Businesses generating more than 100 discarded units may request no-cost pick-up through MRC's Commercial Volume Program. Additionally, many public collection locations in MRC's network also accept discarded units from businesses. The Mattress Collection and Commercial Volume Program sections contain more detail.
5. **No-Cost Consumer Drop-Offs at SWFs:** California residents may drop off mattresses at participating solid waste facilities and other public drop-off sites throughout California at no-cost. The Mattress Collection section contains more detail.
6. **Consumer Incentive:** MRC offers California residents that deliver discarded mattresses directly to select MRC-contracted drop-off locations a payment. This reduces the quantity of mattresses that consumers would otherwise have disposed of through existing solid waste collection options and sent to landfills. The Consumer Incentive Payment section contains more detail.

7. **MRC Recyclers' Target:** MRC's recyclers are responsible for dismantling discarded mattresses and foundations, selling or otherwise identifying a use for the reclaimed materials in secondary markets, and disposing of the waste or otherwise unrecyclable material. A recycler has financial incentives to recycle as much of a mattress as it can because it keeps the revenue it earns from the sale of those materials and incurs costs when sending waste and unrecyclable materials to landfills. To further incentivize the amount of mattress materials recycled through the program, MRC's recyclers are expected to recycle 75% by weight of the units they process, but some recyclers have encountered difficulty meeting this requirement. The Program Disposition Data section contains more detail.
8. **Mitigate Illegal Dumping:** MRC compensates participating entities (local governments, solid waste facilities, solid waste operations and others) in its Illegally Dumped Mattress Collection Initiative for providing data about the number of illegally dumped mattresses they collect in their communities. This information identifies those areas of the state where illegally dumped mattresses are most prevalent and guides MRC's efforts to mitigate illegal dumping activity. The Mitigation of Illegal Mattress Dumping chapter contains more detail.
9. **Prevent Bedbug and Other Contamination:** A mattress may not be recyclable if it is wet, heavily soiled or contaminated by bedbugs. Although contamination affects relatively few units, MRC educates recyclers and collection sites on how to prevent and properly manage bedbug and other contamination, and thereby increase the amount of mattress materials that can be recycled annually. The Collection Site Mattress Management and Recycler Procedures sections contain more detail.
10. **Mattress Collection Site Improvement Funding:** To increase the number of mattresses diverted from the waste stream, improve the recyclability of discarded units, improve worker safety and decrease transportation costs and fuel consumption by increasing the number of units shipped per container, MRC funds improvements to mattress collection sites. Beginning in 2018, public collection sites in California are eligible for up to $10,000 per site per funding cycle. Award recipients must agree to serve as permanent collection sites for at least one year following completion of the project. The Research section contains more detail.

Composting

Composting is a form of recycling and falls at the same level in the waste management hierarchy. In 2025, one MRC recycler sent post-consumer mattress materials to a facility to be composted.

Foundation wood is also theoretically appropriate for composting. However, efficient composting requires that the wood be reduced to very a small particle size that both has a high surface area to volume ratio and provides good structure to the compost mixture. This requires aggressive shredding or grinding to reduce the foundation wood to particles that are three inches or less in diameter. In addition, the shredding process must remove most of the metal contamination. Both of these requirements make composting foundation wood impractical for MRC's recyclers.

Biomass

California's solid waste management hierarchy considers biomass to be recycling that is preferred over the transformation of solid waste through WTE facilities or landfill. In 2025, MRC recyclers sent 4,081,830 pounds of wood to biomass representing a 79.7% increase from 2024. MRC recyclers sent wood to biomass because it was financially more attractive than incurring the cost both to transport the wood to a mulcher and pay the mulching operation's tipping fee or because local mulching companies rejected the material due to metal contamination.

Biomass may not be a viable long-term recycling option for foundation wood. Low energy prices and environmental regulations may cause existing biomass plants that MRC's recyclers use to close in the coming years.

Transformation (WTE)

In 2025, MRC recyclers did not send any post-consumer mattress material to WTE facilities.

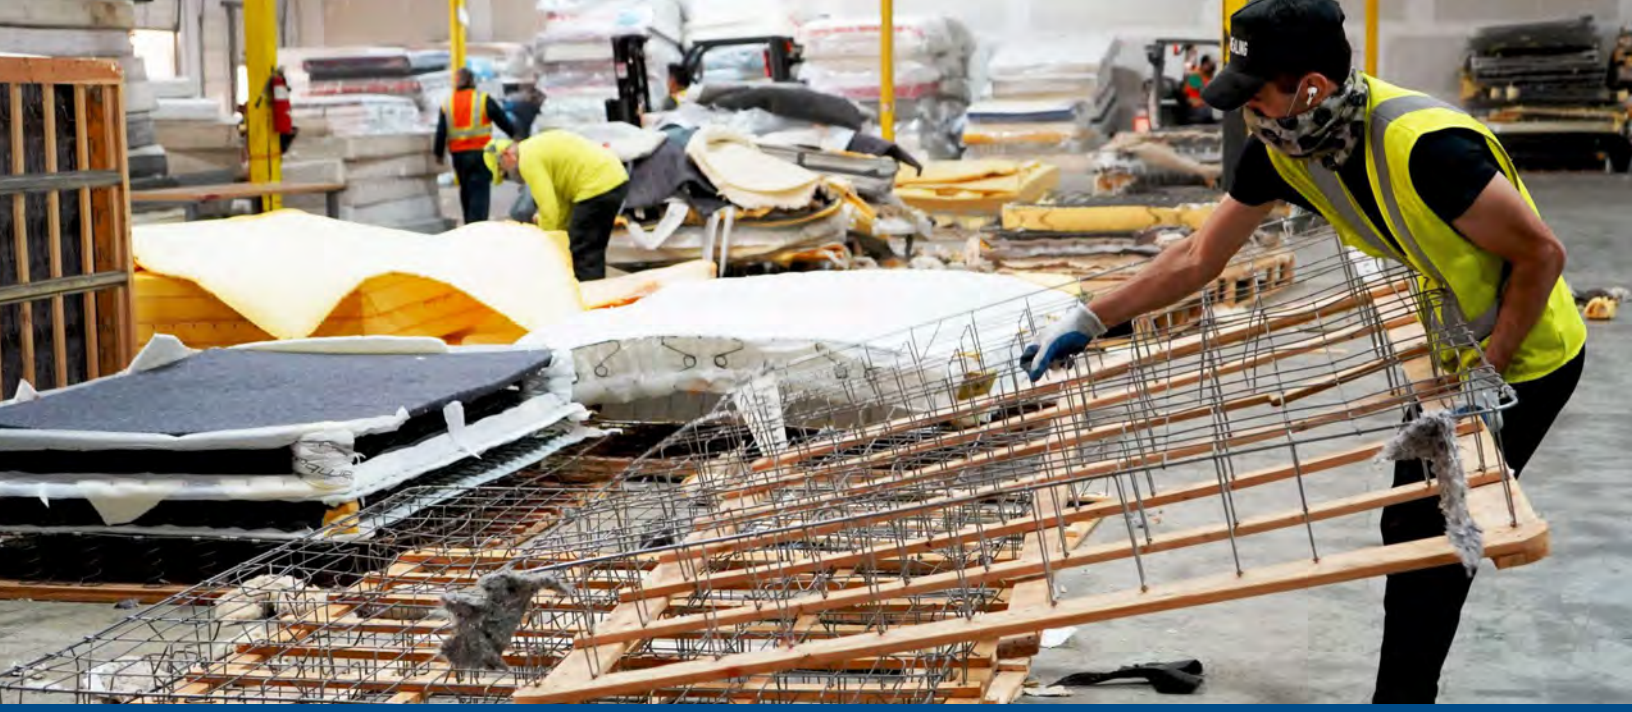

Landfill

Under their contracts with MRC, recyclers are expected to recycle 75% by weight of the units they process, although that may not always be feasible. MRC recyclers dispose of non-recyclable materials and residue in environmentally safe landfills. This material may include entire mattresses or foundations and mattress materials that are:

- Severely damaged or twisted
- Wet, frozen or heavily soiled
- Infested with bedbugs, other living organisms or other biological contaminants that render the unit either unsafe to process or make its constituent materials unmarketable
- Have no financially viable market

MRC recyclers do not track landfill disposal data by material type, making it impossible for MRC to provide data regarding the exact quantity of specific materials that they landfilled in 2025. However, given that recyclers landfilled some whole units, as well as separated materials, MRC assumes that they landfilled at least some quantity of every mattress material type (e.g., steel, foam, fiber and wood). MRC recyclers landfilled 30,188,956 pounds of material in 2025. While this represents an increase of 29.7% from the amount of landfilled material from 2024, much of that increase is attributable to the 5.1% increase in units collected over the prior year. Landfill as a percent of total outbound materials increased 6.3%. Recyclers slightly increased the amount of material sent to landfill due to decreased demand for wood, foam and quilt panel, as discussed in the Program Disposition Data section.

Program Objectives and Activities

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR § 18962(a)(2)(B) — Describe how the program will meet the requirements of subdivisions (d), (g), (i), (j), (k), (l), (m), (o), and (p) of section 42987.1 of the Public Resources Code.

14 CCR § 18964(b)(8) — Description of objectives and activities based on the used mattress recovery and recycling plan, per section 18962(a)(2). State objectives from the approved plan and describe progress toward achieving those objectives during the reporting period. Describe any adjustments to objectives stated in the approved plan that may be made for the upcoming reporting period and accompanying rationale for those changes. If any changes are significant or material, as defined, the mattress recycling organization shall amend and resubmit its plan for approval by the department.

14 CCR § 18964(b)(8)(A) — Quantitative information on subdivisions (b), (c), (d), (e), (f), (g), and (j) of section 42990.1 of the Public Resources Code, including conversion factor(s), if used. When describing the uses for the recycled materials, the annual report shall identify the secondary markets to which those materials are sold, and potential end uses of those materials.

14 CCR § 18964(b)(8)(B) — Qualitative and/or quantitative information on subdivisions (g), (l), and (m) of section 42987.1 of the Public Resources Code.

14 CCR § 18964(b)(13) — Good faith effort. For annual reports submitted on and after July 1, 2019, a demonstration of good faith effort with the state mattress recycling goals established pursuant to section 42987.5 (b) of the Public Resources Code.

Cal. Pub. Res. Code § 42987.1(h) — A program performance measurement that shall collect program data for the purpose of the annual report. The information shall include:

(1) A methodology for estimating the amount of mattresses sold in the state, used mattresses available for collection in the state, and for quantifying the number of used mattresses collected and recycled in the state.

(2) A methodology for determining mattresses sold in the state by the manufacturers and renovators of the mattress recycling organization.

Cal. Pub. Res. Code § 42987.1(k) — Establishment of a financial incentive to encourage parties to collect for recycling used mattresses discarded or illegally dumped in the state.

Cal. Pub. Res. Code § 42987.1(m) — Developing strategies, in consultation with the California Environmental Protection Agency's Environmental Justice Task Force and other relevant parties, for collecting used mattresses for recycling in areas and communities that face unique challenges associated with proper waste management such as poverty, language barriers, and illegal mattress dumping.

Cal. Pub. Res. Code § 42987.5(a)(1)(B) — The state mattress recycling goals.

Cal. Pub. Res. Code § 42987.5(a)(1)(C) — On or before July 1, 2020, metrics and goals for increasing consumer convenience for used mattress dropoff, disposal, and recycling in a way that, notwithstanding this subdivision, applies to the entire state regardless of socioeconomic conditions.

Cal. Pub. Res. Code § 42987.5(a)(1)(D) — On or before January 1, 2021, convenience goals to be effective January 1, 2022, specific to each of the following:

(i) (I) Consumer access to the program, including at least one permanent mattress dropoff location in each county. The requirement to have at least one permanent mattress dropoff location in each county shall not apply to a county with a population of less than 2,000 people as long as the organization continues to provide at least two collection events in the county each year. The department may require additional dropoff locations to ensure that consumers have sufficient convenient access to dropoff locations.

(II) The mattress recycling organization shall provide no-cost freight services to any mattress retailer, health care facility, educational facility, military base, or lodging establishment that has at least 100 used mattresses to pick up at one time.

(ii) Retailer access to the program.

Cal. Pub. Res. Code § 42987.5(b) — Beginning July 1, 2019, and annually thereafter, the annual report required pursuant to Section 42990.1 shall demonstrate the mattress recycling organization's good faith effort to comply with the goals established pursuant to this section.

Cal. Pub. Res. Code § 42990.1(b) — The quantity of mattresses disposed of in solid waste landfills.

Cal. Pub. Res. Code § 42990.1(c) — The quantity of discarded used mattresses collected for recycling in the program.

Cal. Pub. Res. Code § 42990.1(d) — The quantity of used mattresses collected for recycling from different categories of sources.

Cal. Pub. Res. Code § 42990.1(e) — The quantity of each category of materials recycled.

Cal. Pub. Res. Code § 42990.1(g) — The quantity of otherwise disposed of materials.

Cal. Pub. Res. Code § 42990.1 (j) — The total volume, number, and weight of used mattresses collected recycled, renovated, and reused in this state during the preceding calendar year, including any conversion factor used to determine the number of mattresses recovered.

Cal. Pub. Res. Code § 42990.1 (l) — For reports submitted on and after April 1, 2020, a demonstration of good faith effort with the state mattress recycling goals established pursuant to Section 42987.5.

Cal. Pub. Res. Code § 42990.1 (m) — For reports submitted on and after July 1, 2021, all of the following:

(1) A report on activities, which the mattress recycling organization shall undertake, to meet consumer and retailer accessibility goals, and on the progress the organization has made in meeting those goals, and on the organization's planned efforts to meet those goals. Factors to be considered may include, but are not limited to, availability of retailer take-back options, proximity to recyclers and no-cost collection points, availability of no-cost local curbside collections services, and proximity to collection events.

Cal. Pub. Res. Code § 42990.1(o) — For reports submitted after January 1, 2020, the progress toward attainment of the goals included in the organization's mattress recycling plan submitted pursuant to Section 42987.1.

Program Objectives and Activities

Convenience

Pursuant to Cal. Pub. Res. Code § 42987.5(a)(1)(D), CalRecycle requires MRC to meet goals related to consumer convenience, no-cost freight services and retailer convenience. MRC's efforts to achieve the newly established goals are discussed in the Residential Access and Commercial Access sections.

In 2025, MRC contracted with Customer Analytics, a demographic analytics consulting firm, to evaluate the extent to which its collection network is accessible to California residents and retailers. Customer Analytics measured access for all California residents, including those living in rural counties and environmental justice communities, to MRC's collection network using a 15-mile benchmark. For these purposes, the program's mattress collection network refers to all drop-off locations in MRC's collection network (recyclers, collection sites, collection events) and curbside bulky item programs that send their mattresses to MRC recyclers for dismantling.

Customer Analytics first evaluated only the permanent collection network (collection sites, recyclers and curbside bulky item collection programs) to measure whether MRC had met the goals set by CalRecycle, and separately included metrics that incorporate collection events for continuity with past annual reports. For a full description of the methodology used, refer to Appendix D.

Table 9 shows the percentage of California residents living within 15 miles of MRC's collection network in 2025, for both MRC's permanent collection network and entire collection network (that is, including collection events). The Residential Access section contains further details.

TABLE 9: Percentage of California Residents Living Within 15 Miles of MRC's Collection Network

Population Category	Permanent Collection Network Only	Permanent Collection Network & Collection Events
All Residents	**98.6%**	**98.7%**
Residents in Rural Counties	95.2%	95.9%
Residents in Environmental Justice Communities	99.6%	99.7%

Under California law, retailers must provide no-cost take back of a discarded mattress when delivering a new mattress to a California consumer. Retailers may then recycle

the used mattress at no cost through MRC's permanent collection network. In 2025, 176 permanent collection sites accepted mattresses from retailers.

Customer Analytics evaluated retailers' access to MRC's permanent collection network by measuring the percentage of California's population that lives near locations in the network that accept discarded mattresses collected by retailers.

Table 10 indicates retailers' access to MRC's collection network, using a radius of 20 miles for urban counties and 40 miles for rural counties. The Commercial Access section contains additional details.

TABLE 10: Percentage of California Residents Living Within 20 Miles and 40 Miles of MRC's Collection Network for Retailers in 2025

Distance from Collection Network for Retailers	Percent of Residents
Urban: All Residents Within 20 Miles	99.4%
Rural: All Residents within 40 Miles	99.6%

Residential Access

CalRecycle's goals established pursuant to Cal. Pub. Res. Code § 42987.5(a)(1)(D)(i)(I) require that MRC meet the following consumer convenience and access goals annually:

- Establish at least one permanent mattress drop-off location in each California county (except counties whose populations are less than 2,000, in which case, MRC must host two collection events annually).
- Establish at least 250 permanent collection opportunities.
- Increase consumer convenience to 95% by 2025.

Table 11 summarizes MRC's efforts to meet these goals.

Consumer Convenience and Access Goals

TABLE 11: MRC's Consumer Convenience and Access Goals

Category	Goal	2025 Collection Network
Consumer Access to the Program (Number of Convenient Collection Opportunities)	One permanent mattress drop-off location in each county, or 2 collection events in counties with population <2,000 people	MRC's permanent collection network included permanent collection sites in 57 of 58 California counties. Refer to the Good Faith Effort section for additional detail.
Consumer Convenience (Number of Collection Opportunities)	250	272
Consumer Access to the Program (Convenience Goal)	95%	98.6%

Consumer Convenience (Number of Collection Opportunities)

CalRecycle has defined the metric for convenient collection opportunities to include the number of collection sites in MRC's collection network, disposal facilities that accept mattresses, mattress recycling facilities and curbside bulky item collection programs that accept mattresses. MRC does not count retailers that take back old mattresses upon delivery of new mattresses in its reported number of collection opportunities due to difficulty verifying which retailers offer delivery and take-back. Therefore, CalRecycle revised the metrics used to monitor achievement of the goal to remove retailers that take back old mattresses upon delivery of new mattresses from the definition of collection opportunity for the purpose of this goal. In addition, because MRC does not have a mechanism to count disposal facilities outside MRC's collection network that accept mattresses for no fee, they are not included in the collection opportunities counted in 2025.

MRC's collection opportunities are comprised of its permanent collection network (including recycling facilities) plus other franchise haulers and municipalities that collect mattresses through their curbside bulky item collection services. In 2025, MRC's collection network included 247 permanent collection sites and 25 franchise haulers and municipalities that aggregate curbside bulky item units, providing 272 collection opportunities and exceeding CalRecycle's goal by 22.

Table 12 provides an overview of our collection network (permanent collection sites, recycling facilities and curbside bulky collection sites) from 2023 through 2025.

TABLE 12: MRC's Collection Opportunities from 2023 Through 2025

Year	Collection Opportunities
2023	269
2024	268
2025	272

The Program Collection, Transportation and Processing section explains the various channels from which the program units are collected and the reasonable steps we have taken to expand the collection network.

Consumer Access to the Program

In 2025, 98.6% of California's residents lived within 15 miles of MRC's permanent collection network (which consists of permanent collection sites, recycling facilities and other entities that provide curbside bulky item collection), exceeding CalRecycle's goal of 95%. Including collection events, statewide access increases to 98.7%. In 2025, MRC had permanent collection sites in 57 of 58 California counties.

In 2024, the one permanent collection site in San Francisco County terminated operations. In 2025, MRC contacted six entities in the County to host collection events, but none resulted in scheduled events. We also attempted to recruit three potential permanent collection sites, one of which initiated the contracting process and began accepting mattresses from the public at no cost in October 2025. Due to administrative delays, the site did not enter into a contract with MRC until 2026 and was not listed on the Bye Bye Mattress collection site locator until then.

The analysis of MRC's collection network, however, understates the access that California residents have to no-cost mattress recycling because it does not take into consideration the impact of the retailer take-back obligation. As discussed more fully in the Program Collection, Transportation and Processing chapter, a retailer that delivers a mattress to its customer must offer to pick up the customer's discarded mattress at no cost. The retailer take-back obligation provides another important alternative for consumers to access the program. Appendix B contains a list of all locations in MRC's mattress collection network.

Underserved Areas

The 2024 convenience analysis showed that 99% of California residents had access to the program's permanent collection options and collection events. Using this analysis, MRC identified Contra Costa and San Francisco as areas that could benefit from improved consumer access. Table 13 outlines MRC's progress towards improving convenient access in these counties in 2025.

TABLE 13: 2025 Activities in Selected Counties

County	Progress Made in 2025
Contra Costa	Attempted to recruit six potential permanent collection sites and successfully contracted with two.
San Francisco	Attempted to recruit three potential permanent collection sites. One location began the contracting process but did not complete it in 2025.

Next Steps

Based on Customer Analytics' analysis of the 2025 collection network, MRC recognized that San Diego County could benefit from enhanced residential access. We will provide progress updates in the 2026 Annual Report.

Challenges to Expanding the Collection Network

An ongoing challenge that MRC faces is that some SWFs refuse to become a permanent collection site because they make money by charging residents to dispose of their mattresses. Under California law, MRC may recycle mattresses collected by a SWF only if it collects those units without charge to the resident. In exchange, MRC pays the participating SWF a reasonable amount for accepting, collecting, storing, transporting

and handling discarded units. MRC's negotiated compensation is intended to cover SWF's direct costs to provide these services. In addition to being paid to handle units, a participating SWF also avoids the cost of paying to landfill those units or preserves its valuable landfill space because it does not bury units that it sends to its recyclers.

Some SWFs, however, currently charge exceedingly high disposal fees for mattresses (as high as $64 or more per unit). Although MRC is prepared to compensate these SWFs for the reasonable costs they incur in handling mattresses, MRC will not pay them the same high rates that they currently charge consumers. For this reason, some SWFs deliberately do not participate in the program.

MRC anticipates that if not all SWFs participate, the program's ability to increase the number of units collected annually will be limited.

In addition to SWFs that are influenced by financial motivations, other SWFs do not participate in the program because:

- The SWF lacks internal resources to review and complete the contracting process
- Existing contractual restrictions with a local municipality may preclude a franchise hauler that operates a SWF from negotiating to become a permanent collection site
- The SWF lacks the logistical capability to participate in the program (e.g., the facility lacks space for a 53-foot trailer; has insufficient labor to collect, store, transport and handle the units for MRC or lacks appropriate loading equipment)
- The SWF receives very few discarded units

MRC is prepared to accommodate these specific logistical and other constraints to encourage a potential new collection site to expand consumer access by joining its permanent collection network.

When we encounter these obstacles, MRC has developed innovative solutions, including working with the following types of alternative collection entities:

- Nonprofits, including Habitat for Humanity
- Local Conservation Corps, which provide both permanent collection site staffing and event staffing for community collection events
- California Redemption Value locations
- Mattress retailers and local businesses that allow the public to drop off discarded units at no cost.

Rural County Access

MRC dedicates significant resources to making the program accessible to rural county residents. For purposes of this report, rural counties are defined using the definition set forth in Cal. Pub. Res. Code § 40184, which in general defines a rural county as one that

disposes of less than 200,000 tons of waste annually. Based on the most recent waste disposal data collected by CalRecycle in 2024 (the most recent data available at the time of Customer Analytics' analysis), the following counties are considered rural: Alpine, Amador, Butte, Calaveras, Colusa, Del Norte, El Dorado, Glenn, Humboldt, Inyo, Kings, Lake, Lassen, Madera, Mariposa, Mendocino, Modoc, Mono, Napa, Nevada, Plumas, San Benito, Sierra, Siskiyou, Sutter, Tehama, Trinity, Tuolumne and Yuba.

Throughout the year, MRC meets with the Environmental Services Joint Powers Authority (ESJPA) to provide updates, coordinate with stakeholders and discuss strategies and ideas. In rural areas where recruiting a SWF as a collection site may not be an option, we will work with alternative types of collection sites (nonprofits, local businesses, retailers, public agencies or CRV centers) or host local collection events.

In 2025, rural counties covered 46.1% of the state's geographic area but accounted for only 5.9% of its population. MRC's permanent collection network (collection sites, recyclers and curbside bulky item collection programs) served all 29 rural counties.

In 2025, 95.2% of California's rural residents were located within 15 miles of MRC's permanent collection network. When including the eight collection events hosted in rural counties in 2025, rural county accessibility increased to 95.9% .

In addition, a permanent collection site in Madera County increased its residential and commercial unit limit, and a site in Mono County expanded residential drop-off hours from two to six days per week.

California residents in rural counties are accustomed to driving longer distances for services, such as hospitals and grocery stores, when compared to urban residents. MRC also analyzed how many rural county residents were within 25 miles of its collection network. That analysis shows that 98.7% of California's rural county population lives within 25 miles of the program's permanent collection network, demonstrating the program's success in providing access to mattress recycling in rural counties.

In 2024, MRC used an analysis prepared by Customer Analytics to identify Trinity County as a rural county that would benefit from increased network access. Table 14 describes MRC's progress toward that goal in 2025.

TABLE 14: 2025 Activities in Selected Rural Counties

County	Progress Made in 2025
Trinity	MRC recruited a former permanent collection site that had terminated operations and successfully executed a contract to reopen the site.

Based on Customer Analytics' analysis of MRC's permanent collection network in rural counties in 2025, we recognized the potential to enhance residential access in Calaveras County. We will provide progress updates in the 2026 annual report.

Environmental Justice

Cal. Pub. Res. Code § 42987.1(m) requires that MRC develop strategies for collecting used mattresses for recycling from "areas and communities that face unique challenges associated with proper waste management such as poverty, language barriers and illegal mattress dumping." Pursuant to this requirement, MRC consults with Federal Environmental Justice (EJ) Agencies, the California Environmental Protection Agency's (CalEPA) Environmental Justice Task Force (EJ Task Force), CalRecycle Office of Environmental Justice, Tribal Relations, and Education (EJTREO) and other stakeholders.

MRC has identified the relevant communities (which we refer to as "EJ communities") using CalEPA's CalEnviroScreen 4.0—an environmental mapping program that identifies California communities by census tract that are disproportionately burdened by and vulnerable to multiple sources of pollution, considering indicators such as poverty and linguistic isolation. (A census tract is a small geographic area defined for statistical purposes by the U.S. Census Bureau.)

In 2025, 99.6% of Californians who resided in EJ communities lived within 15 miles of MRC's permanent collection network (recyclers, collection sites and curbside bulky item collection). This number increases to 99.7% when collection events are included. These percentages understate actual access since they do not consider when a retailer that delivers a new mattress to a California consumer takes back a consumer's discarded unit at no cost, which is an additional and important way that residents may access the program.

Collection Strategies

MRC collects used mattresses from residents through four channels: retailer take-back, permanent collection sites, curbside bulky item collection and collection events. MRC recognizes that not every resident has the means to transport a mattress, which may be especially true for residents in EJ communities. Therefore, curbside bulky item collection, in addition to the retailer's take-back obligation, is an important part of MRC's strategy for collecting discarded mattresses in EJ communities.

MRC maintains a directory on ByeByeMattress.com of communities that offer at least one free curbside bulky item pickup per year. MRC's consumer education materials and advertising also encourage residents to ask their local government how bulky items are collected in their area. In 2025, 96 bulky programs served EJ communities, 47.9% of which also provided no-cost collection to multifamily housing complexes.

MRC actively uses collection events as another collection channel in EJ communities. Collection events reduce the distance many residents must travel to access the program. In 2025, 43 of the 75 collection events took place in EJ communities and 67 events were within 15 miles of EJ communities.

Underserved Environmental Justice Communities

In the 2024 Annual Report, MRC reported that we would seek to improve access to the program for residents living in Merced County. Table 15 describes MRC's progress toward that goal.

TABLE 15: 2025 EJ Activities in Selected Counties

County	Activity
Merced	MRC attempted to recruit two new collection sites. In addition, MRC supported 15 collection events in the County.

Based on Customer Analytics' analysis of MRC's permanent collection network in 2025 compared with CalEnviroScreen data, MRC recognized the potential to enhance residential access in Solano County. We will provide progress updates in the 2026 annual report.

Illegal Dumping Mitigation in EJ Communities

Since launching the Illegally Dumped Mattress Collection Initiative ("Initiative") in 2016, MRC has collected valuable statewide data. In 2025, Customer Analytics analyzed this data to determine the number of illegally dumped units collected from public rights-of-way in EJ communities. According to their analysis, EJ communities accounted for 21,626 or 38.2% of the total amount of mattresses collected through the Initiative in 2025, a decrease of 8.7% from 2024. The decline in illegally dumped units reported from EJ communities primarily results from one large county underreporting its collected units due to staffing constraints.

By identifying the amount of illegally dumped units collected in EJ communities, MRC can better understand the impact of illegal dumping on these communities and work to address the issue.

In 2025, MRC partnered with the Central California Environmental Justice Network (CCEJN) to support a collection event in Fresno County.

EJ-Focused Conferences and Working Groups

In 2025, MRC sponsored or participated in a variety of task force groups and conferences to gain and share knowledge about illegal dumping as well as the challenges EJ community leaders face with educating their residents about and encouraging them to use available recycling options, including the following:

- California Resource and Recovery Association (August)
- CalEPA Region 9 Tribal Conference (October)
- Northern CA Recycling Association Recycle Update (March)
- San Diego Zero Waste Symposium (February)

- Solid Waste Association of North America (April)
- Southern California Waste Management Forum Spring Conference (April)
- Southern California Waste Management Forum – Annual Business Meeting (May)
- Southern California Waste Management Forum – Annual Conference (November)

Attending these events also allows MRC to make community leaders and influencers more aware of resources they can access to promote mattress recycling and to gather feedback to improve our education and outreach. The stakeholders MRC meets through these events also help us expand the collection network.

For similar reasons, MRC communicates with working groups, such as task forces and community-based organizations that serve EJ community needs. Engaging with these groups allows MRC to learn about new initiatives aimed at communities burdened by multiple sources of pollution or disproportionately vulnerable to the effects of pollution. In 2025, MRC worked with the following:

- CalRecycle Illegal Dumping Technical Advisory Committee
- Identifying Violations Affecting Neighborhoods (serving Fresno, Imperial, Kern, Kings and Tulare Counties)
- Central California Environmental Justice Network

In addition, we participated in an EPA hosted session for California Tribes, presenting its program in coordination with other EPR organizations.

Education and Outreach

MRC prioritizes EJ communities when contacting local officials and media, as well as where we advertise. In 2025, MRC's EJ community-focused efforts included the following:

- Provided multilingual information to mayors, city council members, county officials and Council of Governments to promote mattress recycling options with their residents.
- Provided permanent collection sites and event hosts with publicity toolkits to educate residents about mattress recycling.
- Encouraged media to cover mattress recycling and publish submitted op-eds and letters to the editor.
- Introduced a new public service announcement (PSA) campaign titled "Influencer." The campaign includes 15-second and 30-second video and radio spots. Spanish versions are also available. To develop the concept and scripts, MRC consulted information gathered from completed illegal dumping pilot projects and our involvement in task forces, workshops, and conferences.

- Distributed “Influencer” to PSA directors in February 2025 and encouraged additional airings by contacting station directors in the weeks before Earth Day (April 22) and America Recycles Day (Nov. 15). To complement these airings, MRC also asked city leaders and community-based organizations to share the PSA on their social media feeds and other communication channels. In the first year, the PSA had more than 3.2 million impressions. It aired on three TV stations in the Los Angeles and Eureka markets and six radio stations in Fresno, Los Angeles, and San Diego markets.
- Continued to broadcast a previous PSA campaign, “Break Up the Right Way With Your Old Mattress,” broadcast in 2025. It now has almost 11 million lifetime impressions in California since its 2021 debut.
- Emailed new homeowners and renters in EJ communities about their mattress disposal options (retailer take-back, permanent collection sites or their local curbside bulky item collection program).
- Marketed Spanish-language ads in select major markets to increase general awareness of the program. In addition, Asian-language outlets were used in the fall campaign. The Education and Outreach chapter contains more specific information on targeted counties.
- Exhibited at Earth Day festivals and other spring events in EJ communities.
- Used multicultural outreach consultants to advise MRC how to overcome language barriers and communicate most effectively with residents of EJ communities, as well as identify new opportunities to promote its collection network in EJ communities.

Commercial Access

No-Cost Freight Services

Pursuant to Cal. Pub. Res. Code § PRC section 42987.5(a)(1)(D)(i)(II), CalRecycle’s baseline and goals require that MRC provide no-cost freight services to transport discarded mattresses from retailers, health care facilities, educational facilities, military bases and lodging establishments to permanent collection sites. To meet this goal, MRC offers pickup services for mattresses from each of these entities when they have at least 100 units to discard at one time through its Commercial Volume Program (CVP). The sites where these entities accumulate their mattresses are not open to the public.

Depending on whether an entity regularly collects the minimum (such as a mattress retailer) or has a less frequent or ad-hoc need for MRC’s services (such as a lodging establishment), MRC offers several types of CVP collection and transportation options: CVP sites equipped with a permanent on-site trailer, temporary sites (live loads) and consolidation locations. The following describes each type of CVP collection type:

- Permanent on-site trailer sites are established for entities that collect at least 100 units per month. MRC provides those entities with an on-site trailer and transports the collected units to an MRC recycler on a regular basis. In 2025, the CVP collection network included 61 sites with on-site trailers.

- Temporary sites (live loads) serve entities that generate 100 mattresses less than once a month. Temporary CVP sites contact MRC to schedule a pickup (called a live load) whenever they reach 100 mattresses. MRC picked up 307 live loads from 103 temporary CVP sites in 2025, an increase of 17 live loads from 2024.
- Consolidation locations are sites that accept units delivered by retailers and other commercial entities only. In 2025, MRC offered four consolidation locations. The number of each CVP site type that MRC offered in 2025 is shown in Table 16.

TABLE 16: 2025 CVP Collection Network

Collection Type	Number of Sites	Site Type	Number of Sites
CVP On-Site Trailer Site	61	Retail	61
Temporary CVP Site (live loads)	103	Retail	6
		Lodging Establishment	54
		Military	23
		Healthcare	4
		Education	15
		Correctional Facility	1
Consolidation Location	4	Consolidation Location	4

In 2026, MRC continues to recruit eligible retailers, businesses and institutions to participate in its CVP and will report on progress in the next Annual Report.

Commercial Entities with Small Loads

In addition to the above CVP options, MRC assists lower volume commercial sources to manage discarded mattresses that they collect. Under the CVP, businesses and institutions that generate small loads of discarded mattresses may drop off their units at permanent collection sites that accept commercial volume. These collection sites are not reflected in Table 16's CVP Collection Network but are designated in Appendix B.

In 2025, 176 permanent collection sites offered no-cost drop off for small commercial loads. MRC lists these locations on its Bye Bye Mattress Recycling Locator and in list format on the site's page explaining commercial volume options. MRC also provides CVP entities that are not eligible for MRC-provided transportation (because they do not frequently generate loads of 100 mattresses or more) with a list of renovators that accept discarded mattresses and comply with applicable California and federal bedding requirements (as required by SB 254).

Retailer Access

Pursuant to Cal. Pub. Res. Code § 42992, any retailer that delivers a new mattress to a customer must offer to take back the customer's old mattress at no added cost. To make this take-back requirement a convenient means for California residents to access

no-cost mattress recycling, retailers have the following options for recycling those mattresses through the program at no cost:

- Drop them off at an MRC recycler.
- Drop them off at a permanent collection site that accepts small commercial loads.
- Request that MRC pick them up from the retailer through the CVP (permanent on-site trailer or live loads).
- Drop them off at a CVP consolidation location.

For ease of reference, we will refer to these options as the retailer collection network. Pursuant to Cal. Pub. Res. Code § 42987.5(a)(1)(D)(ii), CalRecycle's goals for MRC require that by 2025, 95% of consumers in rural areas reside within 40 miles and 80% of consumers in urban areas reside within 20 miles of a permanent collection site that accepts mattresses from retailers and their associated delivery parties. Customer Analytics calculated the percentage of California's urban and rural population that lives near permanent collection sites that accept discarded mattresses from retailers and other commercial entities (recyclers, permanent collection sites that accept commercial volume and CVP consolidation locations).

Customer Analytics' analysis showed that 99.4% of the urban population lived within 20 miles, and 99.6% of the rural population lived within 40 miles, of MRC's retailer collection network. Note that this analysis may understate actual retailer access because it does not account for retailers whose units MRC picks up directly through the CVP on-site trailer service or that request live loads.

Residents' Access to No-Cost Disposal Options

Some no-cost mattress disposal options in California are not currently part of MRC's collection network. For example, mattresses collected by some retailers are not recycled through the program and some curbside bulky item collection programs do not send units that they collect to the program.

To complete its analysis of how many California residents may access either no-cost mattress recycling or no-cost mattress disposal, MRC mapped its collection network and all curbside bulky item collection programs in the state, regardless of whether they participate in the program.

Based on MRC's collection network (collection sites, recyclers and curbside bulky collection programs) and including all events in the state, 98.7% of California residents were either served by an event or lived within 15 miles of MRC's collection network in 2025.

This percentage likely understates consumer access because our analysis does not include retailers that take back discarded mattresses and recycle them through the program providing consumers additional no-cost collection options. In 2025, the program received 27.8% of its units directly from retailers or MRC's CVP transporters

(which transport units received from retailers and other commercial entities). Retailers' share of units recycled through the program is even higher because some retailers also drop off units at permanent collection sites. However, since retailer units obtained from permanent collection sites are comingled with mattresses dropped off by residents and other commercial sources, MRC cannot estimate how many of these were from retailers.

This analysis is useful as MRC considers new strategies for preventing illegal dumping and improving statewide program accessibility. MRC has increased residential accessibility by focusing recruitment efforts on SWFs and communities that offer no-cost curbside collection services. The Program Collection, Transportation and Processing section contains further details about MRC's collection network.

Consumer Incentive Payment

Pursuant to Cal. Pub. Res. Code §42987.1 (k) California residents may receive a Consumer Incentive Payment (CIP) when they drop off discarded mattresses at MRC recyclers. The CIP is $3 per unit for up to five units per vehicle per day delivered during the recycler's regular business hours. The CIP is available only to state residents, and not to businesses or government collectors.

The incentive encourages California consumers to manage discarded mattresses responsibly by taking them directly to a contracted recycler for processing.

In 2025, seven of MRC's nine California recycling locations offered the CIP, as well as two permanent collection sites (Habitat for Humanity ReStore and Xtraction Gilroy). One California recycling facility did not offer the CIP because it was winding down its MRC related operations as a result of the 2024 recycling services RFP. The out-of-state processing facility in Oregon does not offer CIP.

In 2025, residents received CIPs for 56,368 units. Residents dropped off an additional 32,925 units that did not qualify for CIPs because they exceeded the five units per day limit, they dropped off their units after normal operating hours, or customers denied payment. The total of 89,293 units that consumers dropped off at the CIP locations represents approximately 5.4% of all units collected through the program.

After carefully considering the potential advantages and disadvantages of offering CIP at more locations or increasing the amount offered, MRC has decided not to do so for the following reasons. First, permanent collection sites face many challenges in offering the CIP in an efficient, fiscally responsible and secure manner. For example, most collection sites lack staff needed to accept the delivered units in compliance with the CIP rules (such as, no more than five units per day per vehicle) and manage the process. Given the nature of their business, few sites have either the cash on hand in small denomination bills needed to disburse CIP when units are dropped off or the security to protect the cash being disbursed. Even if they have the necessary staff and cash on hand, they also lack the internal controls and accounting system needed to track

these transactions and document that the CIP was properly disbursed for eligible units received. Finally, the CIP tends to attract many residents. Permanent collection sites generally lack the space to accommodate lines of residents dropping off mattresses and waiting for their CIP. Second, when MRC developed the CIP program, it sought input from the Mattress Advisory Committee regarding the level of incentive that consumers should receive when dropping off discarded mattresses and foundations at an MRC recycler. After considering different incentive levels, the committee advised MRC that setting the incentive above $3 per unit could harm renovation. MRC accepted the committee's advice and capped the incentive at $3 per unit, for up to five units per vehicle per day. For these reasons, MRC has decided not to increase the CIP at this time from $3 per unit or to offer it at additional locations.

Program Collection and Disposition Data

Pursuant to Cal. Pub. Res. Code §42990.1 (c) and (d) MRC must report on the quantity of discarded mattresses used for recycling and the quantity collected for recycling from different categories of sources.

Program Collection

Based on data that MRC recyclers report through the program, MRC collected 1,639,511 program units for recycling in 2025, reflecting an increase of 5.1% from 2024 to 2025.

TABLE 17: Total Program Units Collected by MRC for 2021 Through 2025

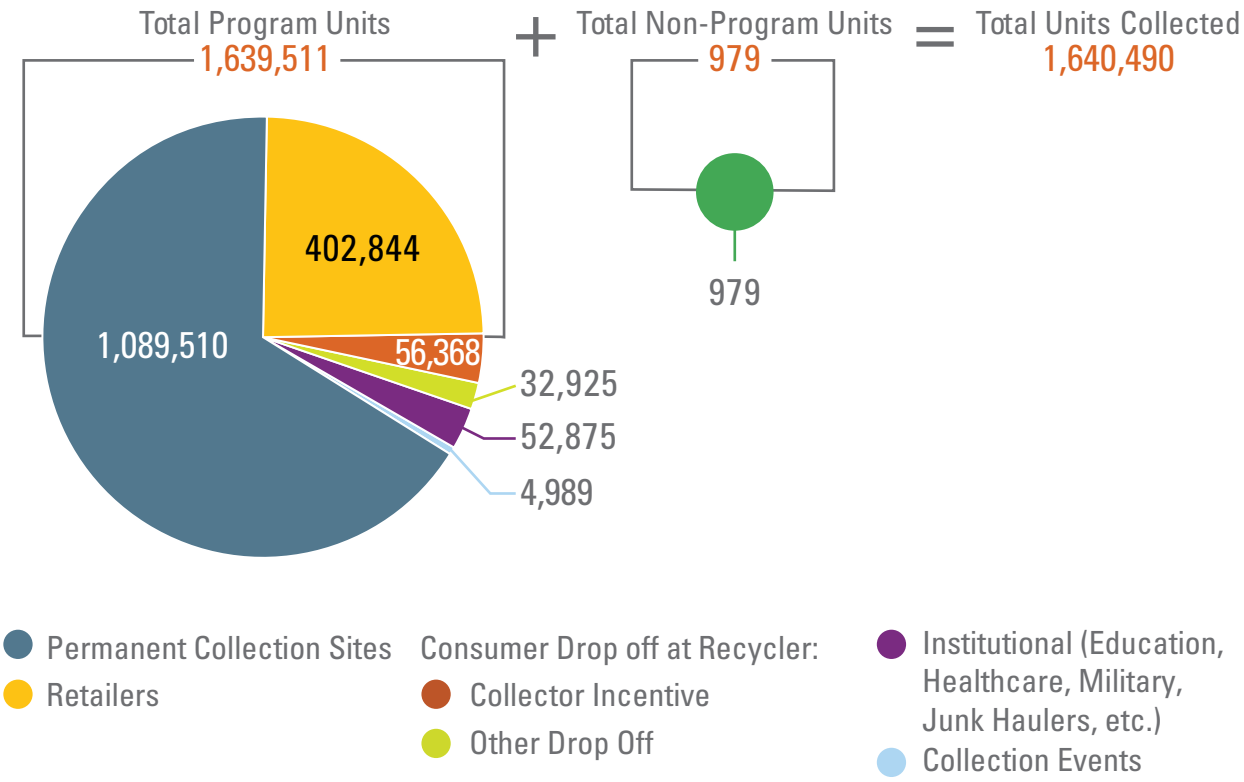

2021	2022	2023	2024	2025
1,602,332	1,419,814	1,468,360	1,560,655	1,639,511

In 2025, MRC recyclers reported that they accepted for recycling a total of 1,640,490 units (that is, both program and non-program units) collected from the sources shown in Table 18 and Figure 1.

TABLE 18: 2025 Units Collected by Source

Source		Units
Permanent Collection Sites		1,089,510
Retailers		402,844
Consumer Drop Off at Recycler	Collector Incentive	56,368
	Other Drop-Off	32,925
Institutional (Education, Healthcare, Military, Junk Haulers, etc.)		52,875
Collection Events		4,989
Total Program		**1,639,511**
Total Non-Program		**979**
Total Units Collected		**1,640,490**

FIGURE 1: Units Collected by Source

MRC recyclers process both program units and non-program units. Non-program units include those that a recycler obtains from franchise haulers and SWFs that do not participate in the program, as well as mattresses manufactured by the Prison Industry Authority (which are exempt from the recycling charge and therefore are not recycled at MRC's cost) and units collected from sources outside the state of California. MRC compensates its recyclers for processing program units only.

Although MRC recyclers separately report program and non-program units received at their facilities, the recyclers commingle the materials recovered through the recycling process from program and non-program sources and report those materials together when sold. The data provided in the Program Disposition Data section reports the totals from both program and non-program materials combined, as reported to MRC by its recyclers.

Program Disposition Data

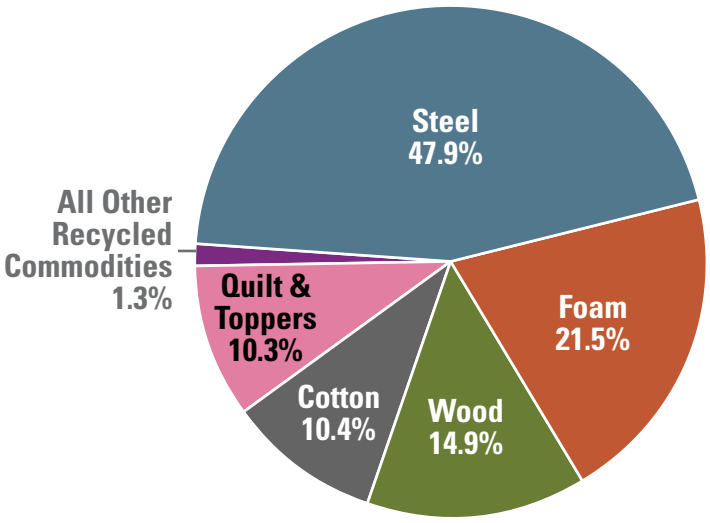

Pursuant to Cal. Pub. Res. Code §42990.1 (e) and (g) MRC must report on the quantity of each category of materials recycled and the quantity of otherwise disposed materials.

As discussed in the Materials Management/Waste Hierarchy section, MRC recyclers are expected to reuse, recycle or send to biomass as much material as is economically practical and feasible. MRC recyclers have reported that they recovered the following materials from discarded mattresses in 2025:

TABLE 19: Total Materials Recycled from Program & Non-Program Units

Materials Recycled	Pounds
Steel	31,209,491
Foam	13,977,098
Wood	9,674,669
Quilt & Toppers	6,764,302
Cotton	231,619
Cardboard	153,565
Other Fiber	115,708
Plastics	23,076
Felt/Shoddy	0
Other Materials	0
Commodities Total	**62,149,528**
Whole Mattresses Reused/Renovated Total	**31,076**
Total Recycled	**62,180,604**

FIGURE 2: Total Commodities Recycled from Program & Non-Program Units

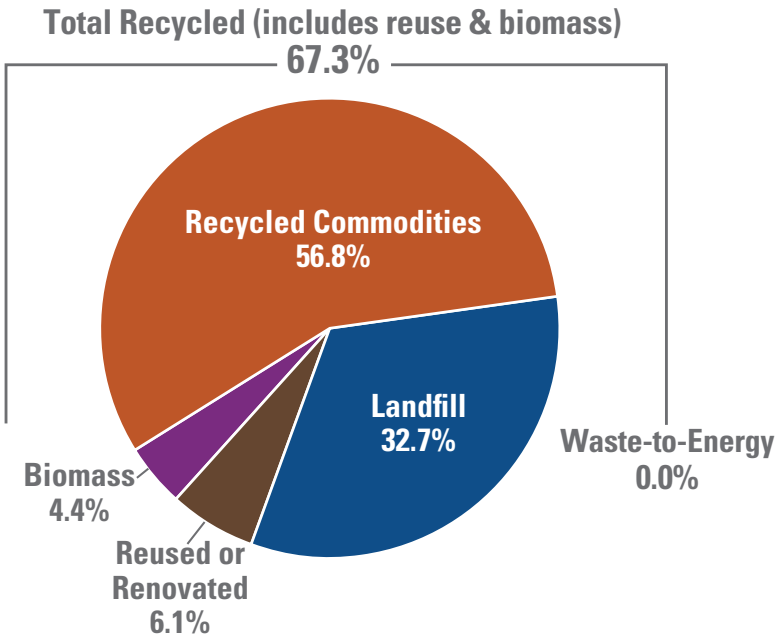

MRC recyclers have reported to MRC that they reused, recycled or sent to biomass 67.3% of all mattress materials processed in 2025. Table 20 and Figure 3 show the 2025 disposition totals and percentages. The data shown for reused or renovated materials includes the whole units reused/renovated shown in Table 19 and other materials that recyclers sold to renovators. The data shown for biomass in Table 20 includes wood pounds from Table 19.

TABLE 20: Disposition of Materials

Disposition	Pounds	Percent
Total Reused, Recycled or Sent to Biomass	**62,180,604**	**67.3%**
Recycled Commodities	52,471,227	56.8%
Reused or Renovated	5,627,547	6.1%
Biomass	4,081,830	4.4%
Landfill	**30,188,956**	**32.7%**
Waste-to-Energy (Transformation)	**0**	**0.0%**
Total Outbound	**92,369,560**	**100.0%**

FIGURE 3: Disposition of Materials

CalRecycle requires that MRC report on its progress towards goals established pursuant to Cal. Pub. Res. Code § 42987.5(a)(1)(A)-(B). In addition to reporting its performance under the CalRecycle metrics, MRC also measures the percentage of materials its recyclers reused, recycled or sent to biomass. To avoid confusion with a distinct goal that CalRecycle defines as "recycling rate", MRC refers to this percentage as the "MRC recovery rate."

TABLE 21: MRC's Recovery Rate, 2021 Through 2025

2021	2022	2023	2024	2025
76.9%	78.4%	76.9%	73.7%	67.3%

MRC is committed to supporting recyclers' efforts to increase their efficiency, but future MRC recovery rates may be influenced by factors outside MRC's control. Markets for some recycled mattress materials are limited, seasonal or depend on a variety of economic variables.

Currently, almost all foam and quilt panels are sold to manufacturers of carpet underlayment. Likewise, some mattresses contain small amounts of different types of fiber, but these materials can be difficult to sell because buyers require minimum quantities, and it can take recyclers substantial time to separate and accumulate the requisite amount. Some recyclers are unable or unwilling to store materials for extended periods of time because they lack space or have more valuable uses for it.

In 2025, steel recycling volumes declined as recyclers assumed primary responsibility for processing pocketed coils. As facilities adjusted their equipment and operations to support this shift, recovery efficiency temporarily declined at some locations. In addition, one recycler landfilled a large quantity of baled steel from inventory because the bales did not meet metal recycler processing specifications, leaving disposal as the only safe and economically feasible option. As a result, steel recovery rates were lower for the year, while recovery of other commodities remained stable. Additionally, wood recycling volumes decreased compared to the prior year. MRC has received reports from recyclers that they are gradually receiving fewer foundations, which is the only source of wood. MRC will conduct a study in 2026 to determine if the proportion of mattresses to box spring foundations supports this observation.

MRC has also taken steps to improve the quality and quantity of material that can be recycled, which can increase the market value for the reclaimed materials and reduce material sent to landfills. For example, MRC continues to fund permanent collection site improvements that protect discarded mattresses from being spoiled for recycling by exposure to weather. The Research section contains more detail on these efforts.

Statewide Collection and Disposition Data

Statewide Program and Disposition Data

MRC is required to report progress towards goals established by CalRecycle pursuant to Cal. Pub. Res. Code § 42987.5(a)(1)(A)-(B) using defined metrics that measure recycling and renovation across California, regardless of affiliation with MRC's program.

14 CCR § 18965 through § 18967 require that mattress recyclers, SWFs and renovators report to CalRecycle the number of used mattresses they collect, recycle, renovate and landfill in California each year. CalRecycle has provided MRC aggregate data that these entities reported.

CalRecycle notes that it took the following actions regarding its 2025 data collection effort:

- Distributed nine emails through the Mattress Recovery and Recycling Program Database to remind entities to submit 2025 annual reports.
- Mailed letters and annual reports in both English and Spanish from January through March 2025 to 47 renovators and confirmed receipt. Mailed follow-up letters and annual reports in both English and Spanish in April 2025 to 43 renovators who had not yet reported and confirmed receipt.
- Contacted all entities that had not yet reported as of April 21, 2025, via phone call and email to remind them to report prior to May 1, 2025.
- Provided continued communication to reporting entities through phone calls and email communications and responded to phone calls and email communications from reporting entities.
- Provided verbal communication, reminder emails, and reporting spreadsheet in Spanish, when necessary.
- Identified and onboarded 1 recycler, 5 renovators, and 3 SWFs that had not reported in prior years.
- Archived 4 renovators that are no longer in operation or no longer renovate mattresses. Archived 6 SWFs that are no longer in operation or no longer collect mattresses.
- Analyzed all data for completeness and reasonableness, including comparing data to annual reports from prior years. Called and emailed entities to clarify and correct suspected errors in reported data.
- Sent notices of violation to 21 entities that failed to submit annual reports by May 1, 2025.

In-State and Out-Of-State Sources

The number of units collected/received includes those received from in-state and out-of-state sources (shown in Table 22). CalRecycle notes that a significant amount of double counting exists in these numbers. For example, SWFs reported receiving 1,176,257 units in 2025; however, many of these were subsequently delivered to mattress recyclers and are counted again in the recyclers' reported data.

TABLE 22: 2025 In-State and Out-of-State Units Collected by California Recyclers, Solid Waste Facilities and Renovators (as reported to CalRecycle)

Entity Type	Units Collected/ Received
Mattress Recyclers	1,656,988
Mattress Renovators	203,810
Solid Waste Facility	1,176,257

CalRecycle provided MRC with statewide totals of units recycled, landfilled or renovated/reused in 2025 as shown in Table 23.

TABLE 23: 2025 Units Recycled, Landfilled, Renovated/Reused in California (as reported to CalRecycle)

Mattress Management	Units
A. Recycled (Processed)	1,670,183
B. Renovated/Reused	152,465
C. Landfilled at SWFs	312,159
D. Total	**2,134,807**
Recycling Rate ((A+B)/D)	**85.4%**

The number of units recycled represents whole units that were dismantled for the purpose of recycling. SWFs reported the number of units landfilled and renovators reported the number of units renovated.

Statewide Recycling Rate

This metric includes units collected through MRC's program and outside of it, as well as units received from in-state and out-of-state sources. Using the data in Table 23, we calculated the statewide recycling rate by dividing the number of units recycled and renovated by the total number of units managed (that is, the sum of units recycled, renovated and disposed of in landfills based on data reported to CalRecycle by recyclers, renovators and SWFs). The Statewide Recycling Rate is 85.4%, which meets the 2025 goal of 83% set by CalRecycle.

The data reported to CalRecycle represents the most comprehensive information on mattress disposition available in the United States. However, challenging data gaps are likely. MRC has spent a considerable amount of time with the Advisory Committee discussing unknown variables to the ultimate disposition including:

1. A considerable number of discarded, but usable units are exported to Mexico. There is no documentation available to quantify this number
2. The number of units crushed in compactor trucks by curbside collectors of solid waste
3. The number of units buried in mixed loads that arrive at solid waste facilities
4. Units reported as being discarded by some transfer stations may be double counted if landfills subsequently report those same units upon receipt.

MRC will continue its efforts to increase the percentage of units that are recycled or reused statewide, but recognizes that opportunities to expand collection are limited for the following reasons:

- Some discarded units are not recyclable because they are too wet, moldy or are mixed with putrescible solid waste and are unsafe to recycle. To reduce weather-related and other damage to discarded units, MRC funds improvements to mattress collection facilities to improve the quality of discarded units, increase loading efficiency and protect worker safety. While these efforts are expected to reduce the number of units landfilled and improve the program's collection and recycling performance, they are unlikely to increase the volumes collected substantially.
- Some units that are potentially recyclable are landfilled by SWFs that have chosen not to participate in the program. MRC has worked diligently since the program's inception to recruit these SWFs and will continue to do so. Nevertheless, recruiting non-participating SWFs into the program is increasingly difficult, limiting MRC's ability to capture additional discarded units.
- In enacting SB 254, the Legislature expressed its intent that mattress recycling does not undermine existing resale, refurbishing and reuse of mattresses that are in compliance with state and federal law, further limiting MRC's ability to increase the number of units recycled.

The Residential Access and Program Collection, Transportation and Processing sections of this report provide an explanation of the various sources from which MRC collected units and the reasonable steps it has taken to expand the collection network, avoid undermining renovation and better serve state residents and businesses.

Statewide Efficiency Rate

This metric includes the amount of material recycled by recyclers and solid waste facilities and renovated by renovators from mattresses collected through MRC's program and outside of it, as well as units received from in-state and out-of-state sources. As the following table demonstrates, MRC calculated the statewide efficiency rate by dividing the pounds of material recycled and renovated by the total pounds of material recycled, renovated and disposed in landfills from data reported to CalRecycle by recyclers, renovators and SWFs. Recyclers report the total quantity in pounds of each mattress material recycled and residual materials disposed. SWFs report the number of units landfilled, as well as the number of whole units recycled on-site, if any. These units must be converted to pounds using the assumption that the average unit weighs 55 pounds. Renovators report the number of units they renovate and the pounds of residual material disposed. The units must be converted to pounds and multiplied by the annual renovation recovery rate calculation agreed upon by CalRecycle, which was 87.3% in 2025. The statewide efficiency rate is 58.8%, which falls short of the 2025 goal of 68% set by CalRecycle.

TABLE 24: 2025 Weight of Mattress Materials Recycled, Landfilled, Renovated/Reused in California (as reported from Recycle)

Mattress Management	Weight of Materials (Pounds)
A. Recycled (Processed)	62,780,561
B. Renovated/Reused	7,316,544
C. Landfilled	49,053,695
D. Total	**119,150,800**
Efficiency Rate ((A+B)/D)	**58.8%**

The Efficiency Rate Goal calculation is based on data that is partially incomplete and partially estimated. Five out of 47 renovators did not submit reports. Of those that reported, five of the renovators provided estimated rather than exact unit counts. Estimated unit counts made up 8% of all renovated units reported. Additionally, two SWFs did not submit reports.

Of the units reported as landfilled by SWFs, 9% were based on estimates rather than exact unit counts. The Efficiency Rate calculation also assumes that all pounds of residual material disposed of by renovators are landfilled, however, data from prior years indicate that some of these materials were directed to product manufacturing or reuse. This disposition information was not provided for in2025, limiting MRC's ability to include such diversions in the Efficiency Rate calculation.

MRC cannot control the landfilling of whole units or component parts by third parties but works to meet this goal by increasing collection and working with recyclers to improve the recovery rate for units they process.

MRC continues to invest in research activities targeting low-value and difficult to recycle mattress commodities that have limited or no demand.

Finally, MRC is educating its recyclers about the importance of material separation and creating clean feedstocks for secondary markets. If post-consumer materials are not properly separated, potential buyers may reject them because of contamination.

With proper information, training and access to new markets, recyclers can reduce their disposal rates, increase the amount and quality of mattress materials recycled and increase revenues by selling the recycled materials. Today, MyMRC isolates each recycler's data and uses it to support score-carding, enabling MRC to assess contractor performance, identify high-performing recyclers, and which may be underperforming. Each recycler can access this data in real time to monitor its results and make operational adjustments.

The multiple strategies MRC is pursuing to divert materials from disposal are discussed in further detail in the Program Disposition Data section, the Research chapter and the Good Faith Effort section.

Good Faith Effort

Pursuant to Cal. Pub. Res. Code § 42987.5, CalRecycle in consultation with MRC, must establish a state mattress recycling baseline amount and state mattress recycling goals. MRC must demonstrate its good faith effort to meet the state's mattress recycling goals. Cal. Pub. Res. Code § 42986(d) provides that "good faith effort" means "all reasonable and economically practical efforts by a mattress recycling organization to implement the components identified in its approved plan consistent with its annual budget.

CalRecycle established the following goals for the program:

TABLE 25: Statewide Goals

Category	Goal	Status
Statewide Recycling Rate	Maintain or exceed 83%	85.4%
Statewide Efficiency Rate	Maintain or exceed 68%	58.8%
Consumer Convenience (number of collection opportunities)	Maintain or exceed 250 collection opportunities	272
Consumer Access to the Program	One permanent mattress drop-off location in each county, or 2 collection events in counties with population <2,000 people	57 of 58 counties had at least one permanent collection site
Consumer Access to the Program (Convenience Goal)	Maintain or Exceed 95%	98.6%
Rural Retailer Access to the Program	Maintain or Exceed 95%	99.6%
Urban Retailer Access to the Program	Maintain or Exceed 95%	99.4%
No-Cost Freight Services	Provide no-cost freight services to any mattress retailer, health care facility, educational facility, military base, or lodging establishment that has at least 100 units at one time	No-cost freight services offered to all required entities

In 2025, MRC achieved six of the eight statewide mattress recycling goals.

Consumer Access to the Program

CalRecycle established that MRC must have at least one permanent mattress drop-off location in each county with 2,000 or more people pursuant to PRC section 42987.5(a)(1)(D)(i)(I). For a county with a population of less than 2,000 people, the requirement does not apply as long as the organization continues to provide at least two collection events.

In 2025, MRC had permanent collection sites in 57 of 58 counties. San Francisco County did not have a contracted permanent collection site during this period. In 2024, MRC had one permanent collection site in San Francisco County, which terminated operations. In 2025, MRC attempted to schedule collection events in the county, but none were successfully conducted. MRC also attempted to recruit three potential permanent collection sites, one of which initiated the contracting process and began accepting mattresses from the public at no cost in October 2025. Due to administrative delays, the site did not enter into a contract with MRC until 2026 and the site was not listed on the Bye Bye Mattress site locator until that time.

Despite the absence of an active permanent site in 2025, San Francisco County residents had access to the program through multiple alternatives, including retailer take back and no cost curbside collection provided by the county's solid waste franchise hauler. In addition, MRC's geographic analysis shows that 100% of San Francisco's population lives within 15 miles of MRC's permanent collection network, with at least four eligible drop-off locations within that distance.

As of the date of this report, MRC has a permanent collection site in all 58 counties.

Statewide Efficiency Rate

For 2025, CalRecycle's statewide efficiency rate goal is 68%. This metric reflects the amount of material recycled by recyclers, solid waste facilities and renovators from mattresses collected statewide, both in MRC's program as well as outside of it. The statewide efficiency rate measures the pounds of mattress materials recycled and renovated and is expressed as a percentage.

In 2025, MRC's statewide efficiency rate was 58.8%, below the 68% goal, due to a combination of operational, secondary market, and data-related factors.

A primary factor affecting performance was the transition of pocketed coil recycling responsibilities from MRC to contracted recyclers. Prior to 2025, MRC managed the processing of pocketed coil material on behalf of recyclers through a third-party processor. To align pocketed coil processing with the handling of other mattress materials and eliminate the risk of reliance on one processing facility, MRC transferred responsibility for pocketed coil processing to each recycler.

To implement this transition, MRC issued a competitive Request for Proposals (RFP) to identify recyclers capable of managing pocketed coil alongside other mattress materials. Multiple recyclers were awarded contracts based on demonstrated technical capability,

processing capacity, geographic location and ability to manage end markets. This structural change required some recyclers to install new equipment, secure necessary permits, and adjust staffing and operations. Three recyclers experienced delays and equipment failures with pocketed coil processing systems in 2025. As a result, limited processing capacity and space constraints led to landfilling materials that would otherwise have been recycled, reducing efficiency. These impacts were transitional in nature as recyclers worked to fully integrate pocketed coil processing into their operations.

Another non-recurring factor impacting the statewide efficiency rate was the disposal of more than 1.5 million pounds of legacy baled pocketed coil material stored by one recycler over a four-year period. Due to the density of the bales, the material could not be safely or effectively separated for processing. After evaluating multiple alternatives these bales were landfilled. Excluding this legacy material, the statewide efficiency rate was 60.3%.

Changes in consumer purchasing behavior has also affected performance. MRC has received feedback that fewer mattress foundations are entering the waste stream, likely reflecting an industry-wide shift toward mattresses placed on adjustable bases and platform furniture as opposed to historically common box springs. Wood recovered from discarded box spring foundations is a significant contributor to the program's recovery rate. MRC will conduct a research study in 2026 to determine what share of discarded units are foundations and mattresses to better understand this trend.

CalRecycle's Mattress Recovery and Recycling Program (MRRP) portal for mattress renovators, recyclers, and solid waste facilities to report annual mattress collection and management information has some data collection limitations. CalRecycle did not receive reports from five renovators and two SWFs. In addition, a significant portion of the data relies on inexact counts with estimates or conversion factors accounting for approximately 12% of renovated units and 11% of SWF disposal units. MRC also has limited visibility in operations at non-program solid waste facilities. It's likely that some double-counting may occur if transfer stations and their downstream landfills are reporting disposal of the same units. Additionally, the SWF reporting deadline limits MRC's ability to fully review the data and make timely corrections before submission of this annual report.

Despite these limitations, MRC conducted a series of targeted actions in 2025 to improve material recovery and reduce disposal. Using 2024 disposal data, MRC focused our field staff on participating facilities with high disposal volumes and recruitment of high-volume non-participating facilities. Analysis showed that 10 participating SWFs accounted for approximately 69% of all landfilled mattresses within the program. MRC staff conducted site visits to identify operational challenges and opportunities to increase diversion. The common challenges identified included:

- Safety concerns related to recovering mattresses from mixed loads or landfill working faces
- Limited container availability, particularly at sites with multiple drop-off areas (i.e. separate commercial and residential areas).

- Conservative screening practices or staff turnover leading to inconsistent acceptance criteria
- Insufficient container capacity due to space limitations
- Weather-related damage to stored units
- Infestation concerns (e.g., bed bugs)
- Suboptimal placement of collection areas within the site, hindering access to a container

Based on these findings, staff provided tailored recommendations and support to each site and suggested the following improvements to increase diversion:

- Offered additional containers or trailers to expand storage capacity and reduce outdoor staging time.
- Offered collection site improvement funding for equipment and infrastructure improvements (i.e., covered storage, material handling equipment, etc.).
- Conducted in person and virtual training sessions to address staff turnover and improve screening practices.
- Worked with SWFs to identify the sources of large volume mattress disposal and conducted outreach to evaluate opportunities to capture materials further upstream.
- Worked with collection sites to optimize trailer placement to improve accessibility.

Collectively, these operational changes, shifts in material composition, reporting limitations, and disposal trends contributed to a decreased statewide efficiency rate. In 2026, MRC is making a good faith effort to actively monitor recycler performance to reduce landfilling of materials, recruit high-volume non-participating collection sites and collectors, and increase diversion at current permanent collection sites to minimize the volume of disposed mattresses and mattress materials.

Statewide Renovation

CalRecycle established a baseline for units renovated statewide by third-party renovators of 225,000 units. Based on the 152,465 units that renovators reported to CalRecycle as units renovated in 2025, renovation reached nearly 70% of the baseline. MRC has the following observations regarding the reported renovation data:

- The data on renovated units reported to CalRecycle by renovators may be incomplete or inaccurate. In 2025, 48 renovators were registered with MRC in California. There is a strong likelihood that other companies are renovating mattresses in California that have not registered with the program. Furthermore, CalRecycle notified 47 renovators about their annual reporting requirement but only 42 renovators reported units renovated data. Of those, five reported using a conversion factor or estimated units renovated, rather than reporting actual units renovated based on their company records. For these reasons, there is a significant likelihood that, if non-registered and

registered renovators had reported their actual renovated units rather than estimates, the true renovated units data would either meet or exceed CalRecycle's 2025 baseline.

- Renovated mattresses tend to sell at a low price point and now compete with on-line boxed bedding which accounts for 30-40% of all sales. Additionally, stakeholder feedback indicates that closures of independent furniture stores have reduced available sales channels for renovated units.
- Competition from low-priced mattress imports remains strong. For these reasons, these combined pressures likely contributed to reduced sales of renovated units.
- MRC has limited influence on the total number of units companies renovate. Nevertheless, MRC continued to demonstrate a good faith effort to support renovation in 2025 using reasonable and economically practical measures. Renovators reported receiving 203,810 units from California sources for renovation. MRC supported this activity by:
    - Recruiting additional renovators to join the permanent collection network
    - Offering collection site improvement funding to renovators who have joined the permanent collection network
    - Providing recyclers and commercial entities with lists of renovators who are compliant with state and federal law to facilitate the sale of whole units or component materials

Renovation is discussed further in the Program Collection, Transportation and Processing section of this report.

Mitigation of Illegal Mattress Dumping

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR § 18964(b)(7) — A description of methods used by the mattress recycling organization to coordinate with existing used mattress collection and recycling programs with regard to the proper management or recycling of discarded or abandoned mattresses.

14 CCR § 18964(b)(8)(B) — Qualitative and/or quantitative information on subdivisions (g), (l), and (m) of section 42987.1 of the Public Resources Code.

Cal. Pub. Res. Code § 42987.1(l) — Ensuring, to the maximum extent possible, that urban and rural local governments and participating permitted solid waste facilities and authorized solid waste operations that accept mattresses are provided with a mechanism for the recovery of illegally disposed used mattresses that is funded at no additional cost to the local government, solid waste facility, or solid waste operation.

Cal. Pub. Res. Code § 42990.1(m) — For reports submitted on and after July 1, 2021, all of the following:

(3) A report on research activities, which the organization shall undertake, to improve used mattress collection, dismantling, recycling operations, source reduction and green product design, and the response to the problem of illegal dumping and a report on the progress made as a result of the research activities.

(4) A report on pilot programs, which the organization shall undertake, to test new processes, methods, or equipment on a local, regional, or otherwise limited basis, such as those designed to clean up illegally dumped mattresses, gather data and identify strategies to reduce the number of illegally dumped mattresses, in partnership with the cities and counties identified by the mattress recycling organization as having areas with the highest rate of illegal dumping in the state. Pilot program descriptions shall include a mechanism to measure success, such as establishing a baseline and goals when possible and report on the progress made in undertaking the pilot programs.

(5) If the mattress recycling organization determines during a particular year that any of the activities undertaken to implement paragraph (3) or (4) were unsuccessful, the organization shall identify the problems with the current activities, and report on the new activities undertaken and progress made, in the following year's annual report.

14 CCR § 18964(b)(7), § 18964(b)(8)(B) & Cal. Pub. Res. Code § 42987.1(l), 42990.1(m)

Mitigation of Illegal Mattress Dumping

Pursuant to the requirements in Cal. Pub. Res. Code § 42987.1(l) and 42987.5 (4), MRC uses the following strategy to address illegal mattress dumping:

1. Intercept discarded mattresses before they are illegally dumped by:
   a. Offering California residents no-cost retailer pick-up of discarded mattresses when the new mattress is delivered.
   b. Expanding no-cost drop-off opportunities for residents at designated permanent collection sites throughout California.
   c. Providing a financial incentive that encourages residents to deliver discarded units directly to recycling facilities.
2. Offer compensation to local governments, solid waste facilities, solid waste operations and other entities that provide baseline data through its Illegally Dumped Mattress Collection Initiative ("Initiative") to help MRC and policymakers better understand the extent of illegal mattress dumping.
3. Use collected data to evaluate illegal dumping trends, enabling MRC, policymakers and participants to assess the extent of illegal dumping within each geographic area and whether mitigation efforts are effective.
4. Fund pilot projects to mitigate illegal mattress dumping and share those findings with illegal dumping technical experts.
5. Collaborate with technical experts to develop solutions and best practices to address illegal dumping, participate in illegal dumping working groups and conferences and promote recycling and illegal dumping mitigation resources.

The methods MRC uses to intercept discarded mattresses before they are illegally dumped are discussed in other chapters of this report. We also encourage consumers to use the no-cost collection network and promote Consumer Incentive Payment locations (where consumers can receive compensation for delivering units directly to recyclers). To reduce the retailers' burden of providing no-cost take-back services, MRC encourages them to participate in our Commercial Volume Program (which provides simple, no-cost options for retailers to dispose of units they collect) described in Program Objectives and Activities. The Education and Outreach chapter describes how MRC informs industry and consumer audiences about its collection channels.

MRC's goal is to proactively discourage illegal dumping by encouraging consumers and businesses to divert used mattresses to recyclers. This strategy is reassessed with consideration of other strategies that might better combat and address unanticipated increases in illegal dumping.

Illegally Dumped Mattress Collection Initiative

MRC collects data to understand the nature and extent of California's illegally dumped mattress problem. The Initiative offers financial incentives to local governments, solid waste facilities, solid waste operations and other entities that report data to MRC regarding illegally dumped units they collect from public right-of-way (e.g., collection date, quantity of units collected, disposition of collected units and location). MRC pays participants a per-unit amount for every illegally dumped unit they pick up and report to the Initiative. The amount paid depends on whether the entity operates in an urban (up to $15 per unit) or rural county ($20 per unit), as determined by the rural county definition set forth in Cal. Pub. Res. Code § 40184 (which in general defines a rural county as one that disposes of less than 200,000 tons of waste annually). Appendix H identifies participants in rural counties. We plan to continue the Initiative in 2026 and will report progress in future annual reports.

In 2025, MRC worked with a software developer to customize a reporting platform to support the Initiative. Launched on January 1, 2026, the new reporting portal uses a streamlined four-step workflow with required photo documentation to improve accuracy, verify the quantity of illegally dumped units and support compliance with Generally Accepted Accounting Principles. We will provide updates in the 2026 annual report.

2025 Results

In 2025, 69 Initiative participants representing 33 counties reported 56,717 units. Of the represented counties, 11 were rural. Compared to 2024, there was an 11.7% decrease in the number of units and seven fewer participants than in the previous year.

13 participants that reported in 2024 did not report in 2025, but this was slightly offset by five new entities joining the Initiative and one former participant rejoining in 2025.

Participant feedback suggests the 2025 decline in illegally dumped units reflected changes in some participants' internal tracking and reporting processes, which created reporting gaps during the year. Some participants also cited local prevention and outreach efforts that may have reduced illegal dumping.

Appendix H identifies the participants in the Initiative and the reported quantity of units collected from 2023 to 2025. MRC will continue to observe data trends in future years to determine whether a more in-depth analysis of the Initiative is warranted.

TABLE 26: MRC's Illegally Dumped Mattress Collection Initiative 2023 Through 2025

Initiative	2023	2024	2025
Number of Participants	76	76	69
Total Units	**55,554**	**64,227**	**56,717**

Participant Outreach and Retention

In 2025, MRC promoted the Initiative among local governments, Native Nations, franchised haulers, Local Conservation Corps and other collectors through conferences and workshops, illegal dumping working groups and task force meetings. We also conducted direct outreach through emails, phone calls, and meetings, resulting in five new participants. Recruitment efforts will continue in 2026, with a focus on underrepresented counties.

In addition, MRC also promoted its new reporting software that launched January 1, 2026. We will provide updates in the next annual report.

Throughout 2025, MRC also regularly corresponded with registered participants to keep them engaged and to ensure they submit information in a timely manner. We regularly sent reminders encouraging participants to submit their data to the online database and contact us if needed. We also continued to provide participants with ongoing support, including providing login assistance, resetting passwords, updating an organization's contact information and navigating the database.

In addition, MRC queried participants who reported units in 2024 but did not report in 2025 and learned that staffing issues were the main reason. MRC will continue to support and provide resources to keep current participants engaged and help them maintain involvement during staff transitions.

Data Analysis

Demographic/Socio-economic Trends

MRC hired Customer Analytics, a demographic data analysis firm, to analyze 2025 illegal dumping data collected through the Initiative. Customer Analytics measured the relationships between illegal dumping and demographic and socio-economic factors in the communities served by the reporting entities. They also tested associations between rates of illegal dumping and various elements of its collection network.

Appendix D contains a complete description of the methodology used.

Customer Analytics' analysis of 2025 illegal dumping data showed that ZIP codes with the following attributes experienced higher rates of illegal dumping:

- Higher percentage of renter households;
- Higher percentage of multifamily housing complexes; and
- Higher percentage of people living below the federal poverty level.

MRC Collection Network and Illegal Mattress Dumping

Customer Analytics' analysis of the 2025 Initiative data suggests that ZIP codes within 15 miles of collection sites or collection events, have less reported illegal dumping.

Overall, this analysis supports MRC's strategy of expanding the permanent collection network, which is an effective method to reduce illegal dumping.

Initiative Data and Analysis Utilization

The Initiative data and accompanying analyses help guide MRC's efforts to expand its collection network, provide a tool for monitoring the outcomes of pilot projects and influence where to target advertising and other outreach.

In the 2024 report, MRC's analysis of the Initiative data identified areas in Los Angeles County with high rates of illegal dumping.

In 2025, Los Angeles County saw expanded disposal access, with four sites increasing access through added weekend hours and extended weekday operating hours, and one site increasing unit acceptance from two to four mattresses per resident.

MRC provides Initiative participants with a customized heat map they may use to inform their city management, local leaders and waste service providers as they respond to illegal dumping incidents. In 2026, we will continue to consult Initiative data as it determines where to expand and conduct outreach.

Projects to Mitigate Illegally Dumped Mattresses

MRC encourages communities experiencing illegal mattress dumping to propose pilot projects to address the problem. MRC invites Initiative participants and California municipalities, nonprofits and solid waste facilities that have collected illegally dumped mattress data for at least one year (either under the Initiative or using an internal reporting system) to submit proposals. The three broad areas considered for funding include:

1. Education programs to inform residents about existing mattress collection channels.
2. Improving residents' awareness of illegal dumping laws and their enforcement.
3. Establishing or improving access to mattress drop-off locations.

Since MRC began offering this funding in 2021, it has distributed over $600,000. The most recently awarded, active and completed projects are described in this chapter. Case studies describing the results of previous years' projects are available on MRC's website at MRC's "Illegal Dumping Mitigation Pilot Project Results" page.

In 2025, MRC released a case study of Ventura County's pilot project, which used surveillance, enforcement coordination and outreach to successfully eliminate illegal dumping in a hotspot area.

Projects Awarded in 2025

Big Sandy Rancheria

MRC partnered with its first Native Nation, Big Sandy Rancheria, to fund a community focused initiative aimed at reducing illegal mattress dumping and expanding access to convenient disposal options. The project established monthly curbside mattress collection, a mattress drop-off program, a consumer education campaign on proper disposal practices and enforcement in collaboration with the Fresno County Sheriff's Office, including the installation of cameras and signage. The initiative also included beautification of an existing illegal dumping site. Big Sandy Rancheria will complete this project in 2026 and we will provide the results in the next annual report.

Active and Completed Projects in 2025

Daly City

In 2024, Daly City partnered with its franchise hauler to pilot free, hyperlocal mattress collection events across 12 neighborhoods to expand disposal access and reduce illegal mattress dumping. The project achieved all of its objectives:

- Raised awareness through multilingual outreach;
- Directly engaged with approximately 500 residents; and
- Established no-cost curbside collection services that addressed transportation barriers.

Across the pilot year, the city collected 988 mattresses through neighborhood and supplemental drop-off events, and illegal dumping decreased from 756 mattresses in 2023 to 502 in 2024, representing a 33.6% decrease, which exceeded the City's 25% reduction goal. A case study detailing these results and lessons learned was released in May 2026.

San Benito County

In 2024, San Benito County launched a comprehensive project to reduce illegal mattress dumping by combining bilingual outreach, signage, community engagement and expanded access to no-cost recycling options. The project's initiatives delivered measurable and positive outcomes across awareness, participation, deterrence and overall dumping trends through:

- **Increasing public awareness:** Outreach to 361 multifamily units generated 121 survey responses, and 97.5% of respondents reported that they learned new information about proper mattress disposal and recycling services, demonstrating stronger understanding and engagement.
- **Increasing program participation:** Participation in the bulky item curbside program increased from 226 residents in 2023 to 377 by early 2025. Countywide mailers and the distribution of 10,000 cart hangers supported this growth.

- **Implementing effective deterrence:** The county installed 27 anti-dumping signs across 14 known hotspots. Combined with targeted surveillance, these measures reduced illegal dumping activity at nearly all monitored locations.

During the 12-month pilot, the county also achieved measurable progress in reducing illegal mattress dumping. Reported incidents declined by 35.4%, from 113 cases in 2023 to 73 in 2024, reflecting the impact of coordinated outreach, deterrence and improved access to no-cost recycling options. In 2025, reported illegal dumping incidents totaled 89, remaining well below the 2023 baseline and indicating sustained improvement beyond the initial pilot year.

City of Modesto

In 2023, MRC funded a pilot project in the City of Modesto designed to reduce illegal mattress dumping by expanding access to proper disposal options, increasing community awareness, and strengthening coordination with local enforcement partners. The project included developing and distributing multilingual door hangers, collaborating with schools to educate students on the impacts of illegal dumping using MRC's illegal dumping lesson plan, installing signage with information on reporting illegal dumping and deploying mobile cameras and a digital message board at illegal dumping hot spots. The city also piloted a one-year no-cost mattress collection site to measure whether these actions reduce illegal dumping.

Modesto submitted its final report to MRC in early 2026. We will report on project results in the next Annual Report.

Next Steps

Given the quality of reported data and positive outcomes from the completed pilot projects, MRC will continue to work with Initiative participants, the CalRecycle Illegal Dumping Technical Advisory Committee, the Mattress Advisory Committee and other illegal dumping task force groups to promote the Initiative.

We will also continue to analyze Initiative data and pilot project results to identify best practices to share with the wider community.

Statewide Tools and Educational Resources

MRC maintains several statewide resources that continue to support jurisdictions in addressing illegal dumping and promoting proper disposal. These resources include the Bulky Item Pickup Directory on ByeByeMattress.com, which helps residents identify no-cost curbside collection opportunities and supports local outreach campaigns. MRC developed the directory based on a statewide study of curbside services and updates it periodically to reflect current information.

MRC also continues to make available its school lesson plan, *Don't Dump It, Recycle It*, which provides Next Generation Science Standards-aligned activities to help students understand the waste stream, environmental impacts, and the importance of proper disposal. The lesson plan remains a resource for teachers, after-school programs, solid waste working groups, and local municipalities seeking to incorporate recycling education into their programs.

In addition, MRC promotes its white paper, *Best Practices in Addressing Illegal Dumping of Durable Waste*, developed by an interdisciplinary team led by Dr. Calvin Lakhan. The paper outlines strategies and best practices that have been effective in mitigating illegal dumping. MRC also promotes its workshop report, *In This Together: Collaborating for Best Practices*, developed with Gigantic Idea Studio, a third-party consulting firm, which captures stakeholder insights on illegal dumping enforcement and illegal dumping mitigation strategies .

These resources will continue to be shared with illegal dumping task forces, environmental justice organizations and conference and event attendees to support policy discussions and community planning to mitigate illegal dumping.

Research

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR § 18964 (b)(8)(B) — Qualitative and/or quantitative information on subdivisions (g), (l), and (m) of section 42987.1 of the Public Resources Code.

> **Cal. Pub. Res. Code § 42987.1(g)** — Conducting research, as needed, related to improving used mattress collection, dismantling, and recycling operations, including pilot programs to test new processes, methods, or equipment on a local, regional, or otherwise limited basis.

Cal. Pub. Res. Code § 42990.1(m) — For reports submitted on and after July 1, 2021, all the following:

> **Cal. Pub. Res. Code § 42990.1(m)(3)** — A report on research activities, which the organization shall undertake, to improve used mattress collection, dismantling, recycling operations, source reduction and green product design, and the response to the problem of illegal dumping and a report on the progress made as a result of the research activities.
>
> **Cal. Pub. Res. Code § 42990.1(m)(5)** — If the mattress recycling organization determines during a particular year that any of the activities undertaken to implement paragraph (3) or (4) were unsuccessful, the organization shall identify the problems with the current activities, and report on the new activities undertaken and progress made, in the following year's annual report.

Cal. Pub. Res. Code § 42990.1(m)(6) — A hard copy of, or an electronic reference to, each research study and report completed by the organization during the period covered by the annual report and a brief explanation of how the organization anticipates the research may benefit the program. The organization shall make these studies and reports publicly available free of charge. If the study or report contains trade secret or confidential information protected by law, the organization shall only be required to provide a description of the research and its relevance to the program that omits any of the trade secret or confidential information.

AB 187

- Requires that MRC report on research activities pertaining to:
  - Mattress collection, dismantling & recycling operations
  - Source reduction & green product design
  - Response to problem of illegal dumping
  - Progress made as result of research activities
- States that if any of the activities undertaken to implement this measure were unsuccessful, MRC shall identify the problems with the current activities, and report on the new activities.
- Requires that MRC include a hard copy of all research studies & reports and an explanation of how research benefits program.

14 CCR § 18964 (b)(8)(B), Cal. Pub. Res. Code § 42987.1(g) and Cal. Pub. Res. Code § 42990.1(m)

RESEARCH

Pursuant to Cal. Pub. Res. Code § 42990.1(m), as amended by AB 187, the annual report shall include a report on research activities undertaken to improve used mattress collection, dismantling, and recycling operations, as well as research related to source reduction, green product design, and responses to the problem of illegal dumping, and the progress made as a result of those activities.

In 2025, MRC conducted and supported a range of research activities to improve operational efficiency, advance market development for recovered materials, and inform long term program performance.

MRC seeks to improve the sustainability of mattress recycling by:[1]

- Advancing the efficient collection and transportation of discarded mattresses
- Identifying and promoting best practices for mattress dismantling and recycling
- Identifying new and better uses for the recycled components
- Fostering innovation, cooperation and communication between suppliers, manufacturers, collectors, dismantlers and end-market commodity buyers to increase mattress recycling rates

To assist in developing and managing its research efforts, MRC works with an experienced team of research and innovation subcontractors to identify projects that have the potential to achieve both short-term, high-impact results, as well as longer-term projects with multi-year horizons. This section summarizes completed, in-progress (active) and future projects or areas of interest. When projects span multiple calendar years, they will be discussed in several reporting cycles. From a portfolio management perspective, MRC works to establish and manage a diverse family of projects which explores both incremental and disruptive technology development. MRC is encouraged by its efforts to date, but is realistic, recognizing that by their nature, research outcomes are unpredictable, with some projects producing useful results and others failing to achieve the intended goals. Moreover, many factors influence market acceptance of new technologies. Therefore, research is necessary to improve long-term industry performance but should not be focused exclusively on short-term results.

[1] In addition to MRC's research efforts to improve the sustainability of mattress recycling, Cal. Pub. Res. Code § 42990.1(m)(3) also requires that MRC report on research activities undertaken concerning "source reduction and green product design, and the response to the problem of illegal dumping." These topics are discussed in the Sleep Products Sustainability Program and Illegal Dumping sections of this report.

With these cautions in mind, MRC evaluates research proposals and defines the intended objective of each research project awarded. This process considers whether the proposer is qualified to undertake the project and the value proposition. Awarded projects are funded contingent on established, structured and milestone-driven contracts with the selected organization. MRC research program metrics are structured to:

- Reward learning
- Encourage taking and managing risks
- Encourage collaboration
- Meet project milestones
- Produce results

Research projects may be accelerated or extended (or stopped entirely) if it appears the work is likely to produce valuable (or inconclusive) results.

Completed Projects

Mattress Collection Facilities Improvement Funding

For the seventh year, MRC funded improvements at mattress collection sites to increase the number of mattresses diverted from landfills, improve the recyclability of discarded units, improve worker safety, decrease mattress handling time, reduce fire risk and decrease transportation costs by increasing the number of units shipped per container. Beginning in late 2018, public and private collection sites in California have been eligible for up to $10,000 per site per year. Award recipients must agree to serve as MRC-contracted public drop-off sites for at least one year following reimbursement of funds for project costs.

In 2025, two projects were completed and reimbursed, totaling $20,000. The scope of work included improvements to mattress collection areas to increase the recyclability of units, optimize operational efficiency and protect collected units from weather damage and contamination. In total, the two projects anticipate collecting an additional 2,400 units annually for recycling as a result of the funding (see table 27). One of these collection sites was new to the MRC program.

MRC awarded three other projects in 2025 that will be completed and funded in 2026. A report on those projects will appear in the next annual report. MRC has offered collection site funding since 2018 but has observed a declining trend in new applicants each year, likely due to the maturity of California's program. Many collection sites have already applied for and received funding to successfully incorporate mattress collection into their daily operations, thereby reducing their need for additional funding. MRC will continue to offer funding in future years.

TABLE 27: Collection Projects Completed and Funded in 2025

	Company	Location	Project	Amount Paid
1	Tahoe Truckee Sierra Disposal	Truckee, CA	Building an additional lean-to structure to shelter mattresses from weather that may compromise the quality of the mattress material – thereby increasing the recyclability of the collected mattresses and expanding the collection site's storage capacity.	$10,000
2	Junk King South San Francisco	Burlingame, CA	Repaving driveway to improve worker safety, load efficiency, and access to the mattress collection container.	$10,000
TOTAL				**$20,000**

Waste Characterization Study

MRC commissioned another waste characterization study of the residual material generated by California mattress recyclers to quantify what mattress components are most often landfilled. The September 2025 report, completed by MSW Consultants, found that the top three most prevalent waste categories as a percentage of total waste are polyurethane foam (19.5%), shoddy felt pad (15.6%), and mixed non-woven fibers (14.7%). The contract value was $38,164 and is available for viewing on the research page of our website.

Mold and Bacteria in Foam

A small-scale in-house study was conducted to assess the presence of mold and bacteria in used mattress foam and quilt layers to determine whether residual levels posed potential health risks. Of the five mattresses tested, all formed active mold and bacteria colonies, with one showing a concerning level of mold. MRC's guidelines emphasize the importance of keeping mattresses clean and dry prior to recycling. This study recommended developing a simple, reliable method for mold detection. Analytical costs from EMSL were $6,750 and results are available for viewing on the research page of our website.

Surface Engineered Powders from Recycled Mattress Foam

MRC continues to support projects to identify new markets for recycled mattress foam. Therefore, MRC sponsored a project at RoCo to develop a process to produce powdered polyurethane mattress foam, for potential use as fillers or additives in various applications. Through an iterative process, RoCo designed and fabricated a benchtop scale grinder and non-cryogenic process capable of converting flexible foam waste into a free-flowing powder. They also demonstrated the ability to modify the particles' surface by introducing carbon dioxide gas into the process. This allows tuning of the surface to tailor the particles for use in various applications.

The particles were evaluated as fillers in cement and rigid foams. In cement, they reduced density and affected heat conduction. In rigid foams, not only could they reduce foam density, but they also served as frequency modulators, which may be useful in some sound absorption applications. RoCo is currently exploring the potential to reincorporate the powders into new flexible foams, thereby improving the circularity of these products.

RoCo believes the powders could also be used as additives in coatings, engineering plastics, adhesives and sealants. They continue to evaluate the resulting powders in selected applications. Future work will focus on identifying technical and market feasibility for the powders and scaling-up the grinding process. The contract value was $71,870 and is available for viewing on the research page of our website.

Mattress Equipment Guide

MRC has assembled an updated list of vendors and machinery intended to assist mattress recycling operations. The list features vertical and horizontal balers, shredders and foundation/box spring separators. The list was assembled in-house and is a free resource on the research page of our website that is periodically updated with new vendors and equipment.

Mechanically Recycled Mattress Foam in Footwear

A sponsored project at George Mason University (with Prof. Shay Bagheri) to explore the use of mechanically recycled polyurethane foam in footwear was completed in 2025. This work demonstrated the feasibility of integrating recycled mattress foam into both midsole and outsole footwear components. For the insole products, blends of Thermoplastic Urethane (TPU) and recycled mattress foam were produced at multiple ratios up to 50% recycled content and evaluated under cyclic compression testing to quantify damping behavior, residual strain and energy absorption, all important parameters for footwear midsoles. The results showed that recycled content can be used to adjust cushioning characteristics, while maintaining stable performance under repeated loading. These findings demonstrate that recycled foam can serve as a design lever for tailoring midsole feel and responsiveness.

For the outsole product, vitrimers prepared from mattress foam and virgin TPU were provided by Vitricycle, who has completed a previous MRC funded study. These thermoplastic blends were successfully integrated into fiber-reinforced composites and processed into outsole “plugged ” that were molded into shoe soles to improve traction. Abrasion resistance, coefficient-of-friction measurements and microscopy of abraded surfaces tests all confirmed that the recycled-content containing composites largely maintained the durability and traction behavior seen in products produced with virgin TPU. The contract value was $116,184.

Active Research Projects

Lean Manufacturing Assessment of MRC California Recyclers

Since 2021, MRC has sponsored a lean manufacturing program to help recyclers identify, reduce and eliminate non-value-added activities in their operations. Participating facilities have consistently demonstrated measurable productivity gains.

In 2025, MRC refined the program to give recyclers greater ownership of their improvement initiatives. Under the updated approach, recyclers could develop and submit project goals to MRC for review. Once approved, MRC provides funding for qualified expenses and the recyclers execute the project plan using lean methods tailored to their operations. Unfortunately, only one recycler took advantage of this available funding and MRC is reverting to a model where we provide and fund a lean expert to improve data quality and process improvements. Additional details will be provided in future reports.

Recycling Facility Fire Assessments

Mattress recycling can involve fire safety risks. To encourage MRC’s recyclers to learn about and implement fire safety compliance and mitigation tactics, MRC again contracted with Doyle Sullivan LLC, a nationally certified fire safety consultant with over four decades of experience in fire prevention and suppression.

In 2025, Doyle Sullivan LLC provided fire assessments at each MRC contracted recycling facility in California to evaluate fire risk reduction opportunities and code compliance. These assessments are intended to help each facility understand the complexities of fire safety. MRC encourages all recyclers to conduct and provide our contractor with a monthly fire risk self-assessment that provides a basis for on-going discussion and awareness of fire prevention throughout the year.

MRC will provide this service again in 2026.

Northwestern/BASF Three-way Agreement

In a recently launched project, MRC will collaborate with BASF to co-sponsor a study at Northwestern University on recycling EOL mattress foams by exploiting the vitrimeric properties of thermoset polyurethanes. A variety of spectroscopic and thermomechanical techniques will be used to identify acceptable conditions for foam-to-film and foam-to-foam re-processing. Through this work, we will gain further understanding of the optimum catalysts and process conditions to produce new foams or other polyurethane products from recycled mattress foam.

Refiberd/ReJu Three-way Agreement

Understanding the composition of textile fabrics is critical for recyclers seeking to create upcycled, value-added products. Reju SAS, a global-scale textile recycler, has partnered with Refiberd, a California-based firm specializing in AI-assisted spectral imaging, to conduct a project in collaboration with MRC. The initiative focuses on determining the composition of woven and nonwoven textiles recovered from mattress recycling operations.

Launched in Q2 2026, the project aims to develop a fast and reliable method for identifying material streams suitable for textile-to-textile recycling. The project plan also includes a factory-scale evaluation of recovered mattress textiles at Reju's recycling facility, scheduled for Q4 2026.

River AI Design

In Q3 2025, a feasibility study by River AI Design demonstrated a method to surface-modify foam and textile materials to create cementitious composites with enhanced strength and acoustic dampening. Building on this, a project was launched to develop a scalable process for architectural concrete products.

Phase 1 focuses on optimizing formulations and validating performance through standard tests, including flexural strength, compressive strength and acoustics, followed by 3D printing trials. Phase 2 will scale production to pilot facilities, with testing against specifications for acoustic panels and sound barriers, along with durability and environmental assessments. If successful, the technology will be demonstrated in two high-visibility construction projects.

Future Areas of Interest

Bridging the Gap

In early 2024, MRC launched a new initiative to accelerate promising research projects to commercial scale. In most cases, a concept proven at lab scale requires additional research to produce an improved material at larger scale and integrate the concept into final products. Unfortunately, the risk profile of production scale investment without clear sight of revenue is a formidable challenge for most enterprises. As a result, promising innovations can stagnate for lack of investment at this stage, a phenomenon often referred to as the “innovator’s dilemma.”

Driving innovations to commercial scale requires collaboration at multiple levels in the supply chain. Obtaining buy-in from end users, developing prototypes and investing in pilot-scale production are examples of activities that are necessary to take technical and commercial readiness to a self-sustainable level. To focus on this challenge, MRC increased technical resources and funding to help create awareness of the potential market value, de-risk scale-up activities, build networks and encourage assembly of end-user sponsored product development teams. Co-investment from the marketplace may take many forms including government sponsored small business innovation awards, government grants, corporate sponsorship and private party agreements.

In 2025, MRC successfully supported the pilot-scale development of vitrimer technology. Efforts to scale carbonization technologies are ongoing but were temporarily tabled due to limited market interest in pilot-scale facility development. Composite technologies and surface modification projects, which demonstrated strong results at the lab scale, are next in the development pipeline. Additionally, recent studies exploring the insulation and acoustic properties of recovered foam and textiles show promising potential for applications in the building and construction industry.

Biochar

The biochar industry in California is not well developed, with most companies operating at pilot or small scale. MRC is still interested in exploring biochar as a potential end-use for post-consumer mattress wood if capacity or costs at biomass facilities are no longer economically viable options for recyclers. Unfortunately, we have yet to identify a suitable California-based company to conduct a pilot project. While composting wood is feasible, foundation wood must be shredded to a small size to decompose at a rate similar to other organic material. The potential benefits from biochar include making energy and/or a char soil amendment that sequesters feedstock carbon in the finished biochar product.

Logistics Innovation

Transportation of low-weight, bulky mattresses accounts for approximately 19% of MRC's 2025 budget. In late 2024, MRC sponsored a feasibility study to evaluate whether mattresses could be safely compressed to increase shipment weight without negatively impacting downstream recycling operations.

As part of the study, a shipping container was modified to enable compression at the point of collection. Initial results were positive, demonstrating that net cargo weights could be increased by approximately 50% without adversely affecting deconstruction or recycling processes.

Throughout 2025, additional design refinements and shipping trials were conducted to further optimize system performance and safety. While the results remain highly promising, further development is needed to align the technology with MRC's logistics operations. MRC is encouraged by compression trailer technology currently used in EU mattress programs, however equipment costs and DOT permitting are challenging. In 2026, MRC will work with potential suppliers to explore options to scale the innovation.

NSF-Funded Foam Circularity Research

From 2021 to 2025, MRC served on the Stakeholder Committee for a four-year project funded by the National Science Foundation (NSF) under the Emerging Frontiers in Research and Innovation program, focused on the circularity of cross-linked polyurethane foams. The research was led by scientific teams from Arizona State University and Virginia Polytechnic Institute and State University.

As a member of the Stakeholder Committee, MRC contributed industry perspectives from across the U.S. polyurethane foam value chain to help inform the research team's priorities, decisions, and resource allocation. The committee met regularly to facilitate communication and collaboration between industry stakeholders and academic researchers.

Collectively, the program addressed several key challenges in advancing a more circular polyurethane economy. Technical areas of focus included novel depolymerization methods, improved separation and purification of reaction products and byproducts, and the development of new end uses for recovered materials. In parallel, the project team generated critical insights to support circular economy infrastructure, including end-of-life material flow modeling, identification of capability gaps, assessment of regulatory impacts, and logistics analysis.

This collaborative effort resulted in six peer-reviewed publications. Additional details and references are available on the NSF website.

Sustainability

Circularity for the Mattress Industry

As MRC manages its own efforts to improve mattress recycling and find new and better markets for reclaimed mattress materials, we regularly communicate with other mattress recycling organizations around the world and stay abreast of broader efforts being pursued to work toward enhancing circularity in the mattress industry.

Designing mattresses that are easier to recycle is a common thread in discussions among manufacturers interested in sharing best practices. However, end-of-life management priorities and strategies diverge significantly from region to region. Rather than invest in conventional recycling infrastructure, which is mostly downcycling, some countries are moving directly to technologies that recycle polymeric materials (such as foam and some fibers) through chemical recycling, pyrolysis and gasification. We anticipate further political and scientific debate regarding the best ways to manage difficult waste streams while contemplating the greenhouse gas impacts of various technologies.

In Europe, several pilot and commercial chemical recycling facilities now convert post-consumer polyurethane foam back into its chemical building blocks that can then be used to make new polyurethane foam and other materials. With increased experience and a better understanding of the technical risks and business case, public-private sector entities and an industry-led consortia are exploring means to globally expand the most promising technologies. Decisions regarding the size and placement of these future facilities will have significant environmental and economic impacts. MRC has been actively engaged with these organizations to provide volume estimates and feedstock quality data to help inform these decisions.

In the United States, MRC continues its focus first on developing better and new markets for mechanically recycled materials. Although mechanical recycling does not create full circularity, it is an important part of the overall strategy because it typically has a favorable environmental impact. Second, MRC thinks that building operational efficiencies to collect, transport and process discarded units is equally important. In these two areas, MRC is taking a leading role and sharing findings with other regions.

Finally, among stakeholders, consensus is building that circularity is an idea that will take considerable time and investment to attain. Moving forward, several industry trade organizations in Europe, the United States, Asia and Australia have committed to playing a lead role to encourage investment and to facilitate communication and collaboration in pursuit of this goal. Global collaborative networks have already formed to explore and address capability gaps systematically with the following initial priorities:

- Develop better designs
- Develop the means to increase recycled content in raw materials

- Build a sustainable logistics and recycling infrastructure
- Establish a science-based forum to advance meaningful innovation
- Establish a more informative material labeling system
- Develop an effective, easy-to-understand communication plan for consumers

Industry Work Group on Polyurethane Foam

Toward the end of 2025, MRC launched a technical work group to advise MRC on relevant topics related to polyurethane foam recycling. The group, which includes representatives from across the mattress value chain, will focus on pre-competitive, non-confidential collaboration to address the challenges and opportunities related to recycling mattress foam. The group's charge is to:

- Inform and enhance the quality of MRC research projects
- Generate new concepts and ideas for future MRC research programs
- Advise on possible ways to address disassembly and separation challenges
- Help develop networks to scale and commercialize promising innovations
- Identify and address emerging issues that impact product life cycles

The work group is intended to leverage the collective knowledge, experience and resources to improve the quality and depth of our portfolio of research projects.

Industry Work Group on Textiles

A technical work group focused on textiles was also established in late 2025. Similar to the foam group, textile experts and participants across the value chain were assembled to advise and support the recovery of post-consumer mattress textiles. The pre-competitive non-confidential collaboration involving industry stakeholders will ideally improve the quality and depth of research programs, leading to the scale-up and commercialization of new textile recycling technologies.

Industry Workgroup on Circular Design

MRC formed the industry work group on Circular Design in 2021 to help members of the value chain consider end-of-life management when designing new components and finished mattress products. The group brings together suppliers, designers, manufacturers, recyclers and secondary markets to share lessons from mattress deconstruction and post-consumer materials management.

The work group held its 2025 meeting in September during ISPA's Sustainability Conference. The meeting opened with a presentation from MRC covering the latest waste characterization study, current market conditions for post-consumer materials, and

updates on the organization's research and innovation projects. Attendees were then given several breakout topics to select from to discuss the current challenges including:

- **Design for Disassembly:**
  - Explore how design choices can result in easier mattress disassembly and recycling.
  - Identify practical adjustments to product design and assembly that minimize cross-material contamination, reduce manufacturing waste and maximize valuable materials at end-of-use.
- **Waste Reduction Across the Value Chain:**
  - From production to post-consumer recovery, where are the greatest opportunities to eliminate waste?
  - Share and develop strategies like increased product longevity, closed in-plant material loops and optimized packaging systems to improve waste reduction across the value chain.
- **Circular Fabrication Materials:**
  - How can innovative materials drive circularity in mattress manufacturing?
  - Explore current and emerging options—like recycled content and renewable feedstocks— and identify opportunities for integration into products or processes.
- **Reducing Lifecycle Carbon Emissions:**
  - What steps meaningfully reduce greenhouse gas emissions across the value chain?
  - Identify emissions hotspots and actionable strategies across design, production, logistics and recovery to reduce a product's lifecycle carbon footprint.
- **Downstream Communication: Engaging Retailers, Consumers and Recyclers:**
  - Explore strategies to enhance communication across the value chain.
  - Develop practical solutions to educate consumers, align with retailers and inform mattress recyclers.

The work group will meet again at ISPA's 2026 Sustainability Conference.

Global Mattress Recycling Coalition

The Global Mattress Recycling Coalition met again in May 2025 and included attendees across the mattress value chain, including international recyclers, mattress manufacturers, component suppliers, stewardship organizations, and industry associations from Australia, Belgium, the Netherlands, Poland, the United Kingdom, and the United States. The meeting included an anti-trust policy review and active discussion

about stewardship program performance metrics, end-market development projects, regulatory updates and recycling policies in each region. Members of this group continue to meet informally as developments or improvements are found to advance efficient collection, transportation, deconstruction and end markets for mattress materials. MRC will continue to coordinate these annual meetings in conjunction with industry events.

Sleep Products Sustainability Program

In 2019, MRC launched an industry certification called the Sleep Products Sustainability Program (SP2), focused on providing mattress manufacturers with an environmental management system for reducing material waste, water and energy consumption. SP2 helps individual mattress manufacturers analyze and understand the environmental impacts of their products by examining:

- The raw materials they manage and consume in manufacturing and distributing those products
- The energy and resources needed to manufacture and distribute mattresses, and how to manage and minimize waste products generated at each stage in the manufacturing and distribution processes
- The nature and designs of the products they manufacture
- How the products they manufacture today are managed at the end of their useful lives by recyclers

SP2 helps mattress manufacturers develop methods for improving their businesses, products and processes in light of these factors. For example, these methods identify steps manufacturers can take to reduce their environmental impacts, define metrics for measuring the impact of those changes and learn from best practices. The goal is to help mattress manufacturers create voluntary and practical environmental management systems that can produce continual improvements over time, reinforced by support from MRC.

Program Criteria

SP2 includes methods to train and verify the participant meets the SP2 requirements. A participant must meet the criteria in Table 28 to obtain SP2 certification:

TABLE 28: Sleep Products Sustainability Program Criteria and Requirements

Category	SP2 Criteria	Requirement
Plan	Environmental Policy	Must be written, adopted by management and communicated to staff
	Facility Impact Assessment	Must evaluate activities, their impact on waste and control methods
	Goals and Targets	Must have targets for waste reduction, reviewed by top management
	Measurement of Progress	Must track waste generation and disposition

Category	SP2 Criteria	Requirement
People	Employee Awareness and Engagement	Must train, gather improvement ideas and provide feedback
	Supplier Partnership	Must conduct one supplier project each year to reduce waste
	Best Practice Sharing	Must share best practices in industry at least once per year
Process	Regulatory Compliance	Must be in compliance with all environmental regulations
	Program Verification	Must conduct periodic walk-throughs for waste programs
	Corrective and Preventative Actions	Must track corrective actions and review periodically
	Program Resilience	Must plan how to respond to program disruptions

Program Resources

MRC has developed the following resources to meet the needs of SP2 participants:

- **Training:** A comprehensive, personalized training for all participants. Offered virtually.
- **SP2 Requirements Document:** A concise document detailing the minimum requirements for certification.
- **SP2 Guidance Document:** A comprehensive document that details each of the 11 requirements, providing a description, examples and gap analysis questions.
- **SP2 Resources Website:** A participants-only website that contains program material, archived webinars and downloadable tools to assist with certification.
- **SP2 Toolkit:** A monthly resource that provides participants with methods and examples to achieve one of the SP2 requirements.
- **Program Tools:** Downloadable tools to help participants assess, track and make progress towards certification. Tools include facility impact assessment and gap analysis templates, a utility tracking tool, a corrective and preventative action tracking tool and a program verification checklist.

In 2025, MRC developed or modified the following additional resources and online tools to assist participants in the SP2 process:

- **Certification Worksheet:** Based on the Gap Analysis Worksheet, this is a tool for auditors to use during certification audits to more easily track the facility's completion of requirements.
- **Recertification Worksheet:** This is a variation of the Certification Worksheet to be used for recertification audits.

- **Recertification Audit Protocol, Revised:** The protocol for doing a full recertification of participants at their three-year anniversary, verifying that participants are still meeting all 11 requirements and making continuous improvement on their sustainability efforts.
- **Maintenance Audit Screencast:** A screencast video to help participants who are conducting their annual maintenance audit fill out the report form correctly.
- **SP2 Gap Analysis Worksheet, Revised:** This tool was updated in 2025 to streamline the process and improve the translation to next steps.
- **Gap Analysis Worksheet Screencast:** A screencast video on how to use the Gap Analysis Worksheet tool by stepping them through the features of the worksheet.
- **Creating a Roadmap Screencast:** A screencast video on how to use the Roadmap tool so they can convert their Gap Analysis into an action-oriented roadmap to certification.
- **Monthly Toolkits, Revised:** These tool kits provide accessible guidance for each SP2 certification requirement to assist SP2 teams when they're ready to establish the next part of their SP2 system. They also serve as a monthly engagement opportunity with existing participants.
- **Sample SP2 Environmental Policy:** This document was created in response to new participant questions about the typical contents of an Environmental Policy by showing two examples of policies that meet SP2 Requirements.
- **Target Progress Charts:** This tool was created to help participants efficiently communicate progress against targets to their employees as part of Employee Awareness & Engagement.
- **SP2 Training Needs Matrix Example:** This document was created to show an example of a training needs matrix to help new participants identify which job roles need which training content.
- **Training Tracking Sheet, Revised:** This template was updated in 2025 to clarify a method to track SP2 training needs, assignment to employees and completion, with added examples and an integrated Training Needs Matrix.
- **Facility Impact Assessment Tool, Revised:** This tool was updated in 2025 to help participants sort their impacts to focus on the largest sources of waste in their facility, with mouseover pointers and additional instruction.
- **SP2 Participant Training eLearning Pilot:** MRC is developing an online SP2 training, or eLearning to replace live training. This will provide on-demand training for new participants and retraining for new SP2 team members at existing certified facilities. This has been frequently requested due to an ever-changing business climate and frequent turnover at manufacturing facilities. The eLearning program incorporates both visual and audio components to accommodate various learning styles. In 2025, the eLearning modules were completed and entered the testing phase.

Program Metrics

MRC uses the following metrics to determine the success of the program:

- **Participant Status:** Participant count at each stage (registration, training, developing, certification, recertification)
- **Waste Diversion:** Qualitative description of participants' waste diversion activities and quantitative data regarding waste diverted by participants (anonymized and aggregated after completing five certifications)
- **Education and Outreach:** Number of impressions or touchpoints with current participants (newsletters, trainings and webinars, etc.) and number of impressions with potential participants (marketing, advertising, webinars, etc.)

Participant Status

Table 29 provides the participant count at each stage of SP2. MRC continues to assist trained facilities with achieving their SP2 certification and recruit eligible manufacturers that sell mattresses to California residents and businesses.

TABLE 29: Participant Count

Participant Status	2021	2022	2023	2024	2025
Registered/Untrained	2	0	1	0	0
Trained/Developing Program	2	3	2	3	0
Certified	1	2	1	0	1
Recertified	0	1	1	2	2
Total	**5**	**6**	**5**	**5**	**3**

Registered/Untrained participants have registered to participate in the program but have not received training. Trained/Developing participants received training and are working on the SP2 requirements. Participants can be in this stage for six months to one year while evaluating current sustainability activities, identifying opportunities and implementing new practices. Certified participants have met all requirements and obtained SP2 certification. Recertified participants have recertified their SP2 program at least once.

Waste Diversion

To achieve SP2 certification, each participant must set qualitative goals and quantitative targets for waste reduction and diversion. Qualitative accomplishments were collected from certified participants through annual maintenance audits. Examples of projects implemented in 2025 by participants include:

- Reduced landfill dumpster pickup frequency from twice weekly to once a week.
- Decreased frequency of landscape irrigation from daily to three times per week, decreasing water use by 21% in the first year.

- Partnered with their fire-retardant stock supplier to reduce trimming waste.
- Supported a newly opened sister facility in developing an environmental management system during its startup phase.
- Procured a high-pressure horizontal baler to make high-density foam bales for recycling, providing more efficient transportation and increased bale value.
- Reused spent product bags to gather fire-retardant material and sticker backs for landfill disposal instead of purchasing liner bags.
- Implemented a program to order foundation lumber cut-to-size to move waste upstream to the supplier where they can better make use of offcuts instead of landfilling.
- Integrated their waste reduction efforts with their quality control efforts to reduce both defects and scrap material.

In 2026, MRC will provide qualitative descriptions about SP2 participants' waste diversion targets. Once MRC has certified five participants, anonymized and aggregated waste diversion quantitative data will be reported in future annual reports.

Education and Outreach

To recruit participants, MRC publicizes SP2 among mattress manufacturers and in industry trade publications – BedTimes, Sleep Savvy and Furniture Today – both print and digital editions and in monthly social media posts. MRC generated further awareness about SP2 through its participation during ISPA's Sustainability Conference. All SP2 announcements, advertisements and outreach materials encouraged readers to visit a dedicated webpage (www.MattressRecyclingCouncil.org/SP2).

In 2025, MRC published two newsletters for SP2 and a toolkit is distributed monthly to participants working towards certification, those in progress and those already certified. SP2 Insights, our recruiting newsletter to potential participants, was distributed once in 2025 in conjunction with South Bay International's certification.

Program participants (certified facilities and trained facilities currently working towards certification) continue to receive the monthly SP2 Toolkit. The monthly SP2 Toolkit was sent to 30 program participants with an average open rate of 30 percent. Each month, the toolkit offers a comprehensive overview of one of the 11 certification requirements. This includes defining the requirement, outlining steps to meet the requirement, providing relevant resources and showcasing examples of how to accomplish it. Immediately following the distribution of toolkit emails, it is common for participants to contact SP2 support with questions about building the next element of their SP2 system, indicating that this is acting as an effective reminder for facilities working toward certification.

TABLE 30: Marketing Tactics and Metrics

Tactic	Frequency	Outcome
Trade Publication Printed Ads	BedTimes (7 times)	3,540 per edition, 24,780 total distributed
Trade Publication Digital Ads	BedTimes in Brief newsletter (16 ads)	634 clicks with 59 SP2 landing page visits
News coverage	South Bay certification	Furniture World; Waste Advantage; Urethanes Technology
Social Media	12 social posts to MRC's Facebook, X and LinkedIn channels with 6,054 views	SP2 Video (generic), 24 views
		SP2 EXPO Series Video 1 Throwback, 128 views
		SP2 EXPO Series Video 2 Throwback, 93 views
		SP2 General Announcement, 434 views
		SP2 EXPO Series Video 3 Throwback, 399 views

Financing Mechanism

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR § 18964 (b)(9) — Financing Mechanism. Include the mattress recycling organization's total expenses and revenues associated with the implementation of the used mattress recycling program. Changes to the mattresses recycling charge shall be reflected in the annual program budget for approval by the department. If a mattress recycling organization conducts activities that are separate from the implementation and management of the California used mattress recycling program, then the annual report shall include documentation on how the collection and use of funds from the California mattress recycling charge were kept separate from other activities of the mattress recycling organization, including the methodology for distribution of shared costs. Consistent with subdivision (a) of section 42990.1 of the Public Resources Code, the annual report shall include the following:

(A) Mattress recycling charge per mattress size

(B) Capital costs

(C) Education/Outreach costs

(D) End-of-life used mattress management costs with line items, if applicable, for collection, transportation, recycling, renovating, reuse, and proper disposal

(E) Program administration costs including, but not limited to, the department's costs pursuant to subdivision (a) of section 42988.2 of the Public Resources Code, and third party legal costs. Surplus funds, if any, and detailed rationale for the specified level of surplus.

14 CCR § 18964(b)(9)

Financing Mechanism

In 2025, the Mattress Recycling Council Inc. (MRC Inc.) operated mattress recycling programs in four states: California, Connecticut, Rhode Island and Oregon. MRC Inc. has established separate limited liability companies (LLCs) for each state program. The LLC operating the California program is Mattress Recycling Council California, LLC (MRC).

Each state program's LLC maintains its own financial records to reflect the receipt of the appropriate recycling charge and the direct expenses that it incurs (e.g., collection, recycling, transportation, education and outreach, etc.). MRC Inc. allocates shared expenses (e.g., administration costs, overhead, etc.) among the four state program LLCs based on the relative population of each state. Each LLC also has a separate reserve for that state program.

Using the format specified in CalRecycle's regulations, we review MRC's total 2025 expenses and revenues associated with the California program with tables comparing 2025 actual expenses and revenues to 2024 actuals, as well as projections for 2026 and the budget for 2027, subject to CalRecycle's approval, as follows:[1]

Revenue from the Mattress Recycling Charge

Cal. Pub. Res. Code § 42989(b)(2) authorizes MRC to either (1) set a single recycling charge that applies to all sizes and types of mattresses and foundations, or (2) set two different charges "to accommodate mattress size differentials." No changes were made to the charge in 2025, and MRC maintained a single $16.00 charge for all mattress sizes for the entire calendar year. Factors that supported this decision included avoiding confusion among retailers and consumers, ease of consumer messaging and simplified charge collection and reporting obligations for retailers when they collect the charge from consumers and then remit those charges to MRC. Additionally, during 2025, the decision was made to increase the charge beginning April 1, 2026, from $16.00 per unit to $18.00 per unit. The increase took effect after the close of the 2025 reporting period. Therefore, the 2026 Annual Report will include additional information about this change as required by 14 CCR § 18964(b)(9)(F) and Cal. Pub. Res. Code § 42989. Refer to MRC's 2027 budget for further details.

[1] For these purposes, all 2024 and 2025 revenue and expenses are based on MRC's audited financials. Projections for 2026 are based on unaudited 1st quarter 2026 actuals and forecasted revenue and expenses for the remainder of the year. Proposed 2027 revenue and expense amounts cited in this annual report have been approved by the MRC Board of Directors and have been submitted separately to CalRecycle in MRC's 2027 Budget.

The recycling charge is collected on all sales of mattresses and foundations to California residents or end users (e.g., hotels, educational institutions, etc.), regardless of size. In 2025, registered retailers and other sellers reported California sales of 3,319,322 units, 1.6% higher than 2024, including over 36,000 units reported as sold in prior years (2017–2024). As a result, in 2025 MRC collected recycling charge revenue totaling $52,911,237.

The California program also collected $64,931 in late fees related to recycling charge remittances. Including these late fees, total 2025 revenue from recycling charges and associated penalties reached $52,976,168.

Table 31 shows 2024 and 2025 actual revenue from the recycling charge and late fee revenue, 2026 projected revenue and proposed 2027 revenue.

TABLE 31: Program Revenue

Category	2024 Actual	2025 Actual	2026 Projections	2027 Proposed Budget
Recycling Charge Revenue	$34,287,173	$52,911,237	$58,472,006	$61,247,484
Late Fee Revenue	$28,388	$64,931	$35,000	$35,000
Total Revenue	**$34,315,561**	**$52,976,168**	**$58,507,006**	**$61,282,484**

Capital Costs

Other than modest expenditures on computers, software and office equipment, MRC incurred no capital costs in 2025 related to the California program.

Education and Outreach Costs

Costs for education and outreach activities totaled $2,536,154 in 2025, an increase of 4.6% from 2024. These costs represent 4.9% of total expenses and include expanded activities to communicate the recycling charge increase. MRC continued to meet its communication objectives, providing robust industry- and consumer-targeted outreach as explained in the Education and Outreach section of this report. Table 32 shows 2024 and 2025 actual education and outreach costs, projected 2026 costs and proposed 2027 expenses.

TABLE 32: Education and Outreach Costs

Category	2024 Actual	2025 Actual	2026 Projections	2027 Proposed Budget
Advertising and Consumer Education	$1,287,595	$1,462,492	$1,521,558	$1,530,010
3rd Party PR Agency	$539,335	$667,049	$768,000	$796,050
Industry and Stakeholder Outreach	$175,257	$56,526	$75,726	$65,183
Conferences & Events	$52,663	$45,150	$60,500	$60,510
Annual Report Expenses	$35,500	$36,600	$38,377	$39,530
Subtotal	**$2,090,350**	**$2,267,817**	**$2,464,161**	**$2,491,283**
Travel	$48,521	$32,643	$40,800	$42,530
Staff Expenses	$286,247	$235,694	$260,509	$270,929
Total Education and Outreach Costs[2]	**$2,425,118**	**$2,536,154**	**$2,765,470**	**$2,804,742**

[2] The 2025 audited financial statements include Education and Outreach staff expenses in the Management, Staffing, and General Expenses category and travel expenses in the Staff and Officer Travel Expense category.

End-of-Life Used Mattress Management Costs

Operational Costs are expenses incurred for mattress collection (including the Illegally Dumped Mattress Collection Initiative), transportation and recycling. As summarized in Table 33 below, MRC's 2025 Operational Costs for end-of-life management were $42,565,164, an increase of 14.0% from 2024 levels. The total recycled units in 2025 were 1,636,888, an increase of 5.1% from 2024 units. This increase in units collected directly affected recycling and collection costs.

The following provides additional details for Operational Costs:

Collection Costs

- **Solid Waste Handling Fees:** MRC paid $3,846,153 (7.2% higher than 2024) to collection sites throughout the state to compensate them for consolidating discarded mattresses in containers for transport to an MRC recycling facility.
- **Collection Containers and Storage:** MRC incurred $1,803,621 in 2025 (0.9% more than 2024) for trailers, sea containers and roll-off container rentals that hold and transport collected units.

- **Consumer Incentive:** In 2025, MRC paid $173,931 (33.1% less than 2024) in consumer incentives to encourage residents to deliver discarded mattresses directly to MRC recycling facilities and two external consumer incentive locations. In setting the per unit incentive amount, MRC took into account Cal. Pub. Res. Code § 42985(b), which states the legislature's intent that the program does not undermine existing used mattress recycling, resale, refurbishing and reuse operations that are in compliance with state and federal law.
- **Collection Site Signage/Guidelines:** MRC incurred $8,582 in 2025 (30.2% less than 2024) to provide collection site signage and written guidelines to collection sites. Signs are produced when a new site joins the program or existing signage is damaged.
- **Illegally Dumped Mattress Collection Initiative:** MRC spent $1,014,303 in 2025 (14.4% less than 2024) to address illegally dumped mattresses in California. Most of these costs ($862,510) were payments to entities, including local governments, solid waste facilities, franchise haulers and nonprofits contracted to count and pick up mattresses that were illegally dumped in their communities. Funding for pilot studies of $82,827 is also included in the 2025 total. See Mitigation of Illegal Mattress Dumping for more information.

Transportation

MRC paid $9,253,796 in 2025 to transport collected units to its contracted recyclers, a decrease of 3.1% from 2024. Although the number of units transported increased compared to 2024, transportation costs declined due to the elimination of pocketed coil transportation. As a result, the average transportation cost per unit decreased from $6.68 in 2024 to $6.20 in 2025.

Recycling

MRC contracts with recyclers to dismantle and recycle units in California. In 2025, MRC paid seven contracted recyclers (operating 9 facilities) $26,464,778 (26.2% more than 2024). The increase was due to higher processing volumes and rate increases by contracted recyclers.

In 2025, all MRC contracted recyclers were required to manage their own pocketed coils, eliminating the need for additional transportation and processing.

Table 33 shows 2024 and 2025 actual end-of-life management costs, projected 2026 costs and proposed 2027 expenses.

TABLE 33: End-of-life Used Mattress Management Costs (Operational Costs)

Category	2024 Actual	2025 Actual	2026 Projections	2027 Proposed Budget
Collection and Container Costs				
Solid Waste Handling Fees	$3,588,874	$3,846,153	$3,665,396	$3,858,992
Collection Containers and Storage	$1,787,242	$1,803,621	$1,696,476	$1,710,240
Consumer Incentive	$260,069	$173,931	$70,473	$71,553
Collection Site Signage/ Guidelines	$12,292	$8,582	$15,238	$15,600
Total Collection and Container Costs	$5,648,477	$5,832,287	$5,447,583	$5,656,385
Illegally Dumped Mattress Collection Initiative				
Initiative Entity Compensation	$972,845	$862,510	$650,000	$650,000
Marketing/Advertising/ Events	$12,499	$41,832	$50,419	$42,600
Consulting Services	$7,108	$540	$0	$0
Pilot Studies	$176,678	$82,827	$64,000	$65,000
Staff Expenses	$16,169	$26,594	$29,394	$30,570
Total Illegally Dumped Mattress Collection Initiative[3]	$1,185,299	$1,014,303	$793,813	$788,170
Total Collection Costs	**$6,833,776**	**$6,846,590**	**$6,241,396**	**$6,444,555**
Transportation	**$9,550,143**	**$9,253,796**	**$9,843,304**	**$10,057,264**
Recycling	**$20,964,578**	**$26,464,778**	**$28,267,145**	**$29,901,890**
Total Operational Costs	**$37,348,497**	**$42,565,164**	**$44,351,845**	**$46,403,709**

Research

MRC seeks to enhance the impact of California's mattress recycling program by improving the efficiency and effectiveness of mattress collection, transportation and deconstruction while identifying and developing new and better end uses for recovered materials. In addition, MRC operates the Sleep Products Sustainability Program (SP2) which is discussed below.

[3] The 2025 audited financial statements include staff expenses for the Illegally Dumped Mattress Collection Initiative in the Management, Staffing, and General Expenses category.

Research Projects

In 2025, expenses of $601,157 (similar to 2024) were incurred for research activities and mattress collection facility improvement funding. See Research section for a more detailed explanation of completed, active and future research activities.

Sleep Products Sustainability Program (SP2)

In 2025, MRC incurred $81,606 to operate the SP2 program (29.4% less than in 2024). SP2 develops methods that manufacturers can use to analyze and reduce their environmental impact by working with California manufacturers to help them reduce both the generation of waste materials and the use of water and energy in their manufacturing facilities.

Program expenses included consulting fees for SP2 oversight and development of program resources to assist participants as they prepare for certification, as well as the costs associated with facilitating workgroups focused on product circularity and new materials in mattresses.

See the Waste Hierarchy and Research sections of this report for more information.

Table 34 shows 2024 and 2025 actual research costs, projected 2026 costs and proposed 2027 expenses.

TABLE 34: Research Costs

Category	2024 Actual	2025 Actual	2026 Projections	2027 Proposed Budget
Research Activities	$294,533	$408,064	$475,000	$500,000
Mattress Collection Facility Improvement Funding[4]	$96,081	$36,852	$40,000	$40,000
Consulting	$210,467	$156,241	$156,500	$160,500
Sleep Products Sustainability Program	$115,625	$81,606	$87,827	$85,293
Subtotal Research	**$716,706**	**$682,763**	**$759,327**	**$785,793**
Staff Expenses	$166,709	$89,362	$98,770	$102,720
Total Research[5]	**$883,415**	**$772,125**	**$858,097**	**$888,513**

[4] The 2025 audited financial statements show Mattress Collection Facility Improvement Funding, labeled as Grants, separately from Research.

[5] In MRC's 2025 audited financial statements, the Management, Staffing, and General Expenses category includes staff expenses for Research.

Program Administration, Legal and CalRecycle Costs

In 2025, MRC incurred $6,386,432 (3.5% lower than 2024) in program administration costs, including legal and CalRecycle oversight. In 2025, MRC's total staff expense of $3,975,051 covered salaries for a total of 26 FTE (full time equivalent) staff. Of that amount, $3,560,676 is for 23 FTEs that perform administrative and operational program oversight and whose salaries are included under this expense category. Staff expense for the additional 3 FTEs, who work on education and outreach, the illegally dumped mattress initiative, research, and in-house legal are included under those activity costs (see below).

MRC paid $385,027 in 2025 to consultants and outside contractors for specialized services and expertise to support program registration management, retailer participation, recycling data management, and financial operations. Program administration expenses also included $347,262 in computer and database costs associated with MRC's finance and customer relationship management (CRM) systems, including enhancements to the CRM platform to improve operational efficiency and data collection capabilities.

Additional administrative and overhead costs include office space, telephone, utilities, insurance, bad debt and depreciation. MRC incurred $17,947 to conduct compliance audits of its recyclers and $21,850 to conduct reviews of retailer participation compliance, bringing total compliance expenses to $39,797.

Program administrative expenses also include costs to prepare annual tax filings and conduct the annual financial audit, including MRC's SOC1 audit (conducted by PwC, a global audit and accounting firm), which CalRecycle's regulation 14 CCR§ 18964(b)(11) requires MRC to perform as a necessary component of the annual audit. These expenses are reflected in the $268,896 in the Annual Financial Audit and Tax Filings expense category.

Field site visits and program travel expenses of $68,739 were 38.4% lower in 2025 compared to 2024 levels.

MRC also engages California-based firms to provide industry and government relations support. These services help MRC respond to inquiries from legislators, educate elected officials and other stakeholders about the program, and monitor California legislative and regulatory developments that may affect the program. In 2025, MRC incurred $144,000 in this expense category, similar to 2024 levels. In addition, CalRecycle invoiced MRC $792,480 for oversight expenses in 2025, a 14.1% increase from 2024.

In 2025, legal and litigation support expenses totaled $97,354, of which $8,178 was for outside legal counsel and the remainder for in-house legal support. Legal costs represent in-house and outsourced legal costs[6] to support the organization, including negotiating, managing and updating MRC's contracts with hundreds of vendors.

Table 35 shows 2024 and 2025 actual administration, legal and CalRecycle oversight costs, projected 2026 costs and proposed 2027 expenses.

TABLE 35: Program Administration, Legal and CalRecycle Oversight Costs

Category	2024 Actual	2025 Actual	2026 Projections	2027 Proposed Budget
Staff Expenses	$3,763,741	$3,560,676	$3,935,556	$4,092,979
Administrative and Overhead Expenses	$658,373	$682,201	$708,058	$715,949
Outsourced Contractors/ Consultants	$415,811	$385,027	$378,578	$391,992
Computer and Database Expenses	$386,088	$347,262	$378,827	$383,536
Annual Financial Audit and Tax Filings	$224,254	$268,896	$230,710	$220,621
Compliance Expenses (operational and retailer)	$75,174	$39,797	$119,000	$104,000
Industry and Government Relations	$144,945	$144,000	$146,000	$146,000
Field Visits and Program Travel	$111,598	$68,739	$104,450	$112,280
Total Administration	**$5,779,984**	**$5,496,598**	**$6,001,179**	**$6,167,357**
Legal and Litigation Support Costs	$145,094	$97,354	$118,565	$122,508
CalRecycle Oversight	$694,374	$792,480	$806,197	$830,000
Total Administration, Legal and CalRecycle Oversight Costs	**$6,619,452**	**$6,386,432**	**$6,925,941**	**$7,119,865**

[6] Legal expenses are presented differently in the Audited Financial Statements. Legal Services reflect only out-sourced legal costs, while in-house legal expenses are included in the Management, Staffing, and General Expenses category.

Total Program Costs

As noted in Table 36 below, MRC's 2025 total program costs were $52,259,875.

TABLE 36: Total Program Costs

Types of Costs	2024 Actual	2025 Actual	2026 Projections	2027 Proposed Budget
Education and Outreach	$2,425,118	$2,536,154	$2,765,470	$2,804,742
Operational Costs	$37,348,497	$42,565,164	$44,351,845	$46,403,709
Research	$883,415	$772,125	$858,097	$888,513
Administration	$5,779,984	$5,496,598	$6,001,179	$6,167,357
Legal and Litigation Support Costs	$145,094	$97,354	$118,565	$122,508
CalRecycle Oversight	$694,374	$792,480	$806,197	$830,000
Total Program Costs	**$47,276,482**	**$52,259,875**	**$54,901,353**	**$57,216,829**

Reserves and Surplus Funds

Cal. Pub. Res. Code § 42988 requires that MRC maintains a reserve that is sufficient to fund the program's operations over a multi-year period in a fiscally prudent and responsible manner. Section 42988.3 further provides:

> Commencing January 1, 2027, the mattress recycling organization shall not maintain total reserves exceeding 60 percent of its annual operating expenses, consistent with the requirements of the Financial Accounting Standards Board's Accounting Standards Update 2016-14, Not-for-Profit Entities (Topic 958), and any future updates to that standard.

In addition, CalRecycle's regulations require that MRC's annual report include a discussion of its "[s]urplus funds, if any, and detailed rationale for the specified level of surplus." 14 CCR § 18964(b)(9)(E).

For nonprofit entities like MRC, the concepts of "surplus funds" and "reserves" are distinct. For nonprofits, generally accepted accounting principles (GAAP) define the annual "increase (or decrease) in net assets" to mean the mathematical difference between total revenue and total expenses for that year. A nonprofit's increase (or decrease) in net assets is functionally comparable to net income (or net loss) earned by a for-profit company. For this reason, we interpret the term "surplus funds" used in 14 CCR § 18964(b)(9)(E) as referring to an increase in net assets that MRC records at the end of each annual year. (A decrease in net assets at year-end would be a deficit.)

GAAP (as set forth in FASB Accounting Standards Update 2016-14, referenced in Section 42988.3 of the Public Resources Code) defines a nonprofit's reserves as that amount of the unrestricted accumulated net assets that the organization's Board of Directors has designated as reserves. MRC has no restricted net assets. MRC's 2025 audited financial statement (Statement of Financial Position) identifies MRC's reserve fund as "Board Designated Financial Reserve."

An organization's Board designated financial reserve can serve many purposes, including providing continuity of operations in times of economic downturn and addressing unforeseen events or other financial hardships. MRC has set aside funds for unforeseen circumstances that could substantially impact its revenues and expenses.

The reserves, however, are less than the organization's total accumulated net assets. The portion of the net assets not designated by the Board as reserves consists of financial assets available to meet the organization's short-term operational needs. These are comprised of liquid assets (such as cash), as well as non-liquid assets. Non-liquid assets, among other items, include accounts receivable (representing 24.6% of net assets), property and equipment and prepaid expenses, and other assets that are not readily convertible to cash.

Sufficient undesignated net assets are important to provide an organization with working capital to meet immediate cash flow needs. MRC's network of recyclers and transporters relies on prompt payment for services rendered. To keep the program functioning and its vendors paid and operating, it is critical that MRC hold sufficient working capital to cover cash flow shortfalls. To be fiscally responsible, MRC has designated approximately three months of operating assets as working capital.

As of December 31, 2025, net assets were $22,224,118, as reported on the Statement of Financial Position section of MRC's 2025 audited financial statements. The Net Assets are divided into two segments:

- $9,159,149 in Board Designated Financial Reserve, which is equal to the total net assets less the undesignated net assets. The reserve represents approximately 17.5% of 2025 Total Expenses, similar to the 2024 level of 17.3%.
- $13,064,969 in undesignated net assets (which equals 25.0% of 2025 Total Expenses). This is set aside as working capital to meet short-term cash needs.

MRC has adopted a conservative investment strategy for the Board Designated Financial Reserve with the goal of preserving the value of our investments over the long term, using lower risk investments that historically provide good returns, with a strong weighting in fixed income. In 2025, MRC earned a net return of $1,502,898 on its investments (including interest, dividends, realized and unrealized gains).

As Table 37 shows, as of December 31, 2025, the Net Assets at the End of the Year were $22,224,118.

TABLE 37: Net Assets

Category	2024 Actual	2025 Actual	2026 Projections[7]	2027 Proposed Budget
Total Revenue	$34,315,561	$52,976,168	$58,507,006	$61,282,484
Total Program Costs	$47,276,482	$52,259,875	$54,901,353	$57,216,829
Change in Net Operating Assets	($12,960,921)	$716,293	$3,605,653	$4,065,655
Net Investment Return	$1,394,760	$1,502,898	$690,000	$720,000
Gain on the Disposal of Assets	$337	$0	$0	$0
Change in Net Assets	($11,565,824)	$2,219,191	$4,295,653	$4,785,655
Net Assets at the Beginning of the Year	$31,570,751	$20,004,927	$22,224,118	$26,519,771
Net Assets at the End of the Year	$20,004,927	$22,224,118	$26,519,771	$31,305,426

MRC's board designated financial reserve and undesignated net assets (working capital) at year-end are indicated in Table 38. The Board Designated Financial Reserve as of December 31, 2025 complies with the 60% reserve target required by Section 42988.3 of the Public Resources Code.

TABLE 38: Board Designated Financial Reserve and Undesignated Net Assets

Net Assets as of 12/31/2025	$22,224,118	2025 Total Expenses: $52,259,875
Board Designated Financial Reserve	$9,159,149	17.5% (approximately 2.1 months of 2025 expenses)
Undesignated Net Assets	$13,064,969	25.0% (3 months of 2025 expenses)

[7] Revenue reflects the fee increase from $16/unit to $18/unit effective 4/1/2026.

Education and Outreach

CALIFORNIA PUBLIC RESOURCES CODE AND REGULATIONS

14 CCR § 18964(b)(10) — Education and Outreach. Provide a description of educational materials that were provided, including electronic examples of these materials. Identify any method(s) used to determine the effectiveness of educational and outreach efforts (e.g., surveys, hits on specific web pages, number of participants at events, etc.), applicable. Describe any changes to those materials that are planned for subsequent years, if applicable.

14 CCR § 18964(b)(10)

EDUCATION & OUTREACH

MRC's education and outreach efforts inform consumers, retailers, the mattress industry and other stakeholders about mattress recycling in California by explaining:

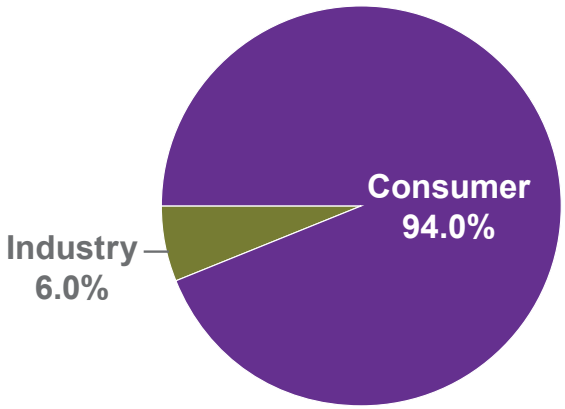

- How MRC operates
- MRC's accomplishments and impact in California
- How and where to recycle discarded mattresses
- Why recycling is beneficial
- What the charge funds
- The mattress industry's legal obligations

MRC reaches these audiences using an array of communications and marketing methods, including targeted direct mail, printed collateral, advertising, media relations, websites and social media. MRC also participates in community and industry events and visits retailers, recyclers and other collection locations to learn how to collaborate on residential outreach.

MRC's multichannel, multilingual consumer education strategy remains effective. Outreach efforts generated 778 million impressions and increased awareness of mattress recycling, retailers' take-back obligation, and how to recycle discarded mattresses.

Figure 4 shows the percentage of education and outreach costs directed to consumer and industry audiences.

FIGURE 4: 2025 Education and Outreach
Spending Industry Versus Consumer

Communication Efforts

Outreach materials fall into one of three categories of efforts:

1. **Controlled:** MRC uses its own assets to provide and publish information (e.g., websites, social media, newsletters).
2. **Paid:** MRC pays for the ability to distribute information and receive visibility (e.g., advertising or event sponsorships).
3. **Offered:** MRC makes information or resources available to others to voluntarily distribute (e.g., a media release or toolkit).

Controlled

Websites

Outreach encourages visiting one of three websites:

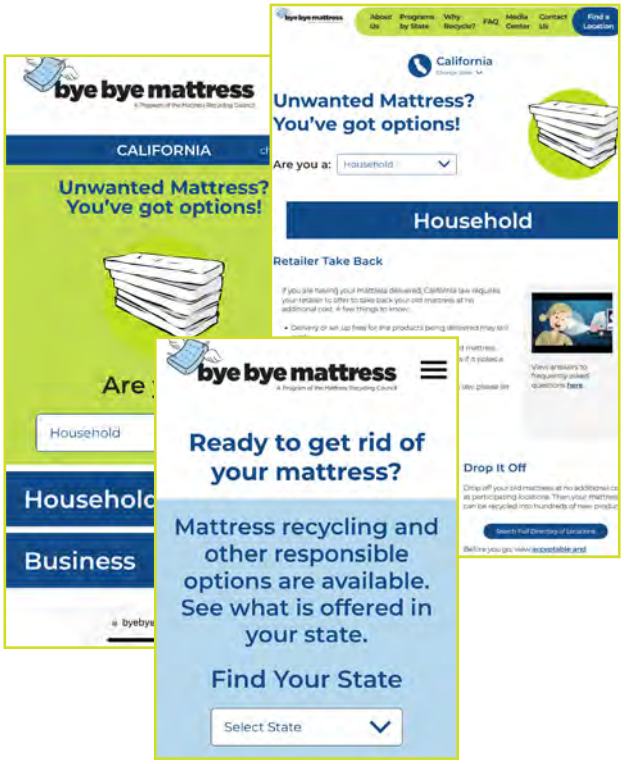

1. ByeByeMattress.com, which focuses on consumers.
2. MattressRecyclingCouncil.org, which informs the mattress industry, regulators, and stakeholders.
3. MRCreporting.org, which mattress retailers, manufacturers, distributors and renovators use to register with MRC and to report and remit recycling charges.

MRC used Plausible to measure website performance. This is a change from previous years, therefore no comparison to 2024 is available.

ByeByeMattress.com

Outreach to California consumers (residents and businesses looking to dispose of a mattress) encourages visiting ByeByeMattress.com to learn how and where to recycle unwanted mattresses. For residents, the site features a searchable locator and a curbside pickup directory, along with California program details, including retailer take-back information. Businesses are provided information on the Commercial Volume Program (CVP). Other sections of the website provide consumers with mattress care advice and resources for addressing illegal dumping in their community.

In 2025, nearly 826,000 visitors came to ByeByeMattress.com. These visitors generated 1.13 million pageviews. Specifically, the California page received almost 295,000 visitors and 420,200 pageviews.

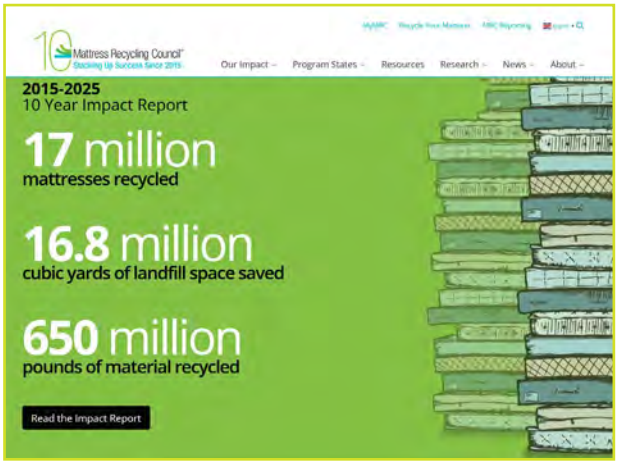

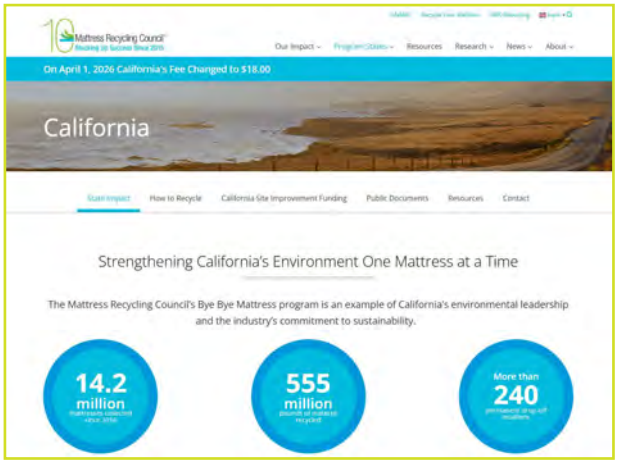

ByeByeMattress.com

MattressRecyclingCouncil.org

MattressRecyclingCouncil.org informs industry audiences, regulators, and stakeholders about state laws, program implementation, and performance. The website features a robust resource library for the solid waste, recycling, and mattress industries; research reports and developments; and a media center with newsletters and announcements.

In 2025, 82,400 visitors came to MattressRecyclingCouncil.org. These visitors generated nearly 108,000 pageviews. The California page received 17,500 visitors and 22,700 pageviews, remaining the second-most-viewed on the website.

MattressRecyclingCouncil.org

MRCreporting.org

Mattress retailers, manufacturers, distributors and renovators use MRCreporting.org to register with MRC and to report and remit recycling charges. The portal houses resources about the California law and program, as well as documents and videos demonstrating the registration, reporting and charge remittance processes. Registered parties receive automatic payment reminders and email notices for missed deadlines. MRC also emails important announcements about program changes, portal updates, available customer education materials and mattress recycling options. In 2025, seven email campaigns reached 2,179 registered California participants.

MRCreporting.org

Social Media

MRC maintains social media channels for both brands. We use the Bye Bye Mattress branded channels—Facebook, X, Instagram and Threads—to educate consumers. Mattress Recycling Council branded channels—Facebook, X, LinkedIn, and YouTube—inform industry audiences. Our social media followers consist of retailers and manufacturers, civic and environmental groups, local and state governments, waste haulers, and recyclers. At the close of 2025, the cumulative number of followers across all branded channels approached 9,000.

In 2025, MRC began monitoring Reddit to reactively provide information on mattress recycling and correct misinformation in various discussions and communities. For now, MRC is not actively building a Reddit presence or audience as it does on other platforms; instead, we view this platform as an advertising opportunity (see local campaigns) and an important avenue for community listening.

In 2026, MRC will continue to monitor the viability of our current social media channels and explore other platforms that may be effective tools for communicating with our diverse audiences.

Bye Bye Mattress channels

By the end of 2025, the cumulative follower count for Bye Bye Mattress-branded channels was 3,953, a 20% increase. Instagram surpassed the 1,000-follower mark, adding more than 400 followers throughout the year.

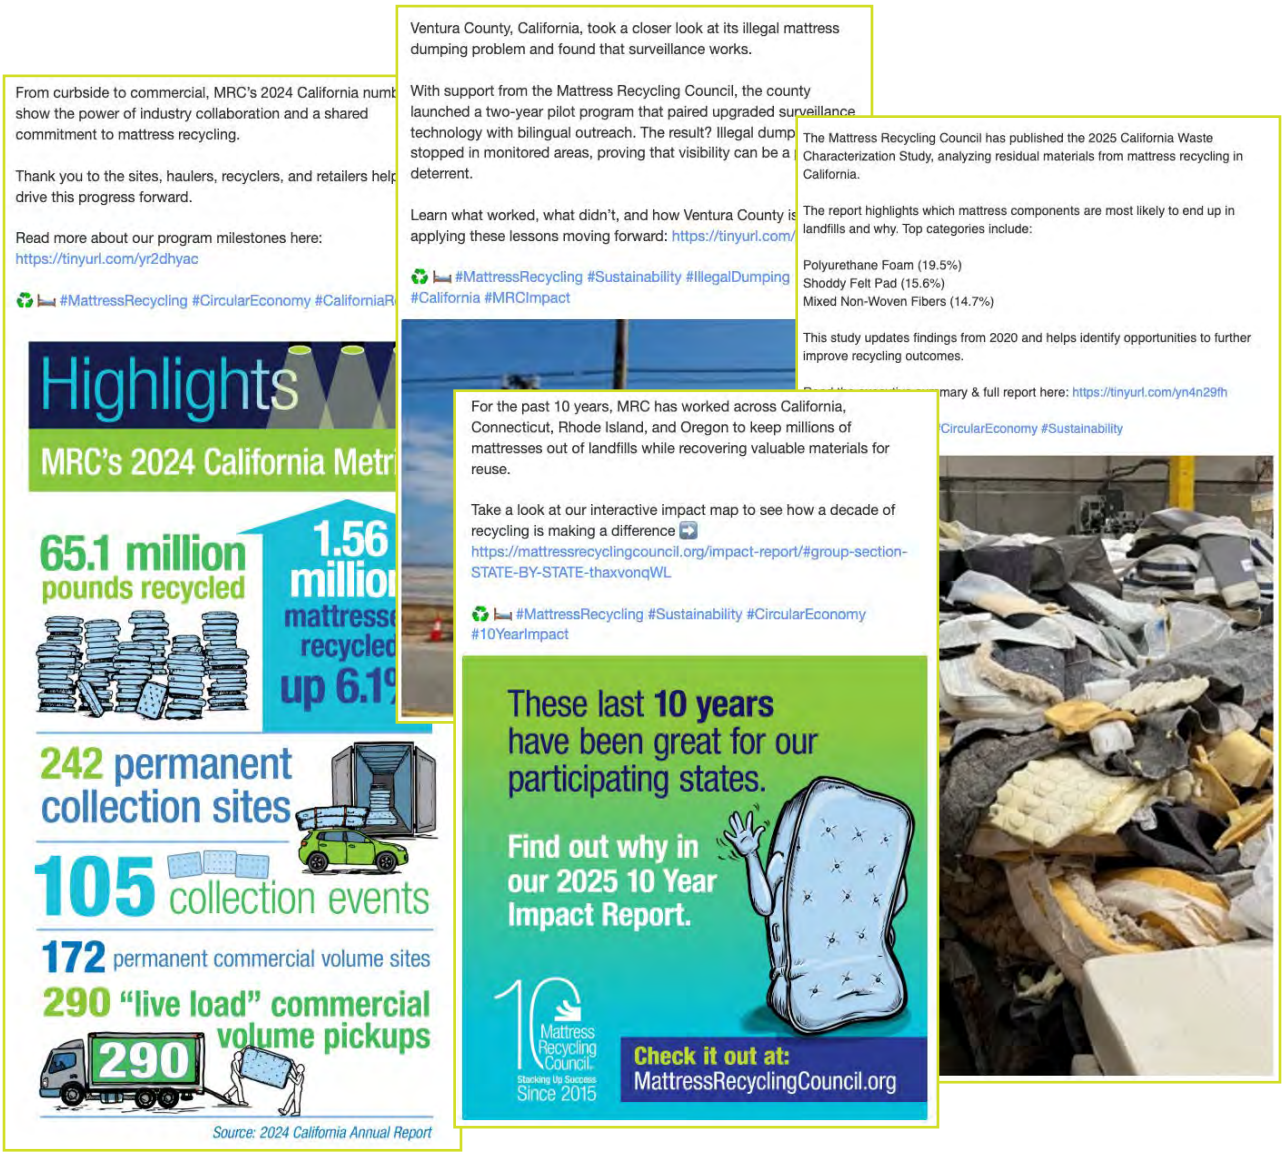

MRC used social media advertising to promote retailer take-back, guide users to the nearest drop-off location, advertise collection events, showcase consumer incentive drop-off locations, draw attention to new mattress care content, and inform new residents to visit ByeByeMattress.com. These ads earned 20.7 million impressions.

Overall, MRC's Bye Bye Mattress social media accounted for 19% of all visitors to ByeByeMattress.com in 2025.

Mattress Recycling Council channels

At the end of 2025, the cumulative number of followers for Mattress Recycling Council-branded channels totaled 5,000. LinkedIn grew by 15% in 2025. With more than 2,900 followers, it is the most popular of all the MRC social media channels.

MRC used these channels to announce program developments, promote MRC's presence at industry events, share research announcements, distribute resources, generate interest in using CVP, recruit Sleep Products Sustainability Program (SP2) participants and increase e-newsletter subscribers.

Newsletters

In 2025, MRC offered six digital newsletters with a mobile-friendly layout. Most of these newsletters targeted small audiences; however, our flagship publication, Highlights, reached over 7,900 subscribers.

Highlights, monthly

Highlights is MRC's primary communication tool for announcements, state program updates, posting research accomplishments, and distributing lessons learned from our illegal dumping pilot projects.

We distribute Highlights to all registered retailers, renovators, manufacturers, collection site hosts, recyclers, and other stakeholders who subscribe. By the year's end, the mailing list had exceeded 7,950 with an average open rate of nearly 55%. MRC also publishes each issue on MattressRecyclingCouncil.org and circulates it on social media channels.

Retailer Spotlight, quarterly

Retailer Spotlight is distributed to registered retailers and provides tips for using MRCreporting.org, updates on state laws and regulations, new MRC resources for retailers, and insights on mattress recycling. By year's end, the nearly 1,500-member mailing list had an average open rate of 55%. This newsletter is now also distributed on social media.

Illegal Mattress Dumping Download, quarterly

The Illegal Mattress Dumping Download provides Illegally Dumped Mattress Collection Initiative participants with news and tips to combat and prevent illegal mattress dumping while continuing to remind Initiative participants about data entry and how to use the reporting system.

This newsletter also serves as the primary vehicle for announcing funding for community pilot projects and for disseminating lessons learned from each project.

What began as a tool for keeping Initiative participants engaged has become a vehicle for sharing information that helps communities across California address illegal dumping. Over the last couple of years, MRC has expanded the readership to include any local official or stakeholder that is interested in the outcomes of the pilot projects and the Initiative's progress. In 2025, the newsletter reached 210 subscribers and averaged a 40% open rate.

Seasonal Reminders, quarterly

Each program coordinator distributes a Seasonal Reminder to the collection network contacts within their multi-county regions. The primary purpose of the newsletter is to remind collection site operators of best practices (e.g., proper mattress stacking) and resources for training their staff or promoting their site. MRC expanded the format to recognize collection sites exemplifying these practices within the region and sharing different approaches to implementing them.

The open rates of each coordinator's newsletter varied. Averages ranged from 30% to 55%.

MRC NEWS

SP2 Toolkit, monthly

MRC distributes this newsletter monthly to contacts at certified SP2 facilities or facilities working toward certification. Each month's content focuses on one of the 12 certification requirements. In 2025, the mailing list consisted of 25 program participants and the newsletter averaged an open rate of 34%.

SP2 Insights, ad-hoc

Following the SP2 certification of South Bay International, a special edition of SP2 Insights was published. This is MRC's recruiting newsletter for the program. It is only published when there is a noteworthy event that could attract interest in the program. The August newsletter was sent to 315 contacts and received a 44% open rate.

Paid

Consumer Advertising

MRC uses a mix of television, radio, digital, social media, and print as it designs advertising plans for general audiences or local plans to address a specific need. Ads are multilingual.

Figure 5 shows the percentage of consumer advertising spending for television, radio, print, digital and social in 2025.

FIGURE 5: Consumer Advertising Spending by Media Type

Advertising is one of the most popular ways consumers learn about ByeByeMattress.com. In 2025, it accounted for nearly 40% of visits to the website's California page.

Appendix E contains examples of these advertisements.

General Audience Campaigns

In 2025, general audience advertising in the spring and fall coincided with holiday weekends when retailers sell large volumes of mattresses. English-language and Spanish-language ads were used in select major markets to increase general awareness of the program.

When determining which areas to focus advertising, MRC considered: the presence of a recycler, the density of available drop-off opportunities, increased access (such as the opening of a large collection site or multiple sites), the area's environmental justice classification, and the per capita rate of illegal dumping. Based on these criteria, the following were chosen as major advertising markets in 2025:

- Azusa
- Fresno
- Oakland
- Sacramento
- San Bernardino
- San Francisco
- San Jose
- Southeast Los Angeles
- Stockton/Woodland

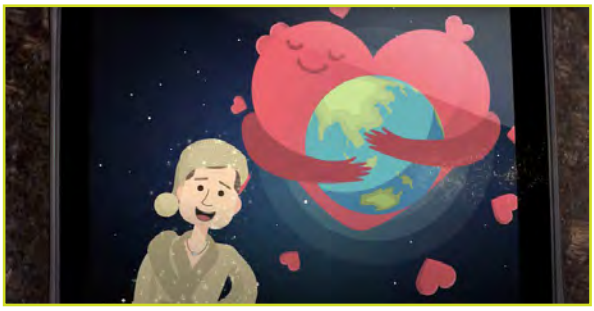

English-language media received the “Three Ways to Recycle” campaign. The ad summarized the three primary ways a consumer could place a mattress in the recycling stream: retailer takeback, consumer drop-off, and municipal bulky-item pickup.

Spanish-language media received “Cuidando la Tierra” (translates to Taking Care of the Earth), which positions mattress recycling as an easy and free way to help protect the environment.

Both ads encourage visiting ByeByeMattress.com to learn more about what to do with an unwanted mattress. Digital mail campaigns to new movers in the target markets complemented these ads.

Overall, general audience advertising in these markets resulted in 35.9 million impressions of digital TV and radio ads and 1.2 million opens of digital newsletter campaigns. These led to more than 105,000 clicks to ByeByeMattress.com.

Local Campaigns

MRC reserves a portion of advertising funds to support localized outreach, which allows us to react to a significant expansion of the collection network or a demonstration of need for higher recycling awareness or increased site utilization. Collection sites and events also create their own ads or materials and may request MRC’s assistance in funding these projects. Notable local campaigns in 2025 included:

- **San Diego County:** During summer and fall mattress sales peaks, MRC advertised in San Diego County to raise awareness of recently added locations. The plan included online search, social media, email marketing and digital TV and radio. These ads received nearly 10.5 million impressions and generated over 16,000 visits to ByeByeMattress.com.

- **Alameda County:** In late 2025, in response to increased illegal dumping, additional resources were allocated in Oakland and Alameda County to promote mattress recycling and local collection sites. The campaign included a combination of digital and print ads on Nextdoor, Reddit, Berkeley Combo and Oakland Post. The campaign received nearly 4.4 million impressions and resulted in 13,500 visits to ByeByeMattress.com.
- **City of Burbank:** As Burbank refreshed the artwork featured on their fleet of garbage trucks, it invited MRC to produce an ad promoting retailer take-back. The ads appeared on 27 garbage trucks throughout May.

Online and Digital Advertising

Monthly online and digital advertising target consumers searching the internet or social media about purchasing or getting rid of their mattress. Digital advertising is also used to focus consumers on the importance of source reduction by caring for their mattress with content provided on ByeByeMattress.com.

- **Online Search:** More than 4.75 million impressions were garnered in 2025 through the use of Google display ads and the Google AdWords grant program. Ads displayed in or alongside search results as users searched the internet for "mattress recycling," "disposal," or "junk removal." More than 105,000 consumers visited ByeByeMattress.com after clicking on one of these ads. In 2025, a similar test campaign on Microsoft's Bing search engine resulted in more than 46,000 impressions and over 400 website visits.
- **Social Media:** Campaigns on Meta's Facebook and Instagram received more than 20.7 million impressions and resulted in more than 140,000 visits to ByeByeMattress.com. The effort included year round campaigns to target zip codes surrounding Consumer Incentive Payment locations and zip codes experiencing high per capita rates of illegal dumping, as well as ad hoc campaigns to promote specific collection sites or events.

MRC will continue using online and digital advertising to generate leads to ByeByeMattress.com and regularly monitor analytics to find the best marketing mix for Californians.

Industry Advertising

In 2025, MRC advertised CVP, SP2 and research funding in a variety of trade publications in different industry verticals. Overall, industry advertising generated more than 2,100 website visits. Appendix E contains examples of these ads.

- **CVP:** To encourage recycling from businesses and institutions, MRC used digital and print ads, as well as targeted emails to subscribers in the home furnishings, lodging and apartments verticals. Some of these outlets offered supplier guides or directory listings, which we also took advantage of when available. The print ads appeared in trade publications with a combined circulation of more than 153,000. Digital banner ads and links in targeted emails resulted in more than 2,000 website visits. In addition to these ads, MRC sponsored a college move out guide that was distributed to over 60 sustainability directors at California colleges and universities.
- **SP2:** To recruit new participants, MRC placed digital and print ads in a monthly furniture industry trade publication with a readership of 24,800 readers. The digital newsletter ads led to 59 visits to the SP2 page on MRC's website.
- **Research:** To solicit proposals for new uses of recycled mattress foam, MRC ran ads in an international scientific publication devoted to polyurethane. The one-time digital ad generated five website visits.

Event Sponsorships

Community Events

Each spring, MRC supports Earth Day festivals across the state. our booth raises awareness about retailer take-back, participating drop-off locations, and available curbside opportunities. Attendees learn about how a mattress is recycled, what happens to the components and the positive environmental impacts of mattress recycling.

In 2025, MRC participated in 15 events and sponsored three others, exposing Bye Bye Mattress to more than 19,250 residents. Sponsorship benefits such as social media posts, inclusion in event advertising and media outreach provided additional exposure beyond event day interactions. The schedule included:

- Earth and Arbor Day Festival Cupertino
- City of Carlsbad Earth Month
- Earth Day Fresno
- Earth Day Napa
- Earth Day - LASAN
- Modesto's Earth Day in the Park
- City of Fremont Earth Day Fair
- Ventura Earth Day Festival
- San Diego EarthFest
- Earth Day Santa Rosa
- Tracy Earth Day
- Green Oceanside Earth Day
- Stockton Earth Day Festival
- ECOS Sacramento Earth Day
- Santa Barbara Earth Day

Industry Events

In 2025, MRC participated in five mattress industry events to increase awareness of legal obligations, present research findings, further sustainability and circularity conversations and build interest in SP2. These events included:

- **Las Vegas Market:** Held twice each year, this event is the largest furniture and bedding show in the United States. It attracts retailers, distributors, and manufacturers from California and across the U.S., as well as from over 80 countries. At both markets, MRC staff members informed attendees about our success and how to access CVP, California's retailer take-back obligation, California's charge, and our research programs to advance recycling and circularity. MRC also visited the event's showrooms to see many of the newly designed and innovative products that had the potential to be sold in California and would need the charge applied.

- **Southern California Furniture and Accessory Market:** MRC exhibited alongside some of the industry's leading manufacturers, suppliers, and distributors of mattresses, furniture and home goods. MRC interacted with attendees at our booth and engaged in discussions with other exhibitors. These interactions raised awareness among retailers of California's law, the availability of recycling, and how to access resources for program compliance and customer education.
- **ISPA Industry Conference:** In March 2025, MRC updated industry leaders about the 10-year impact of its initial state programs. At our booth, attendees learned about how to comply with state laws, recycle mattresses, and promote the program to their customers, as well as the status of research projects.
- **ISPA Sustainability Conference:** ISPA in 2025 held its fourth conference to educate, connect, and inspire the bedding industry to develop practical solutions for sustainability challenges. MRC staff exhibited, presented and led panel discussions to create a broader understanding of end-of-life challenges recyclers face with mattresses, generate interest in research projects and encourage participation in SP2.

Offered

Consumer Education Materials for Retailers

MRC provides no-cost point-of-sale materials to the mattress industry. Items include an information card, poster, Consumer FAQ and digital badge. Translations of these materials are available in the top five other languages spoken in California. On an ongoing basis, MRC uses the Retailer Spotlight newsletter, email notifications via MRCreporting.org, industry publications, and discussions and presentations at events to regularly inform retailers about these educational materials.

A retailer may request these items from MRC or download current artwork from MRC's Resources Library. For newly registered retailers or those opening new stores in the state, MRC sends a starter kit with a link to request an automatic refill of materials.

In 2025, MRC provided 9,800 information cards and 147 posters to California retailers to help them explain mattress recycling and the charge to their customers. The cards and posters were revised in late 2024 to include larger text, images that emphasize the recycling options rather than the recycling process, more prominent contact information, and a QR code to quickly access the California program page on ByeByeMattress.com. The revised materials also listed the new recycling fee rate, which became effective on Jan. 1, 2025.

bye bye mattress
This program is the result of a 2013 law passed in California. It is funded through the recycling fee listed on your receipt.
Each year, the Mattress Recycling Council's Bye Bye Mattress program facilitates the recycling of nearly 1.5 million mattresses across California. The fee collected on the sale of all mattresses and box springs establishes collection opportunities throughout the state, mitigates illegal mattress dumping and funds research to improve mattress recycling.
Your Mattress Recycling Options

bye bye mattress
Este programa es el resultado de una ley aprobada en California en 2013. Se financia a través de la tarifa de reciclaje que figura en su recibo.
Cada año, el programa Bye Bye Mattress de Mattress Recycling Council facilita el reciclaje de casi 1.5 millones de colchones en California. La tarifa cobrada por la venta de todos los colchones y bases de resortes establece oportunidades de recolección en todo el estado, mitiga el vertido ilegal de colchones y financia la investigación para mejorar el reciclaje de colchones.

Media Relations

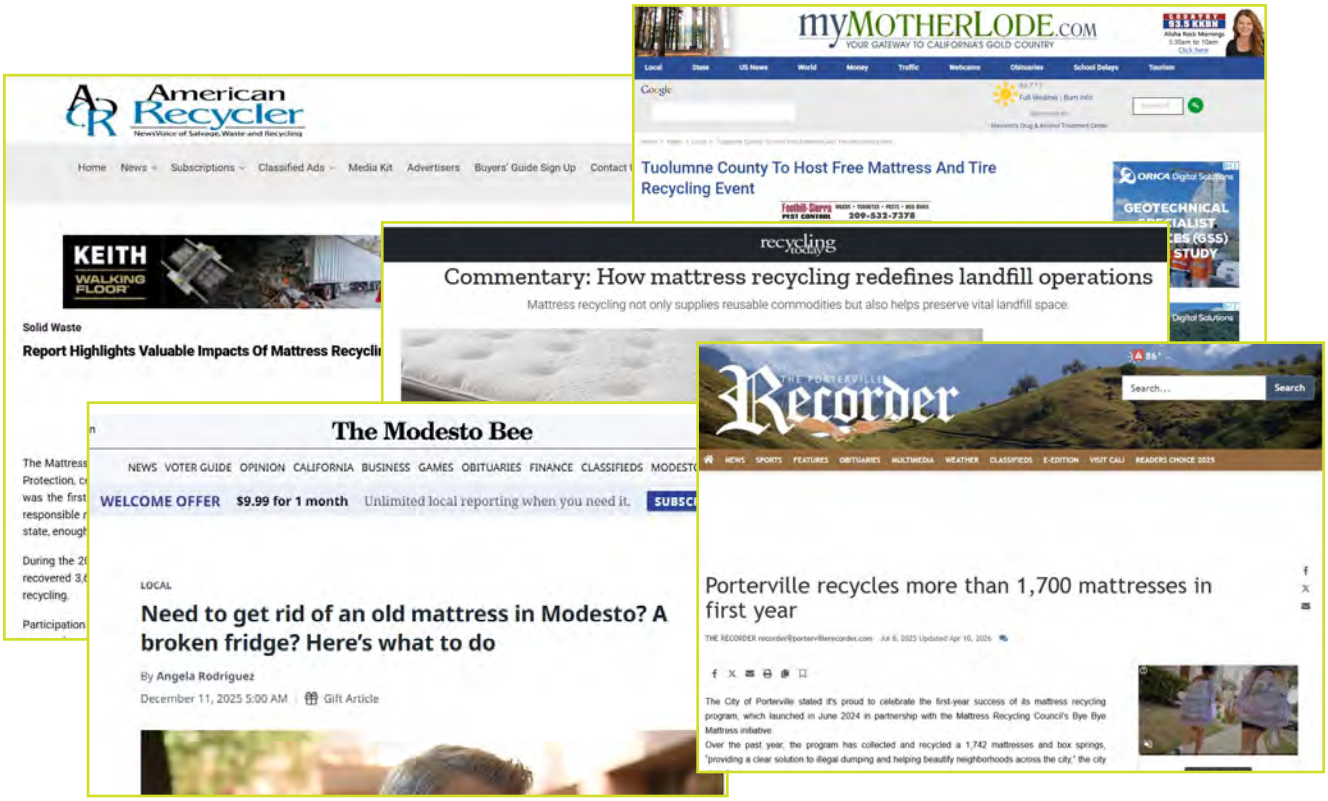

In 2025, our consumer and industry media outreach efforts resulted in more than 677 million impressions. This amount of coverage equates to more than $313,000 in advertising value.

Through earned media efforts in 2025, MRC reached an audience of over 62 million, including Californians in 20 counties. We proactively generated consumer coverage about the availability and success of the Bye Bye Mattress program during Presidents Day, Earth Day, and America Recycles Day. We also informed local media about new collection sites and awards for new pilot projects to mitigate illegal dumping.

In tandem with this media outreach MRC engaged community influencers to amplify awareness of retailer take-back and local mattress recycling options. In 24 counties, we provided information to local elected officials, city managers, county supervisors, and local chambers of commerce to use on their social media channels and newsletters.

MRC's proactive industry efforts focused on the program's 10th anniversary, culminating in a January 2026 press conference in Sacramento. Throughout the year, we also participated in the furniture and bedding industry's coverage of sustainability and circularity. Our other 2025 announcements brought attention to research project results, a new SP2-certified facility, and the new charge amount that would take effect on April 1, 2026.

Other mentions of MRC or Bye Bye Mattress resulted from reporters attributing MRC as their source for mattress recycling information or referencing our program as an example of industry-led recycling. Collection sites or event hosts using our publicity toolkits and accompanying resources also generated coverage of the program.

A Decade of Recycling Success
MRC has recycled 15 million mattresses and foundations —
and helped inspire the entire industry to focus on sustainability
by Julie A. Palm
This year, Mattress Recycling Council is marking 10 successful years of managing statewide mattress recycling programs in California, Connecticut and Rhode Island. Its fourth program, in Oregon, launched at the beginning of the year.
As it marks the milestone, the nonprofit organization has much to celebrate. It has recycled 15 million mattresses and foundations. With more than 75% of a mattress able to be recycled, it has diverted more than 500 million pounds of materials from landfills.
"In early 2017, we celebrated recycling our 1 millionth mattress," says Mike O'Donnell, MRC chief operating officer. "It was exciting. I thought, 'We're really doing this.' Every year since, MRC's programs have added another 1.5 million to the pile."
While the recycling statistics are impressive, they represent
on of MRC's impact over the past decade.
s funded more than 30 research projects that
g other things, led to advancements in used mat-
ssing and discoveries of new uses for used mat-
oments.
e way, MRC has honed its model, which includes
onsumers about mattress recycling, working with
d large-scale mattress buyers to recycle their used
ing illegal dumping, and setting up transporta-
cycling networks. It's a model that can be replicated
es that, like California, Connecticut, Oregon and
d, want to create a mattress recycling program that
ed and supported by the industry.
Some Mattress Recycling Council research funding goes to projects to find new uses for recycled mattress components.
More unexpectedly perhaps, MRC has also helped foster widespread industry interest in recycling, sustainability and circularity and has brought together suppliers, manufacturers and retailers to tackle those issues.
MRC's own programs are sustainable: O'Donnell notes that a life cycle analysis of its recycling program in California

Mattress Recycling: Worldwide but not Everywhere
According to numbers of Verified Market Reports, the global mattress recycling service market was valued at 1.2 billion US-Dollar in 2024 and is projected to reach 2.5 billion US-Dollar by 2033. The increasing demand for sustainable disposal methods and recycling initiatives is expected to drive an annual growth rate of 4.8 percent from 2022 to 2030. However, the varying national circumstances still promote a cautious optimism about this growth.

Public Service Announcement

In 2025, MRC introduced a new public service announcement (PSA) campaign titled “Influencer.” The campaign includes 15-second and 30-second video and radio spots. Spanish versions are also available. Our involvement in illegal dumping pilot projects, local task forces and workshops informed the concept design and script.

We distributed “Influencer” to PSA directors in February 2025 and encouraged additional airings by contacting station directors in the weeks before Earth Day (April 22) and America Recycles Day (Nov. 15). To complement these airings, MRC also asked city leaders and community-based organizations to share the PSA on their social media feeds and other communication channels.

In the first year, the PSA had more than 3.2 million impressions. It is playing on three TV stations in the Los Angeles and Eureka markets and six radio stations in Fresno, Los Angeles, and San Diego markets.

MRC’s previous PSA campaign, “Break Up the Right Way With Your Old Mattress,” continued to be broadcast in 2025. It now has almost 11 million lifetime impressions in California since its 2021 debut.

Compliance Outreach

MRC continues to monitor various sources for new entrants into the mattress segment, as well as non-compliant parties. When MRC identifies a party that may need to register and participate in the program, MRC mails a certified mail notice informing it of its potential obligations and follows up with a phone call or email. If there is no response within 30 days, a second certified letter is mailed and the party is given 30 more days to respond. If the party remains unresponsive, MRC refers the party to CalRecycle Enforcement.

Our database of potential retailers, manufacturers, distributors, and renovators is a compilation of information from California’s Bureau of Household Goods and Services, ReferenceUSA, Dun & Bradstreet, industry publication subscriber lists, industry event attendee lists, Yellow Pages, chambers of commerce, the Better Business Bureau and online searches. We also receive leads for potential registrants from CalRecycle’s enforcement staff and MRC program coordinators as they travel the state, MRC Customer Relations area visits, and other registered participants. In 2025, MRC conducted 47 on-site visits to California retailers.

MRC monitors whether retailers and other mattress sellers submit monthly reports and remit collected recycling charges on time. An automated system alerts parties of missed reports, late payments, late fees and associated interest. CalRecycle Enforcement is notified when a retailer reaches the level 7 delinqency stage.

TABLE 39: Notification Protocol for Late Reporters and Charge Remitters

Delinquency Stage	Late Reporter	Late Remitter
Level 1	Late notice email generated by MRCreporting.org	Late notice email generated by MRCreporting.org
Level 2	Phone call made to verify continued program participation and provide a verbal reporting reminder	Phone call made regarding outstanding payment and warning of potential interest charges
Level 3	Written notice mailed	Written notice mailed and interest invoice issued
Level 4	Second phone call made to provide verbal warning of potential penalties	Second written notice sent by certified mail and interest invoice issued
Level 5	Written notice sent by certified mail and late fee invoice issued	Second phone call made warning of accruing interest
Level 6	Second written notice sent by certified mail and late fee invoice issued	Third call made warning of referral to collections agency and interest invoice issued
Level 7	Late fee invoice issued; CalRecycle notified of delinquent account	Delinquent account sent to collections agency and interest invoice issued; CalRecycle notified of delinquent account
Continued action	Late fee invoices issued monthly until account no longer delinquent	Interest invoices issued monthly until account is no longer delinquent

Meanwhile, CalRecycle Enforcement randomly selects mattress retailers, manufacturers and renovators to evaluate compliance with SB 254 through virtual and on-site inspections.

At retailer inspections, CalRecycle confirms whether the business is registered with MRC, visibly displays the correct charge on the sales transaction documents, collects the recycling charge from customers, properly remits those charges to MRC, and complies with the no-cost retailer take-back obligation. Inspectors also verify whether the mattresses and foundations offered for sale are produced by manufacturers that have registered with MRC.

At renovator inspections, CalRecycle confirms whether the business is registered with MRC and evaluates documentation practices used to report annual mattress collection and disposition data (due to CalRecycle May 1 of each year).

When CalRecycle determines it will levy penalties against a non-compliant party, it publishes the enforcement order on the department's website (https://www2.calrecycle.ca.gov/Docs/EnforcementOrder/). In 2025, CalRecycle enforcement conducted inspections of 121 retailers, 29 manufacturers, and nine renovators. Twenty were remote inspections of retailers and manufacturers. Enforcement proceedings are being pursued on five retailers and two manufacturers/renovators due to a lack of compliance.

Evaluations

MRC tracks consumer awareness annually and conducts periodic research to measure and improve consumer outreach and education. We also gauge industry awareness and satisfaction by contacting all registered retailers at least once each year. Appendix E contains the complete survey results.

Consumer Behavior and Awareness

A statewide consumer survey was conducted in April/May 2025 after the spring advertising campaign. MRC contracted with KB Insights, a 35-year marketing consultant and experienced analyst, to create and implement the survey (N=1,044). This survey was constructed to obtain feedback from adult residents throughout California, matching the demographic breakdown reported in census data (age, gender, ethnicity, income, etc.). All responses were collected online.

The survey measured consumer awareness of mattress recycling, retailer take-back, how to dispose of a mattress so it can be recycled, knowledge of "free" recycling, and awareness of the program's name (these comprise our five Key Performance Indices or "KPIs" listed in Table 40).

When comparing the 2025 results to the same KPI measurements taken in the Spring of 2024, we found that three measurements were statistically similar in 2025 and 2024 (i.e., within +/-3%): knowledge of retailer take back, knowledge that recycling is free and knowledge of how to dispose a mattress for recycling. The other two KPI measurements showed a slight, but statistically significant, increase: knowledge of mattress recycling and the awareness of the Bye Bye Mattress Program.

TABLE 40: Statewide Consumer Awareness Key Performance Indices
2023–2025 Key Performance Indicator

Key Performance Indicator	2023	2024	2025
Knowledge of retailer take back	30%	27%	29%
Knowledge that a mattress can be recycled	50%	46%	49%
Knowledge that recycling is free	23%	19%	21%
Knowledge of how to dispose of a mattress so it can be recycled	27%	25%	26%
Recall of Bye Bye Mattress program name	16%	11%	15%

Respondents that could recall Bye Bye Mattress by name (N=149) reported learning about the program through the following sources (MRC asked respondents to select all that apply): advertising (75%), a friend or relative (41%), local recycling center (30%), social media (26%), news (25%), mailed information (24%), mattress retailer (20%), landlord or property manager (20%), city or local government (17%), YouTube (16%) and online search (15%). When compared to 2024, the categories with statistically significant changes included advertising (74% higher), news (32% higher), and search engines (114% higher).

Of the survey respondents who recalled hearing or seeing an advertisement (N=112), two-thirds recalled a television spot (67%) and almost half remembered a social media post (47%). Radio ad recall ranked third (34%), followed in-store signage or materials (22%), online ads (21%), outdoor/billboard ads (21%) and print ads (17%).

MRC will continue to use these channels to build awareness of Bye Bye Mattress and continue to work with local leaders, city staff, mattress retailers, landlords and property managers to promote the program.

Other portions of the survey are structured to measure consumers' mattress purchasing, disposal and storage behaviors, as well as motivators and barriers to recycling. We use this behavioral data to identify opportunities for improving consumer communications.

In 2025, there were no significant changes in consumer purchasing behavior, nor the methods they use to acquire mattresses. Similar to 2024, most consumers purchased from brick-and-mortar retailers (63%), slightly more than a quarter purchased from online-only companies (29%) and the remainder acquired through non-retail sources such as hand-me-downs, yard sales, classifieds, etc. (6%).

Disposal rates were slightly lower in 2025 than in 2024 (17% versus 20%), and consumers still preferred seeking a way to have their unwanted mattress picked up before resorting to a drop-off/self-haul option. The top three disposal methods were: retailer take back (27%), using city services to have it picked up at the curb (17%) and placing it in the trash/dumpster (10%). Another 9% gave it away, 7% hired a junk removal service to take it away, 5% sold it, and 5% donated it to charity. Meanwhile, dropping it off at a recycling center, an event, or at a landfill comprised only 13% of disposals.

While most disposal methods were consistent with past findings, one key behavioral shift did occur in 2025. Retailer take-backs were up from 2024 (23% higher).

What motivates or prevents consumers from recycling their mattress is also relatively unchanged from 2024. The top three motivators remain "protecting the environment" (selected by 19% as most important), "doing the right thing" (selected by 13%) and "convenience - it's easy to do" (selected by 12%). Perceived barriers continue to be lack of knowledge and not having a vehicle.

MRC's consumer survey strategy in 2026 will include a comprehensive, statewide behavioral/awareness study to gauge success against the 2025 survey. Smaller surveys may be conducted to monitor the effectiveness of campaigns in new target markets.

General Advertising Campaign Effectiveness

To accurately measure the effectiveness of advertising, MRC compares KPI performance before and after advertising in the specific markets targeted in its advertising media plan. Accordingly, MRC research conducted in February 2025 (N=501) established "pre-campaign" performance in 216 targeted zip codes. We then extracted results from the annual survey detailed above, only in the same zip codes, to assess "post-campaign" results for the spring ad campaign. An additional survey was conducted in December 2025 (N=536) to assess "post campaign" results for the fall ad campaign. The following trends were established only in the original 216 zip codes that were consistently targeted all year long.

TABLE 41: Ad Campaign Key Performance Indices 2025 Key Performance Indicator of Consumer in a Target Market

Key Performance Indicator of Consumer in a Target Market	Pre-Campaigns Feb. 2025	Post-Campaign May 2025	Post-Campaign Dec. 20254
Knowledge of retailer take back	36%	33%	28%
Knowledge that mattresses can be recycled	58%	59%	51%
Knowledge that recycling is free	27%	33%	26%
Knowledge of how to dispose of a mattress so it can be recycled	30%	31%	24%
Recall of Bye Bye Mattress program name	18%	22%	13%

Based on these results, the spring campaign was relatively more successful than the fall campaign at sustaining and increasing program knowledge, likely due to timing and competing fourth quarter holiday messaging. However, knowledge was generally higher in the zip codes targeted in 2025 than in those targeted in prior years.

Recent Purchasers

Since mattress disposals strongly correlate with mattress purchases, MRC asks consumers who have purchased or acquired a mattress recently about their recycling knowledge and awareness. When segmenting respondents into targeted markets that had purchased or acquired a mattress in the last year, we note that KPIs increase significantly, further underscoring the relative success of the spring campaign at sustaining/building awareness. The decline from May 2025 to December 2025 is similar to the decline during the same timeframe in 2024 and highlights the challenge of staying relevant to consumers during this time of year as it competes for attention during the holidays. MRC is evaluating the best timing to implement advertising and communications in order to maximize mattress recycling.

TABLE 42: Key Performance Indices of Recent Mattress Purchasers in Targeted Markets

Key Performance Indicator of Recent Mattress Purchaser in a Target Market	Pre-Campaign Feb. 2025	Post-Campaign May 2025	Post-Campaign Dec. 2025
Knowledge of retailer take back	54%	51%	40%
Knowledge that mattresses can be recycled	58%	74%	57%
Knowledge that recycling is free	43%	51%	42%
Knowledge of how to dispose of a mattress so it can be recycled	54%	56%	31%
Recall of Bye Bye Mattress program name	38%	49%	20%

We will continue to measure advertising effectiveness in this manner while still conducting statewide research for strategic analysis and for trending purposes.

Spanish-Speaking Consumers

Awareness among Spanish-speaking consumers is measured in targeted zip codes where we offer outreach material and produce advertisements in this language. In each survey phase, we asked whether the respondent spoke Spanish and segmented those responses for standalone analysis. Most KPIs were consistent throughout the year among Spanish speakers. The one KPI that increased significantly throughout the latter part of the year was the knowledge that mattress recycling is free (11% increase in the last half of the year; 4% for the entire year).

TABLE 43: Key Performance Indices of Spanish-Speaking Consumer in a Targeted Market

Key Performance Indicator of Spanish-Speaking Consumer in a Target Market	Pre-Campaign Feb. 2025	Post-Campaign May 2025	Post-Campaign Dec. 2025
Knowledge of retailer take back	31%	31%	31%
Knowledge that mattresses can be recycled	54%	55%	56%
Knowledge that recycling is free	29%	22%	33%
Knowledge of how to dispose of a mattress so it can be recycled	26%	28%	28%
Recall of Bye Bye Mattress program name	16%	19%	17%

Based on these results, we will continue to incorporate Spanish-language outlets in advertising campaigns, offer a Spanish-language Public Service Announcement, provide dual-language outreach materials, and collaborate with Latino community leaders, elected officials, and nonprofit/community-based groups to keep Spanish-speakers informed.

Industry Relations

In 2025, we invited all 1,672 registered participants in North America (retailers, institutional sellers, manufacturers, distributors and renovators) to complete an annual survey. With 247 participants responding, the survey had a 15% response rate. Three-quarters of those respondents were registered participants in California (N=186).

The participation rate varied by industry sector:

- **Retailers/institutional sellers:** 153, or 82%
- **Manufacturers/distributors:** 40, or 22%
- **Renovators:** 4, or 2%

The total number of surveys doesn't equal the 186 total respondents because some respondents represented multiple registration types (e.g., a retailer and a manufacturer) and completed more than one survey.

Questions varied based on the respondents' role(s) in the industry. Generally, the survey assessed take-back measures, knowledge of obligations, satisfaction with MRC's program, customer service and resources. Major takeaways from the California respondent results are categorized below.

Retailers

Of the California retailers, 29% said that some portion of their sales were made online. Most (84%) sold from store locations—mostly department, furniture and mattress stores.

Most retailers (95%) said they proactively provided information explaining the recycling fee to their customers. The remainder (5%) said they only provided information about the fee upon request. Most (58%) provided program fee information using MRC's posters and/or cards.

Over half of retailers (56%) said they regularly take back customers' mattresses. Another 20% said they did so "sometimes," and 17% do not take back mattresses.

The ByeByeMattress.com website was used by 38% of respondents to locate a drop-off facility to recycle the mattresses taken back from customers. And 11% of retailers use third-party transporters to take back customer mattresses.

About a quarter of retailers (24%) said they had been contacted by CalRecycle to schedule an inspection. Another 23% may have been contacted by CalRecycle, but the respondents weren't sure. The remainder had not.

Similarly, 27% said they had completed their inspections. Another 35% weren't sure if they had completed their inspections or not. The remainder had not.

About two-thirds of respondents (65%) were extremely/somewhat satisfied with the program resources they receive from MRC, with 5% dissatisfied. The remaining 30% were neutral.

More than half (52%) of retailers had used MRC's Customer Service department in the past. The majority (66%) were satisfied with their experiences; 24% were neutral; 10% were dissatisfied.

Overall, more than half of respondents (57%) were extremely/somewhat satisfied with the MRC program; 16% dissatisfied; the remaining 27% neutral.

Manufacturers

Among the 23 manufacturers surveyed, the grand majority (87%) said they offer green/sustainable products and practices. Communications vehicles for conveying this information included sales materials (57%), manufacturer websites (39%) and/or product documentation (35%).

More than a third of the manufacturers surveyed (35%) were interested in participating in, or receiving more information about the program. Information was provided to interested parties.

Half of manufacturers (50%) said they were familiar with the regulatory agencies overseeing the recycling program in their states. The remainder were not familiar (25%) or not sure (25%).

Ten percent of the manufacturers said they had been contacted by CalRecycle to schedule an inspection. A quarter of respondents (25%) said they had already completed their inspections. Several others were unsure whether they had.

Most respondents (93%) were extremely/somewhat satisfied with the resources they received from MRC, while 7% were dissatisfied.

Most manufacturers (71%) have used MRC's Customer Service department in the past. Most of them (92%) were satisfied with their experiences, and 8% were dissatisfied.

Overall, three-quarters of respondents (75%) were extremely/somewhat satisfied with the MRC program; 13% dissatisfied; the remaining 12% neutral.

Renovators

Of the two renovators surveyed, one was interested in recycling old mattresses with MRC through CVP and one was interested in becoming a public collection site. Upon receiving these responses, we provided the renovators with information regarding these recycling options.

Both renovators were familiar with their annual CalRecycle reporting requirements.

One renovator had previously used MRC's Customer Service department and was extremely satisfied with the experience.

Likewise, the one renovator who evaluated MRC's resources and the program overall was extremely satisfied with both.

Appendices

Appendix A: Registered Manufacturers, Renovators, Retailers, Distributors and Brands

14 CCR § 18964(b)(4)

Registered Manufacturers, December 31, 2025

"Manufacturer" means any of the following:

(A) The person who manufactures a mattress and who sells, offers for sale, or distributes a mattress in the state.

(B) If there is no person who is a manufacturer of a mattress for purposes of subparagraph (A), the manufacturer is the person who imports the mattress into the state for sale or distribution.

Legend: In the Address field, the following abbreviations are used: Ave is avenue, Blvd is boulevard, Dr is drive, E is east, Fl is Floor, Hwy is highway, L is lane, N is north, Pkwy is parkway, Pl is place, Rd is road, S is south, St is street, Ste is suite, W is west.

Retailers, December 31, 2025

"Retailer" means a person who sells mattresses in the state or offers to a consumer a mattress in the state through any means, including, but not limited to, by remote offering, including sales outlets or catalogs, electronically through the internet, by telephone, or through the mail.

"Sale" or "sell" means the transfer of title of a mattress for consideration, including by a manufacturer, a distributor, or a retailer for eventual consumption to a consumer in the state, including remote sales conducted through sales outlets, catalogs, or the internet or any other similar electronic means. For purposes of this chapter, a long-term lease of not less than 12 months is the same as a sale.

Appendix C: Program Operations Materials

CALIFORNIA MATTRESS RECYCLING STANDARDS

The Mattress Recycling Standards (Standards) define the minimum requirements to be an approved Recycler for the Mattress Recycling Council (MRC). Under these Standards, mattresses must be managed and processed in a manner that adequately safeguards the environment, industry employees and consumers. The Standard also includes data tracking and reporting requirements.

The MRC reserves the right at its discretion to review and revise these Standards.

For purposes of these Standards, the term “mattress” should be interpreted to include both mattresses and foundations (or box-springs).

Background

The MRC is a non-profit organization formed by the International Sleep Products Association (ISPA) to develop and implement mattress recycling programs in states with laws requiring recycling of discarded mattresses.

Recyclers must comply with these Standards, contract terms and conditions and all legislative and regulatory requirements. Recyclers must have transparent operations, clear and documented recycling procedures and accurate tracking of all mattresses and components (including non-recyclable waste). All Recyclers will be audited under these Standards.

Disclaimer

The MRC does not intend for these Standards to constitute or provide legal guidance of any kind. The Recycler must be aware of and abide by all local, state, or federal laws and regulations applicable to the management of post-consumer mattresses or the business operation of the Recycler. In the event that these Standards are inconsistent with any such laws or regulations, the laws or regulations take precedence, and the Recycler must inform the MRC of such inconsistency.

1. General Requirements

Each Recycler shall:

1.1. Possess a current and valid business license and meet all applicable local, state and federal requirements for providing the type of recycling services required by the MRC.

1.2. Possess valid state approved permits, plans, and approvals, as applicable.

1.3. Comply, and be in good-standing, with all applicable federal, state, and local regulations including but not limited to:

- Department of Transportation (DOT) if providing any transportation services
- Occupational Safety and Health Administration (OSHA) and applicable local and state health and safety regulations
- Local and state fire department regulations, fire and building codes and other applicable building and occupancy safety requirements

1.4. Possess Commercial General Liability Insurance, including coverage for bodily injury, property damage, complete operations and contractual liability with combined single limits of not less than $1 million per occurrence and $2 million aggregate. Recycler's policy must be endorsed to name MRC, its directors, officers, employees, agents, assigns, as Additional Insureds. Recycler must carry its own Business Auto and Workers Compensation policies. Recycler shall require all third parties that it uses to provide any services under its contract with MRC to comply with the same insurance requirements specified in these Standards.

1.5. List the MRC as an additional insured party.

1.6. Possess and maintain in good standing workers compensation and unemployment insurance coverage through a state program or through private insurance policy or sufficient self-insurance coverage.

1.7. Maintain all records for a minimum of 4 years, including but not limited to shipping documents (both for goods received and shipped), processing, material disposal and sales records.

1.8. Develop and keep current a written plan that assures:

1.8.1. proper closure of the Recycler's facility or site in the event of sale, closure, abandonment, bankruptcy, any form of dissolution of the Recycler, or for any other reason;

1.8.2. against abandonment of any mattresses, mattress materials, or other products or materials processed by the Recycler in the event of closure; and

1.8.3. proper remediation of any contamination to the Recycler's facility or site in accordance with all applicable local, state and federal laws and regulations.

As part of that plan, the Recycler must obtain a bond or other financial instrument sufficient to pay for the closure activities described in the plan in the event that the Recycler itself is financially unable to perform all or some of such activities. The Recycler shall make such plan and bond or other financial instrument available for inspection by the MRC upon request.

1.9. Maintain a process to provide written notice of closure to the MRC with a minimum of 90-days advance notice.

1.10. Maintain a process to provide written notice to the MRC of any incidents that required the assistance of first responders within 24 hours of the occurrence. Provide written notice of any corresponding regulatory orders, fines or other governmental or administrative actions taken within 48 hours of receiving such orders or fines.

1.11. Maintain a documented process to record and track accidents, injuries or violations and any corresponding corrective and/or preventive actions taken.

1.12. Maintain a documented process to identify and communicate physical, mechanical, biological or pathogenic hazards and severity of such hazard to employees, and any corresponding corrective and/or preventive actions taken.

1.13. Maintain a documented process to identify and communicate potential fire hazards and severity of such hazards to employees, and any corresponding corrective and/or preventive actions taken.

2. Material Processing

Each Recycler shall implement and maintain a documented plan for deconstructing mattresses, which shall at a minimum require the Recycler to:

2.1. Fully disassemble the mattresses.

2.2. Recycle at least 75% by weight of the mattresses it processes by selling such material in appropriate markets for use in making new materials or products.

2.3. Minimize the quantity of material disposed of through landfills, incineration, or other non-recycling avenues.

2.4. Maintain a written policy describing how each mattress type and material (including pocket coils) will be processed.

2.5. Process all mattresses within 30 days of receipt at facility.

2.6. List criteria applied in determining when a given mattress cannot be processed.

3. Material Tracking

Each Recycler shall implement and maintain a documented plan to track and control mattresses entering their processing facilities and the flow of recyclable and non-recyclable materials generated through mattress deconstruction. The plan shall at minimum require the following:

3.1. Weigh all in-bound mattresses.

3.2. Maintain in-house or use third party annually calibrated and certified scale to weigh all in-bound and outbound materials on-site or document all out-bound shipments using third party calibrated and certified scales.

3.3. Maintain daily records of all receipts of used mattresses, mattress processing, sales or other dispositions of recycled or non-recyclable materials, and inventories.

3.4. Provide the MRC records for all parties providing discarded mattresses to Recycler in exchange for a collector incentive, including quantities received from and incentives paid to each party, and link such information to the inventory records required in 3.3.

3.5. Provide the MRC a list of all purchasers of recycled materials, and notify the MRC of any changes to that list at least 10 business days in advance (the MRC will treat this information as confidential). Recycler must obtain written approval from MRC for new facilities.

3.6. Train employees on how to prepare and maintain all necessary records and other documentation related to the receipt, processing, inventory and disposition of mattress and mattress materials.

3.7. Provide certificates of recycling for all material received and processed.

4. Downstream Due Diligence

Each Recycler shall have processes in place to identify, audit and approve all purchasers of recycled materials. The processes shall at a minimum require:

4.1. Annual desk audits to verify each purchaser's compliance with all applicable local, state and federal environmental and other requirements, and review of each purchaser's operating permits, environmental compliance permits, business licenses, insurance and certifications.

5. Bed Bug Management

Each Recycler shall implement and maintain a documented plan to identify and mitigate bed bug infestation in the facility and among employees. Components of the plan shall, at minimum, address the following provisions:

5.1. Document that all employees attended bed-bug identification and mitigation training.

5.2. Post bed bug identification posters in prominent work place location to encourage proactive identification and isolation of contaminated mattresses.

5.3. Clearly identify how infested mattresses will be isolated and either decontaminated or disposed.

5.4. Track the number and if possible, source of contaminated units.

Recordkeeping **C-15**

Program Withdrawal & Termination **C-16**

About the Guidelines

Staff at all participating collection sites must be knowledgeable regarding these guidelines before accepting mattresses. For simplicity, these guidelines will refer to mattresses and box springs and futons as mattresses. These guidelines describe the program and what is required to participate. MRC reserves the right to update, change, modify, amend, add or remove terms or otherwise alter these guidelines at any time with or without prior notice.

About the Mattress Recycling Council

In 2013, California enacted Senate Bill 254 as amended which requires mattress manufacturers to create a recycling program for mattresses discarded in the state. The bedding industry established the Mattress Recycling Council (MRC) to develop and operate the mattress recycling program known as Bye Bye Mattress.

What MRC Provides

MRC provides the following to participating collection sites:

- A collection container to store mattresses that is appropriate for the number of mattresses that the collection site expects to generate and the site's available space
- Transportation from the collection site to a contracted recycler
- No-cost mattress recycling services

CONTACTS

MRC Contacts: Visit our site here to view our current contact page.

Scan the above QR code to find a map of MRC's Program Coordinator's territories and your designated Program Coordinator contact.

payables@mrc-us.org

Transportation
For issues with your carrier, frequency of service, or access to the MyMRC portal contact:
transportation@mrc-us.org

PROGRAM MATERIALS

INCLUDED PRODUCTS

Mattresses: Defined as any sleep surface covered with ticking or fabric that contains resilient material such as steel innersprings, foam, fiber or other filling or upholstery materials, used alone or in combination, regardless of size or shape. This definition includes foam mattresses.

Futons: See mattress definition above. Futon mattresses must be detachable from the frame or base to be accepted. Futon mattresses that do not detach from the frame or base are not included.

Box springs also commonly called foundations: A ticking or fabric-covered structure used to support a mattress or sleep surface and may be comprised of a frame, foam, springs or other structure, or other materials, used alone or in combination, regardless of whether the product is stationary or adjustable.

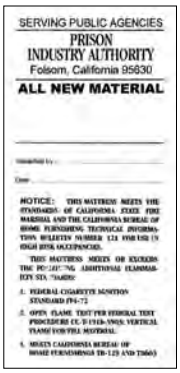

All items accepted for recycling by MRC must have been used and discarded in the state of California.

PROGRAM MATERIALS

EXCLUDED PRODUCTS

- Severely wet, damaged, twisted, frozen or soiled mattresses
- Adjustable bases not covered in ticking or fabric
- Air mattresses that contain no upholstery material (such as camping beds)
- Car beds
- California Prison Industry Authority units
- Collapsible roll-away beds
- Fold-out sofa beds
- Futon frames or bases
- Juvenile products including crib mattresses, carriages, baskets, dressing tables, strollers, playpens, infant carriers, lounge pad, crib bumpers
- Loose bedding, blankets or sheets
- Mattresses infested with bed bugs or other living organisms
- Mattress pads and toppers
- Metal bed frames
- Out-of-state mattresses
- Pillows and cushions
- Sleeping bags
- Water beds

PROGRAM MATERIALS

MATTRESS INSPECTION AND EXAMINATION

Collection site staff should screen incoming mattresses to determine whether they are suitable for recycling and should remove mattresses that are:

- Excessively wet or frozen
- Severely twisted, punctured or crushed
- Infested with bed bugs or other living organisms
- Exceptionally soiled or moldy

Mattresses not suitable for recycling should be disposed of through your existing solid waste stream or your nearby solid waste facility.

Bed Bug Identification

Mattresses and box springs infested with bed bugs are unacceptable for recycling and should be disposed of through your existing solid waste stream or your nearby solid waste facility. Staff at collection sites should evaluate program materials for evidence of bed bug infestation. A training webinar focused on dispelling health related myths, identifying bed bugs and offering best practices for protecting staff can be found here: **https://www.mattressrecyclingcouncil.org/resources**

Bed bugs are tan to brown in color, but may appear redder if they have fed.

Adult Bed Bugs are dorsally flat insects, broadly oval and the size of an apple or melon seed (1/4").

Nymphs look like adults in shape but are smaller.

Eggs are white and barrel-shaped.

Signs of bed bug activity may be more obvious than the insects themselves. Look for clusters of dark spots or smudges on mattresses (fecal spots), especially along seams. Eggs, shed skins and all life stages of bed bugs may also be present in these 'soiled' areas.

For more information on bed bugs, please refer to the resources made possible by the **Connecticut Coalition Against Bed Bugs at www.ct.gov/caes/CCABB**

QUALITY STANDARDS

Acceptable Quality

IMPORTANT: Only units used and discarded in California are accepted by the program.

Shown here are examples of acceptable units.

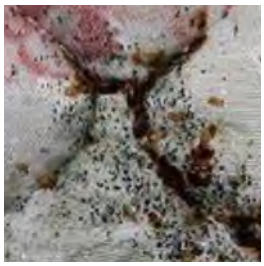

Other Conditions:

- Futons (with base detached)
- Adjustable beds (if covered with fabric and ticking)
- All-foam mattresses

Unacceptable Quality

Shown here are examples to illustrate severe damage, heavy soiling and infestation.

Other Conditions:

- Out-of-state mattresses
- Severely damaged or soiled mattresses
- Mattress that have been stripped of padding components.
- Pillows and cushions
- Fold-out sofa beds and futon frames or bases
- Loose mattress pads, toppers
- Loose bedding, blankets, or sheets
- Water beds
- Fire damaged units

MATERIALS COLLECTION & HANDLING

Each collection site will have unique operational considerations. Participating sites must make their own decisions about how to best manage their operations in the safest manner possible in accordance with applicable laws. At a minimum, each participating site must meet these requirements:

MINIMUM PROGRAM REQUIREMENTS	
SITE	Each collection site must be secure with adequate space and staffing to handle and store acceptable mattresses.
PERMITS	Each collection site must have knowledge of and comply with all applicable federal, state and local laws. These may include, but are not limited to, zoning requirements, state permit requirements and OSHA or other workplace requirements. Please contact your Local Enforcement Agency (LEA) to confirm whether your site is in compliance with all applicable notifications or requirements for accepting mattresses for recycling at your site. In many cases, this will be your county or local Public Health Department.
INSURANCE	Each collection site must maintain general liability insurance of at least $1,000,000 per occurrence and workers compensation coverage, as required by statute.
TRAINING	Staff at each collection site must be trained and knowledgeable regarding these guidelines before accepting mattresses for recycling.
STORING & LOADING MATTRESSES **See page 9 for photos and guidelines**	Collection sites must keep mattresses dry by storing in weatherproof containers or under cover to maximize their recyclability. In addition, all collection sites must: • Make every effort to place mattresses in MRC-designated storage containers immediately upon acceptance • Store units off the ground and make every effort to keep container doors closed • Keep mattresses intact and not intentionally crush or puncture them • Efficiently stack mattresses to maximize the number of units loaded in each storage container • Provide oversight to keep unacceptable items out of MRC-designated storage containers • Remove any non-program materials from MRC-designated storage containers before transport to MRC recyclers • Practice good housekeeping standards and keep storage containers and program materials in a neat and orderly condition
SITE ACCESS	Collection sites must allow MRC on-site access to confirm compliance with these guidelines.

MATERIALS COLLECTION & HANDLING

LOADING MATTRESSES IN STORAGE CONTAINERS

Expected number of mattresses that should fit in various container sizes:

Container Type	Number of Mattresses
20-foot sea container	30-45
28-foot trailer	60-95
40-foot sea container	75-95
40-yard roll-off container	35-50
48-foot trailer	110-180
53-foot trailer	125-190

Acceptable Loading

1. **Begin each stack with a queen or full size box spring.** This acts as a base pallet to create a secure stack and makes unloading of mattresses quick and efficient.
2. **Mattresses should be stacked horizontally** to the top of the trailer to maximize space.
3. In small quantities, king size mattresses can be placed vertically next to a stack of horizontal mattresses. If there are more than 10 king size units, stack horizontally.

Unacceptable Loading

IMPORTANT: Do not load units vertically or in an unsafe manner.

Please contact your Program Coordinator to learn more about acceptable/non-acceptable units and appropriate stacking and loading techniques.

TRANSPORTATION & PROCESSING

TRANSPORTERS

MRC will assign each collection site a transporter to provide a storage container and transportation services.

- MRC-contracted transporters must maintain commercial general liability and automobile insurance coverage of at least $1,000,000 per occurrence
- Each collection site must notify transporter at least two business days before a storage container is full of mattresses
- Each collection site must request a haul through MyMRC
- On the scheduled pick up day, the collection site must make the collection container readily accessible to the transporter

A collection site may choose to provide its own storage container(s) and transportation. These locations must schedule appointments with the recycler on MyMRC to select a drop-off time.

RECYCLERS

Recyclers under contract with MRC will meet established recycling standards and accurately account for all mattresses received, the mattress components recycled (e.g., foam, steel, wood, fiber, etc.) and any residual disposal. Collection sites will be assigned an MRC recycler to best service your facility.

RECORDKEEPING

MyMRC:

MyMRC is a secure, online portal for collection sites, transporters, and recyclers. Upon activation, those assigned a user account will receive an email with their username and password.

MyMRC serves as a central location for all involved in the collection, transportation, and recycling of mattresses to more efficiently coordinate logistics and access real-time data. Once logged in, there is a personalized experience:

Collection Sites will use MyMRC to request pickups, cancel pickups, report feedback to MRC, and access detailed reports about the units collected on site.

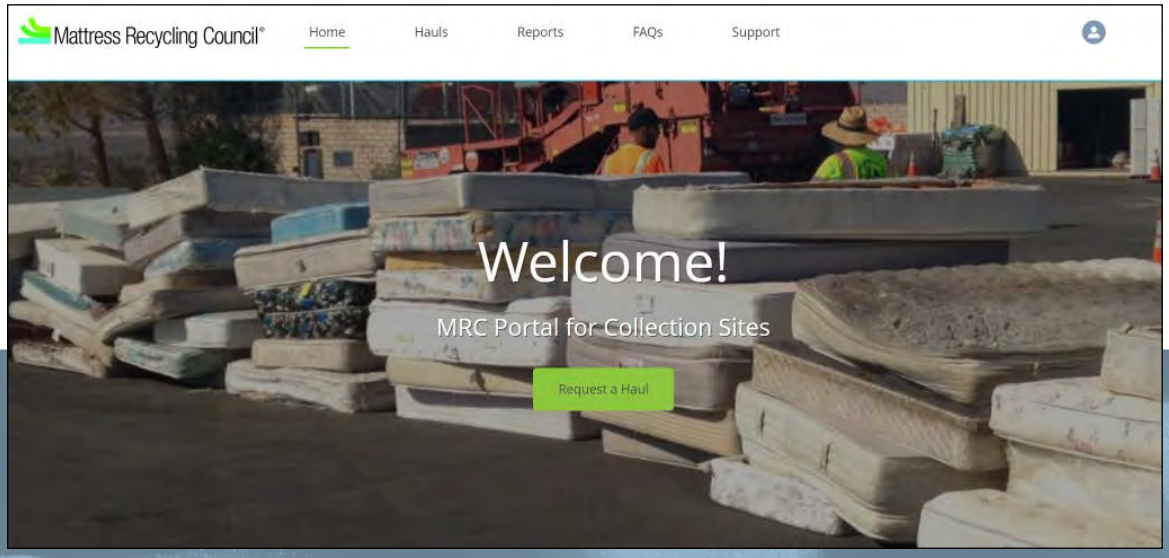

Transporters will use MyMRC to manage pickup requests (accepting, rejecting or diverting them), make docking appointments with recyclers, and report feedback to MRC regarding completed pickups or issues experienced with a haul. Detailed reporting and dashboards will be available as well.

Annual Reporting to CalRecycle:

Per the law, mattress recyclers, renovators, and solid waste facilities, as defined by Public Resources Code section 42986, must submit an annual report to CalRecycle by May 1 each year.

See CalRecycle's website for more information:
https://www.calrecycle.ca.gov/Mattresses/AnnualReport/

The annual reports must meet the requirements listed in Title 14, California Code of Regulations (CCR) sections 18965-18967, which includes contact information and quantitative information. Annual reports are used by CalRecycle and MRC to assess the program and establish and update the mattress recycling goals for the state. To pull a record of your site's annual collection data, you can navigate to the "Hauls" tab in MyMRC. Under this tab, you will be able to pull the needed mattress collection counts and weights for Cal Recycle or other internal/external reporting.

PROGRAM WITHDRAWAL & TERMINATION

A collection site's participation in MRC's Bye Bye Mattress program in California is voluntary. Either party may withdraw from participation in accordance with the terms in your contract. Written notice to the other party is required. MRC reserves the right to remove any collection site not in compliance with these guidelines from further participation in the program. To withdraw from MRC's Bye Bye Mattress program, please reach out to your Program Coordinator (see page 3 for contact details).

If the Bye Bye Mattress Program is creating on-site operational challenges for your staff, please reach out to your Program Coordinator (see page 3) for technical assistance and information about our available site improvement funding.

MRC reserves the right to update, change, modify, amend, add or remove terms or otherwise alter these guidelines at any time with or without prior notice.

ABOUT THE PROGRAM

Mattress Recycling Council

The Mattress Recycling Council (MRC) is a nonprofit organization formed by the bedding industry to operate the Bye Bye Mattress recycling program in states that have enacted mattress recycling laws – California, Connecticut and Rhode Island.

In each of these states households and businesses now have no-cost options to recycle mattresses. Businesses may recycle through the Commercial Volume Program by dropping off units directly at a participating location or eligible entities can arrange transportation with MRC. Households may directly recycle through a local collection site or event or indirectly through a residential bulky item curbside collection program or retailer that takes back old units when delivering new ones.

Bye Bye Mattress is made possible when consumers purchase a mattress or box spring. Fees vary by state and each state fee funds that state's program. The fee is primarily used to establish collection sites and events, transport mattresses from those locations to recyclers and cover the cost to disassemble the mattresses. Portions of the fee are also used for combatting illegal dumping, researching improvements to the recycling process and identifying new uses for materials, as well as conducting public education and outreach.

Commercial Volume Program

MRC provides California businesses and organizations the following opportunities to recycle mattresses at no cost.

- Any business or organization may drop off any number of units at a participating recycler. Contact the desired location to make arrangements. View the current listing at: byebyemattress.com/programs-by-state/ca-commercial-sites/
- Any business or organization may drop off units at a site that is accepting commercial volume at no cost. Unit limits may apply or an appointment may be required. View the current listing at: byebyemattress.com/programs-by-state/ca-commercial-sites/
- Eligible entities (ie: retailers, health care facilities, educational facilities, military bases, and lodging establishments) with at least 100 units to recycle can request transportation services. 14 days advance notice required. Contact MRC for details.

Contact:
Joy Broussard, 707-394-8620
cvp@mrc-us.org

PICKUP ELIGIBILITY AND PARTICIPATION REQUIREMENTS

MRC provides no-cost transportation and recycling of mattresses to eligible entities (ie: retailers, health care facilities, educational facilities, military bases, and lodging establishments) with at least 100 units to discard. All units must have been used and discarded in California and MRC requires 14 days notice to secure transportation.

Eligibility

RETAILERS

- Must be registered with MRC, remitting the recycling fees and compliant with all provisions of California's Used Mattress Recovery and Recycling Act.
- Must have accumulated a minimum of 100 units. Partnering with other local businesses, organizations or allowing public drop-off to reach the minimum is permitted.
- Those collecting at least 100 units monthly may request a permanent trailer.

OTHER COVERED ENTITIES

Hotels & Lodging Facilities, Universities & Educational Facilities, Military Bases, Healthcare

- Must have accumulated a minimum of 100 units. Partnering with other local businesses, organizations or allowing public drop-off to reach the minimum is permitted.

Participation

To receive MRC's assistance with transporting and recycling mattresses, the eligible entity must:

- Complete a registration form and return it no later than 14 days in advance of the desired pickup date.
- Agree to follow these guidelines.
- Provide a collection area that is capable of allowing access to a 53-foot trailer.
- Provide a minimum of two staff members to assist with loading units into the provided trailer.

PROGRAM MATERIALS

INCLUDED PRODUCTS

Mattresses: Defined as any sleep surface covered with ticking or fabric that contains resilient material such as steel innersprings, foam, fiber or other filling or upholstery materials, used alone or in combination, regardless of size or shape. This definition includes foam mattresses.

Futons: See mattress definition above. Futon mattresses must be detachable from the frame or base to be accepted. (Futon mattresses that do not detach from the frame or base are not included.)

Box springs (also commonly called foundations): A ticking or fabric-covered structure used to support a mattress or sleep surface and may be comprised of a frame, foam, springs or other structure, or other materials, used alone or in combination, regardless of whether the product is stationary or adjustable.

All items accepted for recycling by MRC must have been used and discarded in the state of California.

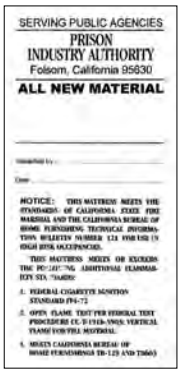

Mattresses from out of state sources cannot be recycled using MRC's program.

PROGRAM MATERIALS

EXCLUDED PRODUCTS

- Severely wet, damaged, twisted, frozen or soiled mattresses
- Adjustable bases not covered in ticking or fabric
- Air mattresses that contain no upholstery material (such as camping beds)
- Car beds
- California Prison Industry Authority units
- Collapsible roll-away beds
- Fold-out sofa beds
- Futon frames or bases
- Juvenile products including, carriages, baskets, dressing tables, strollers, playpens, infant carriers, lounge pad, crib bumpers
- Loose bedding, blankets or sheets
- Mattresses infested with bed bugs or other living organisms
- Mattress pads and toppers
- Metal bed frames
- Out-of-state mattresses
- Pillows and cushions
- Sleeping bags
- Water beds

PROGRAM MATERIALS

MATTRESS INSPECTION AND EXAMINATION

Facility staff should screen incoming mattresses to determine whether they are suitable for recycling and should remove mattresses that are:

- Excessively wet or frozen
- Severely twisted, punctured or crushed
- Infested with bed bugs or other living organisms
- Exceptionally soiled or moldy

Mattresses not suitable for recycling should be disposed of through your existing solid waste stream.

Bed Bug Identification

Mattresses and box springs infested with bed bugs are unacceptable for recycling and should be disposed of through your existing solid waste stream. Facility staff should evaluate program materials for evidence of bed bug infestation. A training webinar focused on dispelling health related myths, identifying bed bugs and offering best practices for protecting staff can be found here: **https://www.mattressrecyclingcouncil.org/resources**

Bed bugs are tan to brown in color, but may appear redder if they have fed.

Adult Bed Bugs are dorsally flat insects, broadly oval and the size of an apple or melon seed (1/4").

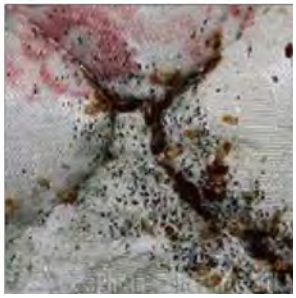

Nymphs look like adults in shape but are smaller.

Eggs are white and barrel-shaped.

Signs of bed bug activity may be more obvious than the insects themselves. Look for clusters of dark spots or smudges on mattresses (fecal spots), especially along seams. Eggs, shed skins and all life stages of bed bugs may also be present in these 'soiled' areas.

For more information on bed bugs, please refer to the resources made possible by the **Connecticut Coalition Against Bed Bugs at www.ct.gov/caes/CCABB**

QUALITY STANDARDS

Acceptable Quality

IMPORTANT: Only units used and discarded in California are accepted by the program.

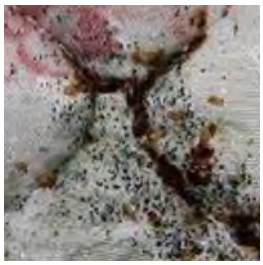

Shown here are examples of acceptable units.

Unacceptable Quality

Shown here are examples to illustrate severe damage, heavy soiling and infestation.

Other Conditions:

- Out-of-state mattresses
- Severely damaged or soiled mattresses
- Mattress that have been stripped of padding components.
- Pillows and cushions
- Fold-out sofa beds and futon frames or bases
- Loose mattress pads, toppers
- Loose bedding, blankets, or sheets
- Water beds
- Fire damaged units

MATERIALS COLLECTION & HANDLING

Each facility's collection site will have unique operational considerations. Participating facilities must make their own decisions about how to best manage their operations in the safest manner possible in accordance with applicable laws. At a minimum, each facility's collection site must meet these requirements:

MINIMUM PROGRAM REQUIREMENTS	
SITE	Each collection site must be secure with adequate space and staffing to handle and store acceptable mattresses.
PERMITS	Each collection site must have knowledge of and comply with all applicable federal, state and local laws. These may include, but are not limited to, zoning requirements, state permit requirements and OSHA or other workplace requirements. Please contact your Local Enforcement Agency (LEA) to confirm whether your site is in compliance with all applicable notifications or requirements for accepting mattresses for recycling at your site. In many cases, this will be your county or local Public Health Department.
INSURANCE	Each collection site must maintain general liability insurance of at least $1,000,000 per occurrence.
TRAINING	Staff at each collection site must be trained and knowledgeable regarding these guidelines before accepting mattresses for recycling.
STORING & LOADING MATTRESSES **See page 10 for photos and guidelines**	Collection sites must keep mattresses dry by storing in weatherproof containers or under cover to maximize their recyclability. In addition, all collection sites must: • Make every effort to place mattresses in MRC-designated storage containers immediately upon acceptance • Keep mattresses intact and not intentionally crush or puncture them • Efficiently stack mattresses to maximize the number of units loaded in each storage container • Provide oversight to keep unacceptable items out of MRC-designated storage containers • Remove any non-program materials from MRC-designated storage containers before transport to MRC recyclers • Practice good housekeeping standards and keep storage containers and program materials in a neat and orderly condition
SITE ACCESS	Collection sites must allow MRC access to confirm compliance with these guidelines.

LOADING INFORMATION

LOADING MATTRESSES IN STORAGE CONTAINERS

Expected number of mattresses that should fit in various container sizes:

Container Type	Number of Mattresses
20-foot sea container	30-45
28-foot trailer	60-95
40-foot sea container	75-95
40-yard roll-off container	35-50
48-foot trailer	110-180
53-foot trailer	125-190

Acceptable Loading

1. **Begin each stack with a queen or full size box spring.** This acts as a base pallet to create a secure stack and makes unloading of mattresses quick and efficient.
2. **Mattresses should be stacked horizontally** to the top of the trailer to maximize space.
3. In small quantities, king size mattresses can be placed vertically next to a stack of horizontal mattresses.
4. If there are more than 10 king size units, stack horizontally.

Unacceptable Loading

IMPORTANT: Do not load units vertically or in an unsafe manner.

Please contact your Program Coordinator to learn more about acceptable/non-acceptable units and appropriate stacking and loading techniques.

TRANSPORTATION & PROCESSING

TRANSPORTERS

MRC will assign each collection site a transporter to provide a storage container and transport services.

- MRC-contracted transporters will provide participating facilities with evidence of automobile insurance coverage of at least $1,000,000 per occurrence.
- Each facility should notify transporter at least two business days before a storage container is full of mattresses if a permanent container is on site.
- The assigned transporter will pick up full containers within two business days of notification and drop off an empty container at the same time.
- On the scheduled pick up day, the facility must make the collection container readily accessible to the transporter.
- At the time of pick-up, facility staff must be present to sign a three-part Bill of Lading (BOL) supplied by the transporter that details the quantity of mattresses in the container and must provide appropriate copies of the BOL to the transporter.

A facility may choose to provide its own storage containers and transportation at its own cost. View a current list of locations that accept commercial volume at byebyemattress.com/programs-by-state/ca-commercial-sites/.

RECYCLERS

Recyclers under contract with MRC will meet established recycling standards and accurately account for all mattresses received, the mattress components recycled (e.g., foam, steel, wood, fiber, etc.) and any residual disposal. MRC will assign a recycler to best service your facility.

RECORDKEEPING

Bill of Lading:

A Bill of Lading (BOL) will be provided by the transporter. Before a full container leaves the site, the BOL must be completed and signed by facility staff.

PROGRAM WITHDRAWAL & TERMINATION

An entity's participation in MRC's Commercial Volume Program is voluntary. Either party may withdraw from participation with 10 days written notice to the other party. MRC reserves the right to remove any entity not in compliance with these guidelines from further participation in the program.

CUSTOMER ANALYTICS
IDEAS TO SOLUTIONS

Appendix D: GIS Methodology

Customer Analytics: MRC Convenience Analysis—Spring 2026 Technical Details

Summary

The Mattress Recycling Council (MRC) requested that Customer Analytics determine how many and what percent of the population in California has convenient access to recycle mattresses in California using the 2025 Collection Network. A combination of standard and spatial analyses was performed to determine convenience rates by geographic and consumer attributes.

A related analysis on the convenience of retailers to recycle used mattresses was also requested. It shares many similarities to consumer analysis and inputs from the consumer work were used to calculate convenience rates for retailers using consumer convenience as a proxy.

Details

To perform the analysis, MRC and Customer Analytics had to define:

- Level of geographic detail the data can support
- What population data would be analyzed:
    - Total
    - In Environmental Justice Communities
    - Rural
- Eligible collection network entities
- Convenience

Geography

The working geography for this analysis is 2020 Census Block Groups. Apart from census blocks, this is the smallest level of geographic detail for which data from government sources are available. It is also the smallest unit of geography for which information on dwelling type is available. This information is necessary for the analysis of certain types of collection programs.

The state of California has just over 25,000 Census Block Groups, which have an average population of 1,500 people. Census Block Groups are subdivisions of Census Tracts, which are subdivisions of Counties. In other words, Block Groups roll up to Tracts which roll up to Counties. Each Census Block Group has a unique, 12-character ID. The first 11 digits of that ID are the Census Tract the Block Group falls inside. The first 5 characters of the ID are the County. This allows us to transfer attributes of Counties or Tracts to Census Block Groups directly.

Population

Small area population data was obtained from the US Census Bureau's American Community Survey (ACS). Customer Analytics downloaded block group and census tract level data for BR25033: Total Population in Occupied Housing Units by Tenure by Units in Structure from 2020 to 2024, 5-year ACS via the Census Bureau's FTP site. These data were summarized into the population living in single family dwellings and multifamily dwellings.

The population living in households with less than 5 units is considered single family, whereas 5 or more units is considered multifamily. This was required to support bulky item collection programs that only service single family dwellings described later.

Environmental Justice

One of the populations that MRC asked Customer Analytics to analyze separately is the population in Environmental Justice Communities ("EJ"). California's EnviroScreen 4.0 (October 2021 release) data was used to determine how many people in a Census Block Group are in EJ Communities. EJ Communities are those Census Tracts CalEnviroScreen defines as Disadvantaged Communities. Disadvantaged Communities are "the top 25% scoring areas from CalEnviroScreen along with other areas with high amounts of pollution and low populations."

As previously noted, Census Block Groups roll up into Census Tracts, which allows us to apply the EJ Community status from Tracts to Block Groups. Once applied, an estimate for the population in EJ Communities for both single and multifamily populations were created. The table below displays the total population and population by EJ Community status.

TABLE 1: California Population by EJ Community Status
(2024 Census Bureau Survey Counts and 2021 Enviroscreen Score)

Population	Number
Total Population	39.3 Million
Population in EJ Communities	9.4 Million
Population in Non-EJ Communities	29.9 Million

Estimates based on 2020–2024 ACS Census Block Group Population; Environmental Justice Communities from Enviroscreen 4.0.

Rural

Part of the requested convenience analysis is to analyze convenience for the rural population of California. MRC requested that Customer Analytics define a rural county as being consistent with Cal. Pub. Res. Code § 40184, which in general defines a rural county as one that disposes of less than 200,000 tons of waste. See the Rural County List located in this appendix for the list of counties that are considered rural for the purposes of this analysis. The county's status as being Urban or Rural is then applied to the Census Block Groups within it, allowing various reports to be summarized by this status.

Retailers

Retailer convenience is determined by the same process used to measure consumer convenience, using consumer convenience as a proxy for retailer convenience.

There are two changes applicable only to retailer convenience analysis:

- Only those collection network facilities that accept units from commercial entities are included.
- The population in rural areas are considered to have convenient access if the distance to a site is less than 40 miles, while in urban areas it must be within 20 miles.

Collection Network Entities

The Mattress Recycling Council provided Customer Analytics with a list of the entities that provide mattress recycling in California. This network of entities is composed of sites wherein consumers transport mattresses directly as well as bulky item programs where the mattress is picked up directly from the consumer's home.

The sites include permanent collection sites, recyclers and events. In all cases, the sites were marked as servicing consumers, commercial customers, or both. For residential convenience analysis, only those collection sites that service consumers or both consumers and commercial customers are considered.

The bulky item programs are classified in two different ways. The first type are those programs that participate with MRC's recycling program. The other type are other bulky item pick-up programs available to consumers that do not participate in MRC's program. For standard convenience analysis, only those that participate with MRC's recycling program are included.

In addition to segmenting between "participating" or "generally available" programs, bulky item programs are also classified by the consumers they service. All bulky item programs service single family dwellings, but some do not service multifamily dwellings.

Both types are included in convenience analysis, but the multifamily population is excluded if the area is only serviced by a bulky item program that exclusively services single family dwellings and is not covered by a collection site.

Exclusively for the retailer convenience analysis, Commercial Volume Program (CVP) consolidation locations were provided to Customer Analytics. These are fixed locations that are used to centralize pick-up for numerous retail chains in the State of California. Any retailer convenience analysis included these sites in addition to the permanent sites and recyclers that service commercial customers.

Collection Network Spatial Coverage

The two types of collection network entities require two approaches to determine the areas that they service.

Sites

MRC requested that Customer Analytics consider a collection site to service a consumer if they are within a 15-mile straight line distance of the site for consumer analysis. As individual consumer to site data is not available, the proximity of the Census Block Group is used to determine if the population within that Block Group is considered serviced or not using the population centroid of each Block Group. Customer Analytics uses the Haversine distance formula when calculating the distance between two points.

The population centroid is superior to the geographic centroid as it is more representative of the population living in that Block Group. This is particularly important in Block Groups with uninhabitable areas such as bodies of water, forests, and deserts.

For a limited number of Collection Sites, there are residency requirements that limit who is eligible to recycle a mattress to residents of a city or one or more counties. A consumer must reside in those eligible geographies and meet the distance criteria to be considered to have convenient access.

Bulky Item

The bulky item programs service a consumer if they live within the area serviced by the bulky item collection program. Each bulky item program's service area is defined by ZIP code, municipal boundary, unincorporated areas within a county, or a description of their service area. Each Census Block Group in California was coded as being in or outside of the service area of one or more bulky item programs. Census Block Groups were identified using a ZIP Code to Census Block Group crosswalk developed by Customer Analytics.

Through spatial joins in ArcMap, Census Block Groups were identified as being in a place or in the unincorporated areas of a county, when applicable, mapped to bulky item programs covering those areas. Description-based service areas were converted to boundary files, which were used to spatially select the Census Block Groups that fall within the area.

Customer Analytics: MRC Illegal Mattress Dumping Analysis—Spring 2025 Technical Details

Summary

The Mattress Recycling Council ("MRC") requested that Customer Analytics use multivariate statistical analyses to determine the following from the 2025 illegal dumping data:

- What preventative measures/opportunities for non-cost management of discarded mattresses affect illegal dumping.
- How demographic/socio-economic characteristics affect illegal dumping within a ZIP code.

As noted in the report, the data suggests that communities near collection events and recyclers are associated with less dumping, and these relationships are statistically significant in 2025. However, as in previous years, we have not yet detected a statistically significant effect of Bulky Item Programs on dumping.

ZIP codes with high concentrations of poverty, renters and multifamily dwelling types (e.g., apartment complexes) are associated with higher dumping rates. To avoid potential ecological fallacies, we should be careful to note that it is possible that people outside of these areas may have dumped mattresses into these areas.

Data Source Details

Illegal Dumping

Illegal Mattress Dumping by member, ZIP code, and month were provided by MRC.

As the finest geography available with mattress dumping was the ZIP code, the data compiled to perform this analysis was narrowed down to the ZIP code level (by month). Data provided by differing types of boundaries (i.e., "places" and "tracts") were allocated to ZIP codes based on overlapping shares of populations within these boundaries.

Demographic and Socio-Economic Characteristics

CalEnviroScreen ("CES") 4.0 (October 2021) data were used as the source of Environmental Justice ("EJ") Communities[1], Pollution, Poverty, Total Population and % Elderly (Aged 65+) figures. CES's Pollution Burden Score was derived from their collection of numerous pollution exposure scores (such as ozone, pesticides, hazardous waste, etc.).[2]

CES defines poverty as anyone living in a household with income that is up to two times the federal poverty level. CES's poverty data is sourced from 2016 to 2020 ACS. Total Population as well as % Elderly were drawn from CES's spreadsheet which also draw from the 2016 to 2020 ACS. As these data are provided at the tract level, we produce a weighted average of these scores by the ZIP code where each tract's contribution to the average is weighted by the population within the tract.

Additional demographic characteristics, namely percentage of renting households or percentage of households in multifamily units, were derived from Customer Analytics' internal estimates which are derived from 2020 to 2024 ACS data.

MRC requested that Customer Analytics define a rural county to be consistent with Cal. Pub. Res. Code § 40184, which in general defines a rural county as one that disposes of less than 200,000 tons of waste annually. See the Rural County List included in this appendix for the list of counties that are considered rural for the purposes of this analysis. The county's status as being Urban or Rural is then applied to ZIP codes within the county.

[1] "Environmental Justice" Communities, referred to as Disadvantaged Communities in the CES data.
[2] See the OEHHA Pollution Indicators page as well as the CalEnviroScreen 4.0 Report.

Collection Network Entities

The MRC provided Customer Analytics a list of locations that accept mattresses for recycling as part of MRC's program for mattress recycling in California. This network of entities is comprised of sites wherein consumers transport mattresses directly to a site for recycling. The sites include permanent collection sites, recyclers and events. Also under consideration are bulky item programs, where the mattress is picked up directly from the consumer's home.

Model Details

A linear regression model ("ordinary least squares") was used to determine which factors were related to higher per capita dumping. To preserve reasonable distributions, we applied logarithmic transformations on the dumps per capita as the dependent variable for the main analyses.

When applicable, we also considered the Pollution Burden Score, % EJ, Poverty Score, % Elderly, % Renter, Rural ZIP Code (yes/no), and % Multifamily Units in our analysis as these variables may capture some of the ZIP codes' defining environmental and demographic characteristics. Month variables (January, February, …, December) were included to account for seasonality. Finally, the number of months for which a ZIP code reported dumps (1, 2, …, 12) was taken into consideration, as the results may be affected by differential reporting rates by the level of cooperation of the ZIP code.

The presence of events, collection sites, recyclers and bulky item programs accessible to a given ZIP code were also considered to determine which of these programs potentially affect dumping behavior.

"CUIDANDO LA TIERRA"

Abre a una acera arbolada. La cámara enfoca (sobre nuestro personaje principal, la "Tierra" (que es un 'hombre con un traje de la Tierra). SFX: Música divertida y alegre

Descripción	Voz
Abre con la Tierra en un trote por la acera arbolada sonriendo y saludando a la gente.	Queremos una Tierra sana.
Corte a la Tierra angustiada encontrando un colchón en un callejón, e intenta moverlo él mismo, pero es demasiado pesado.	Pero seamos sinceros, somos muy duros con ella.
Corte a la Tierra dentro de una casa familiar, la madre está en un ordenador portátil con su hijo a un lado y la abuela en el otro lado. Corte a un primer plano de la pantalla que muestra el sitio web de BBM el colchón explotado en un lado y los nuevos productos en el otro.	Reciclar los colchones viejos ayuda a nuestro medio ambiente: el acero, la espuma, la fibra y la madera pueden utilizarse para hacer cosas nuevas.
La mano de la Tierra toca la pantalla y las "3 maneras de í reciclar» aparecen.	También hay formas fáciles de hacerlo.- - ("en voz baja") ¡y son totalmente GRATIS!
La cámara corta a la Tierra sonriente y cabeceando.	Menos residuos hacen una Tierra más feliz
La cámara se desplaza a una vista amplia y vemos al padre y a la hija adolescente sacando un viejo colchón con la Tierra entusiasmada observando (la madre, el hijo, - y la abuela son visibles en el sofá en primer plano).	Aprenda a reciclar su colchón en ByeByeMattress punto com hoy.
Super: logo de Bye Bye Mattress www.ByeByeMattress.com en él	blank
La Tierra corre y abraza a la familia.	La Tierra lo AMARÁ por ello.

Customer Questions about the Mattress Recycling Fee

bye bye mattress®
A Program of the Mattress Recycling Council®

This list of frequently asked questions (FAQs) is here to help. Please share with your staff.

1. Why do I have to pay the recycling fee and what is it for?
State law requires retailers to collect a recycling fee on each mattress and box spring that is sold. The fee funds the state's mattress recycling program and provides for collection, transportation and recycling of old mattresses and box springs. The amount of the fee is the same statewide and is not controlled by individual retailers. More than 75 percent of a mattress can be recycled into new consumer and industrial products. The recycling program diverts valuable materials from landfill and helps keep bulky waste like mattresses and box springs out of the waste stream.

2. Who is the Mattress Recycling Council?
The Mattress Recycling Council (MRC) is a nonprofit organization that operates recycling programs known as Bye Bye Mattress in states that have passed mattress recycling laws. MRC was founded by the bedding industry and recycles more than 1.7 million mattresses each year. For more information about MRC, go to www.MattressRecyclingCouncil.org. To learn how to recycle your mattress or to find a collection location or event near you, visit www.ByeByeMattress.com.

3. If I don't plan to discard a mattress now, why do I have to pay this fee?
Even if you aren't discarding a mattress right now, mattresses don't last forever and will eventually be discarded. State law requires retailers to collect this fee on any mattress or box spring sale to fund the state's mattress recycling program. This program provides a network of participating cities, towns, retailers, recyclers and other organizations where old mattresses are collected for recycling at no additional cost to you. The fee also supports efforts to combat illegal dumping of mattresses and help keep our community clean.

4. If I decide to take my old mattress to a recycler myself, do I still pay the fee?
Yes, state law requires retailers to collect this fee on any mattress and box spring sale at the time of purchase to fund the mattress recycling program. You may receive a modest financial incentive if you drop off your used mattress or box spring at a designated recycling location. Visit www.ByeByeMattress.com to find the location nearest you.

5. I didn't pay this fee when I bought my old mattress, so will it be accepted for recycling?
Yes, the Bye Bye Mattress program will accept your old mattress no matter when it was originally purchased. To be recycled, units must be clean and dry. Normal wear and tear is expected. Units infested with bed bugs or that are heavily soiled or damaged cannot be recycled.

6. My old mattress was "unacceptable" for recycling. Can you refund my recycling fee?

No, state law requires retailers to collect this fee on any mattress and box spring sale to fund the mattress recycling program. The law does not force retailers to accept every mattress for recycling out of concern for employee health and safety. Store policy, in addition to the guidelines of the recycling program, determine what we will and won't accept. If your mattress is unacceptable for recycling, contact your city or town to learn what disposal options are available.

7. What are the benefits of mattress recycling?

Mattress recycling programs offer many benefits for the community, state and environment, including:

- Less reliance on incinerators and landfills by diverting mattresses from the waste stream
- Reduces the number of illegally dumped mattresses
- Conserves resources by making used steel, foam and other materials available for use in new products
- Creates recycling jobs

8. What happens to my old mattress or box spring when it gets recycled?

Recycled mattresses are cut open and the layers are separated and organized by type. Wood is recycled and used as a fuel source or shredded to produce landscaping mulch. Foam, fiber and other soft commodities are compressed and turned into carpet underlayment or animal bed padding. Metal and box springs are extracted, sent to recyclers and used to make new appliances and building materials.

9. Will the Mattress Recycling Council or Bye Bye Mattress program pick up my old mattress from my home?

If your store takes back old mattresses:

No, but our store offers this service at time of delivery of your new mattress. (If your store recycles with the program, please let the customer know. Otherwise direct them to drop off their mattress at one of our free collection points listed on www.ByeByeMattress.com.)

If your store does not take back old mattresses, your response should be:

Mattresses are collected from a vast network of free collection sites throughout the state. These are typically public works yards or transfer stations. Your city/town may also collect bulky items at curbside as part of your trash service. Visit www.ByeByeMattress.com to see what options are available. The Mattress Recycling Council or the Bye Bye Mattress program does not pick up mattresses from customer's homes.

California Retailer Take Back Requirement

In California, mattress retailers are required by law to offer to take back old mattresses at no extra cost when delivering new ones. This applies to any method of delivery

(in-house, third-party and even common carriers like USPS, UPS, FedEx). Your customer may be aware of this or mention having heard or seen this in an ad.

Please make information available on your website, in the purchasing process or in your shipping/delivery communications about how the pickup of an old mattress will work. Also consider sharing this information with those providing customer service.

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors of the
Mattress Recycling Council
Alexandria, Virginia

Opinion

We have audited the accompanying financial statements of the **Mattress Recycling Council – California LLC** (a wholly owned subsidiary of the Mattress Recycling Council, Inc.), which comprise the statements of financial position as of December 31, 2024 and 2025, and the related statements of activities, functional expenses, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the **Mattress Recycling Council – California LLC** as of December 31, 2024 and 2025, and the changes in its net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the **Mattress Recycling Council – California LLC**, and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about **Mattress Recycling Council – California LLC**'s ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

9401 Key West Avenue • Rockville, Maryland 20850 • 301-948-4400 • Fax: 301-948-8620 • www.lydoncpa.com

INDEPENDENT AUDITOR'S REPORT (continued)

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements, including omissions, are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the **Mattress Recycling Council – California LLC**'s internal control. Accordingly, no such opinion is expressed.

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the **Mattress Recycling Council – California LLC**'s ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

INDEPENDENT AUDITOR'S REPORT (continued)

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also used our report dated June 25, 2026, on our consideration of **Mattress Recycling Council – California LLC**'s internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of **Mattress Recycling Council – California LLC**'s internal control over financial reporting or on compliance. That report (located on pages 28-29) is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering **Mattress Recycling Council – California LLC**'s internal control over financial reporting and compliance.

Financial Statements of Parent Company – Mattress Recycling Council

We have also audited, in accordance with auditing standards generally accepted in the United States of America, the consolidated financial statements of the Mattress Recycling Council (MRC), as of and for the years ended December 31, 2024 and 2025. See **NOTE A** for **Mattress Recycling Council – California LLC**'s (MRC – CA) subsidiary relationship. Our opinion is not modified with respect to that matter.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

This summary of significant accounting policies of the **Mattress Recycling Council – California LLC** ("MRC – CA") is presented to assist in understanding MRC – CA's financial statements. The financial statements and notes are representations of MRC – CA's management who is responsible for their integrity and objectivity. These accounting policies conform to generally accepted accounting principles and have been consistently applied in the preparation of the financial statements.

Purpose of the California Recycling Operations:

The California (CA) Used Mattress Recovery and Recycling Act, as amended ("the Act") requires manufacturers of mattresses sold in CA to develop, finance, and implement a convenient and cost-effective program to recover and recycle used mattresses generated in CA. The Act is administered by MRC – CA. MRC – CA funds its operations through a $10.50 per unit recycling fee through December 31, 2024, a $16.00 per unit recycling fee effective January 1, 2025 through March 31, 2026, and a $18.00 per unit recycling fee effective April 1, 2026 (subsequent to year end, see **NOTE M**) collected from consumers when they purchase a mattress or box spring. MRC – CA is required to perform a financial statement audit under accounting principles generally accepted in the United States of America and the generally accepted *Government Auditing Standards* issued by the Comptroller General of the United States of America to satisfy the State of California's certified audited financial statement requirement in accordance with the State of California Section 42990 of the Public Resources Code.

MRC – CA is one of four operating wholly owned subsidiaries of the Mattress Recycling Council, Inc. ("MRC"). MRC also operates recycling programs in the states of Connecticut, Oregon, and Rhode Island. MRC is a not-for-profit corporation incorporated on November 14, 2013 under the laws of the State of Delaware and organized and operated for purposes consistent with recognition of exempt status under Internal Revenue Code Section 501(c)(3), including, without limitation, to work to establish an environmentally sound and cost-effective program for recycling of sleep products. MRC is a subsidiary (under current accounting standards) of the International Sleep Products Association ("ISPA") due to common control.

MRC – CA's significant accounting policies are as follows:

Basis of Accounting and Separately Stated Financial Statements of MRC – CA:

The financial statements of MRC – CA have been prepared on the accrual basis of accounting and, accordingly, reflect all significant receivables, advances, prepaid expenses, payables, accruals, and other liabilities.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Basis of Accounting and Separately Stated Financial Statements of MRC – CA (continued):

On an annual basis, MRC – CA's financial statements are included in the consolidated group financial statements of MRC. These financial statements of MRC – CA have been issued as a subsidiary of MRC for the years ending December 31, 2024 and 2025. MRC – CA's December 31, 2024 and 2025 separately stated financial statements are prepared due to the request of the Board of Directors of MRC and the State of California. See **NOTE J** for related party transaction disclosures.

Basis of Presentation:

As a wholly owned subsidiary of MRC, a 501(c)(3) not-for-profit organization, the financial statements of MRC – CA have been prepared on the accrual basis of accounting. MRC – CA reports information regarding its financial position and activities according to two classes of net assets:

Net Assets Without Restrictions - Net assets that are not subject to or are no longer subject to third party-imposed stipulations. The board designated reserves are included in net assets without restrictions.

Net Assets With Restrictions - Net assets whose use is limited by third party-imposed time and/or purpose restrictions. MRC – CA has no net assets with restrictions as of December 31, 2024 or 2025.

Revenues are reported as increases in net assets without restrictions unless use of the related assets is limited by third party-imposed restrictions. Expenses are reported as decreases in net assets without restrictions. Gains and losses on investments and other assets or liabilities are reported as increases or decreases in net assets without restrictions unless their use is restricted by explicit third-party stipulation or by law. Expirations of restrictions on the net assets (i.e., the third party stipulated purpose has been fulfilled and/or the stipulated time period has elapsed) are reported as reclassifications between the applicable classes of net assets. MRC – CA has adopted a policy to classify restricted revenues as without restrictions to the extent that restrictions were met in the year the revenue was received.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Basis of Presentation (continued):

MRC – CA established a financial reserve policy to provide for short-term and long-term financial needs. It is the policy of MRC – CA to include in its unrestricted net assets, approximately three months of its annual operating expenses. Once MRC – CA has met the unrestricted net asset objective, MRC – CA seeks to maintain a total reserve target maximum of approximately 60% of its annual operating expenses by January 1, 2027 in accordance with the State of California Section 42988 of the Public Resources Code.

Income Tax Status:

MRC is exempt from federal income tax under Section 501(c)(3) of the Internal Revenue Code. However, income from activities not directly related to MRC's tax-exempt purpose is subject to taxation as unrelated business income. MRC – CA is considered a disregarded entity for federal income tax purposes. MRC – CA's activity and mission are consistent with those of its Parent company, MRC. The subsidiary's financial operations are reported on a consolidated basis with MRC's tax-exempt Federal Form 990 filing. MRC – CA is subject to franchise tax in the State of California. No taxes were owed as of December 31, 2024 or 2025.

MRC has adopted the authoritative guidance relating to uncertainty in income taxes included in ASC Topic *Income Taxes*. These provisions provide consistent guidance for the accounting for uncertainty in income taxes recognized in an entity's financial statements and prescribe a threshold of "more likely than not" for recognition and de-recognition of tax positions taken or expected to be taken in a tax return. MRC performed an evaluation of uncertain tax positions for the year ending December 31, 2025, and determined that there were no material matters that would require recognition in the financial statements or that may have an effect on its tax-exempt status. As of December 31, 2025, the statute of limitations for MRC's income tax return for the years ending December 31, 2022, 2023, and 2024 remain open with the Federal, state, and local authorities. It is MRC's policy to recognize interest and/or penalties related to uncertain tax positions, if any, in income tax expense.

Cash and Cash Equivalents:

For purposes of the statements of cash flows, MRC – CA considers all unrestricted highly liquid investments with an initial maturity of three months or less to be cash equivalents.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Accounts Receivable:

Accounts receivable are stated at the amount management expects to collect from outstanding balances. Management provides for probable uncollectible amounts through a charge to earnings and a credit to valuation allowance based on its assessment of the current status of individual accounts. Balances which are still outstanding after management has used reasonable collection efforts are written off through a charge to the valuation allowance and a credit to accounts receivable. For the years ending December 31, 2024 and 2025, the balance of the allowance for doubtful accounts was $148,985 and $210,247, respectively.

Revenue Recognition:

The State of California mandates that all retailers, producers, and importers that sell mattresses and box springs must register with MRC – CA, report monthly mattress sales, and collect and remit the recycling fee to MRC – CA each month. Each month, a retailer reports the number of mattress and foundation units sold, and then remits to MRC – CA the per unit recycling fees that were collected on those units. The per unit recycling fee was $10.50 and $16.00 per unit for the years ending December 31, 2024 and 2025, respectively. MRC – CA recognizes mattress recycling fee revenue in the period a mattress is sold at retail. Subsequent to year end, effective April 1, 2026, the per unit recycling fee increased to $18.00 (see **NOTE M**).

Property, Equipment, Depreciation and Amortization:

MRC – CA capitalizes all expenditures for property and equipment in excess of $1,000. Purchased property and equipment are carried at cost. Depreciation and amortization is computed using the straight-line method over the estimated useful lives of the assets.

Investments:

MRC – CA has adopted Accounting Standards Codification (ASC) 958 Not-for-Profit Entities. Under FASB ASC 958-320, investments in marketable equity securities with readily determinable fair values and all investments in marketable debt securities are valued at their fair values in the statements of financial position. Realized and unrealized gains and losses are included in the change in net assets.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Functional Allocation of Expenses:

The costs of providing the various programs and other activities have been summarized on a functional basis in the statements of activities and in the statements of functional expenses. Accordingly, certain shared costs have been allocated among the four operating state programs (CA, CT, OR and RI) based on supporting services benefiting each program. Shared general and administrative expenses include those expenses that are not directly identifiable with any other specific function but that provide for the overall support of MRC, including expenses related to contracts with third-party vendors. Total shared costs are allocated to the respective operating states on a monthly basis. For the years ending December 31, 2024 and 2025, approximately 90% and 81% of the shared expenses not directly identifiable with any other specific function, but that provide overall support of MRC, were allocated to MRC – CA, which is based on relative state population of CA as it relates to CT and RI (2024) and CT, RI, and OR (2025).

Use of Estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Operations:

In the financial statements, revenues earned and expenses incurred in conducting the programs and services of MRC – CA are presented as operating activities. Non-operating activities include investment return, gains or losses on the sale or disposal of property and equipment, if applicable, and other non-operating items.

Reclassifications:

Certain accounts in the prior year's financial statements have been reclassified for comparative purposes to conform with the presentation of the current year financial statements.

NOTE B - CASH AND CASH EQUIVALENTS - (UNRESTRICTED)

Cash and cash equivalents consisted of the following at December 31:

	2024	2025
Demand deposits	$ 164,258	$ 2,074,699
Money market deposit accounts	5,751,031	862,165
Total unrestricted cash and cash equivalents	$ 5,915,289	$ 2,936,864

NOTE C - INVESTMENTS

At both December 31, 2024 and 2025, MRC – CA's investments consisted of approximately 71% and 79% conservative fixed income products, respectively, and the remaining approximately 29% and 21% are invested in U.S. and International ETFs and mutual funds, respectively. All investments are exposed to various risks, such as market and credit. Due to the level of risk associated with investments and level of uncertainty related to changes in the value of investments, there is always a possibility that changes in risks in the near term could materially affect investment balances and the amounts reported in the financial statements. MRC – CA has an investment policy statement that is reviewed by the MRC Board annually which addresses these risks. The portfolios are reviewed on a quarterly basis and changes are made as needed, within the scope of the policy.

Investments at December 31, 2024 consisted of the following:

	Cost	Fair Value
Unrestricted	$ 6,996,600	$ 7,084,321
Board Designated – financial reserve	8,249,860	8,185,807
	$ 15,246,460	$ 15,270,128

As of December 31, 2024, $8,185,807 has been recorded as board designated investments (see **NOTE E)**.

NOTE C - INVESTMENTS (continued)

Investments were composed of the following at December 31, 2024:

	Cost	Fair Value
U.S. Fixed Income Mutual Funds and ETFs	$ 11,289,289	$ 10,542,019
Alternative Mutual Funds and ETFs	1,899,127	1,903,685
International Equity Mutual Funds	836,754	884,797
U.S. Equity Mutual Funds	781,633	1,458,693
REIT Mutual Funds	207,951	248,837
U.S. Agency Bonds	231,706	232,097
	$ 15,246,460	$ 15,270,128

Investment return for the year ending December 31, 2024 is comprised of the following:

Interest and dividend income	$ 919,369
Unrealized gain/(loss)	(222,187)
Realized gain	794,636
Investment return before fees	1,491,818
Less: Investment fees	(97,058)
Net investment return	$ 1,394,760

Investments at December 31, 2025 consisted of the following:

	Cost	Fair Value
Unrestricted	$ 9,850,500	$ 10,250,800
Board Designated – financial reserve	8,801,479	9,159,149
	$ 18,651,979	$ 19,409,949

As of December 31, 2025, $9,159,149 has been recorded as board designated investments (see **NOTE E)**.

NOTE C - INVESTMENTS (continued)

Investments were composed of the following at December 31, 2025:

	Cost	Fair Value
U.S. Fixed Income Mutual Funds and ETFs	$ 15,569,875	$ 15,203,881
Alternative Mutual Funds and ETFs	1,354,172	1,440,046
International Equity Mutual Funds	703,740	946,988
U.S. Equity Mutual Funds	668,010	1,420,243
REIT Mutual Funds	178,874	215,837
U.S. Agency Bonds	177,308	182,954
	$ 18,651,979	$ 19,409,949

Investment return for the year ending December 31, 2025 is comprised of the following:

Interest and dividend income	$ 799,616
Unrealized gain/(loss)	733,713
Realized gain	30,456
Investment return before fees	1,563,785
Less: Investment fees	(60,887)
Net investment return	$ 1,502,898

NOTE D - PROPERTY AND EQUIPMENT

Property and equipment at December 31, 2024 consisted of the following:

	Cost	Depreciation and Amortization Expense	Accumulated Depreciation and Amortization	Net Book Value	Estimated Useful Life (Years)
Computer and office equipment	$ 117,180	$ 15,067	$ 97,215	$ 19,965	3-5
Furniture	50,255	6,398	31,571	18,684	7
Software and database	316,936	25,811	187,884	129,052	3-5
Website development	38,556	16,056	16,056	22,500	3
	$ 522,927	$ 63,332	$ 332,726	$ 190,201	

NOTE D - PROPERTY AND EQUIPMENT (continued)

Property and equipment at December 31, 2025 consisted of the following:

	Cost	Depreciation and Amortization Expense	Accumulated Depreciation and Amortization	Net Book Value	Estimated Useful Life (Years)
Computer and office equipment	$ 112,926	$ 10,465	$ 103,426	$ 9,500	3-5
Furniture	50,255	6,397	37,968	12,287	7
Software and database	346,886	30,973	218,856	128,030	3-5
Website development	38,556	12,846	28,902	9,654	3
	$ 548,623	$ 60,681	$ 389,152	$ 159,471	

NOTE E - NET ASSETS

As of December 31, 2024 and 2025, total net assets without restrictions available for general operations of MRC – CA amounted to $20,004,927 and $22,224,118, respectively. MRC – CA's Board has a reserve policy to establish a board designated financial reserve to operate CA's recycling program over a multi-year period. As of December 31, 2024 and 2025, the Board has designated $8,185,807 and $9,159,149 of its $20,004,927 and $22,224,118 total net assets, respectively, as a financial reserve, which is consistent with the requirements under the (CA) Used Mattress Recovery and Recycling Act.

The remaining net assets in the amount of $11,819,120 and $13,064,969 are undesignated as of December 31, 2024 and 2025, respectively. Undesignated net assets equal approximately 3 months of annual budgeted expenses for the upcoming year.

As of December 31, 2024 and 2025, MRC – CA did not have any net assets with third-party restrictions.

NOTE E - NET ASSETS (continued)

	Without Restrictions	With Restrictions	Total Net Assets
Net assets at December 31, 2023 – Restated – NOTE L	$ 31,570,751	$ 0	$ 31,570,751
2024 Decrease in net assets	(11,565,824)	0	(11,565,824)
Net assets at December 31, 2024	20,004,927	0	20,004,927
2025 Increase in net assets	2,219,191	0	2,219,191
Net assets at December 31, 2025	$ 22,224,118	$ 0	$ 22,224,118

NOTE F - SUPPLEMENTAL CASH FLOW STATEMENT DISCLOSURES

Cash paid during the year for:

	2024	2025
Interest	$ 0	$ 0

NOTE G - COMMITMENTS AND CONTINGENCIES

Product Care Association Consulting Fees:

MRC has outsourced its registration, billing and collection functions to Product Care Association (PCA), a third-party vendor which operates out of Canada. PCA manages the seller registrations, collects and reviews the monthly sales reports from various mattress retailers/sellers, invoices these sellers and collects the fee income on behalf of MRC. During the years ending December 31, 2024 and 2025, the total expenses incurred related to PCA consulting fees were $408,325 and $386,792, respectively, and MRC – CA's proportionate allocation of those expenses was $371,597 and $319,663, respectively. A majority of these expenses are included in administration expenses (management, staffing, and general expenses) on the Statements of Activities.

NOTE G - COMMITMENTS AND CONTINGENCIES (continued)

Concentration of Service Providers:

For the years ending December 31, 2024 and 2025, five recyclers accounted for approximately 70% and 95% of MRC – CA's total recycling costs, respectively, and approximately 80% and 95% of the units recycled, respectively.

For the year ending December 31, 2024, two vendors accounted for approximately 22% of MRC – CA's total expenses. For the year ending December 31, 2025, three vendors accounted for approximately 34% of MRC – CA's total expenses.

Note Payable – Line of Credit:

In May 2022, MRC entered into a line of credit agreement with M&T Bank. The principal amount on the line was $1,000,000 and called for a variable rate of 2.42% above the 1-Month CME SOFR Term Reference Rate. The minimum rate was 2.42%. The line of credit was secured by collateral of the assets of MRC.

There were no draws on the line of credit in 2024 or 2025, therefore there is no interest expense related to the line of credit in 2024 or 2025. The line of credit was closed in January 2025.

New State Program:

On March 24, 2022, the State of Oregon approved a law that requires a mattress recycling program be implemented in the state. Mattress Recycling Council (MRC) will implement and run the Oregon state recycling program, and on June 24, 2022, Mattress Recycling Council Oregon, LLC (MRC – OR) was formed as a subsidiary of MRC. The Oregon state recycling program began on January 1, 2025, and is funded by a $22.50 per unit recycling fee on the sale of each mattress and foundation sold in Oregon. The formation and operation of this program in Oregon had no financial impact on MRC – CA in 2024 or 2025.

NOTE H - CONCENTRATION OF CREDIT RISK

A small number of participants accounted for a significant portion of MRC – CA's accounts receivable at December 31, 2024 and 2025, exposing MRC – CA to a concentration of credit risk. Economic characteristics of participants with accounts receivable balances are similar, as they are all in the retail industry. As participation and remittance is required by California law, management does not believe this concentration poses a significant risk of financial impact.

NOTE H - CONCENTRATION OF CREDIT RISK (continued)

MRC – CA maintains its cash and cash equivalents and investment balances in two U.S. financial institutions. The balances are insured by the Federal Deposit Insurance Corporation (FDIC) and the Securities Investor Protection Corporation (SIPC). The FDIC insures up to $250,000 and the SIPC insures up to $500,000 (including up to $250,000 for cash) as of December 31, 2025. MRC – CA's investment firm also maintains additional insurance coverage through an outside insurer which provides excess protection of up to $400 million. At December 31, 2025, MRC – CA's uninsured cash balance was $2,235,926 and MRC – CA had no uninsured investments.

NOTE I - FAIR VALUE OF FINANCIAL INSTRUMENTS

Generally accepted accounting principles define fair value, establish a framework for measuring fair value, and establish a fair value hierarchy that prioritizes the inputs to valuation techniques. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market. Valuation techniques that are consistent with the market, income or cost approach are used to measure fair value.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

Level 1 – These inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that MRC – CA has the ability to access.

Level 2 – These are inputs (other than quoted prices included within level 1) that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, default rates and other similar data.

Level 3 – These are unobservable inputs for the asset or liability and rely on management's own assumptions about the assumptions that market participants would use in pricing the asset or liability. The unobservable inputs should be developed based on the best information available in the circumstances and may include MRC – CA's own data.

NOTE I - FAIR VALUE OF FINANCIAL INSTRUMENTS (continued)

MRC – CA estimates that the fair value of all financial instruments at December 31, 2024 and 2025 does not differ materially from the aggregate carrying values of its financial instruments recorded in the accompanying Statements of Financial Position.

Fair Value Measurements on a Recurring Basis
As of December 31, 2024

	Level 1	Level 2	Level 3	Total
U.S. Fixed Income Mutual Funds and ETFs	$ 10,542,019	$ 0	$ 0	$ 10,542,019
Alternative Mutual Funds and ETFs	1,903,685	0	0	1,903,685
International Equity Mutual Funds	884,797	0	0	884,797
U.S. Equity Mutual Funds	1,458,693	0	0	1,458,693
REIT Mutual Funds	248,837	0	0	248,837
U.S. Agency Bonds	0	232,097	0	232,097
Total investments	$ 15,038,031	$ 232,097	$ 0	$ 15,270,128

Fair Value Measurements on a Recurring Basis
As of December 31, 2025

	Level 1	Level 2	Level 3	Total
U.S. Fixed Income Mutual Funds and ETFs	$ 15,203,881	$ 0	$ 0	$ 15,203,881
Alternative Mutual Funds and ETFs	1,440,046	0	0	1,440,046

REIT Mutual Funds	215,837	0	0	215,837
U.S. Agency Bonds	0	182,954	0	182,954
Total investments	$ 19,226,995	$ 182,954	$ 0	$ 19,409,949

NOTE I - FAIR VALUE OF FINANCIAL INSTRUMENTS (continued)

Investments are composed of the following at December 31:

	2024	2025
Unrestricted	$ 7,084,321	$ 10,250,800
Board Designated – financial reserve	8,185,807	9,159,149
	$ 15,270,128	$ 19,409,949

NOTE J - RELATED PARTY TRANSACTIONS (MRC)

MRC – CA is one of four operating wholly owned subsidiaries of the Mattress Recycling Council, Inc. ("MRC"). MRC also operates recycling programs in the states of Connecticut, Oregon, and Rhode Island. MRC is a not-for-profit organization incorporated on November 14, 2013 under the laws of the State of Delaware and organized and operated for purposes consistent with recognition of exempt status under Internal Revenue Code Section 501(c)(3), including, without limitation, to work to establish an environmentally sound and cost-effective program for recycling of sleep products. MRC is a subsidiary (under current accounting standards) of the International Sleep Products Association ("ISPA") due to common control.

These financial statements include the intra-entity accounts and transactions between MRC – CA and MRC. Due from MRC includes participant funds for the recycling program collected by MRC on behalf of MRC – CA. The following transactions below are included in these separately stated financial statements, but are eliminated in the consolidated MRC financial statements:

	2024	2025
Due from MRC (page 4)	$ 1,048,501	$ 635,326
Administrative and management fee – MRC	$ 4,605,526	$ 4,228,780

NOTE J - RELATED PARTY TRANSACTIONS (MRC) (continued)

Operating Agreement with MRC:

For the years ending December 31, 2024 and 2025, MRC – CA was required to pay a monthly service fee in the amount of $375,000 and $389,500, respectively, which represents the anticipated costs incurred by MRC for administrative, financial and operational support services to the LLC. At the end of each quarter, a reconciliation is prepared for a "true up" of actual costs MRC – CA incurred versus the monthly fee charged and any surplus or deficits are reimbursed by the respective party.

For the years ending December 31, 2024 and 2025, MRC – CA incurred expenses of $4,605,526 and $4,228,780 related to this agreement for administrative and management fee expense including MRC – CA's portion of shared staff expenses and staff expense for in-state personnel. MRC recorded the associated management fee revenue in the same amount. The administrative and management fee expense charged by MRC has not been eliminated in these financial statements as of December 31, 2024 and 2025.

NOTE K - LIQUIDITY AND AVAILABILITY OF FINANCIAL ASSETS

MRC – CA has financial assets as of December 31, 2025, consisting of cash and cash equivalents of $2,936,864, unrestricted investments of $10,250,800, net accounts receivable of $5,470,747, other accounts receivable of $2,416, due from MRC of $635,326, and investments for financial reserve of $9,159,149, which total $28,455,302. Included in these financial assets is the board designated investments in the amount of $9,159,149, set aside for the financial reserve in order to comply with state regulations in CA. These board designated financial assets are not available for general use.

The following reflected MRC – CA's financial assets available for general use as of the Statement of Financial Position date:

Financial assets, at year end	$ 28,455,302
Less those unavailable for general expenditure within one year, due to:	
Amount set aside for the financial reserve	(9,159,149)
Financial assets available to meet cash need for general expenditure within one year	$ 19,296,153

NOTE K - LIQUIDITY AND AVAILABILITY OF FINANCIAL ASSETS (continued)

MRC – CA considers all expenditures related to its ongoing recycling programs, as well as the services undertaken to support these programs to be general expenditures. As part of MRC – CA's liquidity management, it has a policy to structure its financial assets to be available as its general expenditures, liabilities and other obligations come due. In addition, MRC – CA invests cash in excess of daily requirements in investments, which include conservative fixed income products, U.S. and International ETFs and mutual funds.

In addition to financial assets available to meet general expenditures over the next 12 months, MRC – CA has a financial reserve to assist with operational liquidity if needed.

NOTE L - RESTATEMENT OF THE PRIOR PERIOD

During the year ending December 31, 2024, a necessary adjustment was identified to the MRC – CA's previously issued financial statements. During 2024, a mattress retailer informed MRC – CA that they remitted to MRC – CA $693,407 in recycling fees for the month of July 2016, and that it should have remitted $412,555 for the July 2016 remittance. The retailer requested MRC – CA to refund the difference of $280,522. MRC – CA and the retailer settled on a payment of $210,210. The agreed amount was subsequently refunded in 2024 to the retailer.

The refund of the overcharges was recorded as an adjustment to previously stated financial statements and affected the previously stated accounts as discussed below:

Statement of Financial Position as of December 31, 2023:

	As Previously Stated	Prior Period Adjustment	Restated
2023:			
Accounts payable and accrued expenses	$ 5,416,027	$ 210,210	$ 5,626,237
Ending net assets without restrictions	$ 31,780,961	$ (210,210)	$ 31,570,751

NOTE M - SUBSEQUENT EVENTS

In preparing the financial statements, MRC – CA has evaluated events and transactions for potential recognition or disclosure through June 25, 2026, the date the audit report was available to be issued.

Recycling Unit Fee Increase:

Effective April 1, 2026, the per unit recycling fee increased from $16.00 per unit to $18.00 per unit in the State of California.

Supplementary Reports for the California Department of Resources, Recycling And Recovery

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the Board of Directors of the
Mattress Recycling Council
Alexandria, Virginia

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the **Mattress Recycling Council – California LLC** ("MRC – CA"), a subsidiary of the Mattress Recycling Council, Inc. (a nonprofit organization), which comprise the statement of financial position as of December 31, 2025, and the related statements of activities, functional expenses, and cash flows for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated June 25, 2026.

Report on Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered MRC – CA's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of MRC – CA's internal control. Accordingly, we do not express an opinion on the effectiveness of MRC – CA's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS* (continued)

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether MRC – CA's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of MRC – CA's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the organization's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

LYDON FETTEROLF CORYDON, P.A.
Certified Public Accountants • Management Consultants

EXAMINATION REPORT ON COMPLIANCE WITH THE FINANCIAL ASPECTS OF THE PUBLIC RESOURCES CODE SECTION 42990, AND CHAPTER 21, PART 3, DIVISION 30 OF THE PUBLIC RESOURCES CODE, AND TITLE 14, DIVISION 7, CHAPTER 11, ARTICLE 3 OF THE CALIFORNIA CODE OF REGULATIONS

To the Board of Directors of the
Mattress Recycling Council
Alexandria, Virginia

We have examined the Mattress Recycling Council – California LLC's ("MRC – CA") compliance with Used Mattress Recovery and Recycling Act's ("the Act") financial aspects of the Sections 42990 and 42990.1 of the California Public Resources Code, and Title 14, Division 7, Chapter 11, Article 3 of the California Code of Regulations for the year ended December 31, 2025. Management is responsible for MRC – CA's compliance with those requirements. Our responsibility is to express an opinion on MRC – CA's compliance based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether MRC – CA complied, in all material respects, with the specified requirements of the Act. An examination involves performing procedures to obtain evidence about whether MRC – CA complied with the specific requirements of the Act. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risk of material noncompliance, whether due to fraud or error. We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the examination engagement. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

Our examination does not provide a legal determination on MRC – CA's compliance with specified requirements of the Act.

In our opinion, MRC – CA complied, in all material respects, with the financial requirements of the Public Resources Code Section 42990, Part 3, Division 30 of the Public Resources Code, and Title 14, Division 7, Chapter 11, Article 3 of the California Code of Regulations, for the year ended December 31, 2025.

This report is intended solely for the information and use of MRC's Board of Directors, management, and the California Department of Resources, Recycling and Recovery, and is not intended to be and should not be used by anyone other than these specified parties.

Mattress Recycling Council –
California LLC

Schedule of Findings
For the Year Ended December 31, 2025

Section I – Summary of Independent Auditor's Results:

Financial statements

Type of auditor's report issued: Unmodified

Internal control over financial reporting:

- Material weakness(es) identified? _____ Yes __X__ No
- Significant deficiency(ies) identified that are not considered to be material weaknesses _____ Yes __X__ No

Noncompliance material to financial statements noted? _____ Yes __X__ No

Mattress Recycling Council –
California LLC

Schedule of Findings
For the Year Ended December 31, 2025

Section II – Financial Statement Findings – For the year ended December 31, 2025:

There were no Financial Statement findings noted during the audit for the year ended December 31, 2025.

Section II – Prior Year Financial Statement Findings – For the year ended December 31, 2024:

There were no Financial Statement findings noted during the audit for the year ended December 31, 2024.

Mattress Recycling Council –
California LLC

Schedule of Findings
For the Year Ended December 31, 2025

Section III – Compliance with Financial Aspects of CA's Public Resource Code:

There were no Compliance Findings with Financial Aspects of CA's Public Resource Code noted during the audit for the year ended December 31, 2025.

Appendix G: Advisory Committee Report

14 CCR § 18964(b)(12)

April 30, 2026

Mike O'Donnell
Executive Director
Mattress Recycling Council
501 Wythe St.
Alexandria, VA 22314

Subject: Annual Report Letter to CalRecycle from Mattress Advisory Committee -- Consultative Process (as per PRC section 42990.1(k))

Dear Mr. O'Donnell,

As you are aware, per 14 CA ADC § 18968, for inclusion in the Mattress Recycling Council (MRC) annual report, the CalRecycle-appointed Mattress Recycling Advisory Committee ("committee") must provide the MRC with comments. In particular, 30 days before the July 1 deadline for the MRC's annual report, the comments must summarize the "consultative process between the advisory committee and the mattress recycling organization relating to the ongoing implementation of the plan, as well as any other information deemed pertinent by the advisory committee to maximize the recovery and recycling of used mattresses in the state."

The following is our summary of the Consultative Process:

Through regular meetings, as well as email and telephone consultation or in-person contacts, members of the Mattress Recycling Advisory Committee provide input to staff and management of the MRC/MRO. These exchanges are brought to the full committee as agenda items in instances where a resolution is requested or a motion is needed for an official recommendation or action. Additionally, at its regular meetings, the committee includes informational items, updates, discussion items and motions for proposed actions, including the MRC/MRO in the discussion for the purpose of consultation. The Committee was impressed with regular updates from the MRC at the Committee meetings, especially the education components.

The following are items included in last year's Annual Report Letter to CalRecycle from Mattress Advisory Committee regarding the Consultative Process that are still relevant to this year's review of the annual report. These fall into the category of "other information deemed pertinent by the advisory committee to maximize the recovery and recycling of used mattresses in the state."

Appointments to the Committee:

The committee needs CalRecycle to appoint new committee members when vacancies open. To accomplish the committee's legislative and regulatory duties and to provide the MRC with expert advice from a variety of perspectives, the committee needs more members. In 2014, the committee included 13 members. With another recent resignation (due to a job reassignment), the committee currently has only four members. Please communicate to CalRecycle the need for CalRecycle to fill vacancies on the committee.

Recycling Rate:

To carry out its consultative duties mandated by legislation and regulation, the Advisory Committee requires adequate data for analysis. The most basic metric for measurement of mattress program progress is the annual mattress recycling rate. As in prior years, the committee continues to seek information regarding this rate. In 2024, the committee became more specific about this need for data and took actions to request assistance from the MRC and CalRecycle.

In a 1/11/24 letter to CalRecycle Director Rachel Wagoner, the committee advised CalRecycle and the MRC of perceived flaws in measurement of the mattress recycling rate. In response, a 5/24/24 Request for Action, approved by CalRecycle 6/28/24, stated "additional time would be necessary to understand how waste characterization studies could be used to improve the recycling rate calculation" and recommended use of a formula based on counts of recycling, renovation, and disposal. In an action at its 10/1/24 meeting, the Advisory Committee sent a follow up letter, noting the committee does not object to the formula, provided accurate numbers could be determined for recycling, renovation, and disposal. However, the committee noted that data used for the current rate calculation does not seem to provide this accuracy. As noted in the follow up letter, the 2023 rate calculation totals 1,977,808 mattresses, but 3,383,382 mattresses were sold in California in 2023. The population of California is not growing quickly, and the number of mattresses per person is not likely to be greatly increasing each year, so the committee noted the difference indicates the data used for the recycling calculation seems to be inadequate.

At its 10/1/24 meeting, and in a subsequent letter to CalRecycle Director Zoe Heller, the committee requested CalRecycle's mattress recycling staff and the MRC work with the committee to gain a better understanding of the recycling rate, and to potentially develop alternative data sources.

The committee considered that many mattresses are reused after an initial user passes the mattress on to family, friends, or others. However, nearly everyone in California already has a mattress, so the average mattress bought in California likely displaces an existing mattress, regardless of how many times a mattress is reused. Additionally, both MRC staff and CalRecycle staff maintained that the longevity of mattresses made sales figures in one year a mismatch for recycling plus disposal in that same year. For example, according to MRC studies, the average mattress lasts more than 14 years. Also, enrollment in many colleges is increasing, and housing on campus is increasing as well. To address that concern, the committee examined data for multiple years. The results of that examination showed a large difference between the number of mattresses sold in prior years and the combined total of mattresses recycled and disposed in those same years. In every year examined, the number of mattresses sold greatly exceeded official totals of mattresses recycled, refurbished, and landfilled.

Availability of Timely and Accessible Information

Another matter discussed by the committee, included in our review of the 2024 annual report, and included again in this review of the 2025 annual report relates to the committee's 10/1/24 letter to CalRecycle Director Zoe Heller, related to additional information needed by the committee to meet legislative and regulatory duties, per PRC 42985-42994 and 14 CCR § 18968. Prior to the committee's review of annual reports, the committee requested that CalRecycle provide the committee with the report usually included in CalRecycle's RFA considering approval of the annual report. This includes a summary of CalRecycle enforcement actions (number and types of enforcement actions). This would help the committee complete the "consultative process" required for programmatic review. Additionally, the committee requested CalRecycle provide a quarterly summary of CalRecycle costs for this enforcement so the committee can review the MRC's approximately $700,000 in annual payments to CalRecycle. The committee requested a summary of charges by category that CalRecycle sends to the MRC each quarter. While much of this information may be available through interpretation of publicly available documents, timely and facilitated review by the committee would improve the committee's capability for program evaluation.

Illegal Dumping

The committee would like to acknowledge the good work of the MRC in many areas, and in particular in addressing illegal dumping. Previous reports have covered this topic sufficiently, and we look forward to this year's report as well. The efforts and challenges are significant, and additional work in this regard is appreciated.

This letter, as a modification of last year's letter, was approved by a roll-call vote during the committee's 4-30-26 meeting.
Motion: David Goldstein. Second Larry Sweetser
Aye: Larry Sweetser, Steve Kelley, David Goldstein
Nay: None
Abstain: None

Thank you again for the excellent work of the Mattress Recycling Council.

Sincerely,

David Goldstein, Chairman
California Mattress Recycling Advisory Committee

Appendix I: References for the Outline Prescribed by 14 CCR § 18964

For ease of review, the following is the annual report outline prescribed in CalRecycle Regulations, followed by a reference indicating where the requirement is discussed in the 2024 Annual Report.

(b) The annual report shall follow the outline below and contain the following:

(1) Contact information. Identify the corporate officer of the mattress recycling organization responsible for annual report submittal.

1. Contact Information

(2) Executive Summary. The purpose of the Executive Summary is to provide a broad understanding of the mattress recycling organization's program as a whole and to put into context the data and information that will follow. Provide a brief description of the mattress recycling organization's used mattress recovery efforts during the calendar year pursuant to section 18962.

2. Executive Summary

(3) A description of the methods used to collect, transport, and process used mattresses in California.

3. Program Collection, Transportation, and Processing

(4) Include an updated list of participating manufacturers, renovators, and retailers and any updates to their respective contact information per section 18961(a)(2) and an updated list of brands covered under the plan per section 18961(a)(3).

Appendix A: Registered Manufacturers, Renovators, Retailers and Brands

(5) Description of how consumers of mattresses in California had an opportunity to recycle and properly manage their used mattresses, including the number, location, and type of collection points in the program.

3. Program Collection, Transportation, and Processing — Mattress Collection — Collection Site Types

(6) May include a description of activities to ensure proper collection and management of used mattresses.

3. Program Collection, Transportation, and Processing — Mattress Collection — Collection Site Mattress Management

(7) A description of methods used by the mattress recycling organization to coordinate with existing used mattress collection and recycling programs with regard to the proper management or recycling of discarded or abandoned mattresses.

3. Program Collection, Transportation, and Processing — Coordination with Existing Infrastructure

5. Mitigation of Illegal Mattress Dumping

(8) Description of objectives and activities based on the used mattress recovery and recycling plan, per section 18962(a)(2). State objectives from the approved plan and describe progress toward achieving those objectives during the reporting period. Describe any adjustments to objectives stated in the approved plan that may be made for the upcoming reporting period and accompanying rationale for those changes. If any changes are significant or material, as defined, the mattress recycling organization shall amend and resubmit its plan for approval by the department. The annual report shall include:

4. Program Objectives and Activities

(A) Quantitative information on subdivisions (b), (c), (d), (e), (f), (g), and (j) of section 42990.1 of the Public Resources Code, including conversion factor(s), if used. When describing the uses for the recycled materials, the annual report shall identify the secondary markets to which those materials are sold, and potential end uses of those materials.

(b) The quantity of mattresses disposed of in solid waste landfills.

4. Program Objectives and Activities — Statewide Collection and Disposition Data

(c) The quantity of discarded used mattresses collected for recycling in the program

4. Program Objectives and Activities — Program Collection and Disposition Data — Program Collection

(d) The quantity of used mattresses collected for recycling from different categories of sources.

4. Program Objectives and Activities — Program Collection and Disposition Data — Program Collection

(e) The quantity of each category of materials recycled

4. Program Objectives and Activities — Program Collection and Disposition Data — Program Collection

(f) The uses for the recycled materials.

3. Program Collection, Transportation, and Processing — Mattress Processing/Recycling — Uses for Recycled Materials

(g) The quantity of otherwise disposed of materials.

4. Program Objectives and Activities — Program Collection and Disposition Data — Program Disposition Data

(j) The total volume, number, and weight of used mattresses collected recycled, renovated, and reused in this state during the preceding calendar year, including any conversion factor used to determine the number of mattresses recovered.

4. Program Objectives and Activities — Statewide Collection and Disposition Data

(B) Qualitative and/or quantitative information on subdivisions (g), (l), and (m) of section 42987.1 of the Public Resources Code.

(g) Conducting research, as needed, related to improving used mattress collection, dismantling, and recycling operations, including pilot programs to test new processes, methods, or equipment on a local, regional, or otherwise limited basis.

6. Research

(l) Ensuring, to the maximum extent possible, that urban and rural local governments and participating permitted solid waste facilities and authorized solid waste operations that accept mattresses are provided with a mechanism for the recovery of illegally disposed used mattresses that is funded at no additional cost to the local government, solid waste facility, or solid waste operation.

5. Mitigation of Illegal Mattress Dumping

(m) Developing strategies, in consultation with the California Environmental Protection Agency's Environmental Justice Task Force and other relevant parties, for collecting used mattresses for recycling in areas and communities that face unique challenges associated with proper waste management such as poverty, language barriers, and illegal mattress dumping.

4. Program Objectives and Activities — Convenience — Environmental Justice

5. Mitigation of Illegal Mattress Dumping

(9) Financing Mechanism. Include the mattress recycling organization's total expenses and revenues associated with the implementation of the used mattress recycling program. Changes to the mattresses recycling charge shall be reflected in the annual program budget for approval by the department. If a mattress recycling organization changes the amount of the mattress recycling

charge in the first 12 months during which the mattress recycling charge is being collected per subsection (1) of subdivision (c) of section 42989 of the Public Resources Code, the mattress recycling organization shall provide the department no less than 90 days' notice before the change in the amount of the mattress recycling charge takes place. If a mattress recycling organization conducts activities that are separate from the implementation and management of the California used mattress recycling program, then the annual report shall include documentation on how the collection and use of funds from the California mattress recycling charge were kept separate from other activities of the mattress recycling organization, including the methodology for distribution of shared costs. Consistent with subdivision (a) of section 42990.1 of the Public Resources Code, the annual report shall include the following:

7. Financing Mechanism

(A) Mattress recycling charge per mattress size

7. Financing Mechanism — Revenue from the Mattress Recycling Charge

(B) Capital costs

7. Financing Mechanism — Capital Costs

(C) Education/Outreach costs

7. Financing Mechanism — Education and Outreach Costs

(D) End-of-life used mattress management costs with line items, if applicable, for collection, transportation, recycling, renovating, reuse, and proper disposal

7. Financing Mechanism — End-of-Life Used Mattress Management Costs

(E) Program administration costs including, but not limited to, the department's costs pursuant to subdivision (a) of section 42988.2 of the Public Resources Code, and third party legal costs. Surplus funds, if any, and detailed rationale for the specified level of surplus.

7. Financing Mechanism — Program Administration, Legal, and CalRecycle Costs and Total Program Costs

(F) For the first 12 months during which the mattress recycling charge was collected, include a description of any changes to the amount of the mattress recycling charge, and how implementation of the change complied with subsection (1) or (2) of subdivision (c) of section 42989 of the Public Resources Code, if applicable. The mattress recycling organization may also include a description of why the change was made.

7. Financing Mechanism — Revenue from the Mattress Recycling Charge

(10) Education and Outreach. Provide a description of educational materials that were provided, including electronic examples of these materials. Identify any method(s) used to determine the effectiveness of educational and outreach efforts (e.g., surveys, hits on specific web pages, number of participants at events, etc.), if applicable. Describe any changes to those materials that are planned for subsequent years, if applicable.

8. Education and Outreach and Appendix E: Education and Outreach Examples

(11) Audits. The annual report shall include an independent financial audit of the used mattress recovery and recycling program funded from the mattress recycling charge. The audit shall be conducted in accordance with auditing standards generally accepted in the United States of America, and standards set forth in Government Auditing Standards issued by the Controller General of the United States. The financial audit submitted to the department shall be prepared by an Independent Certified Public Accountant (CPA). The CPA shall not perform non-audit services for the mattress recycling organization that would impair independence as defined in the Government Auditing Standards issued by the Controller General of the United States (e.g., accounting services, development of internal controls, management decisions). The independent financial audit shall include:

(A) Mattress recycling program financial statements, as required by GAAP.
(B) An opinion on the mattress recycling organization's compliance with the financial aspects of Chapter 21 (commencing with section 42985), Part 3, Division 30 of the Public Resources Code and Title 14, Division 7, Chapter 11, Article 3 of the California Code of Regulations.
(C) Findings and recommendations as they relate to the financial aspects of the program.
