

Oregon Illegally Dumped Mattress Collection Initiative

On Today's Call

Taylor Grimes

Special Projects Coordinator

Tgrimes@mrc-us.org

What is the IDMCI?

Oregon passed the Mattress Stewardship Act (SB 1576, 2022), establishing a statewide mattress recycling program administered by the Mattress Recycling Council (MRC).

MRC created the Illegally Dumped Mattress Collection Initiative to address the illegal dumping of mattresses in the state.

MRC partners with eligible entities to track and report the collection of illegal dumped mattresses through a software called Rubbish.

Participation Eligibility

Who is eligible to participate?

Entities that remove illegally dumped mattresses and box springs from the public right-of-way including:

- Local governments
- Authorized solid waste operations
- Permitted solid waste facilities

Receive up to \$15 per unit for each reported mattress.

Payments are issued in March of the following reporting year.

Reporting Obligations

Participants must **report** the following monthly:

- Photo of the unit(s) in the location it was collected
- The date the unit was collected
- The zip code it was collected from
- The end-of-life management of the unit (recycled, landfill, etc.)

MRC requires participants submit data within 45 days of the end of the reporting month.

Eligible and Ineligible Items

Units may be recycled through MRC's Bye Bye Mattress program. Units that are damaged or contaminated are still eligible for compensation.

The following items are **not** eligible for IDMCI or recycling:

- Mattress pads or toppers
- Sleeping bags
- Car beds
- Water beds or camping air mattresses
- Fold-out sofa beds
- Futon frames or bases
- Furniture
- Juvenile products such as carriages, baskets, cribs, bassinets, dressing tables, strollers, and playpens or their pads
- Infant carriers, lounge pads, or crib bumpers

Online Reporting System

All data and reporting is done through the Rubbish software platform. Through this platform MRC is able to:

1. Provide payment and audit validation per GAAP
2. Automate and simplify reporting
3. Provide illegal dumping hot spot location mapping

Automate Reporting

Report a Dumped Mattress
